# Foreword

---

The 2022 Population and Housing Census (PHC) for the United Republic of Tanzania had its reference as the midnight of 22<sup>nd</sup>/23<sup>rd</sup> August 2022. This was the Sixth and the first digital Census after the Union of Tanganyika and

Zanzibar in 1964. Other post union censuses were carried out in 1967, 1978, 1988, 2002 and 2012. The Sixth Phase Government of Tanzania under the leadership of Her Excellence Dr. Samia Suluhu Hassan, and the Eighth Phase Government of Zanzibar under the leadership of Dr. Hussein Ali Mwinyi like the previous phases, have fulfilled their obligation of conducting the 2022 PHC according to the United Nations Principles and Recommendation for the Population and Housing Census. We owe them much appreciation for their commitment and support during Census implementation.

The 2022 PHC was conducted in accordance with the Statistics Act Cap 351, which mandates the Government of the United Republic of Tanzania to conduct Population and Housing Census every ten years. It also followed the United Nations Principles and Recommendations for conducting the 2020 Round of Population and Housing Census, including adoption of advanced Information and Communication technology (ICT) at all stages of Census implementation. Indeed, the country's decision to use more advanced technology to capture data during cartographic mapping; enumeration and data transmission; and processing made the 2022 PHC the first ever digital census to be conducted in Tanzania.

The 2022 PHC results are for integrated plans and sustainable development of the country and will increase awareness and transparency in allocation of resources at all levels of administration based on the actual population. The results will be used by the Government and stakeholders in monitoring and evaluating various national, regional and international development frameworks including the Tanzania Development Vision 2025 and Zanzibar Development Vision 2050; the Third National Five-Year Development Plan 2021/22 - 2025/26 and Zanzibar Development Plan 2021/22 - 2025/26; the East African Community

Vision 2050; Southern African Development Community Vision 2050 and the African Development Agenda 2063.

Furthermore, results will enable the country to evaluate the progress of implementation of Sustainable Development Goals (United Nation Agenda 2030); goals that aim at achieving equality and eradicating poverty of all kinds including extreme poverty by 2030 by ensuring no one is left behind. The census data will also provide a basis for the computation of several indicators such as enrolment and literacy rates, infant and maternal mortality rates, unemployment rate and others.

Administrative Units Population Distribution Report is the first in a series of planned publications for the 2022 PHC. The report has three volumes; The United Republic of Tanzania (Volume 1A), Tanzania Mainland (Volume 1B) and Tanzania Zanzibar (Volume 1C). The main purpose of the report is to give aggregated total of population by sex at regional, council and Shehia levels for informed decision making. The report also provides number of households, average household size, average annual intercensal population growth rates, population density, as well as sex ratios. Other reports in the series of planned Census publications will present among others Age and Sex Population Distribution, and Basic Demographic and Socio-Economic Characteristics of the population at National, Regional and Council levels.

The success of 2022 PHC depended on the cooperation and contributions from the Government, specifically Census Committees from national to the lowest administrative level. These includes the National Central Census Committee comprising of Ministers; National Census Advisory Committee comprising of Permanent/Principal Secretaries; National Census Technical Committee; Census Committees at regional, district and shehia.. Forums from Non-States Actors including Collaborators Forum, Private Sector, various institutions and the public at large.

A word of thanks goes to Government leaders at all levels, particularly, Prime Minister's Office - Policy, Parliamentary Affairs and Coordination; Office of Second Vice President of Zanzibar; Minister for Finance and Planning; Minister of State - President's Office, Finance and Planning, Zanzibar; Members of Parliament; Members of the House of Representatives; Councillors/Shehas; Regional and District Census Committees chaired by Regional and District Commissioners of respective areas; Census Coordinators (National and Zanzibar); Regional and District Census Coordinators; Supervisors;

Enumerators; Local leaders and all respondents (head of households, members of households and other individuals).

Special gratitudes are extended to the following Development Partners:- United Nations Population Fund (UNFPA); World Bank (WB); United Nations Children's Fund (UNICEF); UN-Women; International Organization for Migration (IOM); United States Agency for International Development (USAID); Foreign, Commonwealth and Development Office (FCDO); United States Census Bureau (USCB), The Republic of South Korea , The People's Republic of China and other Development Partners for providing equipment, expertise, training and financial support in making the 2022 Population and Housing Census a success. We also thank religious, traditional and political leaders, non-governmental organization leaders, the media and all citizens and non-citizens in general for their participation and contributions in the successful implementation of the Census.

Special thanks also go to Honourable Anne Semamba Makinda - Census Commissar for Tanzania Mainland and Former Speaker of the National Assembly; and Honourable Ambassador Mohamed Haji Hamza - Census Commissar for Tanzania Zanzibar, for their effective leadership and management in educating and sensitizing all citizens and non-citizens to participate in the 2022 Population and Housing Census thus, resulting in enhanced quality, smoothness and timely execution of the Census exercise. We also thank the Chairperson of the Governing Board of the National Bureau of Statistics (NBS), Dr. Amina Msengwa and the Chairperson of the Statistics Board of Zanzibar, Ambassador Amina Salum Ali, for their guidance throughout the implementation of the Census exercise.

Last but not least, we acknowledge the unprecedented efforts and commitment of the management and staff of the National Bureau of Statistics under the leadership of Dr. Albina Chuwa, the Statistician General; and staff of the Office of the Chief Government Statistician, Zanzibar under the leadership of Mr. Salum Kassim Ali; Chief Government Statistician; staff from the Ministry of Lands, Housing and Human Settlements Development; Ministry of Information, Communications and Information Technology; as well as other Government officials who worked tirelessly in ensuring that the 2022 Population and Housing Census was implemented successfully.

**Kassim Majaliwa Majaliwa (MP)**  
Prime Minister of  
The United Republic of Tanzania

**Hemed Suleiman Abdulla (MHR)**  
Second Vice President of Zanzibar

# Acknowledgement

---

The National Bureau of Statistics and Office of the Chief Government Statistician, Zanzibar conducted the 2022 PHC to provide necessary information for policy implication, planning, monitoring and evaluation of development processes. The census collected detailed information on demographics, disabilities, migration, possession of national documents and orphanhood, education, economic activities, land ownership and information related to ICT ownership and use, fertility, mortality, housing ownership and assets, agriculture, community facilities and buildings. Some information on physical addresses was also collected.

This report presents population distribution disaggregated by administrative areas from regional level to shehia. It provides detailed statistics of different indicators that facilitate making evidence-based decisions relevant to the population at their localities. We therefore express our sincere appreciation to all experts who have put their time and efforts to produce this report. In particular we would like to thank Ruth Davison Minja, the Acting Director of Population Census and Social Statistics, NBS; Fahima Mohamed Issa, Director of Social Statistics, Census and Survey(OCGS); Seif Ahmad Kuchengo, the National Census Coordinator; Abdul-majid Jecha Ramadhan, the Tanzania Zanzibar Census Coordinator and the National Census Technical Team, Statisticians, Demographers, Information Technology and Geographic Information System officers for their commitment which led to successful completion of this report.

Our appreciation is as well extended to all professionals, Regional and District supervisors, enumerators and field supervisors as well as the media for their dedicated work. Certainly, without their commitment and dedication, the census would not have been successful. We would also like to thank the public for their cooperation during the entire period of the Census.

**Dr. Albina Chuwa**  
Statistician General  
National Bureau of Statistics

**Salum Kassim Ali**  
Chief Government Statistician

## Basic Concepts and Definitions

---

**Household** refers to a person or group of persons who reside in the same homestead/compound but not necessarily in the same dwelling unit, have the same cooking arrangements, and are answerable to the same household head.

**Average household size** is calculated by dividing the total number of persons by the total number of households (Collective and Private) in a given population.

**Sex ratio** is the ratio of males to females in a given population usually expressed as the number of males for every 100 females. For example, sex ratio of 96 Kaskazini Unguja Region means, for every 100 females, there are 96 males.

**Population density** refers to the number of people living in a given area per square kilometer of land.

**Population growth** refers to the change in population over time, and can be quantified as the change in the number of individuals in a population using "per unit time" for measurement.

**Population Growth Rate** refers to the change in population over a unit time period, often expressed as a percentage of the number of individuals in the population at the beginning of that period. Growth rate in this book is expressed as an exponential rate of growth of population from year 2012 to 2022 and is termed as average annual intercensal population growth rates.

**Population Share** refers to the percentage of population of a certain area for example region and district to that of total population of country and region respectively.

