Pages: 87

This instruction implements AFPD 10-2, Readiness. It establishes and describes the Air Force Operational Reporting System (AFOREPS). **PART 1** introduces the general concept of the AFOREPS and covers reporting policies and command reporting responsibilities. **PART 2** deals with Operational Status Reports. It explains the purpose and gives instructions for preparing and submitting these reports. **PART 3** covers Operational Support Monitoring Reports. It explains the purpose and gives instructions for preparing and submitting these reports. Send recommended changes, additions, deletions, or new reports and any conflict or duplication of other reports to HQ USAF/XOOOA, 1480 Air Force Pentagon, Washington, D.C. 20330-1480. Commands should supplement this Air Force Instruction (AFI) instead of repeating instructions in separate directives. Send HQ USAF/XOOOA one copy of directives (to include drafts) that support or implement the AFOREPS. Waiver authority for this instruction is HQ USAF/XOOOA. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with AFPD 37-1, Information Management and AFMAN 37-123, Management of Records and disposed of in accordance with the Air Force Records Disposition Schedule (RDS) located at <https://webrims.amc.af.mil>.

GENERAL CONCEPTS, POLICIES, AND RESPONSIBILITIES

Chapter 1

INTRODUCTION TO AIR FORCE OPERATIONAL REPORTING SYSTEM (AFOREPS)

1.1. Concept of the AFOREPS. The set of reports that make up the AFOREPS provide HQ USAF and intermediate commands the information necessary for timely operational decisions. Major commands (MAJCOM) will integrate their reporting systems into AFOREPS, thereby allowing easy lateral and vertical transfer of information.

1.2. Reporting Instructions and Principles. The following instructions and principles apply to the AFOREPS:

1.2.1. AFOREPS reports draw information from numerous sources (e.g., personnel, materiel, equipment status, operations and logistics planning, situation monitoring, and intelligence) and give decision makers a concise picture of events. The main criterion for inclusion in the AFOREPS system is essential information for command and control of aerospace forces.

1.2.2. Commands with both an Air Force and a joint or combined reporting requirement (e.g., air component commands) will use the AFOREPS and address both chains.

1.2.3. Annually, MAJCOMs will review new requirements to determine operational necessity.

1.3. Command Reporting Responsibilities. To identify and streamline host-tenant responsibilities, host units will establish host-tenant agreements that meet the needs of both organizations. Commanders are responsible for timely and accurate reporting for all events/incidents that meet CJCS reporting criteria (PINNACLES), CSAF reporting criteria (BEELINES), and MAJCOM/CC reporting criteria (HOMELINES) for all assigned or attached units, as well as units staging through their command. The agreement will establish procedures to ensure the installation commander is made aware of all events/incidents occurring on or affecting their installation. Agreements must adhere to the following stipulations at a minimum.

1.3.1. Ensure established procedures do not delay the submission of OPREP-3 reports.

1.3.2. Outline specific OPREP-3 responsibilities of host and tenant command posts/units, i.e., 1C3s functioning as a command post entity such as AMCCs, (including who will submit the reports), with emphasis on timely and accurate report submission.

1.3.3. **Installations Operating Under a Single MAJCOM:** If the installation has one or more tenant(s) but only one command post, the host unit will establish the agreement, and the command post will submit all OPREP-3 reports. The commander or authorized delegate operating the command post submitting the report will approve OPREP-3 reports prior to submission.

1.3.4. **Installations Operating with Multiple MAJCOMs:** Tenant commanders assigned to a different MAJCOM than the host unit, have the sole responsibility to report an event/incident affecting their assets that meet OPREP-3 reporting criteria. The unit commander or authorized delegate submitting the report will have approval/release authority for all OPREP-3 reports affecting his/her assets.

- 1.3.4.1. If the host command post submits OPREP-3 reports for the tenant, the host unit will not interfere with, alter, or delay the tenant unit's report.
- 1.3.5. Ensure OPREP-3 reports have all required addresses, including the affected (host or tenant) MAJCOM command center, and affected units and MAJCOMs.
- 1.3.6. Provide copies of the agreement to the host and tenant MAJCOMs, IAW MAJCOM procedures. MAJCOMs will maintain a current copy of the agreement on file.
- 1.3.7. MAJCOMs, direct reporting units (DRUs), field operating agencies (FOAs), Air Force Reserve (AFRC), and Air National Guard (ANG) personnel will develop instructions to ensure timely and accurate OPREP-3 reporting.
 - 1.3.7.1. Geographically Separated Units (GSUs) that do not fit under any of the above criteria will comply with parent MAJCOM guidance IAW this instruction.
- 1.3.8. Air component commanders of unified commands and/or JTFs will ensure compliance through their air component command centers and de-conflict with unified/JTF command directives.

