Textual variants in the Gospel of Luke

Results from the variant evaluation:

The best MSS of Lk:

1. Primary (=best) witnesses for Lk are: 01, B, L, W1-7, Co

P75, T, \Xi (= have lacunae)

W is Alex from ch. 1-7, after that Byz.

2. Secondary (= good) witnesses for Lk are: P45, R¹³⁻¹⁶, 070, 579, 1241, 1342⁶⁻¹⁰

1342 is much better in ch. 6-10 (ca. 6:35-11:15 from a

cursory check in IGNTP), elsewhere Byz. R is particularly good in ch. 13-16 (Waltz).

3. Tertiary: R, f1, 33, [157, 1612, 1627], 565¹⁻², 700¹⁻¹⁰, 892, 2786

vg, Sy-S, Sy-C, Sy-Pal

565 is comparatively good in ch. 1-2, later it is Byz.

700 is better in ch. 1-10, later Byz.

The assignment of R has been taken from Waltz online encyclopedia and is

consistent with my data (see below).

"Western": D, it, Sy-S, Sy-C

"Caesarean":(($[\Theta, f13, 1071], [f1, 157]$)) two subgroups, all very weak

"Caesarean" and "Western" MSS in Lk:

The Western element in Lk is exceptionally strong: D, Lat, Sy-S, Sy-C

To the contrary the Caesarean element is very weak.

MSS with lacunae

<u>Note:</u> The lacunae of P45, P75, R, T, 070 are not noted explicitly at the variants, because they are more often absent than present. Only the lacunae of Ξ from ch. 1-11 have been noted. Also 33 and Sy-S have been noted, explicitly. If one of the fragmentary MSS is not given, please refer back to this page.

Western non-interpolations

In D there are several passages omitted which have been labeled "Western non-interpolations" by WH.

Luk 5:39 [12 words]	Luk 22:19b-20 [32]	Luk 24:12 [22]
Luk 10:41-42 [11]	Luk 22:62 [5]	Luk 24:36 [5]
Luk 12:19 [7]	Luk 24:3 [3]	Luk 24:40 [10]
Luk 12:21 [9]	Luk 24:6[5]	Luk 24:51 [5]
Luk 12:39 [3]	Luk 24:9[3]	Luk 24:52 [2]

Further we have one omission probably due to h.t.:

Luk 11:32 [24]

And three omissions for other reasons:

Luke 11:36 [23]

Luk 19:24b-25 [16]

Luk 19:32-33 [23]

Western non-interpolations and John

It is interesting to note that several Western non-interpolations at the end of Luke could be interpreted as harmonizations to John.

Luke 23:38	John 19:20
Luke 24:12	John 20:3-6
Luke 24:36	John 20:19
Luke 24:40	John 20:20

Compare:

K. Snodgras "Western non-interpolations" JBL (1972) 369-79

Noteworthy other MSS:

In Lk 131 belongs to f1. It is also f1 in Mk 1-5.

"Text & Textwert" found the following additional MSS, which have a valuable text in Lk (noted are the number of "2" readings):

```
<u>E 040</u> 12/15 80%

<u>070</u> 11/13 85% both fragmentary.
```

(+ 0110, 0124, 0178, 0179, 0180, 0190, 0191, 0202) (Lk in: 070, 0124, 0178, 0179, 0190, 0191, 0202)

070 = T_i Greek-Coptic bilingual from the 6th CE, Paris, see Gregory I, p. 69.

157, 1612 and 1627 form a group

157 15/46 33%, agrees with 1612 77%. 1612 10/35 29%, agrees with 1627 69%. 1627 8/45 18%, agrees with 1342 (!) 81%.

2786 8/46 17% (372 and 2737 have only 8% "2" readings)

I also checked the fragmentary palimpsest codex R/027 in IGNTP: R has roughly 30% txt readings (15/49). Waltz in his online TC-Encyclopedia gets 25% on a larger sample size. He finds it particularly good in ch. 13-16 with 60% (20/32) txt readings. The assignment as Cat. 5 (=Byz) by Aland is not correct.