# Section A: Summary of Findings - Population

## 1.0 Introduction

This section presents summary of findings of the 2022 PHC. These include number of persons by region, average annual intercensal population growth rate, average household size, population density and sex ratio.

## 1.1 Number of Persons

The 2022 PHC revealed that the population of Tanzania Zanzibar has increased five times from 354,815 persons in the 1967 Census to 1,889,773 persons in the 2022 Census (Figure 1).

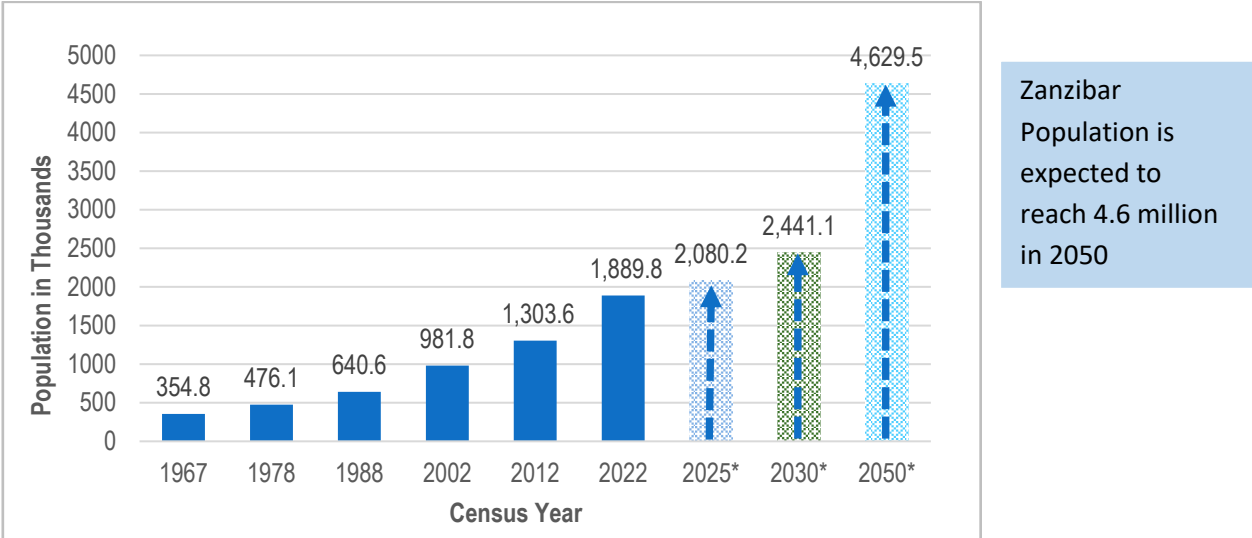

Figure 1: Population Trends in Tanzania Zanzibar, 1967 – 2022 PHCs

\* Indicates exponentially projected population by the end of implementation of the following development frameworks

**2025\*** - 2.1 million Zanzibar Development Plan 2021/22-2025/26

**2030\***- 2.4 million Sustainable Development Goals 2030,

**2050\*** - 4.6 million Zanzibar Development Vision (2050) and East African Community Vision 2050 and Southern African Development Community Vision, 2050

