# Contents

Foreword .....	xix
Preface.....	xxi
Acknowledgments.....	xxiii
Author .....	xxv
<b>Chapter 1</b> Introduction .....	1
<b>Chapter 2</b> Conventional Methods for Handling Plant Chromosomes .....	11
2.1 Introduction .....	11
2.2 Mitotic Chromosomes .....	11
2.2.1 Collection of Roots.....	11
2.2.2 Pretreatment of Roots.....	13
2.2.2.1 Ice-Cold Water.....	13
2.2.2.2 8-Hydroxyquinoline (C <sub>9</sub> H <sub>7</sub> NO).....	14
2.2.2.3 Colchicine (C <sub>22</sub> H <sub>25</sub> O <sub>6</sub> N).....	14
2.2.2.4 $\alpha$ -Bromonaphthalene (C <sub>10</sub> H <sub>7</sub> Br).....	15
2.2.2.5 <i>p</i> -Dichlorobenzene (C <sub>6</sub> H <sub>4</sub> Cl <sub>2</sub> ).....	15
2.2.2.6 Nitrous Oxide (N <sub>2</sub> O).....	16
2.2.3 Fixation.....	17
2.2.3.1 Carnoy's Solution I.....	17
2.2.3.2 Carnoy's Solution II.....	18
2.2.3.3 Propionic Acid Alcohol .....	18
2.2.4 Staining of Mitotic Chromosomes .....	18
2.2.4.1 Preparation of Stain .....	18
2.2.4.2 Staining of Roots .....	21
2.2.5 Preparation of Chromosome Spread .....	23
2.2.5.1 Supplies.....	23
2.2.5.2 Chromosome Spreading .....	23
2.2.5.3 Giemsa Staining.....	32
2.3 Meiotic Chromosomes.....	38
2.3.1 Collection of Flower Buds.....	38
2.3.2 Fixation.....	40
2.3.2.1 Carnoy's Solution 1.....	40
2.3.2.2 Carnoy's Solution 2.....	40
2.3.2.3 Propionic Acid Alcohol .....	40
2.3.3 Staining of Meiotic Chromosomes.....	41
2.3.4 Preparation of Chromosome Slide .....	41
2.3.5 Observation of Cells.....	41
2.4 Supplies .....	43
References .....	44

<b>Chapter 3</b>	Smear Technique for Plant Chromosomes .....	47
3.1	Introduction .....	47
3.2	Chromosome Preparation from the Root .....	47
3.2.1	Enzyme Treatment .....	47
3.2.2	Preparation of Chromosome Spread .....	48
3.3	Chromosome Preparation from Cell Suspension and Callus .....	48
3.3.1	Chromosome Count in Suspension Culture .....	49
3.3.2	Chromosome Count in Callus .....	49
3.4	Chromosome Count from Leaf Explants .....	50
3.4.1	Potato.....	50
3.4.2	Beetroot.....	51
3.4.3	Rose.....	53
3.4.4	Banana.....	55
3.4.5	Coffee.....	56
3.4.6	Ag-NOR Banding.....	57
3.4.7	Hsc-FA Banding.....	57
3.4.8	Image Analysis.....	58
3.5	Chromosome Preparation from Flowers .....	59
3.5.1	Meiotic Chromosomes .....	59
	References .....	60
<b>Chapter 4</b>	Fluorescence <i>In Situ</i> Hybridization.....	63
4.1	Introduction .....	63
4.2	Equipment.....	63
4.3	DNA Isolation.....	63
4.3.1	Buffer/Tissue .....	64
4.3.2	Procedure .....	64
4.4	Nick Translation .....	66
4.4.1	Nick Translation System.....	66
4.4.2	Nick Translation Kit.....	66
4.4.3	Labeling Reaction with DIG-dUTP or Biotin-dUTP.....	66
4.4.4	Labeling Reaction with Fluorescein dUTP, AMCA-dUTP, or Tetramethyl-rhodamine-dUTP.....	67
4.4.5	Purification of Labeled Probe .....	68
4.4.6	Nick Translation Labeling of Double-Stranded DNA with DIG-, Biotin-, or Fluorochrome- Labeled dUTP .....	68
4.5	Preparation of Buffers .....	69
4.5.1	Preparation of CA-SC Buffer .....	69
4.5.2	Preparation of SSC Buffer.....	69
4.5.3	Preparation of 4× SSC + 0.2% Tween 20.....	69
4.5.4	Preparation of 2× SSC.....	69