<u>arab^{MS}:</u> Sinai Ar. Parchment 8+28. 8^{th} CE. It was among the new finds from 1975. See NovT 50(2008)28-57.

131 of the 342 variants (38%) are difficult to evaluate (Rating either "-" or "1?").

Lk has 1149 verses. This means that we have

- one significant variant every 3rd 4th verse, and
- one difficult variant every 9^{th} verse.

About 36 variants (11%) should be reconsidered in NA (Mt: 20, Mk: 13).

Of the variants noted only 26 (8%) have an umlaut in B (plus 2 insecure cases). There are 78 umlauts overall in Lk. This means that 52 of the 78 umlauts indicate rather minor (or unknown!) stuff.

Here the words are safe.

 $\kappa\rho\alpha\nu\gamma\dot{\eta}$ is a rare word in the NT (6 times, once in Mt, once in Acts, both occurrences are safe).

On the one hand it is possible that $\phi\omega\nu\hat{\eta}$ has been changed to $\kappa\rho\alpha\nu\gamma\hat{\eta}$ to avoid the double $\phi\omega\nu\eta$. In the same way the change by 01 et al. could be explained, they left $\phi\omega\nu\hat{\eta}$, but changed $\dot{\alpha}\nu\varepsilon\phi\dot{\omega}\nu\eta\sigma\varepsilon\nu$ to $\dot{\alpha}\nu\varepsilon\beta\dot{\omega}\eta\sigma\varepsilon\nu$.

On the other hand, the rare $\kappa\rho\alpha\nu\gamma\dot{\eta}$ could have been changed to the more common $\phi\omega\nu\dot{\eta}$. Weiss (Lk Com.) thinks $\phi\omega\nu\dot{\eta}$ has been conformed to the verb.

A much debated point. In the previous verses it is Elisabeth who is speaking. It is possible that someone accidentally or deliberately changed the name here. The following words make not much sense in the mouth of Elisabeth ("from now on all generations will call me blessed").

Harnack notes, that if the subject is changing in verse 46, $\in \hat{l} \pi \in \nu$ $\delta \in \hat{l} \pi \in \nu$ would be expected and not $k\alpha \hat{l} \in \hat{l} \pi \in \nu$.

Similarly in verse 1:56 the $\xi \mu \in \nu \in \nu$... $\sigma \dot{\nu} \nu \alpha \dot{\nu} \tau \dot{\eta}$ should be either $\xi \mu \in \nu \in \nu$ $\delta \dot{\epsilon} M \alpha \rho \iota \dot{\alpha} \mu \sigma \dot{\nu} \nu \tau \dot{\eta}$ 'Elisakhet or simply $\xi \mu \in \nu \in \nu$ $\delta \dot{\epsilon} \sigma \dot{\nu} \nu \tau \dot{\eta}$ 'Elisakhet.

To the opposite WH argue that the change to Elisabeth could have been inspired by these words.

Harnack argues that BOTH $E\lambda\iota\sigma\alpha\beta\epsilon\tau$ and $M\alpha\rho\iota\alpha\mu$ are explanatory glosses, and that $E\lambda\iota\sigma\alpha\beta\epsilon\tau$ is the correct interpretation. Luke simply continues Elisabeth's speech with $\kappa\alpha\iota$ $\epsilon\iota\pi\epsilon\nu$. This is also the opinion of Burkitt.

The beginning of the Magnificat is similar to Hannah's Prayer in 1.Sam 1:11 and 2:1ff. Here Hannah gives thanks to the Lord for giving her a son after a long time of infertility. This would then fit of course good to Elisabeth, too.

Note that in 1.5am 2:1 the Prayer also simply starts with $\kappa\alpha$ i \in i $\pi\in\nu$, with Hannah continue speaking.