## 1.2 Population by Region

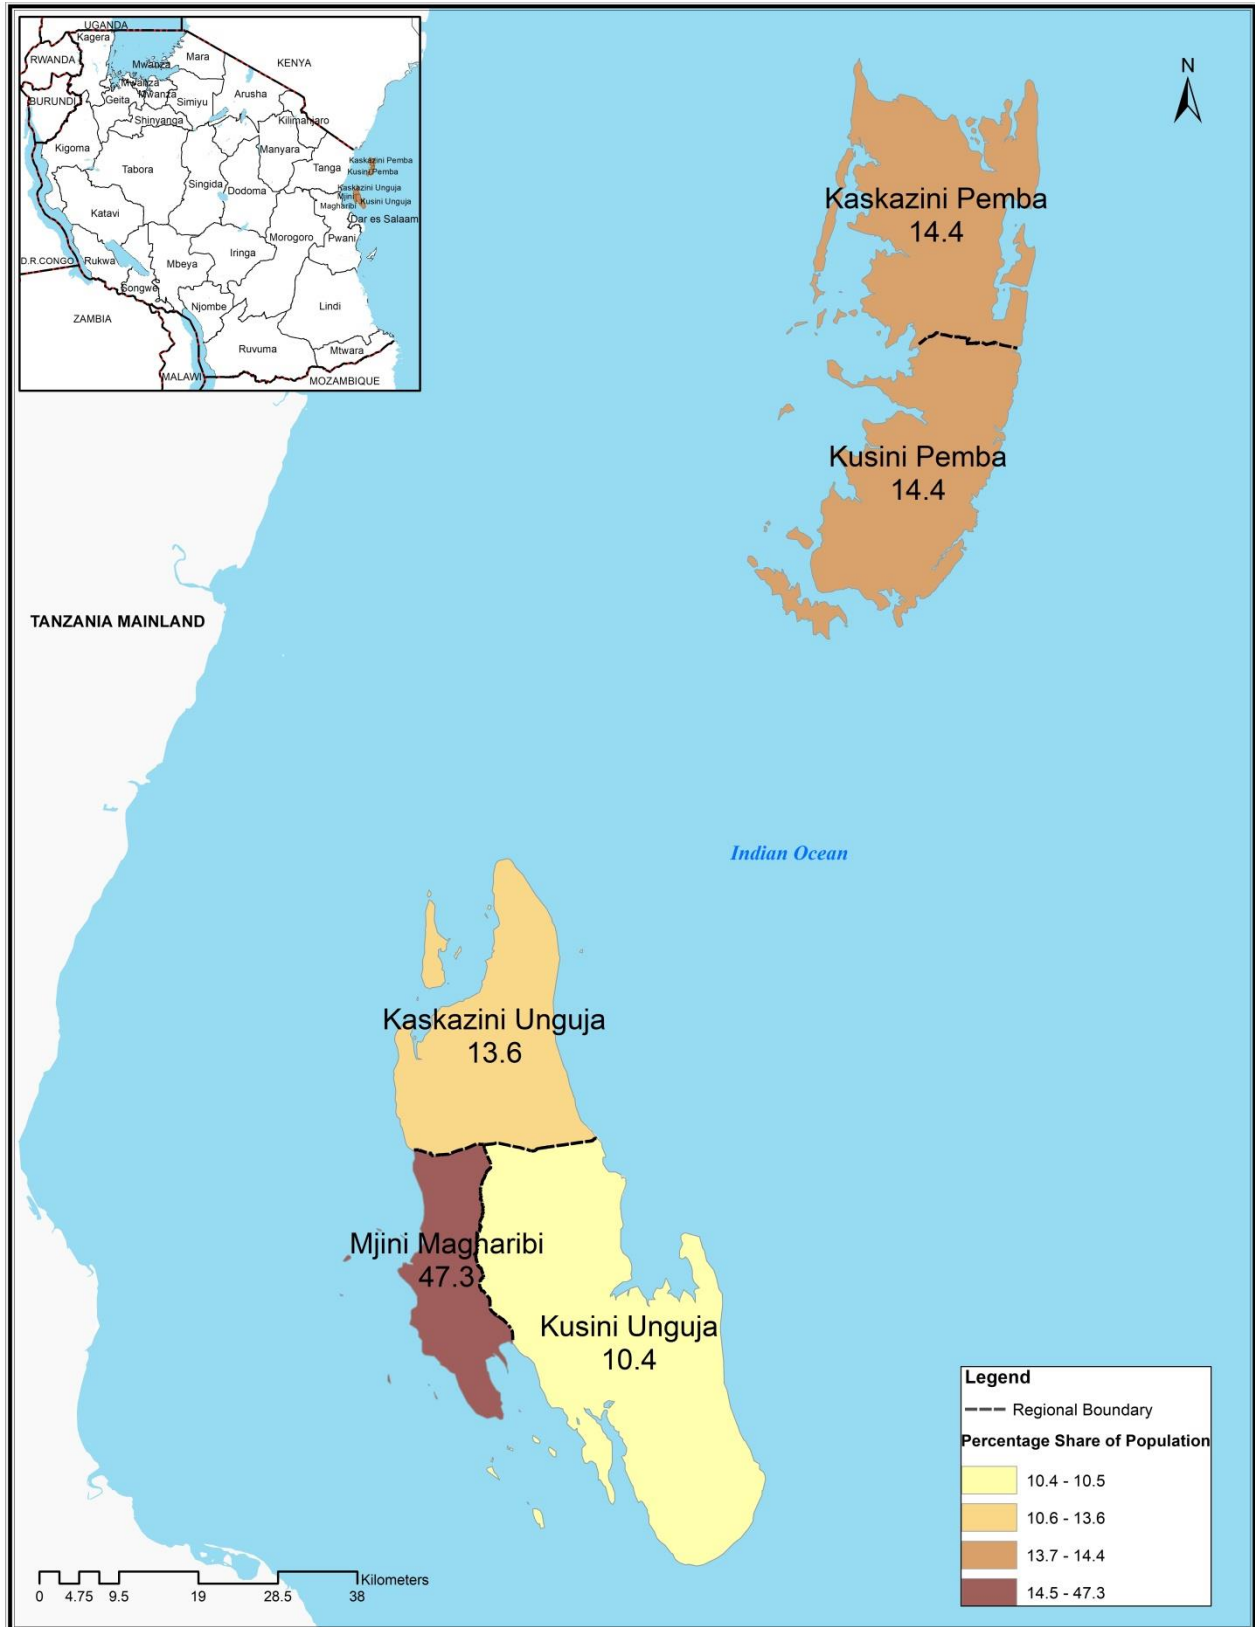

Tanzania Zanzibar has five (5) regions. Table 1 presents regional populations during the 2012 and 2022 Population and Housing Censuses and their annual average intercensal population growth rates.

In the 2022 Census, Mjini Magharibi Region was found to have the largest population of 893,169 accounting to 47.3 percent of the total population in Zanzibar. The region with the smallest population is Kusini Unguja with a population of 195,873 that is equivalent to 10.4 percent of the total population in Zanzibar. (Map A1).

**Table 1: Population, Population Increase and Average Annual Intercensal Population Growth Rate by Region, Tanzania Zanzibar; 2012 and 2022 PHCs**

Region	Population			Population Increase (Number)	Average Annual Intercensal Population Growth Rate (Percent)	
	2012 Census	2022 Projections	2022 Census	2012 - 2022	2002-2012	2012-2022
<b>Tanzania Zanzibar</b>	<b>1,303,569</b>	<b>1,762,989</b>	<b>1,889,773</b>	<b>586,204</b>	<b>2.8</b>	<b>3.7</b>
Kaskazini Unguja	187,455	242,314	257,290	69,835	3.2	3.2
Kusini Unguja	115,588	142,935	195,873	80,285	2.0	5.3
Mjini Magharibi	593,678	765,686	893,169	299,491	4.2	4.1
Kaskazini Pemba	211,732	318,214	272,091	60,359	1.3	2.5
Kusini Pemba	195,116	293,840	271,350	76,234	1.1	3.3

Map 0 1 :Population Share by Region, Tanzania Zanzibar; 2022 PHC

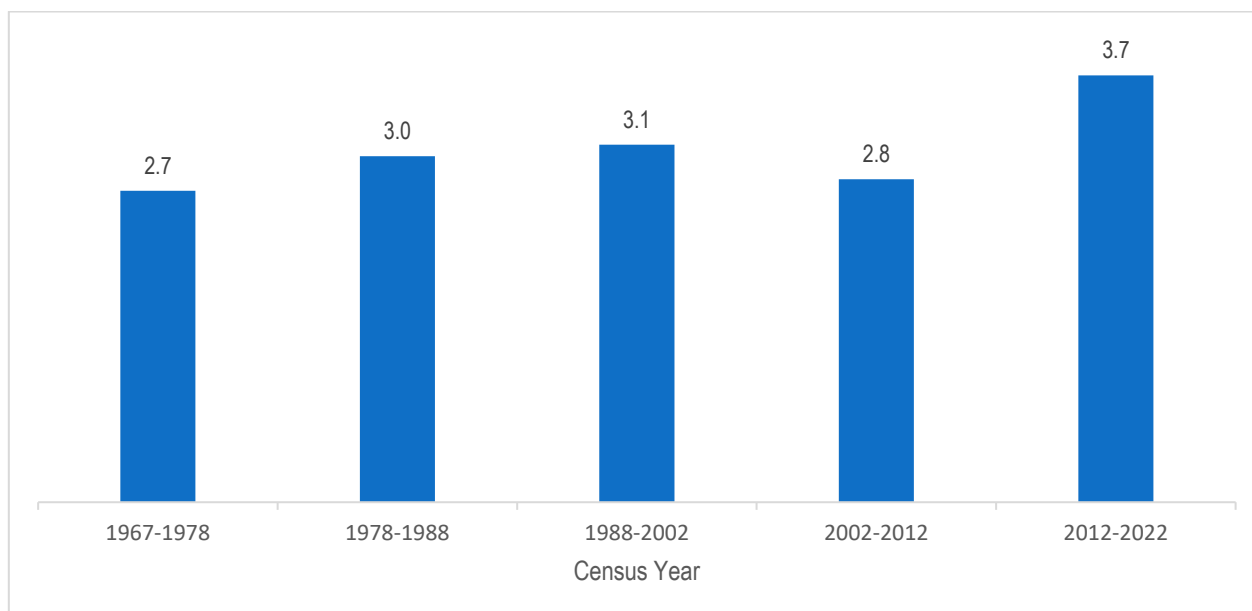

### 1.3 Average Annual Intercensal Population Growth Rate

The average annual intercensal population growth rate for Tanzania Zanzibar increased from 2.7 percent in 1978 to 3.1 percent in 2002 before declining to 2.8 percent in 2012. In 2022, Tanzania Zanzibar recorded an average annual intercensal population growth rate of 3.7 percent as seen in Figure 2.

With the current average annual intercensal population growth rate of 3.7 percent, the population of Tanzania Zanzibar is expected to double in the next 22 years

**Figure 2: Trends in the Average Annual Intercensal Population Growth Rates, Tanzania Zanzibar; 1978 – 2022 PHCs**

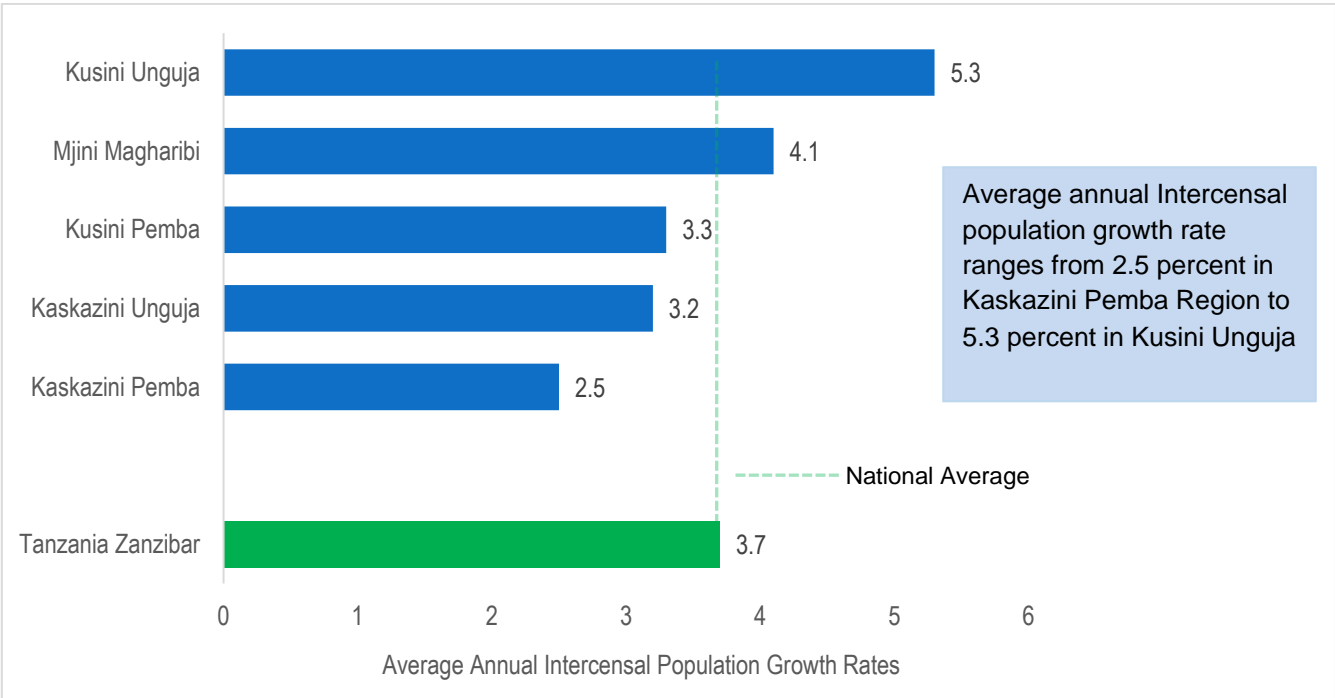

Average annual Intercensal population growth rates vary across regions. The average annual intercensal population growth rates for the period of 2012 to 2022 range from 2.5 percent in Kaskazini Pemba Region to 5.3 percent in Kusini Unguja Region. The Regions that recorded relatively large increases in the average annual intercensal population growth rates for the 2012 - 2022 periods are Kusini Unguja (from 2.0 percent in 2012 to 5.3 percent in 2022), Kusini Pemba (from 1.1 percent in 2012 to 3.3 percent in 2022) and Kaskazini Pemba (from 1.3 percent in 2012 to 2.5 percent in 2022).

