CAPTURE

Version 2

CAPTURE is a system of programs for inserting graphics into T_EX, on IBM™ PC systems with LaserJet™ (and PostScript™) printers.

- Acquire graphics from redirected printer output, the screen, or file conversion from TIFF and PCX formats.
- Convert graphics to

and from PCX format for image editing.

- Convert graphics to PK/TFM format for inclusion in PostScript™ T_EX documents.

- Tested with PCT_EX™, Turbo-T_EX™, μT_EX™, and T_EXPlus™; DOS™ 2–5, Windows™ 3.0–3.1, LaserJet II and LaserJet III.
- Optionally remove extra white space.
- *Scale graphics to virtually any size.*
- Comes complete with T_EX and L_AT_EX insertion macros, printer capture, screen capture, and file conversion utilities.

CAPTURE is designed to work with T_EX. Graphics files are processed to remove all control codes and positioning commands that can disrupt T_EX. Graphics can be manipulated by T_EX and treated as any other font of type. Graphics and text are intermingled gracefully, using the full power of T_EX. Notice how the text wraps around the graphics in this advertisement; it was all done with T_EX. In addition, CAPTURE can convert graphics to the T_EX standard PK/TFM file format. Graphics literally become a T_EX type font and can be used with any T_EX platform. For example, IBM/PC graphics from application programs that support the LaserJet can be inserted into PostScript documents, or used with VMS or UNIX systems.

Version 1 Customers: *Wynne-Manley is charging nothing to upgrade.*

Version 2 upgrade is available from Micro Programs (see below) for a nominal media and handling charge. And we thank you for your support.

For T_EX Users . . .

New Services and Prices from Computer Composition Corporation

We are pleased to announce the installation of several ***new output services*** now available to T_EX users:

1. High Resolution Laser Imaging (1200 dpi) from Postscript diskette files created on either Mac- or PC-based systems.
2. High Resolution Laser Imaging (960 dpi) from DVI magnetic tape or diskette files using a variety of typefaces in addition to the Computer Modern typeface family.
3. High quality laser page proofs at 480 dpi.
4. **NEW PRICING** for high resolution laser imaging:
 - a. From **Postscript text files** in volumes over 400 pages **\$2.00 per page**
 - b. From **Postscript text files** in volumes between 100 & 400 pages **\$2.25 per page**
 - c. From **Postscript text files** in volumes below 100 pages . . **\$2.40 per page**
 - d. From **DVI files** in volumes over 400 pages **\$2.15 per page**
 - e. From **DVI files** in volumes between 100 & 400 pages **\$2.30 per page**
 - f. From **DVI files** in volumes below 100 pages **\$2.45 per page**

NOTE: DEDUCT \$1.00 FROM THE ABOVE PRICES FOR HIGH QUALITY LASER PAGE PROOFS.

5. **All jobs shipped within 48 hours.**

Call or write for page samples or send us your file and we will image it on the output unit of your choice.

TEX Publishing Services

From the Basic:

The American Mathematical Society offers you two basic, low cost TEX publishing services.

- You provide a DVI file and we will produce typeset pages using an Autologic APS Micro-5 phototypesetter. \$5 per page for the first 100 pages; \$2.50 per page for additional pages.
- You provide a PostScript output file and we will provide typeset pages using an Agfa/Compugraphic 9600 imagesetter. \$7 per page for the first 100 pages; \$3.50 per page for additional pages.

There is a \$30 minimum charge for either service. Quick turnaround is also provided... a manuscript up to 500 pages can be back in your hands in one week or less.

To the Complex:

As a full-service TEX publisher, you can look to the American Mathematical Society as a single source for any or all your publishing needs.

Macro-Writing	TEX Problem Solving	Non-CM Fonts	Keyboarding
Art and Pasteup	Camera Work	Printing and Binding	Distribution

For more information or to schedule a job, please contact Regina Girouard, American Mathematical Society, P. O. Box 6248, Providence, RI 02940, or call 401-455-4060.

FOR YOUR TEX TOOLBOX

CAPTURE

Capture graphics generated by application programs. Make LaserJet images compatible with TEX. Create pk files from pcl or pcx files. \$135.00

texpic

Use texpic graphics package to integrate simple graphics—boxes, circles, ellipses, lines, arrows—into your TEX documents. \$79.00

Voyager

TEX macros to produce viewgraphs—including bar charts—quickly and easily. They provide format, indentation, font, and spacing control. \$25.00

FOR YOUR TEX BOOKSHELF

TEX BY EXAMPLE

Input and output are shown side-by-side. Quickly see how to obtain desired output. \$19.95