A typical LXX term, it appears 33 times in the LXX, but nowhere else in the NT. The support is rather bad, probably secondary.

Weiss (Lk Com.) notes, that the dative $\tau\alpha \hat{\iota}\zeta$ $\dot{\eta}\mu \acute{\epsilon}\rho\alpha \iota\zeta$ should indicate every single day. It has been changed into the accusative of length of time, which then is further defined by $\tau \dot{\eta}\zeta$ $\zeta\omega \dot{\eta}\zeta$.

And:

Odes of Solomon 9:76 καὶ σὺ δέ παιδίον προφήτης ὑψίστου κληθήση προπορεύση γὰρ πρὸ προσώπου κυρίου ἑτοιμάσαι ὁδοὺς αὐτοῦ

ένώπιον κυρίου appears 117 times in the LXX, but only 2 times in the NT (2Co 8:21 and Jam 4:10).

πρὸ προσώπου κυρίου appears only 5 times in the LXX and not in the NT. But the exact LXX parallel here quoted has πρὸ προσώπου μου. Also Mk 1:2, Mt 11:10 and Lk 7:27 have the words.

On the other hand $\dot{\epsilon}\nu\dot{\omega}\pi\iota o\nu$ kupiou appears in verse 1:15.

So it's either a conformation to context or to the LXX and Gospel parallels (so Tischendorf).

It is interesting to find $\pi\rho\grave{o}$ $\pi\rho o\sigma \acute{\omega}\pi o\upsilon$ $\kappa \upsilon\rho\acute{\iota}o\upsilon$ in the Odes of Solomon, which are generally dated to around 100-150 CE and are therefore our earliest independent(?) witness.

The peculiarity has been resolved in D by placing the verb before $\mathring{\alpha}\pi o\gamma\rho\alpha\varphi\mathring{\eta}$. The error is probably at least in part accidental. The question is if the error is the omission of one H or the addition of a second H. The former appears to be slightly more probable.

€ὐδοκίας noun genitive feminine singular €ὐδοκία noun nominative feminine singular €ὐδοκία "good will, pleasure, favor"

txt "and on earth peace among men with whom he is pleased"

Byz " and on earth peace, good will toward men"

German: txt "bei den Menschen seines Wohlgefallens"

Byz "und den Menschen ein Wohlgefallen"

A much debated issue. The genitive is the more difficult reading.

See detailed discussion in WH Intro and Scrivener Intro Vol. 2. Scrivener notes a quote from Dr. Field, who points out that "men of good pleasure" would be according to Graeco-biblical usage, not $\mathring{\alpha}\nu\theta\rho\mathring{\omega}\pi$ oι $\mathring{\epsilon}\mathring{\upsilon}\delta$ oκίας, but $\mathring{\alpha}\nu\delta\rho$ eς $\mathring{\epsilon}\mathring{\upsilon}\delta$ oκίας.

It is difficult to explain how the txt reading could have arisen accidentally.

The omission of the $\dot{\epsilon}\nu$ could be due to avoiding a Hiatus: $\epsilon \dot{\iota}\rho\dot{\eta}\nu\eta$ - $\dot{\epsilon}\nu$.

Harnack (compare NT Textkritik, 1931, p. 153-179): The solution can only come from a correct understanding of the sentence. The sentence can be constructed either as:

 Δ όξα $\dot{\epsilon}$ ν ὑψίστοις θ $\dot{\epsilon}$ $\dot{\omega}$,

Καὶ ἐπὶ γῆς εἰρήνη ἀνθρώποις εὐδοκίας.

or:

Δόξα ἐν ὑψίστοις θεῷ καὶ ἐπὶ γῆς,

Εἰρήνη ἀνθρώποις εὐδοκίας.