1.4. Authority and References:

- 1.4.1. Authority. This instruction includes the requirements of the various documents of the Joint Reporting System. Air Force units will use AFI 10-206 as the primary source for reporting instructions. Later chapters identify reference materials for specific reports.
- 1.4.2. Emergency Status Codes (ESC). These codes serve as a guide for reporting under emergency and crisis conditions. Each chapter reflects the ESC required for each type report. AFI 33-324, The Information Collections and Reports Management Program; Controlling Internal, Public, and Inter-agency Air Force Information Collections (formerly AFI 37-124) prescribes ESC.
 - 1.4.2.1. Status Code "D" indicates: Immediately discontinue reporting data requirements during emergency conditions.
 - 1.4.2.2. Status Code "C1" indicates: Continue reporting during emergency conditions, priority precedence. Submit data requirements assigned this category as prescribed or by any means to ensure arrival on the established due dates.
 - 1.4.2.3. Status Code "C2" indicates: Continue reporting during emergency conditions, normal priority. Submit data requirements in this category as prescribed or by any means to ensure arrival on the established due dates.
 - 1.4.2.4. Status Code "C3" indicates: Continue reporting during emergency conditions, delayed precedence. Submit data requirements as prescribed, but they may be delayed to allow the submission of higher precedence reports. Submit by non-electronic means, if possible.
- 1.4.3. **Chapter 5** of this instruction is exempt from report licensing as defined in AFI 33-324. The HQ USAF Report Control Symbol (RCS) follows the title of each type report.

Chapter 2

GENERAL REPORTING INSTRUCTIONS

2.1. Security Classification and Downgrading Instructions. AFI 31-401, *Information Security Program Management* provides security classification and downgrading instructions.

2.1.1. Classify reports indicating unit combat readiness status according to AFI 10-201, *Status of Resources and Training System (SORTS)*.

2.1.2. Classify OPREP-3 reports containing:

2.1.2.1. Information on a combat loss or damage or discussing combat mission results a minimum of SECRET.

2.1.2.2. A complete inventory of nuclear weapons of one or more units a minimum of SECRET.

2.1.2.3. Information on the deployment of combat aircraft, units, or personnel according to the appropriate deployment plans.

2.1.2.4. Unit names and locations associated with a plan according to security instructions.

2.1.2.5. Events/incidents involving nuclear weapons according to content.

2.1.2.6. Events/incidents of confirmed or suspected compromise of classified information according to content.

2.1.2.7. Information of a unit's total mission impairment according to content.

2.2. Transmitting Reports During Combat or Combat Related Operations. When combat or combat-related operational requirements make speed of delivery paramount, military commanders may modify transmission of classified information as necessary to meet local conditions. (When so doing, commanders will cite in the message "CJCSM 3150.03B, Enclosure A, paragraph 4a," as the authority.)

2.3. Flagword JOPREP JIFFY. The flagword JOPREP JIFFY identifies electrically transmitted command post-to-command post messages and operational reports, and notifies communications centers to route a message directly to the command and control facility. The flagword does not indicate a precedence for transmission within communications channels.

2.4. Operating in a Degraded Communications Environment. HQ USAF and MAJCOMs may suspend the submission of selected reports. MAJCOMs will advise HQ USAF immediately of any suspended AFOREPS reports.

2.5. Report Formats. Prepare record copy reports using the specific formats and content information available in AFPAM 10-709 V1CD (formerly AFP 102-2, volume I), and as supplemented by this instruction. When AFPAM 10-709 V1CD, does not contain a specific format for the record copy report, use the General Administration (GENADMIN) format with the report's name as the SUBJECT.

2.6. Correction of Reports. The originator will submit a correction if an error is noticed after submitting a report. The corrected report includes only those sections of the report requiring correction. The cor-

rected report will be classified according to its content. Identify a corrected report by placing "CORR" in the third field of the TIMELOC set.

PART 2**OPERATIONAL STATUS REPORTS****Chapter 3****EVENT/INCIDENT REPORT (OPREP-3)(RCS: HAF-XOO(AR)7118)**

3.1. Subject and Purpose. OPREP-3 reports use command post channels to immediately notify commanders of any significant event or incident that rises to the level of MAJCOM, HQ USAF, or DOD interests. Submit the applicable OPREP-3 regardless of whether or not the event is being reported through other channels. OPREP-3 reports do not replace the requirement for more detailed reports such as the Aircrew/Aircraft Loss Report (LOSREP), the Commander's Situation Report (SITREP), and accident or incident investigation reports. Submitting an OPREP-3 report neither changes, nor substitutes for any report required by other directives.

3.2. Reference Materials. Chairman of the Joint Chiefs of Staff Manual (CJCSM) 3150.03B.

3.3. Report Categories. OPREP-3 reports categorize events or incidents according to their nature. Flagwords associated with each category aid prompt transmission, processing, and distribution of the reports by alerting people to their importance. The following flagword reports make up the OPREP-3 system.

3.3.1. **PINNACLE (OPREP-3P).** This message is used by any unit to provide the NMCC and, as appropriate, combatant commands and Services with immediate notification of any incident or event where national-level interest is indicated. The general OPREP-3P report is used for situations that do not require reporting via other OPREP-3P reports listed in subparagraphs 3.3.2. through 3.3.9. this report is not restricted to operational information. Any event or incident should be considered reportable if it:

- 3.3.1.1. Generates a higher level of military action.
- 3.3.1.2. Causes a national reaction.
- 3.3.1.3. Affects international relationships.
- 3.3.1.4. Causes immediate widespread coverage in news media.
- 3.3.1.5. Is clearly against the national interest.
- 3.3.1.6. Affects current national policy.

