Introduction

Accreditation certifies — to other educational institutions and to the general public — that an institution meets or exceeds established standards and is achieving its own stated objectives. WASC and the other five regional associations in the United States grant “institutional accreditation” after a comprehensive self-study followed by an on-site evaluation of the programs and services of the total institution. This means that all diploma or degree programs and educational activities offered by an institution are covered by the institution’s accreditation. The evaluation determines whether or not the institution qualifies for regional recognition, but more importantly, periodic self-studies and reviews promote improvement in educational quality.

Although accreditation serves as an indicator of quality for a school (PK-12 and Adult), the primary goal of accreditation is school self-improvement. The process involves three steps:

1. **An in-depth study** and self-evaluation conducted by the staff and community of a school with the help of instruments developed for specific kinds of schools.
2. **On-site observation** by a visiting committee that validates the school report, evaluates its findings, and makes a recommendation to the Commission for a term of accreditation.
3. **Commission study** and discussion of the Visiting Committee’s report, with subsequent action to grant, extend, or deny accreditation.

The **Accrediting Commission for Schools** requires the application of qualitative criteria and substantial documentation of student performance rather than mere confirmation of a school’s adherence to minimum quantitative standards. Accreditation is granted when there is compelling evidence that a school is substantially accomplishing its own stated purposes and functions identified as appropriate for an institution of its type; and that a school is meeting an acceptable philosophy, goals, and objectives; organization; student personnel services; curricular programs; co-curricular programs; staff; school plant and physical facilities; and finance.

This directory provides information about those schools currently accredited by WASC and those schools that have been granted the status of candidacy for a period of three years.

The Accredited Schools section serves as an excellent resource to learn about the schools currently accredited by WASC. The following information is provided for each school:

- School name, address, phone number, and WASC ID number
- Grade levels except for postsecondary, adult education, and ROCPs
- Type of school: public, non-public; multi-campus; postsecondary; or charter

- The span of years for which a school has been accredited (years shown, i.e., 1972/2006, indicates when the school was first accredited and the year through which the school is currently accredited)
- California public schools are listed by district following the alphabetical listing of schools

The Candidate Schools section provides information about the schools that have been granted the status of candidacy for a period of three years. This is an affiliation that indicates that an institution has achieved initial recognition and is progressing toward, but does not assume, accreditation. These schools are strengthening their program and operation as they move into the full evaluation process based on the WASC criteria for accreditation.