Most commentators favor the first version. Harnack and Hort go with the second. The first line is straightforward, $\tau \grave{\alpha}$ $\mathring{\upsilon} \psi \iota \sigma \tau \alpha$ is equivalent to $0 \mathring{\iota} 0 \mathring{\upsilon} \rho \alpha \nu 0 \mathring{\iota}$ and has probably been chosen for poetic reasons (Harnack). But what means $\mathring{\alpha} \nu \theta \rho \acute{\omega} \pi \sigma \iota \zeta \in \mathring{\upsilon} \delta \sigma \kappa \acute{\iota} \alpha \zeta$? It has no parallel.

Hort notes that a trajection (hyperbaton) is possible, so that $\in \mathring{\upsilon}\delta \text{OK} \acute{\iota}\alpha \zeta$ belongs to $\in \mathring{\iota}\rho \acute{\eta}\nu \eta$ with the meaning: "peace of [God's] favor in men". This is apparently the interpretation of Origen! He writes:

εἰ εἰρήνην λέγει ὁ σωτὴρ μὴ διδόναι ἐπὶ γῆς, οὐκ ἔστιν <u>εὐδοκίας</u> εἰρήνη· οὐ γὰρ ἀρνεῖται διδόναι τὴν εἰρήνην, ἀλλ' ἀπλῶς λέγει· οὐκ ἦλθον βαλεῖν εἰρήνην ἐπὶ τὴν γῆν. οὐκ εἶπε δὲ εὐδοκίας εἰρήνην, ἀλλὰ ταῦτά γε εἶπον παρὰ τοῖς ποιμέσιν οἱ ἄγγελοι.

Origen distinguishes between $\epsilon i \rho \eta \nu \eta$ as such and $\epsilon i \rho \eta \nu \eta \in \dot{\upsilon} \delta o \kappa i \alpha \zeta$. This must be a special peace "through grace". By the way, Origen learned the word from the LXX and thinks the LXX created it. It was apparently not part of the living $Kol\nu\hat{\eta}$ Greek at his time.

The Hyperbaton idea is strengthened by the fact that the first line contains one too:

Glory in the highest - to God - and on earth = Glory in the highest and on earth to God

Peace - to men - of God's grace = Peace of God's grace to men

Compare also Henoch I, 8: καὶ μετὰ τῶν δικαίων τὴν εἰρήνην ποιήσει ... καὶ τὴν εὐδοκίαν δώσει αὐτοῖς.

Harnack additionally notes that the two sentences are not connected, a $\kappa\alpha$ i seems to be required. He explains this structure as the two sentences being two hymnic exclamations and also notes the contrast between $\theta \in \hat{\omega}$ and $\dot{\alpha}\nu\theta\rho\dot{\omega}\pi\sigma\iota\varsigma$.

Metzger, who took the words in the first of the two above constructions writes: "The meaning seems to be, not that divine peace can be bestowed only where human good will is already present, but that at the birth of the Saviour God's peace rests upon those whom he has chosen in accord with his good pleasure. It should be noted that the Sahidic version employs the possessive pronoun: 'and peace upon earth among men of his desire [pleasure].'

ἀνθρώποις εὐδοκίας is probably a Semitic construction and has been found several times in Hebrew and Aramaic Qumran hymns in the following forms:

"the sons of his [God's] good pleasure"

"the elect of his [God's] good pleasure"

"among men of his good pleasure"

(see: J.A. Fitzmyer, Theological Studies 19 (1958), 225-227)

The Byzantine text appears in the LXX Ode 14:1-3. The addition of the Odes to the LXX is relatively late (5^{th} CE?), but I haven't found any details about this. The earliest form of Ode 14 can be found in the Apostolic Constitutions (4^{th} CE, book 7, sec. V "Daily prayers - A morning prayer", XLVII).

Kilpatrick reviews the evidence and writes: "Whether Luke wrote the genitive or the nominative at 2.14, we should expect to find good idiom and sense." After analyzing the internal evidence he concludes: "The 'received' nominative $\in \mathring{\upsilon}\delta \text{OK} \, \acute{\iota}\alpha$ suffers from neither ambiguity nor inappropriateness in either context or in form".