Mjini Magharibi Region recorded a slightly decrease in the average annual intercensal population growth rate (from 4.2 percent in 2012 to 4.1 percent in 2022) while Kaskazini

#### Key Message Box 1:

Fertility, Mortality and Migration are the factors for population change. An increase or decrease of average annual intercensal population growth rates depend on those factors.

Unguja Region the average annual intercensal population growth rate for the 2012 and 2022 censuses have remained the same (3.2 percent) **(Figure 3)**.

**Figure 3: Average Annual Intercensal Population Growth Rate by Region, Tanzania Zanzibar; 2012 – 2022 PHCs**

**1.4 Population Density**

Tanzania Zanzibar is sparsely populated with population density of 768 persons per square kilometre with variation across regions (Figure 4 and Map 2). Persons are concentrated in Mjini Magharibi region with population densities of 3,883 persons per square kilometre. Regions with lowest population densities are Kusini Unguja (229 persons per square kilometre) and Kaskazini Pemba (474 persons per square kilometre).

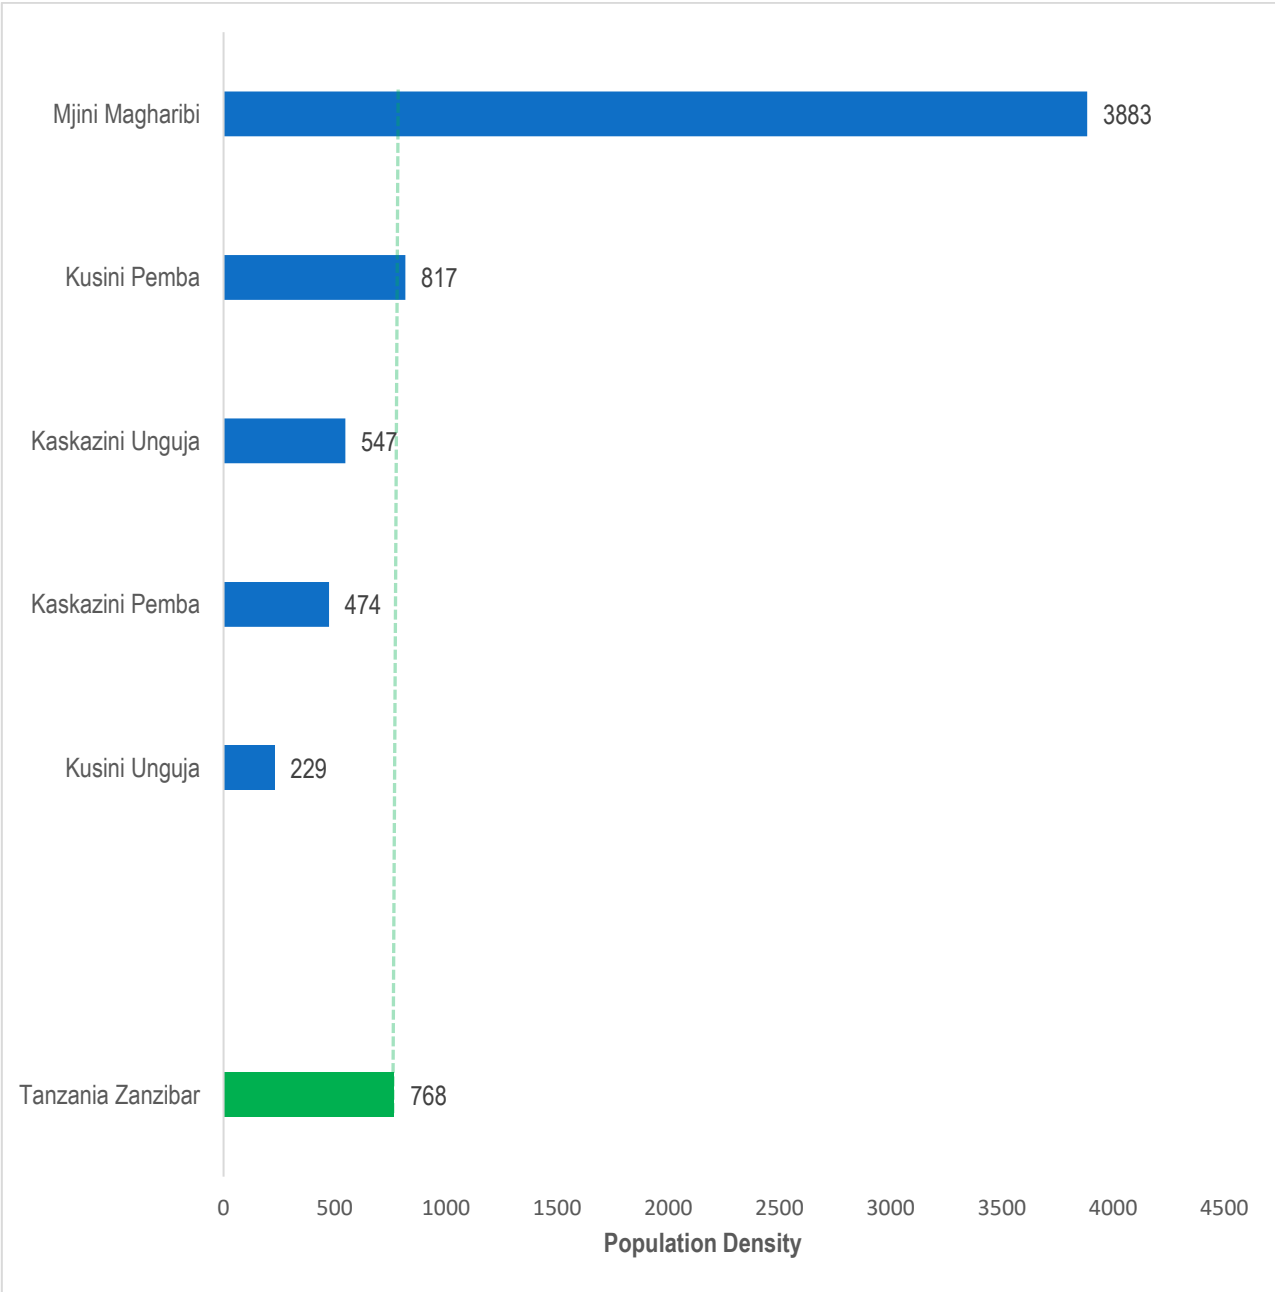

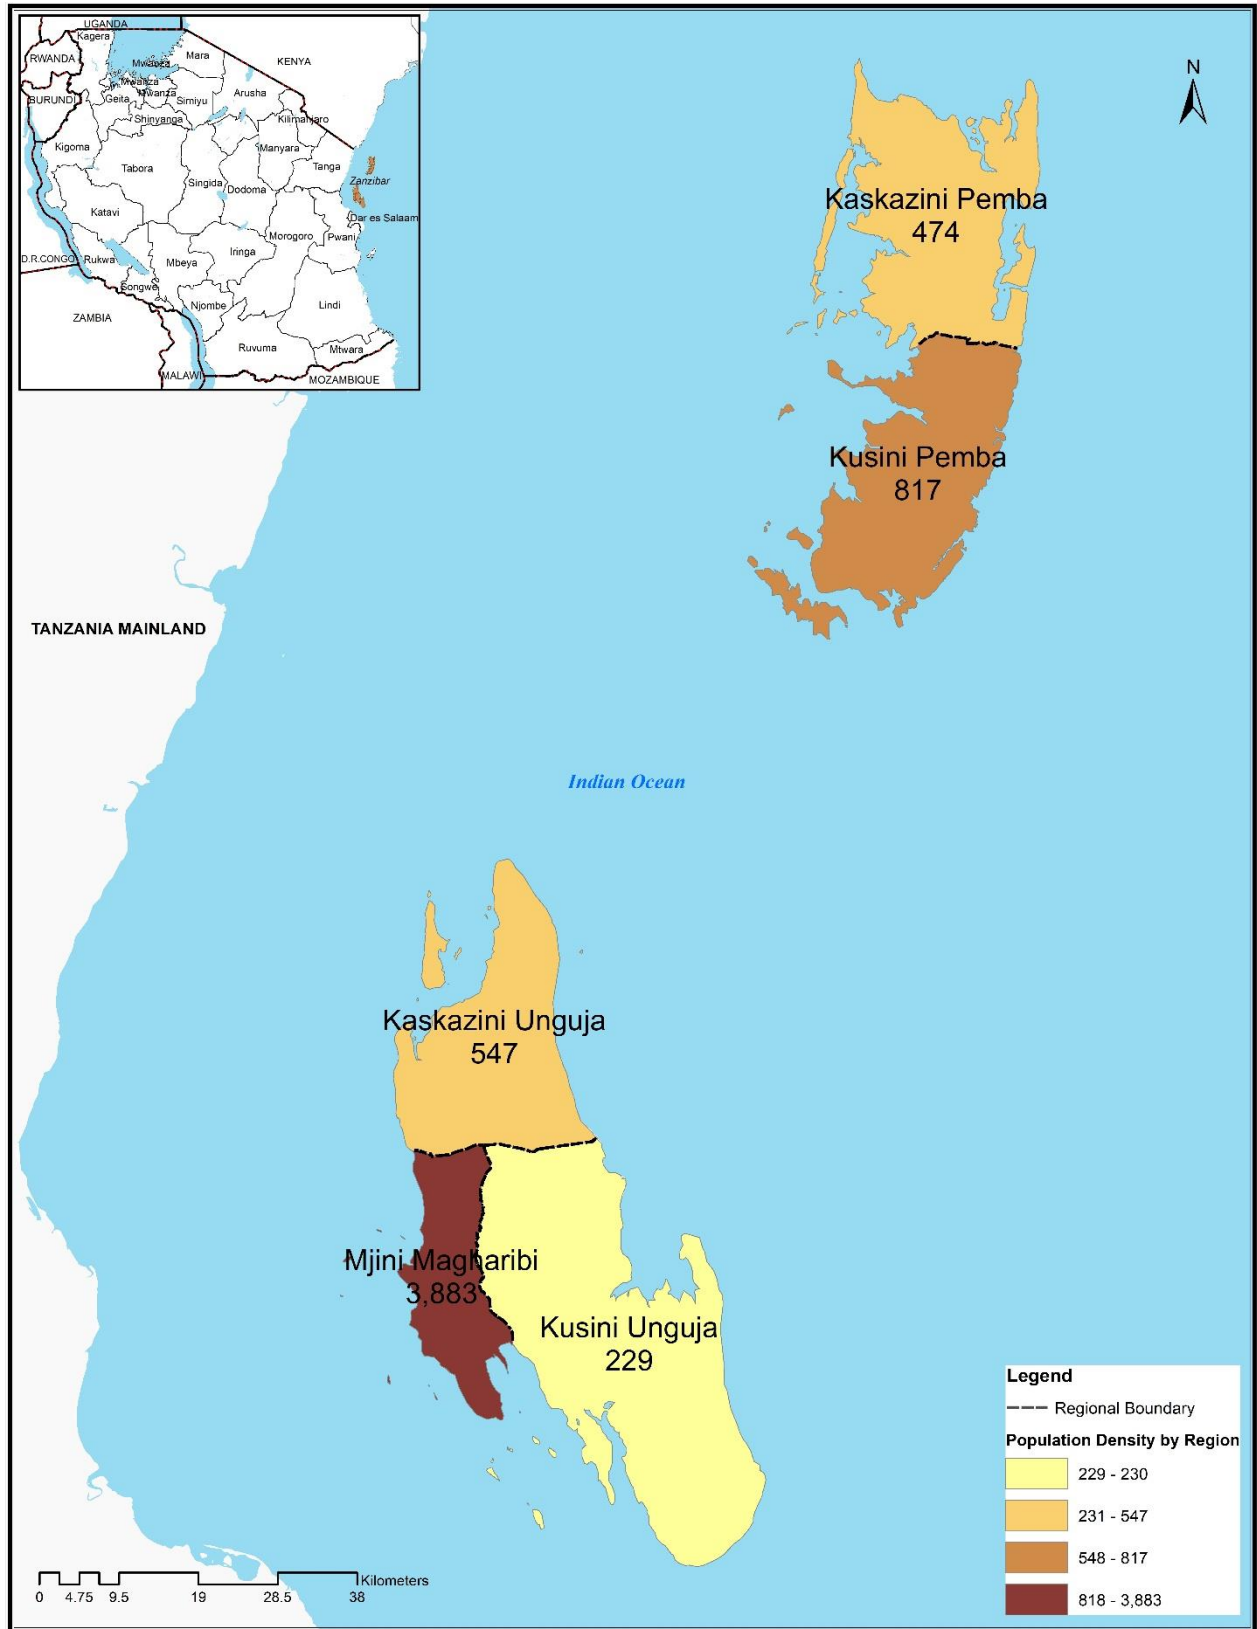

Figure 4: Population Density by Region, Tanzania 2022 PHCs

**Map 0 2 : Population Density by Region, Tanzania Zanzibar; 2022 PHC**

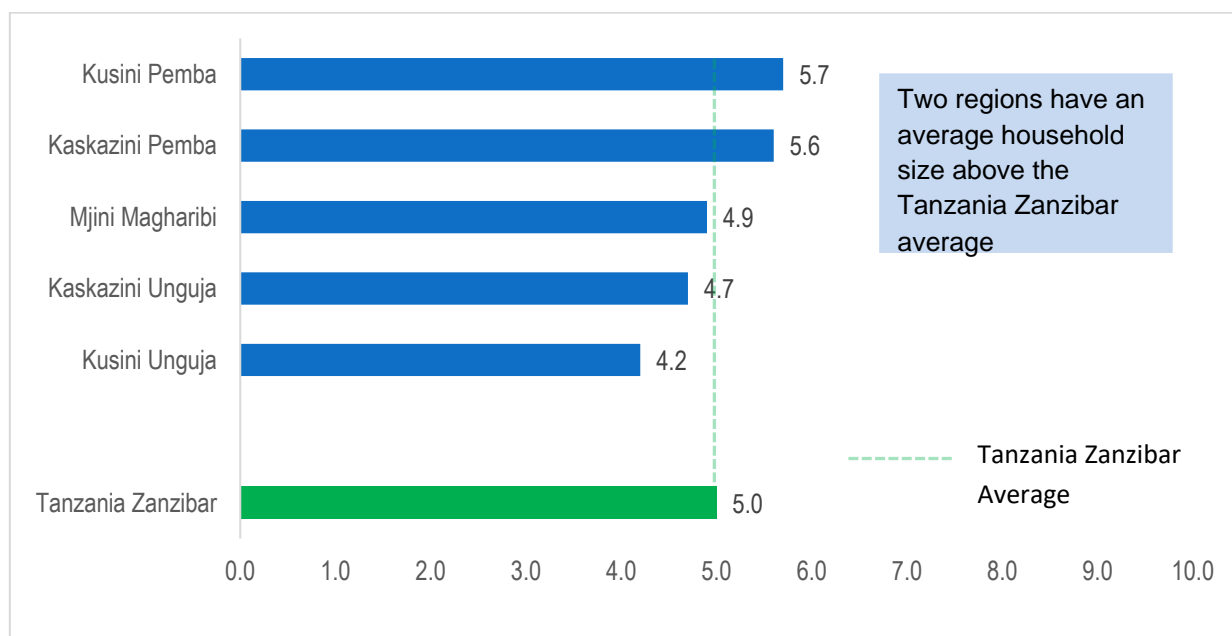

## 1.5 Household Size

The average household size in Tanzania Zanzibar for the 2022 Population and Housing Census was 5.0 persons indicating a slightly decrease from an average of 5.1 persons recorded in 2012. The average household size varies across regions ranging from 4.2 persons in Kusini Unguja Region to 5.7 persons in Kusini Pemba Region. Two regions recorded an average household size above the Tanzania Zanzibar average. Thus, the households have been increasing faster than population as seen in **Figure 5 and Table 2**.

