BAR CHART

HISTOGRAM

Shows the distribution of one variable.

x-axis is continuous, broken into equal size bins.

y-axis is a count of observations.

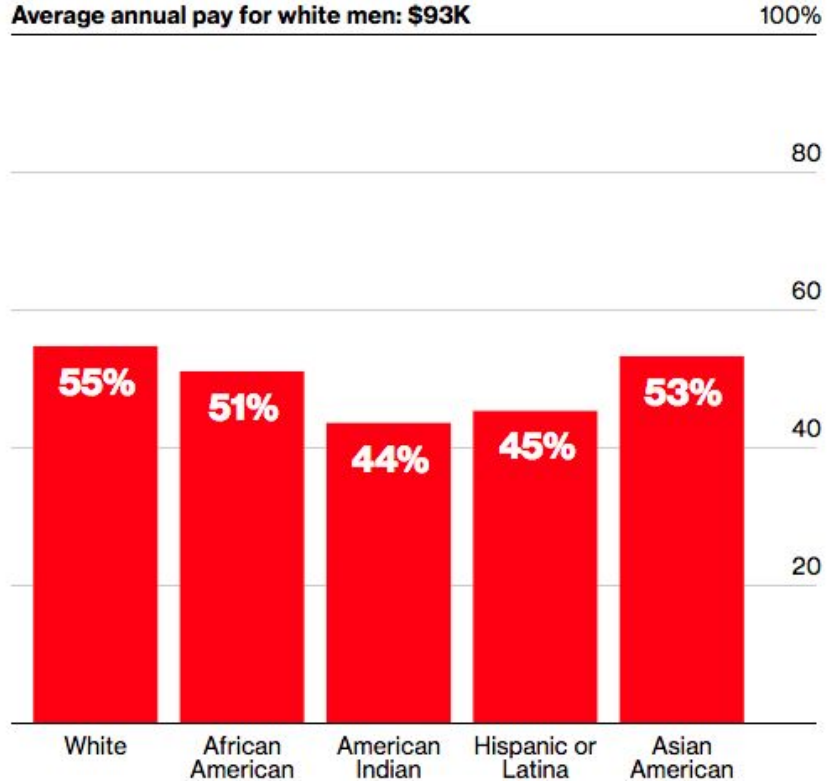

BAR CHART

Shows two variables

x-axis is a categorical variable

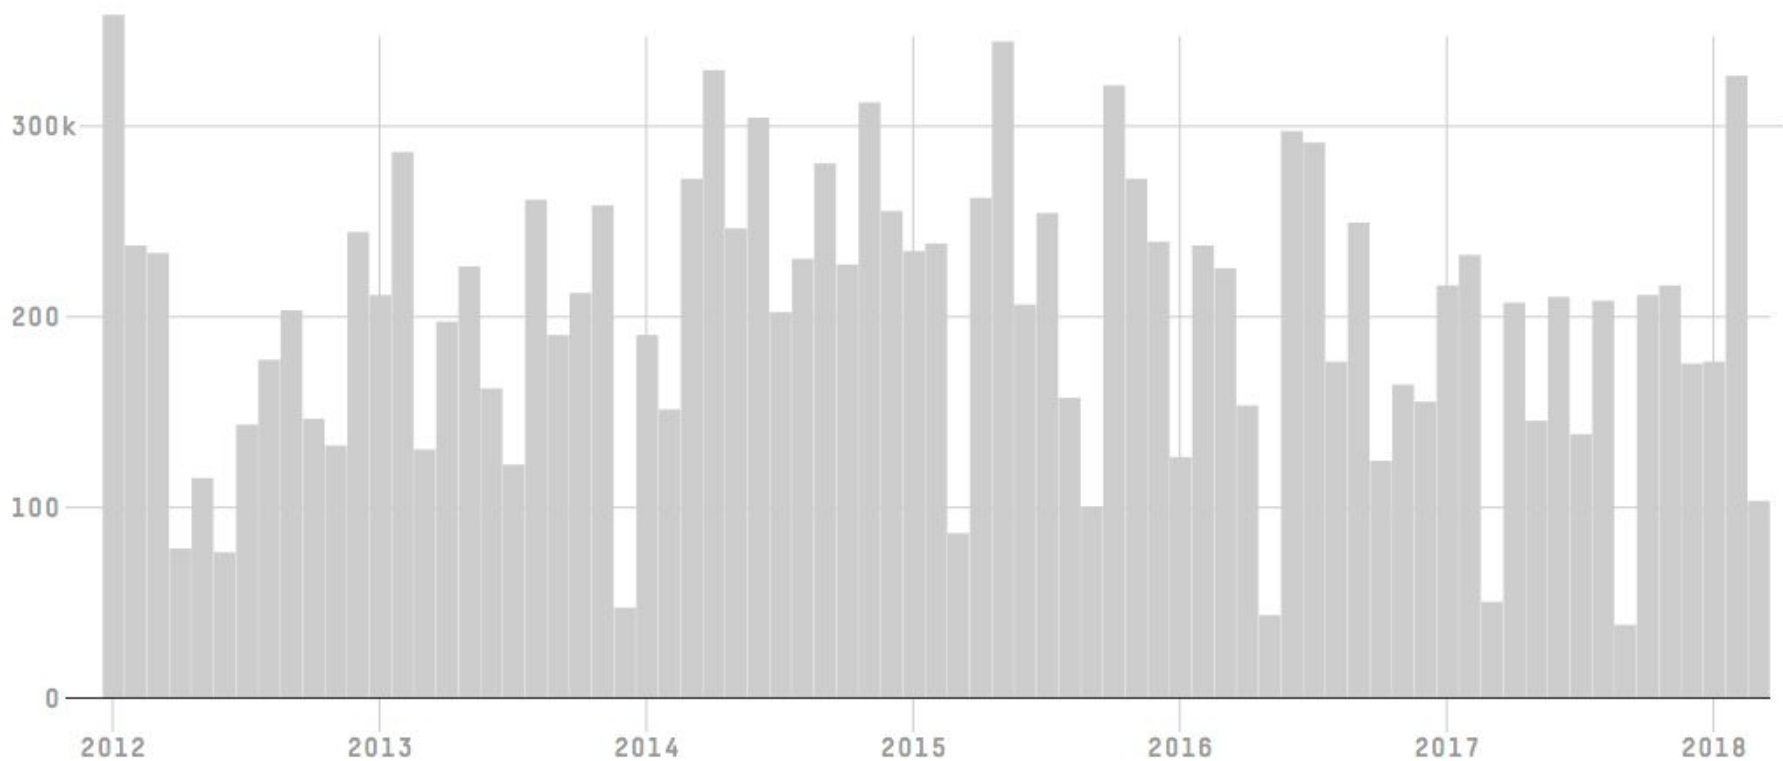

y-axis is a continuous variable

Gender Pay Gap, by Race
College-educated women's earnings as a percentage of college-educated white men's earnings

