23	Legal Notice on Publication of the Details of the Breakdown of the National and State Provisional Totals 2006 Census	B 175 - 198

Printed and published by The Federal Government Printer, Lagos, Nigeria

PGP 71 A2007 2,500 (11/24)

Annual subscription (from 1st January, 2006) is (local) ₦15,000.00 (Overseas) ₦21,500.00 [Surface Mail] ₦24,500.00 [Second Class Air Mail]. Present issue, ₦2,500.00 per copy. Subscribers who wish to obtain *Gazette* after 1st January should apply to the Federal Government Printer, Lagos for amended Subscriptions.

**CONSTITUTION OF THE FEDERAL REPUBLIC OF NIGERIA
(CAP C. 23 LFN)**

**LEGAL NOTICE ON PUBLICATION OF THE DETAILS
OF THE BREAKDOWN OF THE NATIONAL AND
STATE PROVISIONAL TOTALS 2006 CENSUS**

WHEREAS :

The National Population Commission conducted national population and housing census between the 21st and 27th March, 2006, followed by a post enumeration survey in June, 2006 ;

The National Population Commission has as required by the Constitution of the Federal Republic of Nigeria, 1999, delivered to me the report of the said Population and Housing Census 2006 ;

I have accepted the report on the advice of the Council of State ;

The report has been laid on the table of each House of the National Assembly ;

The detailed report on the Census 2006 and provisional results was published in Federal Government's Extraordinary *Gazette*, No. 4 of 19th January, 2007, Vol. 94 as Statutory Instrument No. 5 ;

AND the National Population Commission has presented to me DETAILS OF THE BREAKDOWN OF THE NATIONAL AND STATE PROVISIONAL POPULATION TOTALS 2006 CENSUS with the Explanatory Note ;

NOW THEREFORE, in exercise of the powers conferred upon me by virtue of section 213(4) of the Constitution of the Federal Republic of Nigeria, 1999, and all other powers enabling me in that behalf, I, OLUSEGUN OBASANJO, President of the Federal Republic of Nigeria, do hereby publish for information DETAILS OF THE BREAKDOWN OF THE NATIONAL AND STATE PROVISIONAL POPULATION TOTALS 2006 CENSUS as appearing in Schedule II to this Legal Notice.

SCHEDULE I

GENERAL EXPLANATORY NOTE FOR THE BREAKDOWN OF STATE POPULATION TOTALS FOR 2006 CENSUS PROVISIONAL RESULTS

The national and state population totals were accepted by the Federal Government on 9th January, 2007. The stage is now set for providing the breakdown of the state population totals by LGA. While appreciating the 774 LGAs provisional population totals, the following important issues must be borne in mind before reaching any hasty conclusions or expressing opinions as these may not take into account various known and unknown facts and situations which may seem not to influence population numbers.

1. While it is possible to explain largely (though not necessarily fully) through demographic principles the changes in population size and its distribution at the country and state level this may not necessarily hold true at the LGA level. This is because of the huge differences in the physical areas and the population size at the LGA level. While the impact of migration of the population is likely to have a relatively small impact at the national and state level, this could be a significant factor at the LGA level in several instances. It may be recalled also that the 1991 and 2006 censuses were carried out in different months and seasons and the mobility of the population in terms of direction and quantum is unevenly distributed over the year. Thus broadly speaking LGA populations could be influenced favourably or adversely by population movements — seasonal or due to several other factors ;
2. It may again be recalled that new states and LGAs were created just before the 1991 census and also in 1996. This resulted in the increase of LGAs from 555 to 593 and then finally to 774. The apportionment of the Enumeration Areas (EAs) to reflect the newly created LGAs population may not have been perfect in all cases as the demarcation of the new boundaries of the LGAs affected was not necessarily clear in all cases when the results were finalised for 1991 census. The Commission was dependent on other agencies while assigning EAs of 1991 census to the newly created LGAs and changes continued to take place thereafter. The frequent boundary changes before and after the 1991 census thus could have affected the process of population apportionment due to this and other factors ;
3. The 1991 population figures for 774 LGAs were on a stand alone basis and no comparison/ validation or consistency checks against previous population totals was required or carried out as none existed. Thus if wittingly or unwittingly any errors were introduced, these cannot be rectified now with retrospective effect and will continue to affect the totals if comparisons are made or consistency checks are applied ;
4. There is a gap of over 14 years between the 1991 and 2006 census during which 7 new states and 219 new LGAs were created. While the old names of the LGAs continue in most cases, these LGAs (bifurcated or trifurcated) now do not reflect the same area as their previous self and therefore their population size has undergone a significant change. The creation of new states and LGAs