4.6	Preparation of Enzyme Solution.....	69
4.7	Preparation of Slides for Soybean Chromosomes.....	69
4.7.1	Processing Slides through FISH .....	70
4.7.1.1	Pre-hybridization Method.....	71
4.7.1.2	Hybridization .....	71
4.7.1.3	Observation and Photography.....	72
4.8	Preparation of FISH Slides for Wheat Chromosomes .....	73
4.8.1	Chromosome Preparation.....	73
4.8.2	Procedure of FISH/GISH.....	74
4.8.2.1	Preparation of Stock Solution for FISH and GISH .....	74
4.8.2.2	Purification of Labeled Probe DNA .....	75
4.8.2.3	Random Primed DNA Labeling with Digoxigenin-dUTP .....	77
4.8.2.4	Random Primed DIG Labeling of DNA Fragment .....	78
4.8.3	Immunofluorescence of CENH3 of Wheat Centromere .....	78
4.8.3.1	Plant Materials and Chromosome Preparation .....	78
4.8.3.2	Immunodetection of CENH3 and FISH.....	79
4.8.3.3	Sequential Detection of CENH3, CRWs, pSc119, and pAs1 .....	80
4.8.3.4	Genome-Specific Markers and PCR.....	80
4.9	Genomic <i>In Situ</i> Hybridization.....	80
4.9.1	DNA Isolation.....	81
4.9.1.1	CTAB Method .....	81
4.9.1.2	Selective Precipitation of Polysaccharides.....	83
4.9.1.3	DNA Quantification.....	83
4.9.1.4	Nick Translation.....	84
4.9.2	Collection of Roots.....	85
4.9.3	Genomic <i>In Situ</i> Hybridization .....	85
4.9.4	Preparation of GISH Hybridization Mixture .....	86
4.9.5	Posthybridization.....	86
4.10	Multicolor Genomic <i>In Situ</i> Hybridization (McGISH) .....	87
4.11	Multicolor FISH for Wheat Genome.....	89
4.11.1	Genomic Library Construction .....	89
4.11.1.1	Slide Preparation.....	90
4.11.1.2	Probe Labeling Using VentR (exo-) Polymerase.....	92
4.11.1.3	FISH and Reprobing Procedures.....	93
4.11.2	Primed <i>In Situ</i> (Prins) DNA Labeling.....	94
4.11.3	FISH on Extended DNA Fiber: Fiber-FISH.....	95
4.11.3.1	Protocol-I: Fiber-FISH on Extended Nuclear DNA Fibers .....	96

	4.11.3.2 Protocol 2: Fiber-FISH Using BAC and Circular Molecules as Targets .....	100
	4.11.3.3 Protocol III: Staining Fibers (Yo-Yo Staining) .....	100
	4.11.3.4 Source of Chemicals .....	101
	References .....	101
<b>Chapter 5</b>	<b>Flow Analysis and Sorting of Plant Chromosomes .....</b>	<b>103</b>
5.1	Introduction .....	103
5.2	Basic Protocol 1 .....	103
	5.2.1 Accumulation of Root-Tip Cells in Mitotic Metaphase .....	103
	5.2.2 Materials .....	107
	5.2.3 Germination of Seeds .....	107
	5.2.4 Accumulation of Root-Tip Cells in Metaphase .....	108
5.3	Alternate Protocol 1 .....	108
	5.3.1 Accumulation of Root-Tip Cells in Mitotic Metaphase in Large-Seeded Legumes .....	108
	5.3.2 Additional Materials .....	108
5.4	Alternate Protocol 2 .....	109
	5.4.1 Accumulation of Root-Tip Cells at the Mitotic Metaphase by Nitrous Oxide Treatment .....	109
	5.4.2 Additional Materials .....	109
5.5	Alternate Protocol 3 .....	109
	5.5.1 Accumulation of Root-Tip Cells at the Mitotic Metaphase in Plant Species Where Seeds are Unavailable .....	109
	5.5.2 Additional Materials .....	109
	5.5.3 Grow the Roots .....	109
	5.5.4 Prepare for Treatments .....	110
5.6	Support Protocol 1 .....	110
	5.6.1 Analysis of the Degree of Metaphase Synchrony ....	110
	5.6.2 Materials .....	110
	5.6.3 Fix and Stain Cells .....	111
	5.6.4 Prepare and Analyze Squashes .....	111
5.7	Basic Protocol 2 .....	112
	5.7.1 Preparation of Suspensions of Intact Plant Chromosomes .....	112
	5.7.2 Materials .....	112
	5.7.3 Prepare Chromosome Suspension .....	112
	5.7.4 Examine Quality of Chromosomes .....	113
5.8	Basic Protocol 3 .....	113
	5.8.1 Univariate Flow Karyotyping of Plant Chromosomes .....	113