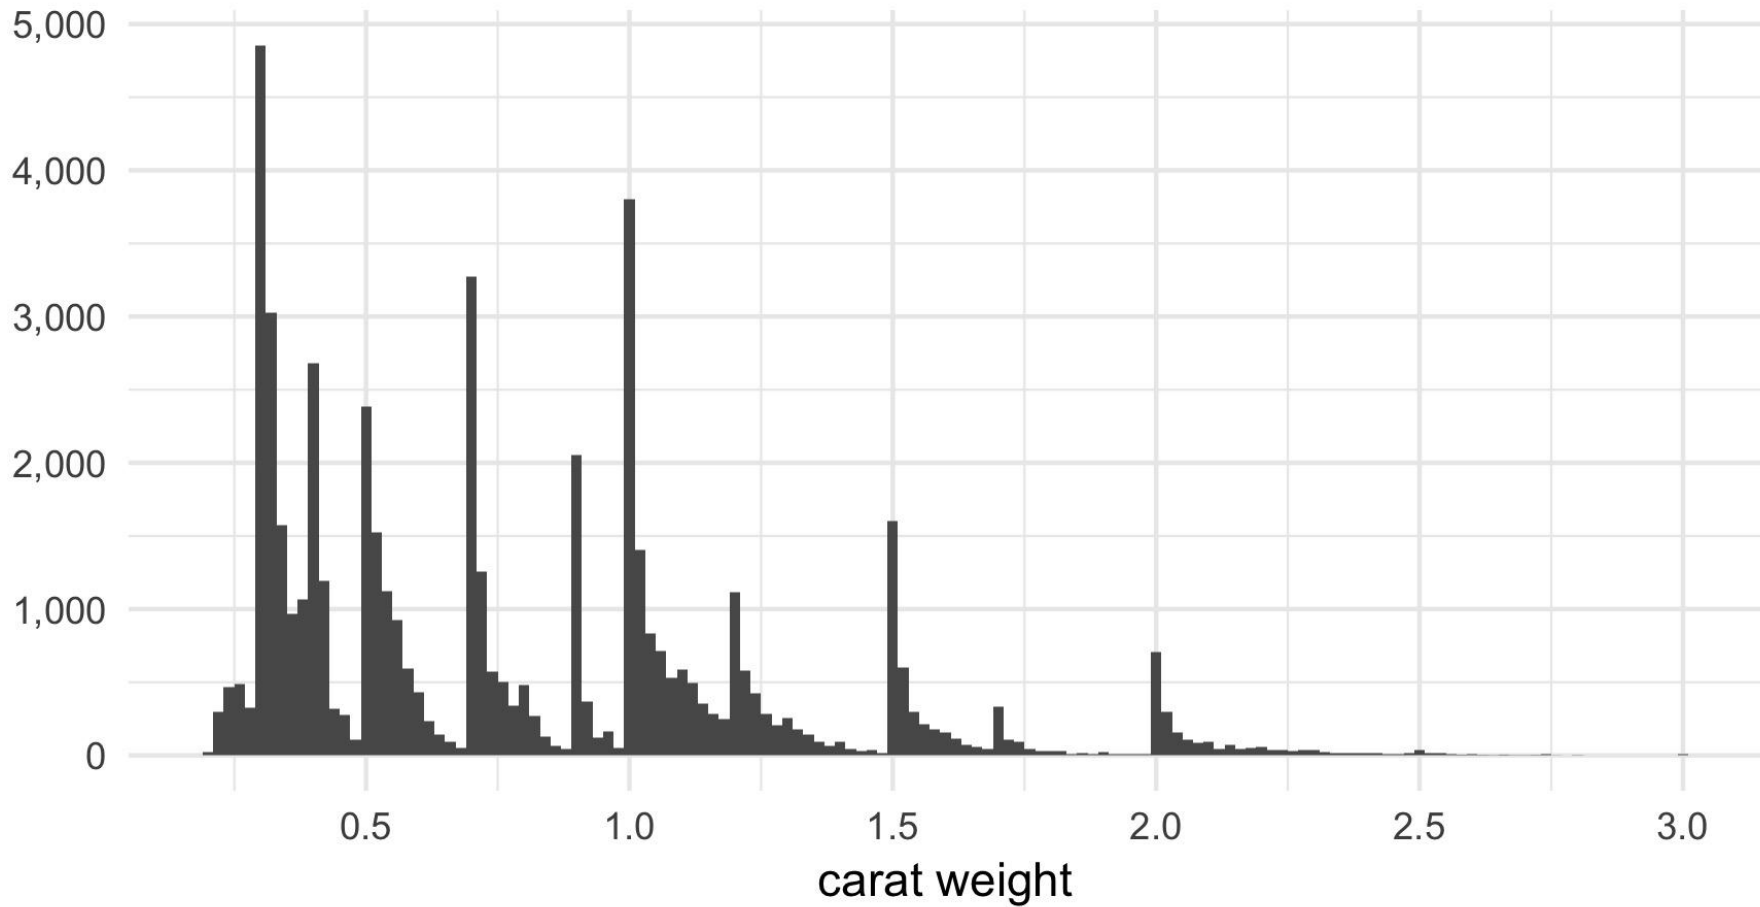

Number of jobs added or lost

Monthly change in nonfarm payroll employment, seasonally adjusted

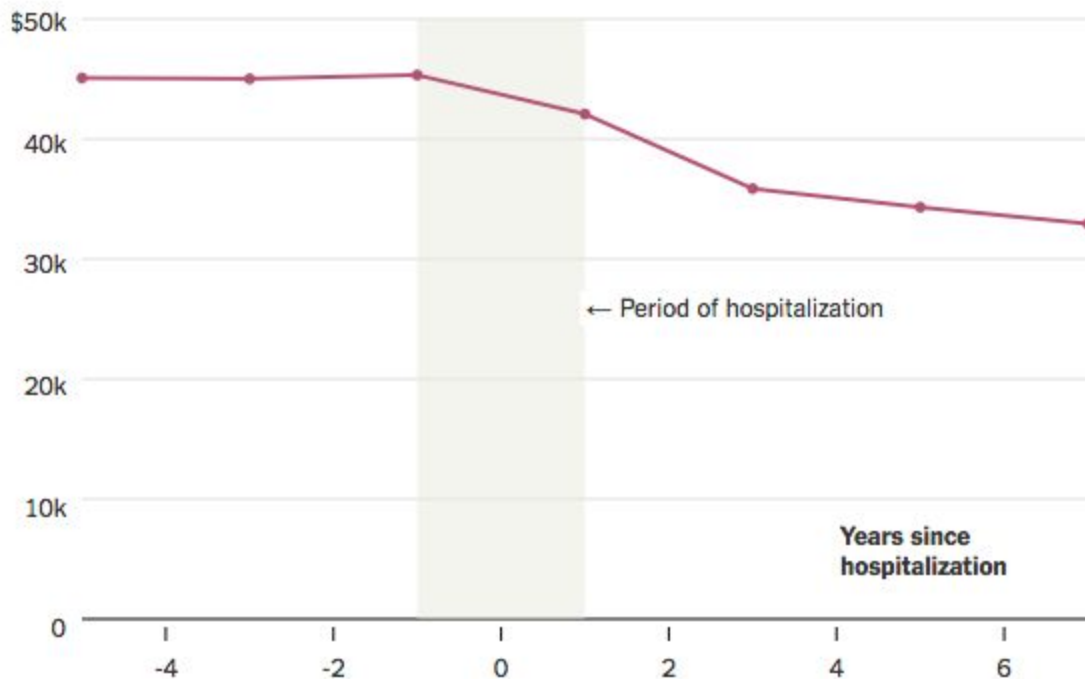

Carat weight of 50,000 round-cut diamonds

A Hospital Visit Can Hit Your Paycheck

Among people in their 50s who were hospitalized, about 10 percent never went back to work. Some others scaled back their hours or took lower-paying jobs.

Average income

Share of children living in low-poverty neighborhoods with many fathers present

Share of children living in high-poverty neighborhoods with few fathers present