3.3.2. **PINNACLE NUCFLASH (OPREP-3PNF).** Used to report an event, accident, or incident that could create the risk of a nuclear war. This message has the highest precedence in the OPREP-3 reporting structure. Report any of the following as an OPREP-3PNF:

- 3.3.2.1. Ballistic missile launch or space launch.
- 3.3.2.2. Reentering space object.
- 3.3.2.3. Loss, potential loss or degradation of US military space capability when the loss or degradation is because of actions by a suspected or known hostile source.

3.3.2.4. Reports of cruise missiles or non-friendly, non-US or non-allied aircraft not on an approved flight plan that could pose a threat.

3.3.2.4.1. Accidental, unauthorized, or unexplained incident involving possible detonation of a nuclear weapon.

3.3.2.4.2. Unauthorized flight or deviation from an approved flight plan, by a US nuclear-armed or nuclear-capable aircraft with the capability to penetrate the airspace of another nuclear-capable country.

3.3.3. **PINNACLE FRONT BURNER (OPREP-3PFB)**. Used to report pre-conflict occurrence of armed attack, harassment, or hostile action against US forces, territory, or interests.

3.3.4. **PINNACLE BROKEN ARROW (OPREP-3PBA)**. Used to report a US nuclear weapon accident that does not create the risk of a nuclear war. Included are the following:

3.3.4.1. Nuclear detonation of a US nuclear weapon.

3.3.4.2. Non-nuclear detonation or burning of a nuclear weapon.

3.3.4.3. Radioactive contamination from a US nuclear weapon or component.

3.3.4.4. The jettisoning of a US nuclear weapon or component.

3.3.4.5. Public hazard, actual or implied, from a US nuclear weapon or component.

3.3.5. **PINNACLE EMPTY QUIVER (OPREP-3PEQ)**. Used to report the seizure, theft, or loss of a nuclear weapon.

3.3.6. **PINNACLE EMERGENCY DISABLEMENT (OPREP-3PED)**. Used for reporting operations involving the command disablement or nonviolent disablement of nuclear weapons.

3.3.7. **PINNACLE EMERGENCY EVACUATION (OPREP-3PEV)**. Used to report operations involving the emergency evacuation of nuclear weapons.

3.3.8. **PINNACLE COMMAND ASSESSMENT (OPREP-3PCA)**. Used to report a combatant commander's assessment of a developing or potential crisis situation.

3.3.9. **PINNACLE LERTCON STATUS OF ACTION (OPREP-3PLSOA)**. Used to immediately notify the NMCC of Combatant Commander's actions relative to the alert condition of their forces.

3.3.10. **BENT SPEAR (OPREP-3BS)**. Used to report incidents involving nuclear weapons that are of significant interest but are not categorized as PINNACLE NUCFLASH or PINNACLE BROKEN ARROW to the appropriate Service headquarters. The flagword PINNACLE may be added at any level of command to expedite forwarding of this message to the NMCC.

3.3.11. **FADED GIANT (OPREP-3FG)**. Used to report nuclear reactor or radiological accidents or incidents to the appropriate Service headquarters. The flagword PINNACLE may be added at any level of command to expedite forwarding of this message to the NMCC

3.3.12. **BEELINE (OPREP-3B)**. Used to report any event or incident that requires Air Force-level interest, but not requiring OPREP-3 PINNACLE reports. Although the report normally remains within US Air Force channels, commanders may add other addressees, as appropriate to avoid duplicate reporting. HQ USAF may make BEELINE information available to agencies outside the Air Force (e.g., NMCC, State Department) based on the situation.

3.3.13. **HOMELINE (OPREP-3H).** Used to report events or incidents, which do not meet Air Force-level criteria, but are of interest to the MAJCOM. Although these reports are not addressed to HQ Air Force, they are part of the AFOREPS program and will use the same basic format. MAJCOMs determine specific reporting requirements and procedures for the HOMELINE report.

ANG units report HOMELINE-level information to ANG Operations Center, unless federalized or mobilized.

3.3.14. **OPREP-3 CRESCENT EDGE (OPREP-3CE).** Used to immediately notify program managers at the Joint Staff, Air Force, or MAJCOM level of significant activities involving Special Access Programs (SAPs) operating under the auspices of AFI 16-701. Affected unit command posts will submit voice reports through normal command post channels. The flagwords HOMELINE, BEE-LINE, and PINNACLE are used to reference the level of the program manager to be contacted. If the program manager is at the Air Force level the AFOC will notify the program manager. MAJCOMs will establish procedures for contacting program managers at and below the MAJCOM level.

3.3.14.1. The CRESCENT EDGE Report allows units operating SAPs to use the operational reporting channel to advise their program managers of events or incidents that meet OPREP-3 reporting criteria. The CRESCENT EDGE Report is the single reporting channel for all SAP units reporting incidents to higher headquarters. Crescent Edge Reports will be forwarded through command post channels to MAJCOM Command Centers, the AFOC, or the NMCC as required depending on the program manager level. Refer to [Figure 3.1.](#) to view a sample voice report.