would possibly have influenced population dynamics of in and out migration. The precise nature, direction and quantum of changes in population movement is unlikely to be evenly distributed and will necessarily be consistent or in accordance with public or political perceptions. While some LGAs may even lose populations others may increase at a phenomenal pace due to various factors which may not necessarily be explained fully by known demographic principles. The reasons for churning of the population could be influenced by political, administrative, social, ethnic, religious, industrial and even international events ;

5. It may again be recalled that certain areas of the country during the 1991 Census complained/experienced an undercount of population (over count is not well recorded but it is likely to have occurred in some LGAs). If during the 2006 Census these areas (of undercount in 1991) were better covered, these are likely to experience a higher growth. Similarly areas where over count could not be repeated this time and was better controlled during 2006 Census, may experience a very low increase in population ;
6. The population size and the physical area of the 774 LGAs varies considerably in the country. Generally speaking certain highly urban LGAs had a very small land area and their physical capacity to take population increase was already exhausted or extremely limited. This was particularly true if the LGAs in question had commercial/administrative/industrial feature and if the land/building prices were very high. There were as many as 76 LGAs (about 10%), which had a physical area of less than 20 x 10 kms i.e. 200 kms. It may also be remembered that as per 1991 census, there were as many as 64 LGAs (about 9%), which had a population of less than 50,000 while 21 LGAs had a population of over 300,000. While a relatively small population increase will make a huge visible impression of population growth for such small sized LGAs, to have similar impact for big size LGAs a very large population increase is required. The LGAs with small population size were Bakassi LGA in Cross River state and Eastern Obolo LGA in Akwa Ibom state ;
7. The country has witnessed during the period of the two censuses several social disturbances due to political, ethnic and religious reasons in certain areas. This has possibly resulted in population movements of precisely unknown quantum and direction within or even outside the LGAs and states. These movements could be short term or long term and therefore accordingly be reflected in the population of the affected LGAs. Similarly, if the ground situation improved after the 1991 Census, certain populations which had moved out of the LGAs before the 1991 Census and were enumerated in a particular LGA then would not have been enumerated in 2006 in the same LGA as before. Thus while some LGAs will now gain others will definitely suffer loss due to such population movements. It may be recalled that some enumerating staff deployed by the Commission for 2006 Census were killed while some were assaulted and chased away during the current census in certain parts of the country. These areas are likely to be affected ;

8. There are reportedly population movements into certain LGAs on or near the international borders due to the arising diplomatic situation with certain neighbouring countries.
9. It is not known how the disputed areas were settled while finalizing the 1991 Census results. There are no explanatory notes to this effect in official publications. The Commission is aware that disputed areas within and among states exist. Proper identification of the localities and EAs is currently under progress and when finalised will be taken into account for the final population at LGA level. For the moment barring Taraba state no such effect has been given ;
10. Possible use of the Post Enumeration Survey (PES) result on validation of the final census results is awaited. This will depend on when the PES result is available and its quality ;
11. One should always remember that the DETAILS OF THE BREAKDOWN OF THE NATIONAL AND STATE PROVISIONAL POPULATION TOTALS 2006 CENSUS are provisional and not the final results. If there is any clerical or other *bona fide* error, it will be taken into account and rectified when the consistency and validation checks are performed before the final results are prepared and presented in due course.

CORRIGENDUM

12. In case of Osun state, the population figure for the state in the last row should read as 3,423,535 instead of 3,423,536 and the female figure should read as 1,682,916 instead of 1,682,917 Published in Federal Government's Extraordinary Gazette, No. 4 of 19th January, 2007, Vol. 94 as Statutory Instrument, No. 5.

CHIEF SAMU'ILA DANKO MAKAMA
Chairman, National Population Commission
11th April, 2007,
Abuja, Nigeria.
