Roman Artemyev

Content

Introduction

Hello. I'm Roman, and my superpowers are diligence and concentration.

My passion is creativity and logic, and programming allows me to combine them, which has motivated me to move in this direction since childhood.
At the moment I am engaged in frontend development, but I strive to improve as a developer, expanding the range of tools, technologies and approaches used.

The main driving forces for me are curiosity and the desire to create interesting and useful things.
The first one pushes me to continue studying and developing as a specialist and as a person, delving into and developing expertise in various fields throughout my life.
The second one led me to IT, as one of the most advanced areas of human activity and, in particular, to WEB development.

In any activity, I strive to practice a thorough and conscious approach, and most importantly, bring what I started with the end, whether it's a project or some kind of creative impulse.

For me, the organization of the process and attention to detail are important. I'm a fast learner, able to pick up new skills and juggle different projects and roles with relative ease.

My interests, in addition to IT and various types of development, include some areas of design, illustration and various hand-made.

At first glance, I am reserved, but, nevertheless, deeply emotional and empathetic. It helps me in my relationships and in my work, because what I undertake becomes a part of me.

Biography

My path to IT was laid at the age of 11, when I started studying programming in Pascal and Delphi (relevant then) at a local house of art.

Later I got a degree in information systems engineering. This helped me to expand my range of knowledge and accumulated experience in many areas of interaction with Information Systems: from the design and administration of Information Systems to the principles of project management; from the principles of application development to storage and distributed databases. In addition, disciplines such as Technical Translation and Psychology of Personality and Group have laid the necessary foundation for reading documentation and understanding people.

The first real experience in web development for me was the development of landing pages using CMS (Joomla and ModX) for a couple of commercial construction companies in the first months after the student. This was also the first practice of interacting with customers.

Then I gained experience in IT, mostly in office positions. So in a construction company, I maintained the operability of the local database and the relevance of the data in it. In addition, I interacted with customers, formed technical calculations and commercial proposals.
The next experience for me was the position of a leading specialist in the local Administration, where everything related to the IT sphere was my responsibility.

Recently, I have been improving my skills in frontend development and updating my knowledge in this area. And I continue to expand my set of tools used and strive to grow as a web developer.

I am currently open to cooperation and offers of remote or permanent work, whether as an employee or a freelancer. I strive to work on interesting projects that will allow me to hone my professional skills and realize the need to create something useful.

Experiences

Administration of the Azov district

Leading Specialist
January 2016 – 2020

- Network system administration;
- Maintenance of software and computer equipment on the workplaces;
- Setting up and maintaining work in various Government Information Systems and financial document management systems;
- Work with manufacturing documentation, related software and installation / configuration of Electronic Signature keys;
- Administration of accounts of district institutions in the Unified Automated Public Finance Management System;
- Electronic document management.

"RostovRemStroy"

Technologist
2015

- Local database support;
- Updating data in the database;
- Interaction with customers, and the formation of commercial proposals;
- Formation of technical calculations for production.

Skills

Soft (real) skills

- Critical thinking
- Adaptability
- Discipline and self-organization
- Motivated to take on new challenges
- Always curious, humble and openness
- Emotional intelligence
- Openness to constructive criticism
- Stress resistance and balance in all circumstances
- striving for self-development and awareness
- Ability to express thoughts and actively listen
- Research skills
- User-centric mindset for problem solving
- A sense of responsibility
- Multitasking
- Ability to work in a team

Hard skills

- Hard work and attention to detail
- Planning
- Ability to work with documentation
- Pre-Intermediate English
- Experience in using different programming languages
- Principles of building networks
- Fast mastering of any softawr
- Knowledge of the hardware and software

Technical skills

- HTML
- CSS, CSS3
- JavaScript ES6+
- jQuery
- JSON / XHR
- React
- Redux
- SCSS, SASS, LESS
- GIT

- Familiar with Node.js
- Familiar with Babel
- Familiar with PHP
- Familiar with C++
- Familiar with MySQL
- Familiar with Bootstrap
- Familiar with Wordpress

Software

- Visual Studio
- Git Bash
- GitKraken
- Gulp
- Webpack

- Avocode
- Figma
- Adobe Photoshop
- Adobe Illustrator
- CorelDraw

Weaknesses

- No patience with inefficiency
- Neglect of social networs
- Scrupulousness and perfectionism
- The desire to please everyone
- Lack of motivation if I'm not being challanged
- Public speaking or presentation to a large group of people

Things I love

- Tea with sweets
- Learning new things and always being in motion
- Travel and get to know people
- Video and board games, movies, music, various art
- Drawing and crafting
- Running, fitness and table tennis
- Heart-to-heart conversations
- Monitor the development of technologies

Education

Engineer's Specialty

Information systems and technologies
Don State Technical University
2009 – 2014

High School

School №9, Azov
1999 – 2009

Achievements

Professional development

according to the program "Web Development basics"
2020

"Center for Advanced Training in the field of Information Technology"

Professional development

according to the program " Technical protection of information. Organization of protection of restricted access information that does not contain information constituting a state secret"
2018

Institute of Information Technology "IT"

Letter of thanks from the head of the Azov district

Administration of the Azov district
September 2017

Implementation Of A Unified Financial Management System

Administration of the Azov district
Summer 2017

Organization of conferences and workplaces for training employees of the district institutions.
Setting up and administering the district user base.
Implementation of Information Systems in organization and transfer of databases from old systems.

Contact

I'm based in Russia, Rostov-on-Don.

You can contact me at **gnobious@gmail.com**

Looking forward to hear from you!