3.3.14.2. The unit with the SAP, not the command post, initiates CRESCENT EDGE reports. The initiating unit will notify the command post that they have a CRESCENT EDGE report to be submitted. No program names or incident details will be included, and command post personnel will not press for details. The command post will assign a report number and send the report up the chain to the appropriate level. After report submission, no other action is required by the command post.

3.3.14.3. Only the following information will be included in the report:

3.3.14.3.1. The time the unit initiated the report.

3.3.14.3.2. The name, phone number, and office symbol of the person at the unit initiating the report.

3.3.14.3.3. The name, phone number, and office symbol of the program manager at the appropriate higher headquarters.

3.3.14.4. A CRESCENT EDGE Report will be submitted when an event or incident involving a SAP has been determined, by an authorized individual from the SAP unit, that higher-level awareness is warranted.

3.3.14.4.1. It is the reporting unit's responsibility, not the command post's or wing commander's, to determine the level the report will be submitted, and to provide all the information to be reported IAW paragraph [3.3.14.3.](#) above.

3.3.14.4.2. The parent MAJCOM, the AFOC, or the NMCC (as deemed applicable) are the only addressees permitted on record copy CRESCENT EDGE reports. If report goes to the AFOC or NMCC, MAJCOM and the AFOC will be addressed.

3.3.14.4.3. The CRESCENT EDGE voice and record copy reports will be sent via normal reporting channels using FLASH or IMMEDIATE precedence. This report is unclassified; however, record copy reports will be transmitted Encrypt for Transmission Only (EFTO).

3.3.15. **EXERCISE WHITE PINNACLE--OPREP-3 WHITE PINNACLE (OPREP-3WP).** OPREP-3WP is an unclassified exercise flagword used in exercise messages that contain simulated, time-critical information from operating forces to the NMCC. This exercise is used by the NMCC and combatant commanders to exercise the timeliness of the OPREP-3 PINNACLE reports.

3.3.15.1. Regional Operations Support Division (ROSD), Operations, Training, and Exercise (OT&E) Branch, J-3 DDRO, will recommend to unified commands via message the number of exercises to be conducted within the assigned period. Unified commands will designate the units to receive the exercise message and will select specific exercise start times.

3.3.15.2. Detailed guidance is governed by CJCSM 3150.03B (Joint Reporting Structure Event and Incident Reports). Only unified commands, units subordinate to unified commands, and the NMCC participate in this exercise.

3.4. Command Responsibilities. Due to the time sensitivity of OPREP-3 information, report each event/incident as promptly and accurately as possible. If there is doubt, report it. Units at all levels will develop procedures to quickly obtain and report the key elements of an OPREP-3 report. Since installations normally host units assigned to different MAJCOMs, notification and coordination procedures between units must be agreed upon. Therefore, host, tenant, and applicable MAJCOMs will have a MOA on file (IAW para 1.3.). Commanders should ensure all agencies under their command receive OPREP-3 training at least quarterly.

3.4.1. Command posts will thoroughly brief commanders on all reporting criteria and procedures outlined in this instruction. Prior to the command post submission, the commander or designated alternate will review all OPREP-3 reports in a timely manner. The command post is responsible for providing commanders the necessary information to facilitate an informed decision and timely OPREP-3 voice and record-copy submissions IAW this instruction (para. 3.5.1. and 3.5.2.) and CJCSM 3150.03B (Enclosure A, para 3).

3.5. Report Submission. The closest command post to the location where an event/incident has occurred having knowledge of that event/incident will submit the OPREP-3 reports. When necessary, the AFOC may request, through the MAJCOM, that a unit report an event/incident because that unit is located closest to where the event/incident occurred.

3.5.1. Voice Reports: Air Force units will submit voice reports to the appropriate MAJCOM command center via telephone conference. IAW CJCSM 3150.03B, OPREP-3 voice reports will be submitted as soon as possible after an event or incident has occurred using FLASH or IMMEDIATE precedence. The goal is to initiate initial voice reports within 15 minutes of an event or incident. Due to the extremely time sensitive nature of the PINNACLE NUCFLASH report, these voice reports must be made within 5 minutes after the incident and sent at FLASH precedence.

3.5.1.1. Normal conferencing procedures for BEELINE and Service-level reports (Bent Spear and Faded Giant) will be unit-to-MAJCOM-to-AFOC. Procedures for PINNACLE reports will be unit-to-MAJCOM-to-AFOC-to-NMCC. Because the audible quality of some conferencing systems is degraded with each added conferee, the AFOC will conference in the NMCC for PINNA-

CLE reports. MAJCOMs or lower echelons may add additional conferees to conferences as appropriate. Ensure the AFOC is the last conferee added to the conference.

3.5.1.2. When reporting on any asset assigned to a MAJCOM other than that of the reporting unit, ensure the MAJCOM command center owning the asset is included in the voice conference and addressed on the record copy report.

3.5.1.3. When reporting on any nuclear event, ensure USSTRATCOM is included in the voice conference (Unclassified: DSN 271-1806, Comm 402-294-1806 / Classified: DSN 272-4405, Comm 402-232-4405) and addressed on the record copy report (MEA 38).