It is possible that où $\Hau\nu\theta\rho\omega\pi\sigma\iota$ has been omitted due to h.t. (OI - OI - OI) or to improve style. The longer reading is characteristically Lukan in style.

It is also possible that it has been added to have a better separation between the angels and the shepherds. But this then has been done very imperfectly. Now, in the longer reading, the sentence structure is really equivocal: $\mathring{\alpha}\pi\mathring{\eta}\lambda\theta$ ov $\mathring{\alpha}\pi'$ $\alpha\mathring{v}\tau\mathring{\omega}\nu$ $\epsilon\mathring{\iota}\zeta$ $\tau\grave{o}\nu$ o $\mathring{v}\rho\alpha\nu\grave{o}\nu$ o $\mathring{\iota}$ $\mathring{\alpha}\gamma\gamma\epsilon\lambda$ or ka $\grave{\iota}$ o $\mathring{\iota}$ $\mathring{\alpha}\nu\theta\rho\omega\pi$ or o $\mathring{\iota}$ π or $\mu\acute{\epsilon}\nu\acute{\epsilon}\zeta$

In this form it could be interpreted as "... were gone away from them into heaven the angels and the men, the shepherds said ..."

To avoid this interpretation several witnesses moved of $\mbox{\'e}\gamma\gamma\epsilon\lambda$ of in front of $\mbox{\'e}i\zeta$ tòu oùpauòu. It is possible that others omitted kal of $\mbox{\'e}\nu\theta\rho\omega\pi$ of for that reason. Θ goes so far and does both.

It is also possible that $\kappa\alpha$ i δ i $\delta\nu\theta\rho\omega\pi\sigma$ has been added to continue the bipartition from verse 14 of $\delta\nu$ implies and $\delta\nu\theta\rho\omega\pi\sigma$. That when the angels departed ALSO the men behaved according to Gods will. But the addition appears rather unskillful.

"After eight days had passed, it was time to circumcise the child; and he was called Jesus, the name given by the angel before he was conceived in the womb."

The purification law applies probably to women here only.

The Western $\alpha \mathring{\upsilon} \tau o \widehat{\upsilon}$ probably refers to Jesus, who is mentioned in the previous verse.

NET Bible: "It was Mary's purification that was required by law, forty days after the birth (Lev 12:2-4). However, it is possible Joseph shared in a need to be purified by having to help with the birth or that they also dedicated the child as a first born (Exod 13:2), which would also require a sacrifice that Joseph would bring. Luke's point is that the parents followed the law. They were pious."

W.H.P. The Byzantine reading is theologically problematic, because it would indicate that Jesus developed spiritually and was not completely divine from the beginning (see Ehrman, Orthodox Corruption, p. 92-94).

It appears that the omission might be original. There is no reason for an omission. It is possible that the addition of $\dot{\epsilon}\nu$ or $\dot{\epsilon}\nu$ $\tau\hat{\eta}$ was meant to indicate the dative. The omission of $\dot{\epsilon}\nu$ by B et al. is possibly due to oversight (ENEN, so Weiss). On the other hand it could have been added for that reason.

Weiss (Lk Com.) notes that the words could have been omitted to construct the three expressions more parallel: $\pi\rho o\dot{\epsilon}\kappa o\pi\tau \epsilon\nu$ σοφία καὶ ἡλικία καὶ χάριτι.

Both corrections are very weak. They are written in small uncial script in the left margin. The words are indicated for exchange by a vertical wave. Tischendorf in his 8^{th} ed. labels the words with " B^{mg*} ". Does this asterisk indicate that he considers both words as being deleted subsequently? I think the words in the margin are by B^{C1} and are just very faded. In his Vaticanus edition Tischendorf isn't giving a specific corrector's label to the words.