### Key Message Box 2:

A decrease of average household size might be a result of reduced fertility rate and increase of single person households which are contributed by various social economic factors. This can be used as a proxy indicator for individual wellness

**Figure 5: Average Household Size by Region, Tanzania Zanzibar, 2022 PHC**

**Table 2: Population Distribution by Average Household Size by Region, Tanzania Zanzibar; 2012 and 2022 PHCs**

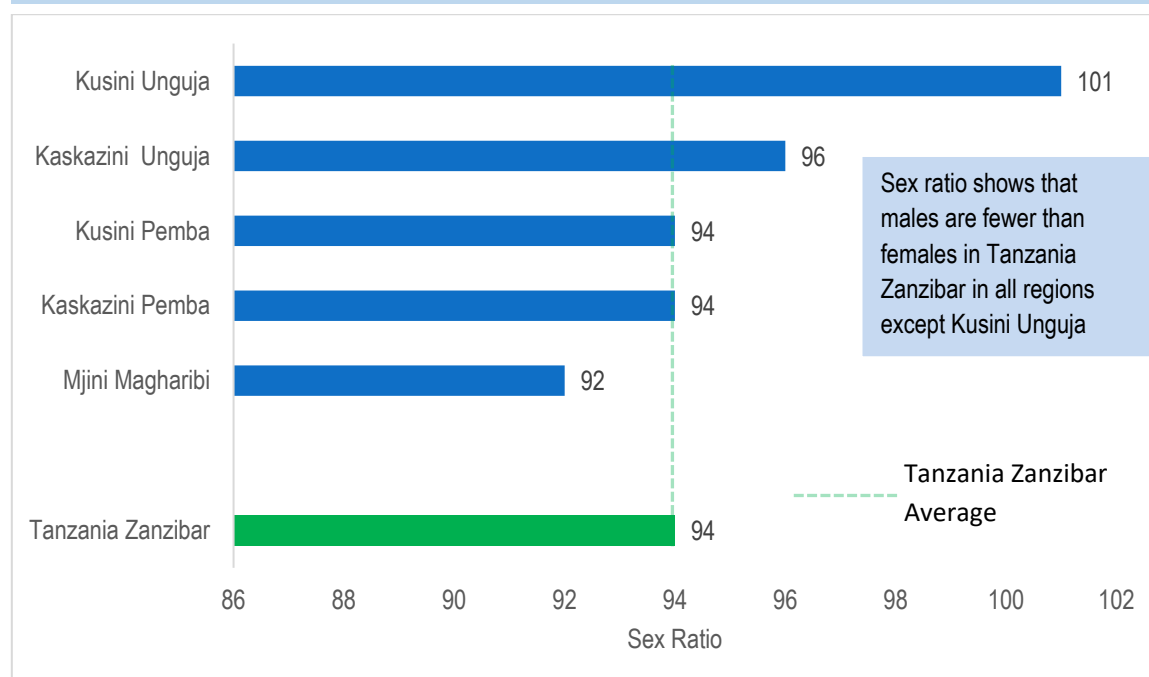

Region	2012 Census			2022 Census		
	Population	Households	Average Household Size	Population	Households	Average Household Size
<b>Tanzania Zanzibar</b>	<b>1,303,569</b>	<b>253,608</b>	<b>5.1</b>	<b>1,889,773</b>	<b>380,260</b>	<b>5.0</b>
Kaskazini Unguja	187,455	38,651	4.8	257,290	54,810	4.7
Kusini Unguja	115,588	25,947	4.5	195,873	47,010	4.2
Mjini Magharibi	593,678	113,420	5.2	893,169	182,079	4.9
Kaskazini Pemba	211,732	39,706	5.3	272,091	48,575	5.6
Kusini Pemba	195,116	35,884	5.4	271,350	47,786	5.7

### 1.6 Sex Ratio

The sex ratio of Tanzania Zanzibar is 94 males per 100 females. Sex ratio varies across regions from 92 males per 100 females in Mjini Magharibi Region to 101 males per 100 females in Kusini Unguja. A region with a sex ratio of more than 100 indicates that there are more males than females in that region **(Figure 6)**.

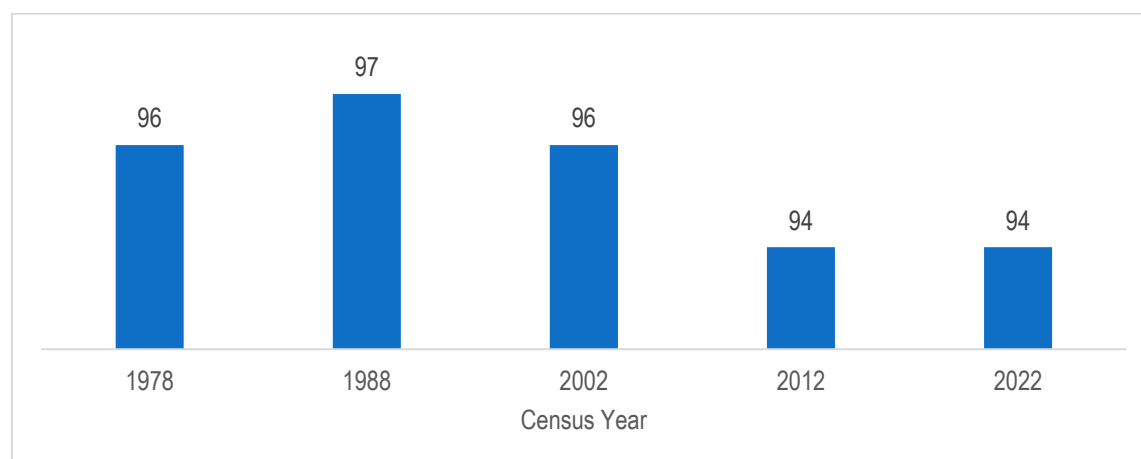

#### Key Message Box 3:

More male than female in Manyara and Kusini Unguja Region might be caused by disproportionate in and out migration among males and females.

**Figure 6: Sex Ratio by Region, Tanzania Zanzibar; 2022 PHC**

Trends in sex ratio in the 1988, 2002, 2012 and 2022 Censuses show that there were more females than males in the population of Tanzania Zanzibar as seen in **Figure 7**.

**Figure 7:** Trends in Sex Ratio, Tanzania Zanzibar; 1978 – 2022 PHCs

### 1.7 Population Size in Regions

In Tanzania Zanzibar, the region with the largest population is Mjini Magharibi (893,169 persons) while the region with the smallest population is Kusini Unguja (195,873 persons) as seen in **Table 3**.

**Table 3:** Population by Sex, Sex Ratio, Number of Households and Average Household Size by Region -Tanzania Zanzibar; 2022 PHC

Region	Population			Sex Ratio	Number of Households	Average Household Size
	Both Sexes	Male	Female			
<b>Tanzania Zanzibar</b>	<b>1,889,773</b>	<b>915,492</b>	<b>974,281</b>	<b>94</b>	<b>380,260</b>	<b>5.0</b>

Kusini Pemba	271,350	131,373	139,977	94	47,786	5.7

# Section B: Key Findings, Policy Implications and Recommendations

## 2.0 Introduction

This section highlights Key findings of the 2022 PHC and their policy implication and Recommendation

The Population and Housing Census is the only trusted and reliable source of demographic and housing statistics. The 2022 PHC provides baseline population and housing data which are crucial on policy formulation and updating, monitoring and evaluation of development frameworks at national, regional and international levels. It is rational to explicitly indicate key findings and their policy implications, provide policy recommendations for planners, business community, researchers and the public to ensure that the 2022 PHC results are used in making evidence-based decisions in development processes.

### 2.1 Key Findings and Policy Implications

- a) The population of Tanzania Zanzibar has increased for about five times from 354,815 in 1967 to 1,889,773 in 2022.

**Policy implication:** Increase in population result into increased demand for social services such as education, health, infrastructure as well as restructuring of administrative areas, urbanization and land ownership.

- b) With the current average annual intercensal population growth rate of 3.7 percent, the population of Tanzania Zanzibar is expected to double in the next 22 years.
- c) Average annual Intercensal population growth rates range from 2.5 percent in Kaskazini Pemba Region to 5.3 percent in Kusini Unguja Region.

**Policy implication:** Increase in population growth rate if well managed implies increase of the labour force and participation rates in production of goods and services which could leads to competitive businesses, increased individual's per capita income and market shares of commodities which have direct impact on poverty reduction and economic growth. On the other hand, it may results into high unemployment rate, limited resources to meet the basic socio-economic services of the population, environmental pollution particularly, greenhouse gas emissions, land degradation and disruption of water sources caused by human activities.