TEX BY TOPIC

Learn to program complicated macros. . . . \$29.25

TEX FOR THE IMPATIENT

Includes a complete description of TEX's control sequences. \$29.25

TEX FOR THE BEGINNER

A carefully paced tutorial introduction. . . \$29.25

BEGINNER'S BOOK OF TEX

A friendly introduction for beginners and aspiring "wizards." \$29.95

TurboTEX

Typesetting Software

Executables \$150
With Source \$300

THE MOST VERSATILE TEX ever published is breaking new ground in the powerful and convenient graphical environment of Microsoft Windows: TurboTEX Release 3.1E. TurboTEX runs on all the most popular operating systems (Windows, MS-DOS, OS/2, and UNIX) and provides the latest TEX 3.14 and METAFONT 2.7 standards and certifications: preloaded plain TEX, L^ATEX, AMS-TEX and AMS-L^ATEX, previewers for PC's and X-servers, METAFONT, Computer Modern and L^ATEX fonts, and printer drivers for HP LaserJet and DeskJet, PostScript, and Epson LQ and FX dot-matrix printers.

■ **Best-selling Value:** TurboTEX sets the world standard for power and value among TEX implementations: one price buys a complete, commercially-hardened typesetting system. *Computer* magazine recommended it as "the version of TEX to have," *IEEE Software* called it "industrial strength," and thousands of satisfied users around the globe agree. TurboTEX gets you started quickly, installing itself automatically under MS-DOS or Microsoft Windows, and compiling itself automatically under UNIX. The 90-page User's Guide includes generous examples and a full index, and leads you step-by-step through installing and using TEX and METAFONT.

■ **Classic TEX for Windows.** Even if you have never used Windows on your PC, the speed and power of TurboTEX will convince you of the benefits. While the TEX command-line options and *TEXbook* interaction work the same, you also can control TEX using friendly icons, menus, and

dialog boxes. Windows protected mode frees you from MS-DOS limitations like DOS extenders, overlay swapping, and scarce memory. You can run long TEX formatting or printing jobs in the background while using other programs in the foreground.

■ **MS-DOS Power, Too:** TurboTEX still includes the plain MS-DOS programs. Virtual memory simulation provides the same sized TEX that runs on multi-megabyte mainframes, with capacity for large documents, complicated formats, and demanding macro packages.

■ **Source Code:** The portable C source to TurboTEX consists of over 100,000 lines of generously commented TEX, TurboTEX, METAFONT, previewer, and printer driver source code, including: our WEB system in C; PASCAL, our proprietary Pascal-to-C translator; Windows interface; and preloading, virtual memory, and graphics code, all meeting C portability standards like ANSI and K&R.

■ **Availability & Requirements:** TurboTEX executables for IBM PC's include the User's Guide and require 640K, hard disk, and MS-DOS 3.0 or later. Windows versions run on Microsoft Windows 3.0 or 3.1. Order source code (includes Programmer's Guide) for other machines. On the PC, source compiles with Microsoft C, Watcom C 8.0, or Borland C++ 2.0; other operating systems need a 32-bit C compiler supporting UNIX standard I/O. Specify 5-1/4" or 3-1/2" PC-format floppy disks.

■ **Upgrade at Low Cost.** If you have TurboTEX Release 3.0, upgrade to the latest version for just \$40 (ex-

ecutables) or \$80 (including source). Or, get either applicable upgrade free when you buy the AP-TEX fonts (see facing page) for \$200!

■ **No-risk trial offer:** Examine the documentation and run the PC TurboTEX for 10 days. If you are not satisfied, return it for a 100% refund or credit. (Offer applies to PC executables only.)

■ **Free Buyer's Guide:** Ask for the free, 70-page Buyer's Guide for details on TurboTEX and dozens of TEX-related products: previewers, TEX-to-FAX and TEX-to-Ventura/Pagemaker translators, optional fonts, graphics editors, public domain TEX accessory software, books and reports.

Ordering TurboTEX

Ordering TurboTEX is easy and delivery is fast, by phone, FAX, or mail. Terms: Check with order (free media and ground shipping in US), VISA, Mastercard (free media, shipping extra); Net 30 to well-rated firms and public agencies (shipping and media extra). Discounts available for quantities or resale. International orders gladly expedited via Air or Express Mail.

TYPESET QUALITY WITH THE EASE OF WORD PROCESSING

SPRINGER FOR T_EXNOLOGY

R. Seroul, Université Louis Pasteur,
Strasbourg, France; S. Levy, University of
Minnesota, Minneapolis, MN

A Beginner's Book of T_EX

This is a friendly introduction to T_EX, the powerful typesetting system developed by Don Knuth. It is addressed primarily to beginners, but contains much information that will be useful to aspiring T_EX wizards. Moreover, the authors kept firmly in mind the diversity of backgrounds that characterize T_EX users: authors in the sciences and the humanities, secretaries, and technical typists. The book contains a wealth of examples and many "tricks" based on the authors' long experience with T_EX.