5.8.2	Materials.....	113
5.8.3	Perform Flow Cytometry .....	114
5.8.4	Sort Chromosomes .....	114
5.9	Alternate Protocol 4 .....	115
5.9.1	Bivariate Flow Karyotyping of Plant Chromosomes after FISHIS .....	115
5.9.2	Materials.....	115
5.9.3	Label DNA Repeats.....	115
5.9.4	Perform Flow Cytometry .....	116
5.9.5	Sort Chromosomes .....	116
5.10	Support Protocol 2.....	116
5.10.1	Preparation of Flow Sorter for Chromosome Sorting .....	116
5.10.2	Additional Materials.....	117
5.10.3	Set Up Flow Cytometer .....	117
5.10.4	Adjust Sorting Device .....	117
5.11	Basic Protocol 4.....	117
5.11.1	Chromosome Sorting for DNA Amplification .....	117
5.11.2	Materials.....	118
5.11.3	Sort Chromosomes .....	118
5.11.4	Purify and Amplify DNA .....	118
5.12	Alternate Protocol 5 .....	119
5.12.1	Single Chromosome Sorting and Amplification .....	119
5.12.2	Materials.....	119
5.12.3	Sort Chromosomes .....	119
5.12.4	Amplify DNA.....	119
5.13	Alternate Protocol 6 .....	120
5.13.1	Chromosome Sorting for Preparation of High Molecular Weight DNA (HMW DNA) .....	120
5.13.2	Materials.....	120
5.13.3	Prepare HMW DNA from Flow-Sorted Chromosomes.....	120
5.14	Alternate Protocol 7 .....	121
5.14.1	Chromosome Sorting for Proteomic Analyses .....	121
5.14.2	Materials.....	121
5.14.3	Methods.....	121
5.15	Support Protocol 3.....	121
5.15.1	Estimation of Purity in Sorted Fractions Using FISH.....	121
5.15.2	Materials.....	122
5.15.3	Sort Chromosomes .....	122
5.15.4	Perform FISH Reaction.....	122
5.15.5	Reagents and Solutions.....	123
5.15.5.1	Amiprophos-methyl (APM) Treatment Solutions .....	123