3.5.1.4. MAJCOM command centers will screen HOMELINE reports for possible BEELINE criteria. The AFOC will screen BEELINE reports for possible PINNACLE criteria. When in doubt, consult the appropriate MAJCOM or the AFOC through the MAJCOM.

3.5.1.5. Units submitting the OPREP-3 PINNACLE or BEELINE voice report will provide the MAJCOM and the AFOC the rule number and subject of the event/incident being reported. Providing the AFOC with the rule number allows preliminary checklist steps to be accomplished prior to the unit beginning the voice report. After completion of voice reports, the AFOC will give a reference time in Zulu for record-copy BEELINE reports, and their initials. For PINNACLE reports, the AFOC will remind units of CJCSM 3150.03B reporting criteria (see para. [3.5.2.](#) below).

3.5.1.6. If MAJCOM or NAF command centers are unable to establish a teleconference or the unit is reporting a classified report and individual phone calls must be made in lieu of a teleconference, the unit will call the AFOC first. The AFOC will attempt to patch the appropriate MAJCOM command center(s) and the NMCC (if applicable) into the conference.

3.5.1.7. For PINNACLE and BEELINE Reports: Do not delay the initial voice report by preparing the record copy report prior to voicing the report.

3.5.1.8. Contact the NMCC directly for nuclear related PINNACLE reports. Intermediate command centers will be conferenced if time permits and only if it does not cause a delay in immediately voicing these reports to the NMCC. For direct contact to the NMCC, use DSN 223-8196 for the Senior Operations Officer (SOO (primary)) or DSN 227-6340 for the EA Cell (secondary).

3.5.2. Record-copy Reports: IAW CJCSM 3150.03B, the goal is to submit initial record copy PINNACLE reports within 1 hour of the incident. IAW this instruction, submit all record copy BEELINE reports within 1 hour after the associated voice report. Intermediate levels of command will immediately pass the report to subordinate or lateral commands that need the information.

3.5.2.1. The AFOC may request certain questions answered prior to submission of the final report. Information requested by the AFOC that is unknown during the initial voice report will be provided (when the information becomes available) in the INITIAL record copy report or FOLUP/FINAL voice/hard copy reports.

3.5.3. Do not include the following statements: “The commander has deemed the following reportable” and “Further reporting through xxx channels” in OPREP-3 BEELINE or PINNACLE reports.

3.5.3.1. The first statement in the text of INITIAL record copy reports will state the time the command post was notified of the event/incident, and the time the commander or designated alternate approved the voice report for command post submission. Example: “The command post was noti-

fied at 27/1829Z Jul 03, and the commander approved the voice report at 27/1918Z Jul 03.” Do not include this information in the voice report.

3.5.4. Units will ensure all record copy OPREP-3 reports on Class “A” Mishaps are addressed to all MAJCOM command centers to include ANG Operations Center and AFRC Command Center using the MEA Listing (**Table 3.5.**). Additionally, address appropriate MAJCOM command centers to include ANG and AFRC when personnel and/or assets (active, guard or reserve, mobilized or non-mobilized) assigned to those organizations are affected. If units have problems transmitting over DMS, use regular NIPRNET/SIPRNET e-mail addresses (**Table 3.2.**) to forward reports.

3.5.5. Intermediate levels of command and or the unit originating the report will immediately pass the report to subordinate or lateral commands whose units or assets are affected by the event/incident.

3.5.6. Rapid reporting is imperative. Do not delay an INITIAL report to obtain additional information. Use FOLUP reports to provide additional information when it becomes available.

3.5.6.1. INITIAL reports must be timely and concise, and contain as much information as immediately available within established time parameters. Record copy reports must thoroughly answer the following questions: who, what, when, where, why, and how. Continue reporting until these questions are answered.

3.5.7. Transmit OPREP-3 reports by the fastest means available consistent with security constraints: usually by non-secure voice transmission, followed by a confirming record transmission. Transmit reports containing classified or special intelligence information with the proper security precautions. Include the flagword JOPREP JIFFY after the classification on all OPREP-3 reports.

3.5.7.1. If units are unable to use DMS to meet record copy timing criteria, forward the record copy to the AFOC’s NIPRNET address (**Table 3.1.**). If electronic transmission capabilities are not available, faxing the record copy report to the AFOC can be used to meet timing criteria, however electronic transmission is preferred. If the report is sent using NIPRNET or faxed to the AFOC, the originating unit is still responsible for ensuring all required MEAs are in receipt of the record copy. For OPREP-3 PINNACLES, the AFOC will ensure the NMCC is in receipt.

3.5.8. The initial record copy report will contain any updated information gathered after the initial voice report without exceeding the time criteria established in paragraph **3.5.2.**

3.5.9. The OPREP-3 PINNACLE NUCFLASH takes precedence over all other OPREP-3 reports.

3.5.10. Any actual OPREP-3 report takes precedence over all peacetime exercise communications.

3.5.11. Submission of OPREP-3 reports will not be effected by the imposition of MINIMIZE.

3.5.12. Use the ESC “C1” designator - Continue reporting, priority.

3.6. Report Format and Contents: AFPAM 10-709 V 1CD gives specific format information for OPREP-3 reporting.

3.6.1. The narrative section of each report must clearly convey the details of the incident. Use **Figure 3.2.** to assist in gathering and reporting all minimum required events/incident details.