The word $\beta\alpha\sigma\iota\lambda\in i\alpha\zeta$ is slightly superimposed by the Latin chapter number "·3·". It is not noted in NA and Swanson, but in IGNTP and Tis. One line below in column B are two letters not enhanced. They are equally faded.

It may be that someone tried to delete $\mathring{o}\rho\in\iota\nu\mathring{\eta}\zeta$ later, the area around it looks washed out. But $\beta\alpha\sigma\iota\lambda\in\acute\iota\alpha\zeta$ above also looks very faded and has no such blot. It is thus more probable that the stain has nothing to do with the word $\mathring{o}\rho\in\iota\nu\mathring{\eta}\zeta$. $\mathring{o}\rho\in\iota\nu\mathring{\eta}\zeta$ is not noted in NA, IGNTP and Swanson, but in Tis.

There is an extra file with images on this paleographic problem, click here.

Now the question is, why these changes? No other MS reads thus, as far as I know.

Has ἡγεμονίας been changed to βασιλείας for stylistic reasons, to avoid the double ἡγεμονίας - ἡγεμονεύοντος?

And $\delta \rho \in \iota \nu \hat{\eta} \varsigma$? Is it another designation for $\iota \tau \circ \nu \alpha \iota \alpha \varsigma$?

Perhaps an early commentary?

Burkitt (Evangelion Intro, p. 288) writes:

"Possibly therefore the disturbing cause is the Western reading $\beta\alpha\pi\tau\iota\sigma\theta\hat{\eta}\nu\alpha\iota\dot{\epsilon}\nu\omega\pi\iota\sigma\nu$ $\alpha\dot{\upsilon}\tau\sigma\hat{\upsilon}$. This uncommon phrase is very likely to be genuine: possibly even stood in the source from which St. Luke took Lk 3:10-15. It is possible that the addition of $\kappa\alpha\lambda\delta\nu$ is a harmonization to Mt. Note that D, Lat, Sy-S, Sy-C also omit $\kappa\alpha\lambda$ as a conformation to Mt. These are the only differences to Mt.

Metzger notes that "the omission of $\kappa\alpha\lambda\grave{o}\nu$ improves the sense (every unfruitful tree - not only the one that does not bring forth good fruit - is to be cut down)."

It is quite probable that it is at least in part an omission due to homoioarcton $\kappa\alpha$ - $\kappa\alpha$ or homoioteleuton -0 ν -0 ν .

It is noteworthy that WH have $\kappa\alpha\lambda\delta\nu$ in brackets. They very probably did not know P4. P4 has been found in 1880 and was first published in 1892. WH

published their text in 1881. Perhaps they were influenced by Lachmann? Or they considered Origen plus Western evidence (Old Latin plus Vulgate) to be enough evidence.

The evidence from Origen is divided, as in the homilies he cites Lk 3:9 with 'good fruit' twice (from Tregelles).

UBS 4 dropped the variant. UBS 3b has "Ir-Lat" and "Or" for the omission.

The SQE has interestingly "Ir" for the omission in Mt 3:10!

LXX Psalm 2:7 διαγγέλλων τὸ πρόσταγμα κυρίου κύριος εἶπεν πρός με υἱός μου εἶ σύ ἐγὼ σήμερον γεγέννηκά σε

NA²⁷ Acts 13:33 ὅτι ταύτην ὁ θεὸς ἐκπεπλήρωκεν τοῖς τέκνοις [αὐτῶν] ἡμῖν ἀναστήσας Ἰησοῦν ὡς καὶ ἐν τῷ ψαλμῷ γέγραπται τῷ δευτέρῳ· υἱός μου εἶ σύ, ἐγὼ σήμερον γεγέννηκά σε.

God has in full completed this to us their children, having raised up Jesus, as also in the second Psalm it has been written, "You are my Son; today I have begotten you"

NA²⁷ Hebrews 1:5 Τίνι γὰρ ϵ ἶπέν ποτε τῶν ἀγγέλων υἱός μου ϵ ἶ σύ, $\dot{\epsilon}$ γὼ σήμερον γεγέννηκά σε;

For to which of the angels did God ever say, "You are my Son; today I have begotten you"?