Contents: What is T_EX? • The Characteristics of T_EX • Groups and Modes • The Fonts T_EX Uses • Spacing, Glue and Springs • Paragraphs • Page Layout • Boxes • Alignments • Tabbing • Typesetting Mathematics • T_EX Programming • Dictionary and Index
1991/283 pp./Softcover \$29.95/ISBN 0-387-97562-4

T_EX in Practice

A recent surge of good T_EX implementations for PC's has put T_EX on the disks of many people including writers, designers, desktop publishers, and engineers. With such increased interest in T_EX, there is a need for good T_EX books. **T_EX in Practice** is the ideal reference and guide for the T_EX community. The four-volume set is written by an acknowledged expert in the field and addresses the needs of the T_EX novice to the more experienced "T_EXpert." The book provides step-by-step introduction to the various functions of T_EX with many relevant examples.

The T_EX Users Group
is seeking applicants for the position of
Executive Director

The individual selected for this position will oversee the business and information dissemination activities of TUG; direct the promotional program to develop membership and TUG activities; develop a program of volunteer efforts for TUG activities; manage a small office staff with clerical, technical, and bookkeeping functions; and interact with TUG members and others in fields of interest to TUG. The Executive Director will report to TUG Board of Directors.

The following criteria will be considered as applicants are evaluated:

- experience in managing a business;
- skill in managing the retrieval, organization and dissemination of information;
- experience with the program T_EX and related programs;
- computer experience and capability of understanding technical questions regarding T_EX and related programs;
- good writing and speaking skills;
- good interpersonal skills;
- knowledge of considerations in managing a professional, non-profit association.

Applicants for this position should send indication of their interest and copies of their *curricula vitae* to:

Search Committee

TEX *without* Bitmaps

Wouldn't it be nice to be able to preview DVI files at any magnification, not just those for which bitmap fonts have been pre-built? Or to produce truly resolution-independent output that will run on any PostScript device, whether image setter or laser printer?

Perhaps you are looking for an alternative to Computer Modern? Well, there now exist complete outline font sets which include math fonts that are direct replacements for those in CM. Even if you do want to remain faithful to CM, there are distinct advantages to switching to the outline version of the fonts. We supply the tools to do all of this:

DVIWindo — *preview DVI files calling for outline fonts*

- * Preview at arbitrary magnification
- * Preview in Windows™ — a simple, standardized user interface
- * Print to any printer with a Windows printer driver
- * Show EPSF files with preview on screen — and insert TIFF images.

DVIPSONE — *partial font downloading for speed and efficiency*

- * Avoid running out of memory on the printer
- * Produce truly resolution-independent output
- * Designed from the bottom up for use with outline fonts on the PC