3.7. Report Numbering. Number OPREP-3 reports consecutively for each calendar year by type, (i.e. PINNACLE, BEELINE) beginning with 001. Subsequent reports for the same incident will add sequential letters to the basic report number (e.g., 002A, 002B). After the number 999, revert to 001 for the next

report. Report numbers are designed for the individual unit to track the total number of OPREP-3 reports submitted per year.

3.8. Exercise Reports. Number exercise OPREP-3 reports independently of real-world OPREP-3 reports. Begin exercise reports with 001 at the start of each exercise. Indicate exercise name in the EXER set of each report.

3.9. Follow-up Reports. FOLUP reports are essential to keep commanders informed of developing situations and to provide additional details as they are learned.

3.9.1. Record copy FOLUP or FINAL reports may contain information previously provided in one or more voice reports. Continue reporting as long as the situation merits. When the immediacy of the OPREP-3 system subsides, commanders may use SITREP reporting to provide continuous information. Include a reference to applicable voice and record copy reports in each additional record report.

3.9.2. FOLUP and FINAL reports will be voiced in the same manner as INITIAL voice reports, and a record copy report will be submitted.

3.9.3. INITIAL, FOLUP, and FINAL reports will close with the applicable phrase, i.e., this is a command post INITIAL, FOLUP, or FINAL report.

3.9.4. FOLUP and FINAL reports will contain enough information from the previous report(s) to aid the recipient.

3.9.5. When it is determined that situations are no longer developing, units will send the appropriate voice and record report (IAW para 3.9.4.) and add the phrase, "No further information available. This is a final report" to close INITIAL and FOLUP reports.

3.10. Use of Personnel Identification. Do not include the name, social security number (SSN), or address of individuals in OPREP-3 reports. Rather, provide broad categories (e.g., active duty, reserve, airman, noncommissioned officer (NCO), officer, or dependent). If a report recipient requires names or SSN, request it as an addendum separate from OPREP-3s. Exceptions: OPREP-3CE (the name and phone number of both POCs are required), and for aircraft accidents, the name, title, and phone number of safety board president.

3.11. Upgrading Reports. Units will upgrade OPREP-3 reports if FOLUP information to an event/incident meets the criteria of a higher-level report (e.g., HOMELINE to BEELINE). Units will report the INITIAL information and any FOLUP information as a new report. Also include any references to earlier reports. In the upgraded INITIAL report, provide all known facts even if previously reported to the lower level organization. Upgrade reports will require both a voice and record copy. Send all FOLUP reports to the appropriate addressees.

3.15. The OPREP-3 Reports Matrix. The OPREP-3 Reports Matrix (**Table 3.4.**) is a quick reference guide to assist users in determining the type of report to submit. The matrix provides broad guidance and is not all-inclusive. Judgement on the part of local command posts and commanders is essential to proper reporting. Base the level of the report on whether or not the event or incident will attract national level interest (PINNACLE) or will only be of interest to HQ USAF (BEELINE) or a MAJCOM (HOMELINE). Refer to **Figure 3.1.** through **Figure 3.7.** for additional guidance on minimum OPREP-3 report content.

Q. If CBR substance is unknown, list protective action assumptions being employed, such as DOT Emergency Response Guide (ERG) guide numbers.

R. Estimate of how many personnel were exposed.

S. Size of cordon and evacuation zone.

T. Sheltering in-place: size of zone and time.

Figure 3.7. Guide for Reporting Chief of Staff Special Reporting Items (CSAF-SRI).

From time to time an operation, incident, or activity receives the personal interest of the CSAF. These incidents will be reported using the CSAF-SRI report. CSAF-SRIs will be updated quarterly by message advising units of new reporting criteria. The list of CSAF-SRIs will remain in effect for a period of six months from the date time group of the message or until superceded or rescinded.

4.4. Submission Timing. Reports will be submitted daily, or more frequently if required, for the duration of the activity or operation. Unless specified otherwise by Combatant Commander directives, submit reports no later than 0200Z, reflecting data current as of 2359Z.

4.5. Submission Precedence. Submit reports via IMMEDIATE precedence for Automated Digital Network (AUTODIN) or Urgent precedence with Defense Messaging System (DMS) with classification appropriate for the message content. Continue to report during MINIMIZE unless directed otherwise by the implementing authority. This message may be submitted by voice or Global Command Control System (GCCS) when record AUTODIN or DMS transmission is not available.

4.6. Specific Reporting Instructions. The SITREP is a narrative report. It keeps addressees informed and enables higher levels of command to prepare for potential effects of ongoing situations.

4.6.1. Duplicate reporting is not desired; however, information available in another Joint Reporting Structure (JRS) report will be referenced to ensure operational impacts are noted.

4.6.2. Any higher headquarters level in the reporting chain may direct additional reporting requirements. The Air Force Operations Group, in fulfilling the CSAF's Title 10 responsibilities, is authorized to request any necessary additional/amplifying information on past events, current operations, or planned actions. A quick response to requests for information from the AFOC, Air Force Crisis Action Team, or CSAF Presentation Division is required.