Furthermore, high population growth rates imply either high fertility rate, reduced mortality or high net migration. At individuals and families, high rates of population growth can be associated with high dependency ratios and low investment in the human capital of children and young adults.

- d) Average household sizes in two (2) regions are above that of Tanzania Zanzibar average (5.0). Kusini Pemba Region has recorded the highest household size of 5.7 among the regions of Tanzania Zanzibar and Kaskazini Pemba recorded an average household size of 5.6.

**Policy implication:** Large household size is very likely to be constrained by poor access to adequate, food, water, sanitation, transportation, energy, education and health services which may lead to poverty. Thus, there is need for improved and inclusive social protection policies to address needs for different population groups.

- e) The sex ratio of Tanzania Zanzibar is 94 males per 100 females. Sex ratio varies across regions ranging from 92 males per 100 females in Mjini Magharibi Region to 101 males per 100 females in Kusini Unguja.

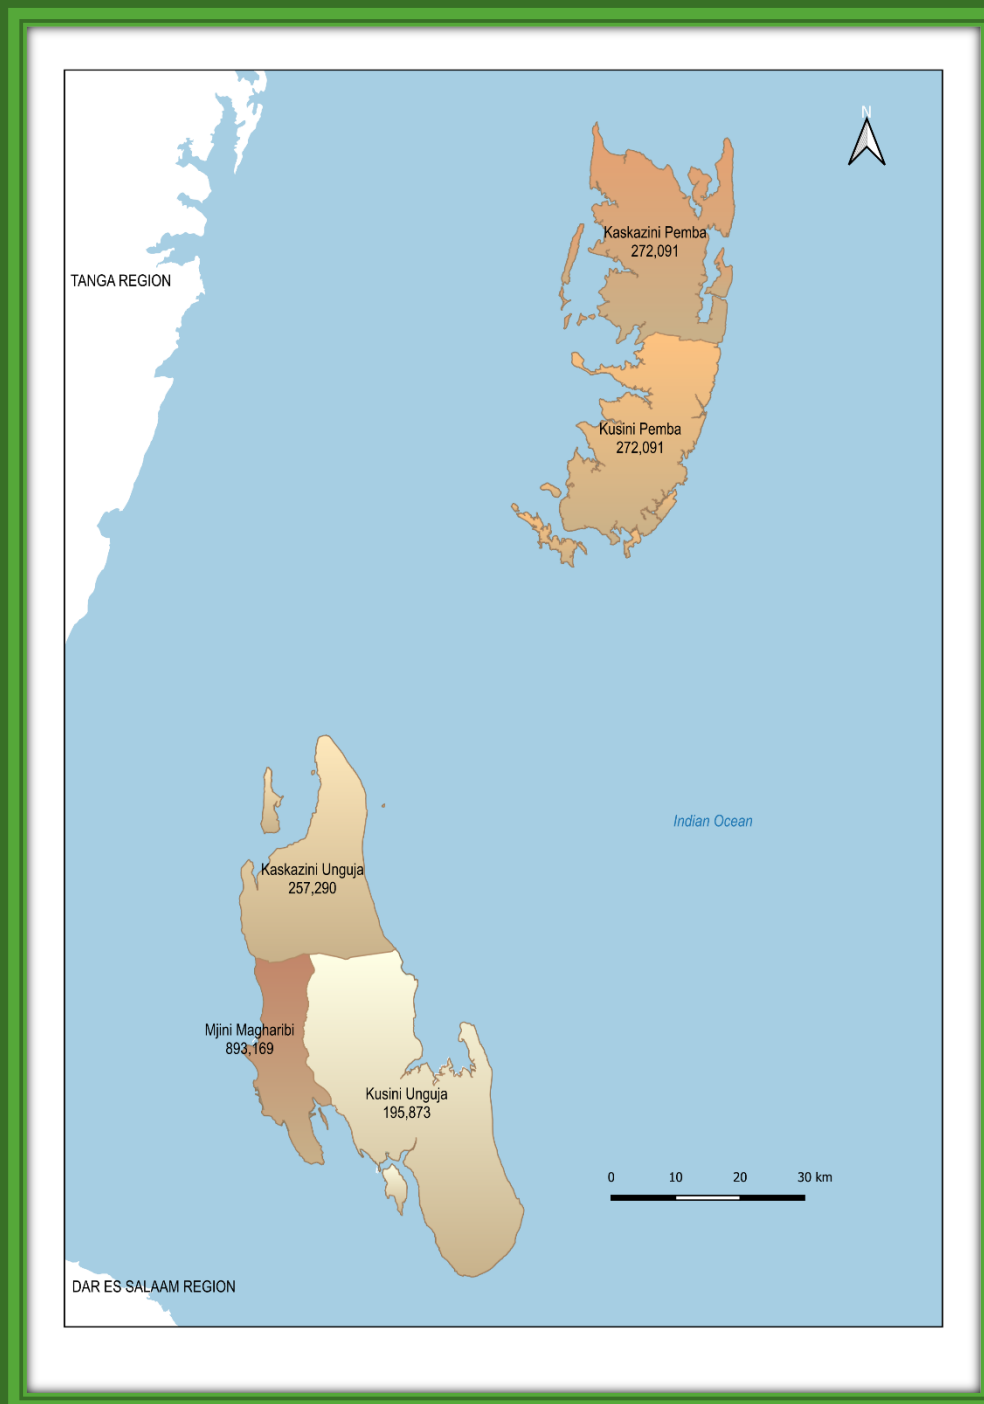

**Policy implication:** More females than males imply that females constitute a large population share in the country. Nonetheless, women are marginalized in terms of education and economic opportunities compared to men; thus, empowering them with equal opportunities will uplift a significant proportion of population from poverty to improved social and economic welfare.

## 2.2 Policy Recommendations

The best way to manage population growth depends on a combination of political will and effective socio-economic measures. In order to attain a sustainable economic development, poverty reduction, conserved environment, combat climate change and ensure an educated society as stipulated in the National Population Policy of 1992 and reviewed in 2006 and Zanzibar Population Policy of 2008, the following should be considered in short, medium and long-term development plans: -

