Education

Kalyani Government Engineering College

B.Tech in Computer Science and Engineering

Aug. 2021 – Jul. 2025 (Expected)

8.9 CGPA (up to 5th semester)

Experience

Artificial Intelligence Institute of South Carolina

AI Research Intern

May 2024 - Present

Kolkata, India (Remote)

- Under Mentorship of Prof. (Dr.) Amitava Das.
- Working and testing capabilities of Large Language Models their ability to retain proper context alignment while generating response.
- Working as Co-organizer for **Defactify-4.0**, helping organize the shared tasks in **Codalab** and helping participants.

Personal Projects

Game Recommender App ↗ **Video Explanation** ↗

May. 2024

- Engineered a scalable game recommendation system powered by **Google Gemini**, recommending about **180 games** to users.
- Features included seamless scalability, **natural language query handling**, user-friendly chatbot interface using **Streamlit**, and continuous improvement through **user feedback integration**.
- Implemented **logging** and **monitoring** with **Langsmith**, helping in monitoring and optimizing code logic to reduce prompt token from **11,000 to 6,000**.
- Deployed using **GitHub Actions** for **CI/CD**, **AWS ECR** for **Docker** container registry, **AWS EC2** for hosting, and **Terraform** for infrastructure as code.

My Sweet Home ↗ **Video Explanation** ↗

Jul 2023 – Nov 2023

- **Predicted** house prices and **recommended** similar housing properties using content-based filtering.
- **House Price Prediction:** Achieved **90%** accuracy for properties for **sale** and **70%** accuracy for **rental** properties.
- **Property Recommendation:** Generated a list of **6 most similar properties** matching given criteria and displayed the **average percentage of cosine-similarity** for those properties.

Technical Stack

- **Python Packages and Frameworks:** Scikit-Learn, TensorFlow, Keras, NumPy, Pandas.
- **Web Development:** HTML, CSS, Flask, Django, JavaScript, Chainlit, Streamlit.
- **Programming Languages:** Python, JavaScript, SQL, NoSQL, HTML, CSS.
- **Databases:** MySQL, MongoDB, PostgreSQL, Pinecone, FAISS.
- **MLOps Tools:** DVC, MLflow, CI/CD, GitHub Actions.
- **Cloud Deployment and Containers:** AWS ECR, AWS EC2, Vercel, Git, Docker.
- **Gen AI Framework and Models:** LlamaIndex, Langchain, Langsmith, Google Gemini.

Achievements

Winner of Smart India Hackathon 2022 ↗

Aug 2022

- We, the team BRAINCELLS had the opportunity to participate in the **grand finale** of **Smart India Hackathon 2022** and after working for 36 hours straight with our team members and mentors, we were able to make a desirable solution for the problem statement: "Suggest an innovative approach to serve the educational needs of the weaker section of the society during this challenging situation of COVID-19". We presented our solution in the form of apps and website.