4.6.3. During peacetime MSCA operations and under hostile conditions such as terrorism, comply with **Figure 3.4.** and the daily reporting instruction timeline described in the supported Combatant Command's Execute Order.

4.7. Report Content. Air Force SITREPs will evaluate significant factors relating primarily to readiness, mobilization personnel, and logistics. Report content should highlight key activities and build on previous reports. Duplicating or including information to fill in the blank is not desirable. Brevity is paramount. The following is a list of subparagraphs from the USMTF formats, and will be used as applicable.

4.7.1. Commander's Own Situation/Disposition/Status of Forces. Includes summary of significant unit mission readiness degradation, current deployments, and projected deployments and requirements.

4.7.2. Situation Overview. A brief overall assessment of the situation, including circumstances or conditions that increase or materially detract from the capability and readiness of forces.

4.7.3. Operations. A brief description and the results of operations carried out during the report period. Also include deviations and variations from previously reported intentions or plans. Include as a minimum: unit, location, aircraft/equipment status (Available/FMC/PMC/NMC), sorties scheduled, sorties flown, specific reasons for sortie cancellations and sorties scheduled for next 24 hours, unit/aircraft rotation plans/status, and any other items required by the AFOC.

4.7.4. Intelligence/Reconnaissance. A brief overview of the situation in terms of operations, order of battle, capabilities, and threat changes. Reference any Spot Intelligence reports submitted in the past 24 hours.

4.7.5. Logistics. A brief description of logistics sustainability by class of supply and/or critical items. Highlight significant deficiencies that are above the commanders capability to overcome in a timely manner.

4.7.6. Communications Connectivity. Report significant outages, equipment deficiencies and incompatibilities.

4.7.7. Personnel. Report factors affecting readiness of forces or units; mobilization status; battle casualties (i.e., killed in action, wounded in action, and missing in action); and the effect of casualties sustained.

4.7.8. Significant Political/Military/or Diplomatic Events. Report events not reported by OPREP-3 PINNACLE or BEELINE but which could result in local, national, or international public reaction; civil unrest or indications of civil defense measures contemplated or implemented; and events affecting the attitudes, emotions, or behavior of the populous that could be used in developing psychological operations campaigns.

4.7.9. Commander's Evaluation. Summary of key points from individual paragraphs. Comments will provide an overall assessment and any individual comments keyed to forces as outlined in approved Execute Order/Deployment Order and Modifications to those orders. The information contained in **Figure 4.1** should be included in the summary SITREP:

COMMUNICATIONS INSTRUCTIONS REPORTING VITAL INTELLIGENCE SIGHTINGS (CIRVIS)

5.1. Subject and Purpose. This report provides vital information to the security of the United States and Canada which, in the opinion of the observer, requires very urgent defensive action or investigation by the US and or Canadian Armed Forces.

5.2. Reference Materials. NORAD Instruction 10-19.

5.3. Submitted By. Any Air Force personnel.

5.4. Submitted To:

5.4.1. Airborne reports: US or Canadian military or civilian communications facility.

5.4.2. Post-landing reports: Commander, North American Aerospace Defense Command (NORAD), Cheyenne Mt, Colorado, or HQ Northern NORAD Region, North Bay, Ontario, Canada, whichever is more convenient. If landing outside Canadian or US territories, submit reports through the nearest US or Canadian military or diplomatic representative.

5.5. When Submitted. As soon as possible after the intelligence sighting.

5.6. How Submitted. Reports are normally UNCLASSIFIED but handled as For Official Use Only.

5.6.1. Use the most rapid means of transmission available. For airborne reports use the same procedures as for air traffic control. When pilots cannot establish contact with a ground station, make maximum effort to relay the report via other aircraft.

5.6.2. To avoid delays while airborne, repeat the word CIRVIS three times before the message to preempt all other communications (except distress and urgency). If this fails to clear the frequencies, use the International Urgency Signal "PAN" spoken three times. For the ground relay of airborne reports or post-landing reports, use FLASH precedence.

5.6.3. Transmit during MINIMIZE.

5.6.4. Use the ESC C1 designator- Continue reporting, priority.

5.7. Reporting Instructions:

5.7.1. Facilities receiving CIRVIS reports will rapidly process and forward them as prescribed by NORAD Instruction 10-19.

5.7.2. Report all unidentifiable, suspicious, or hostile traffic (land, aerospace, or seaborne) which, because of its nature, course, or actions, considered a threat to the security of the United States or Canada. Such reporting extends the early warning defense system for the United States and Canada. There are five types of CIRVIS reports:

5.7.2.1. Issue initial CIRVIS reports while airborne (or as warranted, upon landing).

5.7.2.2. Issue post-landing CIRVIS reports if airborne reports made.

- 5.7.2.3. Issue follow-up CIRVIS reports by anyone with additional information about an earlier report (refer to the initial report).
 - 5.7.2.4. Issue cancellation CIRVIS reports once sightings are positively identified as friendly or determined it was erroneously reported.
 - 5.7.2.5. Submit evaluation CIRVIS reports to each addressee of the above CIRVIS reports. Promptly submit evaluation reports to keep all interested parties fully informed.
- 5.7.3. Report the following specific sightings:
- 5.7.3.1. Hostile or unidentified aircraft which appears directed against the United States, Canada, or their forces.
 - 5.7.3.2. Missiles.
 - 5.7.3.3. Unidentified flying objects.
 - 5.7.3.4. Hostile or unidentified military surface vessels or submarines.
 - 5.7.3.5. Any other individual surface vessels, submarines, or aircraft of unconventional design engaged in suspicious activity, observed in an unusual location, or on a course which may threaten the United States, Canada, or their forces.
 - 5.7.3.6. Any unexplained or unusual activity which may indicate a possible attack against or through Canada or the United States (includes the presence of any unidentified or suspicious ground parties in remote or sparsely populated areas, including the polar region).
 - 5.7.3.7. Unlisted airfields, facilities, weather stations, or air navigation aids.
- 5.7.4. Make every effort to document sightings with as many photographs as possible. Send undeveloped film or prints and negatives, with a brief written report and other identifying information to the Director of Naval Intelligence, Department of the Navy, Washington, DC 20305. The Department of the Navy will process the film and return one copy of each print and a roll of new film to the individual.
- 5.7.5. Use [Figure 5.1](#) to gather and report specific sighting details.

Figure 5.1. Communications Instructions Reporting Vital Intelligence Sightings (CIRVIS).

Item B5. CRITICAL PERSONNEL ISSUES. Describe personnel issues that impact mission capability.

Item B6. PATIENT WORKLOAD DATA. Identify the type of facility on line B6. Enter patient workload data since the last report, based on the type of facility as indicated below. Use a single slash (/) to separate

data elements within each line. The primary source for this data should be Global Expeditionary Medical System (GEMS) or equivalent automated patient encounter tracking system.

Item B6.A. PATIENT EVACUATION SUMMARY. For aeromedical staging units, use this section to report current/new activity and cumulative data as described below. Place the two data groups below on separate lines.

CURRENT ACTIVITY: Patients awaiting evacuation or evacuated **within theater**, and awaiting evacuation or evacuated **out of theater** since last report. Each category is broken down into litter and ambulatory figures. Example: 30 PATIENTS AWAITING EVACUATION WITHIN THEATER, (10 LITTER/20 AMBULATORY); 5 PATIENTS AWAITING EVACUATION OUT OF THEATER (3 LITTER/2 AMBULATORY); 10 LITTER/5 AMBULATORY PATIENTS EVACUATED WITHIN THEATER; 9 LITTER/6 AMBULATORY PATIENTS EVACUATED OUT OF THEATER.

CUMULATIVE DATA: Cumulative numbers for each category above, broken down into litter and ambulatory figures. Example: 68 TOTAL LITTER/20 TOTAL AMBULATORY PATIENTS EVACUATED WITHIN THEATER TO DATE; 20 TOTAL LITTER/10 TOTAL AMBULATORY PATIENTS EVACUATED OUT OF THEATER TO DATE.

Item B6.B. INPATIENT FACILITY PATIENT DATA. For facilities with inpatient beds, such as CONUS Casualty Reception Hospitals (CRH), Air Force Theater Hospitals (AFTH), and CONUS Hospitals with bed expansion missions, report current/new activity and cumulative data as described below. Place the two data groups below on separate lines.

CURRENT ACTIVITY: The number of **new** patient encounters, patients admitted, returned to duty (RTD), transferred out, and deaths since last report. Example: 60 NEW PATIENT ENCOUNTERS/11 PATIENTS ADMITTED/48 PATIENTS DISCHARGED OR RTD/0 PATIENTS TRANSFERRED OUT/1 DEATH.

Item B6.C. OUTPATIENT FACILITY PATIENT DATA. For facilities with no inpatient beds, such as EMEDS Basic, Squadron Medical Elements with or without Air Transportable Clinics (ATC), and Clinics (including Residual Medical Clinics), report current/new activity and cumulative data as described below. Place the two data groups below on separate lines.

CURRENT ACTIVITY: The number of **new** patients seen (encounters), returned to duty (RTD), awaiting disposition, evacuated or transferred, and deaths since last report. Example: 12 NEW PATIENTS/7 RTD/3 PATIENTS AWAITING DISPOSITION/1 PATIENT EVACUATED/1 PATIENT DEATH SINCE LAST REPORT.

CUMULATIVE DATA: Cumulative totals to date for each category listed above. Example: 100 PATIENTS SEEN TO DATE/34 EVACUATED/5 DEATHS.

When new equipment UTCs are expected to arrive, include a statement listing those UTCs, anticipated arrival date, and date of receipt.

Item B12: EFFECTIVENESS PERCENTAGE (PCTEF) RATING. The unit commander will provide a subjective assessment of the unit's ability to execute the deployed mission, using the C-ratings described below. Provide a detailed explanation of issues causing a rating other than C-1, list applicable UTC(s), and provide an estimated get-well date.

Table 10.1. PCTEF Ratings

C-1	Unit possesses the required resources and is trained to undertake the full mission(s) assigned
C-2	Unit possesses the required resources and is trained to undertake most of the mission(s) assigned
C-3	Unit possesses the required resources and is trained to undertake many, but not all, portions of the mission(s) assigned
C-4	Unit requires additional resources or training to undertake the current mission(s) assigned