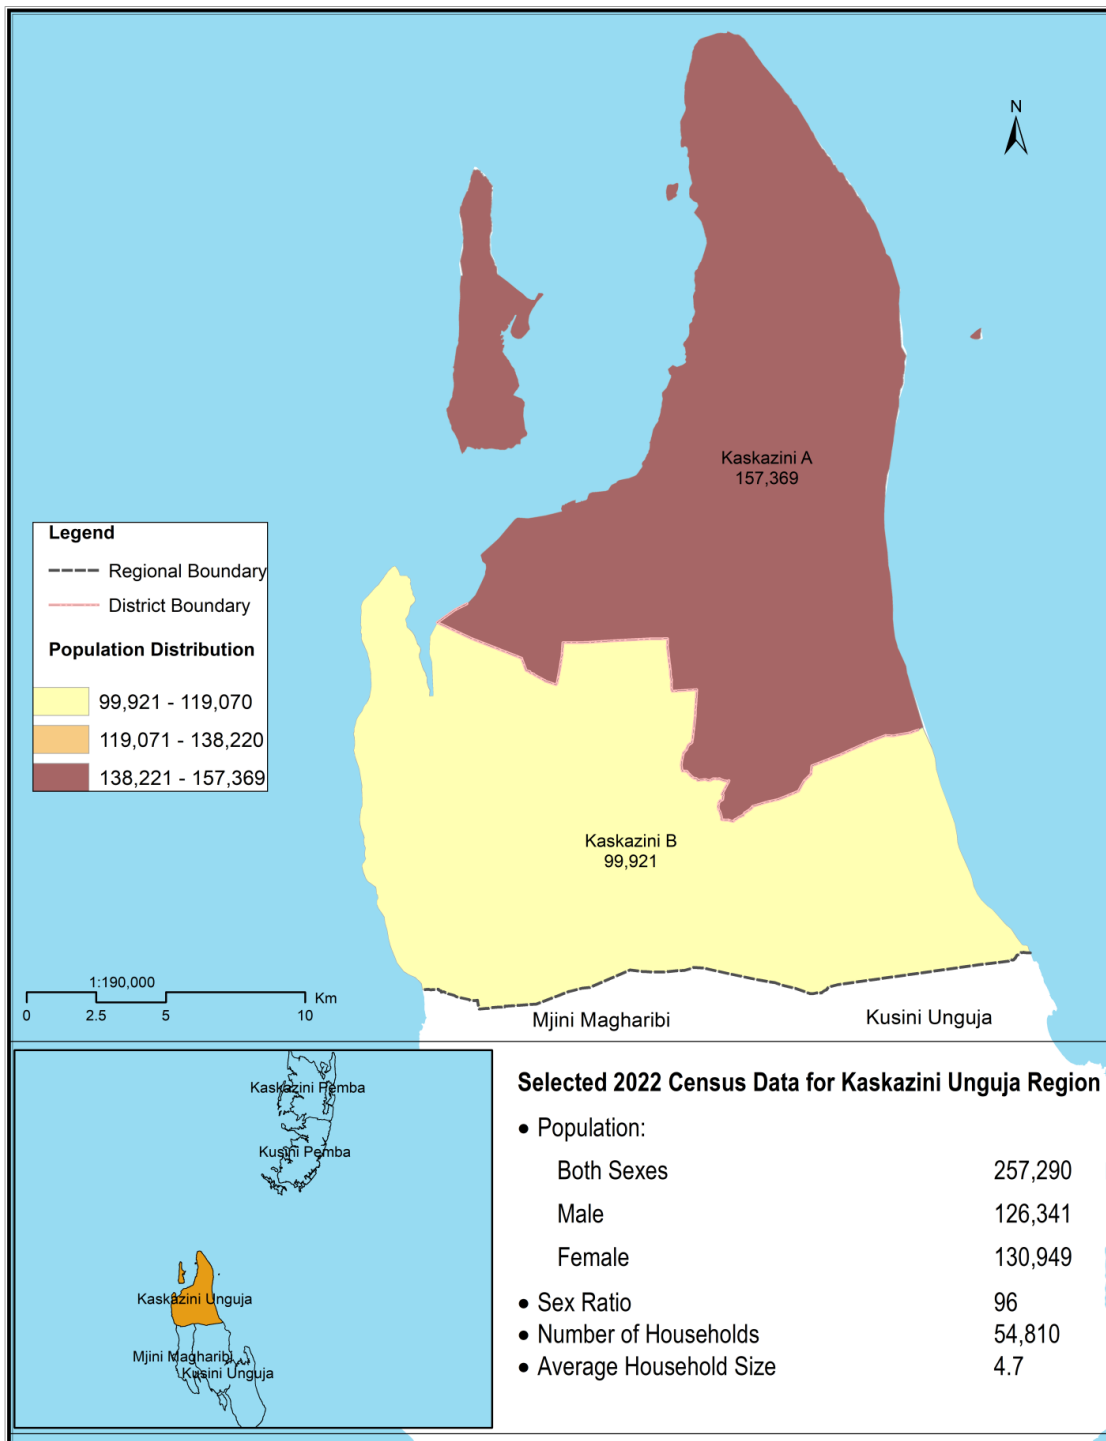

- a) Population growth should be managed through a set of variables, including reproductive health, education, employment, rural/urban migration, women empowerment and environmental management leading to the development of human resources and skills development. A direct consequence is better economic opportunities, improved household savings to stimulate investments and subsequent poverty reduction. More importantly, improvement of the standards of living and aspiration to better quality of life is expected to enhance the desire for small family sizes;
- b) Strengthen the Implementation of Zanzibar Environmental Policies in addressing effects on land use and marine activities for sustainable development of Zanzibar (Blue Economy)
- c) Enhance family planning education programmes and incorporate population growth and family planning into school curriculum;
- d) Integrate population management issues into National Development Plans;
- e) Establish a permanent population committee to plan, develop, and implement population policies and related research.
- f) Expand and enhance access to health and education facilities and services to enable the population effectively participate in the country's social economic development activities;
- g) Enhance production of food and cash crops, livestock as well as fishing industries.
- h) Enhance the implementation of Zanzibar Development Vision (ZDV 2050) and Zanzibar Development Plan (ZADEP) 2021 - 2026 which have a theme of realising competitiveness and industrialization for human development that aims to increase efficiency and productivity in manufacturing using the resources available in abundance within the country; It is important to ensure that economy has to grow three times as much as the population growth rate.
- i) Enforce fertility regulation and reducing mortality rates through better health, education and employment opportunities will stimulate household saving and investment.
- j) Revise the Zanzibar Environmental Management Act No.3 of 2015 to accommodate emerging issues resulting from increased population including high level of technology and the climate change.

## Section C: Population Distribution in Regions

# Region 1: Kaskazini Unguja

Map 1: Population Distribution by Council, Kaskazini Unguja Region; 2022 PHC

**Table 1.0: Population Distribution by Sex, Sex Ratio, Number of Households and Average Household Size by Council, Kaskazini Unguja Region; 2022 PHC**

Region/Council		Population			Sex Ratio	Number of Households	Average Household Size
		Both Sexes	Male	Female			
<b>Kaskazini Unguja Region</b>		<b>257,290</b>	<b>126,341</b>	<b>130,949</b>	<b>96</b>	<b>54,810</b>	<b>4.7</b>

## **Annex: List of Contributors**

---

### **Contributors to the Administrative Units Population Distribution Report – Tanzania Zanzibar**

#### **Census Commissars**

---

Hon. Anne Semamba Makinda (Tanzania Mainland)

Amb. Mohamed Haji Hamza (Tanzania Zanzibar)

#### **NBS/OCGS Board Chairpersons**

---

Dr. Amina Msengwa (NBS)

Amb. Amina Salum Ali (OCGS)

#### **NBS/OCGS Chief Government Statistician**

---

Dr. Albina Chuwa (NBS)

Salum Kassim Ali (OCGS)

#### **NBS and OCGS Directors**

---

Ruth Minja (NBS)

Fahima Mohamed Issa (OCGS)

Emilian Karugendo (NBS)

Bakari Kitwana Makame (OCGS)

Daniel Masolwa (NBS)

Haroub Ali Masoud (OCGS)

Daniel Ulindula Andrew (NBS)

Abdalla Khamis Abdalla (OCGS)

#### **Census Coordinator**

---

Seif Kuchengo (NBS)

Abdul-Majid Jecha Ramadhan (OCGS)

## **Authors/Reviewers**

---

Aldegunda Komba	Ramadhan Othman (NBS)
Dr. Mwinyi Mwinyi (NBS)	Boniface Simpoli (NBS)
Mariam Kitembe (NBS)	David Mwaipopo (NBS)
Phausta Ntigiti (NBS)	Hassan Jamal Hassan
Veronica Mwangoka (NBS)	Hilali Abdullah (NBS)
Said Mohamed Said (OCGS)	Henrick R. Mwellu (NBS)
Novat T. Buberwa (NBS)	Pastory Ulimali (NBS)
Asia Hassan Mussa (OCGS)	Philbert G. Mrema (NBS)
Deogratius Malamsha (NBS)	Amina Musa Khamis
Mdoka Omar (NBS)	Bakari Khamis Kondo
Hellen Hillary (NBS)	Kazija Khamis Said (OCGS)
Zawadi Biki (NBS)	Hashim Njowele (NBS)
Saidi K. Mnenge (TAMISEMI)	Zawadi Biki (NBS)
Livini Avith Morrice (NEC)	Richard Bakubiye (TAMISEMI)
George Joseph Miringay (TAMISEMI)	

## **Spatial Data Analysts**

---

Benedict Mugambi (NBS)	Khalid Lewanga (NBS)
Mohammed S. Gharib (OCGS)	Julieth Msuya (NBS)
Yunis Nota (NBS)	Nassir H. Salum (OCGS)

## **Data Processing**

---

Mwanaidi Mahiza (NBS)	Stephen S. Jutta (NBS)
Hashim Uzia Mohamed	Novat T. Buberwa (NBS)
Steven Lwendo (NBS)	Munir Mdee (NBS)
Bakar K. Omar	George Mockray
Beatrice Rwegoshora (NBS)	Emmanuel K. Chanya
Masele Mabula	Vicent Kaberengeta (NBS)

## Editorial Team

---

Mr. Cletus Mkai  
(Retired Director General, NBS)

Prof. Maurice Mbago  
(University of Dar es Salaam)

Prof. Milline Mbonile  
(University of Dar es Salaam)

Prof. Esther Ndungumaro  
(Mkwawa University College of Education)

Prof. Hijja Mwatawala  
(Institute of Rural Development Planning)

Dr. Joyce Peters Chonjo  
(Demographer/Economist)

Ahmed Mohamed Makbel  
(Statistician/Demographer)

Irenius Joseph Ruyobya  
(Statistician/Demographer)