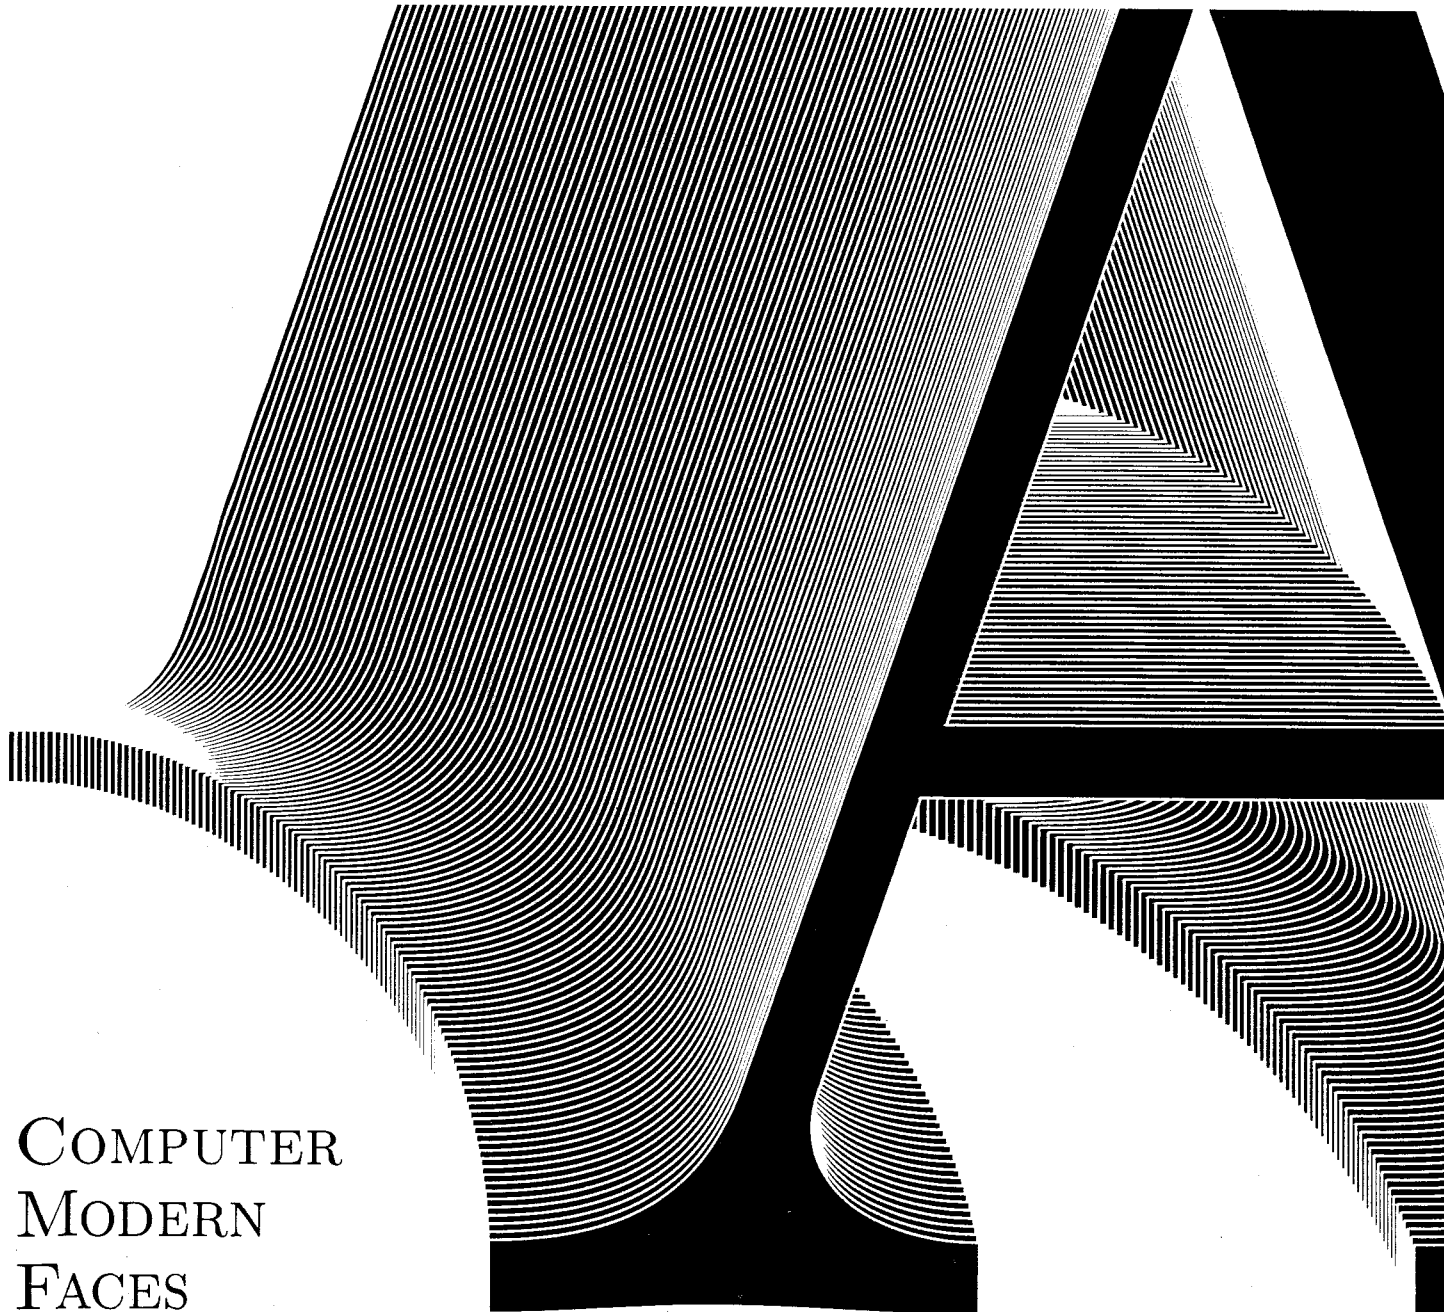

Fonts — *available from Y&Y in Adobe Type 1™ form (ATM compatible)*

- * BSR Computer Modern fonts — with accented characters built in
- * L^AT_EX + S^LT_EX fonts in outline form
- * Euler font set — the most popular faces from the A_MS font set.
- * Lucida®Bright + LucidaBrightMath — a complete alternative to CM

Resolution-independent PostScript files using outline fonts can be printed by any service bureau, not just those with T_EXpertise — and that translates into considerable savings for you. Perhaps it is time to get rid of those huge, complex directories full of bitmap fonts?
