

**RESIDENTIAL POPULATION AND COMPONENTS OF CHANGE
NEW YORK STATE COUNTIES, 2000 TO 2005**

Resident population is estimated annually at the mid-year point of the year, July 1, by the U.S. Bureau of the Census. The components of change are produced by using actual birth and death data and an estimate of net-migration based on a residual method.

METHODOLOGY

Using the latest Decennial Census as a base, current estimates of resident population are prepared using actual vital statistics data from the National Center for Health Statistics (NCHS) and an estimate of net migration using Internal Revenue Service tax returns. Resident population includes military populations and persons living in institutions. These estimates are produced through the Federal-State Cooperative Program for Population Estimates.

REVISIONS:

This data is subject to annual revision back to the most recent Census date and supercedes previously released estimates. Note that the 2000 Census counts in this report reflect revisions subsequent to the original release of the Census.

- 1 - Revised Decennial Census counts include changes made subsequent to the original Census release.
- 2 - Net migration represents the total of net internal migration, net international migration, and a small error adjustment to account for national and state population controls.
- 3 - New York City and Putname, Rockland, Westchester counties are New York State parts of the New York Metropolitan Division.
- 4 - In 2003, the Office of Management and Budget issued new area definitions for metropolitan areas. These definitions recognize metropolitan areas (an urban core of 50,000 or more) and micropolitan areas (an urban core of between 10,000 and 49,999).
- 5 - Upstate New York is defined as the New York State total, minus the five counties of New York City, Nassau, Putnam, Rockland, Suffolk, and Westchester.