NA²⁷ Hebrews 5:5 οὕτως καὶ ὁ Χριστὸς οὐχ ἑαυτὸν ἐδόξασεν γενηθῆναι ἀρχιερέα ἀλλ' ὁ λαλήσας πρὸς αὐτόν υἱός μου εἶ σύ, ἐγὼ σήμερον γεγέννηκά σε·

so also the Christ did not glorify himself to become chief priest, but He who spoke unto him: "You are my Son; today I have begotten you"?

A so-called Adoptionistic or Ebionitic reading.

The reading seems to have been widespread and early. Internally it is clearly to be favored: It is the harder reading and the txt reading is possibly a harmonization to Mt/Mk. Acts 13:33 shows that Ps 2:7 is clearly connected with Jesus from early on. Where did the author of Hebrews get his quote? Did he know Lk in this form?

Do the church fathers really quote a special Lukan reading or are they just quoting Ps 2:7?

The version in the Gospel of the Ebionites is clearly a conflation, but of what? Of Mt and Lk? Or of two versions of Lk?

A curious reading of P4 might be mentioned here for this verse (noted in Comfort, Encountering the MSS, p. 331).

Instead of

καὶ καταβῆναι τὸ πν \in ῦμα τὸ ἄγιον σωματικῷ and the Holy Spirit descended upon him in bodily form

P4 has:

καὶ καταβῆναι τὸ ΠΝΑ τὸ ἄγιον ΠΝΙ

which expands:

καὶ καταβῆναι τὸ πν \in ῦμα τὸ ἄγιον πν \in ύματι and the Holy Spirit descended upon him in spiritual form

Comfort writes: The reading "provides a creative alternative to the difficult idea of the Spirit descending in bodily form."

Four slightly deviating genealogies are given in Swanson, by E. 2. 28. 1071

They are mixing up the names, perhaps interchanging rows and columns (at least 1071).

Now, D has a very strange genealogy: The first part (Lk 3:24-31) is the Matthean genealogy Mt 1:6-16, but in reversed order. The second part (Lk 3:32-38) is the normal Lukan genealogy.

This D version is also found in Aphraates' homily "Demonstrations 23.21" (ca. 345 CE), Aphraates is known for citing the Diatessaron (which lacks the genealogies). Curious!

Notes:

- 1. Aphraates omits too $E\lambda\iota\alpha\kappa\in\iota\mu$. This name is in D only. Regarding its probable origin confer: 2. Chr 36:4 The king of Egypt made his brother <u>Eliakim</u> king over Judah and Jerusalem, <u>and changed his name to Jehoiakim</u>. So, $E\lambda\iota\alpha\kappa\iota\mu$ is just another name for $I\omega\alpha\kappa\iota\mu$. Perhaps a marginal gloss that found its way into the text?
- 2. $I\omega\alpha\kappa\iota\mu$ is a well known addition in Mt 1:11. Support:

M, U, Θ , Σ , f1, 33, 1342, al 168 , Sy-H, Sy-Pal, geo, (Ir $^{\text{Lat}}$), Epiph

- 3. The addition of tou $A\mu\alpha\sigma\iota o\upsilon$ tou $I\omega\alpha\zeta$ tou $O\chi o\zeta\iota o\upsilon$ is also given in Mt 1:8 by Sy-C, Aeth and Epiphanius (4th CE). Unfortunately D is not extant in this part of Mt. Sy-S reads normal.
 - They are taken from 1st Chronicles:
 - 1.Chr. 3:11-12 <u>Ιωραμ υίὸς αὐτοῦ Οχοζια υίὸς αὐτοῦ Ιωας υίὸς αὐτοῦ 12 Αμασιας υίὸς αὐτοῦ Αζαρια</u> υίὸς αὐτοῦ Ιωαθαν υίὸς αὐτοῦ
- 4. Unfortunately Sy-C is not extant for this part of Lk. Sy-S reads the normal genealogy.