5.15.5.2	Blocking Reagent.....	123
5.15.5.3	DAPI (4', 6-Diamidino-2-phenylindole) Stock Solution, 0.1 mg/mL .....	123
5.15.5.4	ET Buffer .....	124
5.15.5.5	Formaldehyde Fixative .....	124
5.15.5.6	Fructose Syrup.....	124
5.15.5.7	Hoagland's Nutrient Solution, 0.1×.....	124
5.15.5.8	Hoagland's Nutrient Solution, 1×.....	125
5.15.5.9	Hoagland's Solution A .....	125
5.15.5.10	Hoagland's Solution B .....	125
5.15.5.11	Hoagland's Solution C .....	125
5.15.5.12	Hoagland's Stock Solution, 10×.....	125
5.15.5.13	Hybridization Mix (FISH).....	125
5.15.5.14	Hydroxyurea Treatment Solutions .....	126
5.15.5.15	Isolation Buffer, 1.5× (1.5× IB).....	126
5.15.5.16	Isolation Buffer, 10× (10× IB).....	126
5.15.5.17	LB01 Buffer .....	126
5.15.5.18	LB01-P Buffer, 1×.....	127
5.15.5.19	LB01-P Buffer, 10×.....	127
5.15.5.20	Lysis Buffer (Single Chromosome Amplification).....	127
5.15.5.21	Lysis Buffer B (HMW DNA) .....	127
5.15.5.22	Lysis Buffer C (HMW DNA) .....	128
5.15.5.23	NaOH Solution, 10 M .....	128
5.15.5.24	Neutralization Buffer (Single Chromosome Amplification).....	128
5.15.5.25	Oryzalin Solutions .....	128
5.15.5.26	P5 Buffer.....	128
5.15.5.27	Phenylmethanesulfonylfluoride (PMSF) Stock Solution, 100 mM.....	128
5.15.5.28	Proteinase K Buffer, 40×.....	129
5.15.5.29	Proteinase K Stock Solution, 10 mg/mL.....	129
5.15.5.30	Schiff's Reagent.....	129
5.15.5.31	SSC Solutions .....	129
5.15.5.32	Tris Buffer.....	129
5.15.5.33	Tris Cl, 1 M.....	129
5.16	Commentary .....	130
5.16.1	Background Information .....	130
5.16.2	Materials Used for Preparation of Plant Chromosome Suspensions.....	132
5.16.3	Cell Cycle Synchronization and Accumulation of Metaphase Chromosomes .....	132
5.16.4	Preparation of Chromosome Suspensions.....	133
5.16.5	Flow Karyotyping .....	134
5.16.6	Chromosome Sorting .....	135

5.16.7	Utility of Sorted Chromosome Fractions .....	135
5.16.8	Critical Parameters and Troubleshooting.....	138
5.16.8.1	Cell Cycle Synchronization and Metaphase .....	138
5.16.8.2	Preparation of Chromosome Suspension....	139
5.16.8.3	Flow Karyotyping.....	140
5.16.8.4	Chromosome Sorting.....	141
5.16.8.5	Estimation of Purity of Sorted Fractions using FISH .....	141
5.16.8.6	Multiple Displacement Amplification of Chromosomal DNA.....	142
5.16.8.7	Single Chromosome Sorting and Amplification .....	142
5.16.8.8	Preparation of HMW DNA .....	143
5.16.8.9	Proteomic Analyses .....	143
5.17	Anticipated Results.....	143
5.17.1	Preparation of Chromosome Suspensions.....	143
5.17.2	Flow Karyotyping and Chromosome Sorting.....	143
5.17.3	Determining the Purity of Sorted Chromosome Fractions Using FISH.....	144
5.17.4	DNA Amplification .....	145
5.17.5	Preparation of HMW DNA .....	145
5.17.6	Time Considerations.....	145
5.17.7	Preparation of Chromosome Suspensions.....	145
5.17.8	FISHIS.....	146
5.17.9	Flow Analysis and Sorting .....	146
5.17.10	Estimating the Purity of Sorted Chromosomes .....	146
5.17.11	Single Chromosome DNA Amplification .....	146
5.17.12	Preparation of HMW DNA .....	147
5.17.13	Proteomic Analyses.....	147
	References .....	147

## Chapter 6 Pollen Staining ..... 155

6.1	Introduction .....	155
6.2	Protocols for Pollen Fertility .....	155
6.2.1	Acetocarmine Stain.....	155
6.2.1.1	Fertile Pollen Grains.....	155
6.2.1.2	Sterile Pollen Grains.....	158
6.2.2	Iodine–Potassium Iodide (I <sub>2</sub> –KI Stain).....	158
6.2.3	Alexander Stain.....	158
6.2.3.1	Ingredients .....	160
6.2.3.2	Staining.....	161
6.2.3.3	Stain Solution.....	161
6.2.4	Differential Staining of Pollen .....	164
6.2.4.1	Staining of Pollen with Thin Wall.....	164

