Java

Python

PROFILE

I'm deeply curious about web applications and their infrastructure. By understanding them better, I can create tests that ensure quality and help the product evolve.

EMPLOYMENT HISTORY

Software Engineer, Sofist

Remote

Aug 2021 — Present

Conducted load testing, capacity planning, and stress tests using JMeter, Dynatrace, and Grafana, assessed the impact on various microservices and overall infrastructure, created performance reports highlighting areas of improvement, presented findings to the responsible team and maintained and developed Python internal microservices.

Software QA Engineer, Thomson Reuters

Criciúma

May 2018 — Jul 2021

I undertook detailed planning and integration for multiple software changes and projects. I developed and executed comprehensive test cases and scripts, both manual and automated. Likewise, I consistently created detailed test plan documents, adhering to organization-specific testing protocols. My responsibilities also included reporting test outcomes and collaborating with teams for effective feedback and process improvement, all geared towards ensuring optimal software quality.

EDUCATION

Bachelors Degree in Computer Science,
Universidade do Extremo Sul Catarinense
(UNESC)

Criciúma

Mar 2017 — Dec 2022