	6.2.4.2	Staining of Pollen with Thick and Spiny Walls.....	164
	6.2.4.3	Staining of Pollen inside a Nondehiscent Anther .....	165
6.3		Pollen–Stigma Incompatibility.....	165
	6.3.1	Pollen Germination Test.....	165
	6.3.1.1	Method.....	166
	6.3.1.2	Pollen Culture .....	166
	6.3.1.3	Humidity Chamber .....	166
	6.3.1.4	Microscopic Examination.....	167
	6.3.2	Staining Pistils with Aniline Blue.....	169
	6.3.3	Cleared-Pistil Method .....	170
	6.3.4	Modified Cleared-Pistil Method .....	173
6.4		Chromosome Count in Pollen .....	173
	6.4.1	Stain.....	173
		References .....	176
<b>Chapter 7</b>		<b>Cell Division.....</b>	<b>177</b>
	7.1	Introduction .....	177
	7.2	Mitosis .....	177
	7.2.1	Process of Mitosis .....	177
	7.2.1.1	Interphase .....	177
	7.2.1.2	Prophase.....	179
	7.2.1.3	Metaphase.....	179
	7.2.1.4	Anaphase .....	179
	7.2.1.5	Telophase .....	179
	7.2.1.6	Cytokinesis .....	180
	7.3	Meiosis.....	181
	7.3.1	Process of Meiosis.....	181
	7.3.1.1	Cycle 1 .....	181
	7.3.1.2	Cycle 2 .....	185
	7.4	Gametogenesis.....	185
	7.5	Fertilization .....	187
		References .....	187
<b>Chapter 8</b>		<b>Mode of Reproduction in Plants.....</b>	<b>189</b>
	8.1	Sexual Reproduction.....	189
	8.2	Asexual Reproduction .....	189
	8.2.1	Types of Apomixis .....	191
	8.2.1.1	Gametophytic Apomixis.....	191
	8.2.1.2	Apospory Apomixis .....	192
	8.2.1.3	Adventitious Embryony .....	192
	8.2.1.4	Polyembryony .....	193
	8.2.2	Endosperm Development in Apomixis .....	193
	8.2.2.1	Autonomous Endosperm Development ....	193

8.2.3	Pseudogamous Endosperm Development .....	193
8.2.4	Identification of Apomixis .....	194
8.3	Classification of Plants Based on Natural Crossing .....	194
8.4	Apomixis in Crop Improvement.....	197
8.5	Vegetative Reproduction.....	197
8.5.1	Vegetative Reproduction by Specialized Vegetative Organs .....	197
8.5.1.1	Bulb.....	197
8.5.1.2	Corm .....	197
8.5.1.3	Runners (Stolons).....	197
8.5.1.4	Rhizomes .....	200
8.5.1.5	Tubers.....	201
8.5.2	Vegetative Reproduction by Adventitious Roots and Shoots .....	203
8.5.3	Vegetative Reproduction by Grafting.....	203
8.5.4	Vegetative Reproduction by Tissue Culture.....	205
8.5.5	Advantages of Vegetative Reproduction .....	205
8.6	Methodologies for Producing Amphidiploidy .....	206
8.6.1	Colchicine.....	206
8.6.2	Nitrous Oxide .....	207
8.7	Barriers to Crossability in Plants .....	208
	References .....	208

## **Chapter 9** Karyotype Analysis..... 209

9.1	Introduction .....	209
9.2	Nomenclature of Chromosomes .....	209
9.3	Karyotype Analysis by Mitotic Metaphase Chromosomes .....	211
9.3.1	Chromosome 1 (7H).....	211
9.3.2	Chromosome 2 (2H).....	212
9.3.3	Chromosome 3 (3H).....	212
9.3.4	Chromosome 4 (4H).....	213
9.3.5	Chromosome 5 (1H).....	213
9.3.6	Chromosome 6 (6H).....	213
9.3.7	Chromosome 7 (5H).....	213
9.4	Karyotype Analysis by Pachytene Chromosomes .....	213
9.5	Karyotype Analysis by Flow Cytometry.....	214
9.6	Karyotype Analysis by Image Analysis .....	216
	References .....	217

## **Chapter 10** Classical Methods for Associating Genes with the Chromosomes .....

10.1	Introduction .....	219
10.2	Monohybrid Inheritance .....	220
10.2.1	Complete Dominance.....	220
10.2.2	Incomplete Dominance .....	220

10.3	Dihybrid Inheritance .....	222
10.4	Gene Interaction and Expression.....	224
10.4.1	Lethal Genes .....	224
10.4.2	Complementary Genes .....	225
10.4.3	Epistasis.....	225
10.4.3.1	Dominant Epistasis (12:3:1) .....	225
10.4.3.2	Dominant Suppression Epistasis (13:3).....	226
10.4.4	Color Reversion (9:3:4).....	227
10.4.5	Complete Dominance at Both Gene Pairs (15:1).....	227
10.5	Test of Independence .....	229
10.5.1	Two Independent Nongenetic Events— Two-Coin Tosses .....	229
10.5.2	Four Independent Nongenetic Events— Four-Coin Tosses.....	230
10.6	Genetic Mapping of Chromosomes.....	232
10.6.1	Classical Method.....	232
10.6.2	Chromosome Mapping.....	234
10.6.2.1	Crossing Over and Crossover Frequency.....	234
10.6.2.2	Three-Point Testcross .....	236
10.6.2.3	Interference and Coincidence .....	237
10.7	Rise and Decline of Plant Cytogenetics .....	238
	References .....	239
<b>Chapter 11</b>	<b>Structural Chromosome Changes for Locating the Genes .....</b>	<b>241</b>
11.1	Deficiencies .....	241
11.1.1	Origin of Deficiencies .....	241
11.1.2	Identification of Deficiencies.....	241
11.1.3	Genetic Studies.....	241
11.2	Duplications.....	242
11.2.1	Classification of Duplications.....	242
11.2.2	Origin of Duplications.....	242
11.2.3	Genetic Studies.....	243
11.3	Chromosomal Interchanges.....	243
11.3.1	Origin of Interchanges.....	243
11.3.2	Identification.....	243
11.3.2.1	Cytological Method .....	243
11.3.2.2	Pollen Fertility .....	245
11.3.3	Genetic Studies.....	245
11.3.4	Principles of Producing Interchange Testers.....	246
11.4	Trisomics .....	246
11.4.1	Primary Trisomics.....	247
11.4.1.1	Identification of Primary Trisomics .....	247
11.4.2	Secondary Trisomics.....	250
11.4.2.1	Identification of Secondary Trisomics.....	251

11.4.2.2 Genetic Segregation in Secondary Trisomics .....	251
11.4.3 Tertiary Trisomics .....	251
11.4.3.1 Identification of Tertiary Trisomics .....	252
11.4.3.2 Genetic Segregation in Tertiary Trisomics .....	253
11.4.4 Telotrisomics .....	253
11.4.4.1 Identification of Telotrisomics .....	254
11.4.4.2 Genetic Segregation in Telotrisomics .....	254
11.4.5 Acrotrisomics .....	257
11.4.5.1 Identification of Acrotrisomics .....	257
11.4.5.2 Genetic Segregation in Acrotrisomics .....	258
References .....	258
 <b>Chapter 12</b> Wide Hybridization .....	 261
12.1 Introduction .....	261
12.2 Gene Pool Concept .....	261
12.3 Utilization of the Tertiary Gene Pool .....	263
12.4 The Assemblage of Large Germplasm .....	263
12.5 Wide Hybridization in Soybean .....	264
12.5.1 Selection of Parents in Wide Hybridization .....	264
12.5.2 Emasculation .....	265
12.5.3 Embryo Rescue .....	267
12.5.4 Production of F <sub>1</sub> and Amphidiploid Plants .....	271
12.5.5 Production of BC <sub>1</sub> and BC <sub>2</sub> Plants .....	272
12.5.6 Production of BC <sub>3</sub> F <sub>1</sub> Plants .....	274
12.5.7 Production of BC <sub>3</sub> F <sub>2</sub> Plants and Beyond .....	274
12.5.8 Isolation of Monosomic Alien Addition Lines .....	274
12.5.9 Broadening the Cytoplasm of the Soybean .....	274