This obviously secondary genealogy can thus be traced back to Syria in the 4^{th} CE. One could speculate that, perhaps, it is an attempt to add a genealogy to the

Diatessaron? It's inclusion in D, then, would be another indicator for D's closeness to the Diatessaron or some similar document (and for its origin in Syria). William Petersen agrees with this speculation (private email, Dec. 2005).

Codex Fuldensis (547 CE), a Latin Gospel harmony using a Vulgate text, shows a clearly independent attempt to add a combined genealogy. It first has the full Matthean genealogy (Mt 1:1-16) in the normal order and after that the Lukan succession from Abraham to God (Lk 3:34-38). It has the normal Vulgate text and none of the additions known from D/Aphraates:

Irenaeus (Adv Haer III.22.3) seems to have known a text of Luke with 72 generations: "Wherefore Luke points out that the pedigree which traces the generation of our Lord back to Adam contains seventy-two generations, connecting the end with the beginning, and implying that it is He who has summed up in Himself all nations dispersed from Adam downwards, and all languages and generations of men, together with Adam himself."

Much depends on how Irenaeus counted, e.g. if he included Adam or Jesus. (Regarding the 72 nations compare the discussion of the 70/72 at Lk 10:1.)

Resa is unknown. The explanation is that Resa is not a name but a title. The list seems to have been reversed from a file that read "Zorobabel Resa", which means "Zorobabel, the prince", Aramaic \COMM "head". By misinterpretation and reversion of the list, this "Resa" then became the father of Zorobabel (see Nestle "Einführung" 2^{nd} ed.).

This is not a TC issue, but possibly connected with the variant 3:33, see below.

Parallel:

NA²⁷ Matthew 1:3 ... Έσρώμ δὲ ἐγέννησεν τὸν 'Αράμ, 4 'Αρὰμ δὲ ἐγέννησεν τὸν 'Αμιναδάβ, ...

 NA^{27} Matthew 1:8 'Aσὰφ δὲ ἐγέννησεν τὸν 'Iωσαφάτ, 'Iωσαφὰτ δὲ ἐγέννησεν τὸν \underline{I} ωράμ, \underline{I} ωράμ δὲ ἐγέννησεν τὸν 'Oζίαν,

The names ${}^{\prime}A\delta\mu i\nu$ and ${}^{\prime}A\rho\nu i$ appear nowhere else in the Bible. Probably someone changed them to the Byzantine reading using the name from Mt 1:3. Since then one name is missing, a ${}^{\prime}I\omega\rho\acute{\alpha}\mu$ has been inserted later. Or, in the case of 0102 and N ${}^{\prime}A\rho\acute{\alpha}\mu$ has been replaced for one of the unknown names. The reading of Θ , f1 is a conflation of both either accidentally (misinterpreting a correction) or deliberately.

WH note: "Aminadab/Admin and Aram/Arni are evidently duplicate forms of the same pair of names, preserved in different family records."

Then the B reading and the Byzantine reading (A, D et al.) would mean the same. $A\mu\nu\alpha\delta\dot{\alpha}\beta$ is sometimes written as $A\mu\nu\alpha\delta\dot{\alpha}\mu$, which might explain the $A\delta\alpha\mu$ by P4, O1* et al., but why the other way round?

It is possible that the genealogy used by Luke was originally the other way round and read ARAMAMINADAM, giving Adam, A(d)min and Aram/Arni, the reading of P4, O1* et al. Alert scribes noted the error and changed "Adam+Admin" back to Aminadab (= Byz) or removed Adam (= B).

This means that essentially most of the readings mean the same, only the K et al. reading being really wrong.

The Byzantine reading is identical with Mt and cannot be the original. It cannot explain the strange other combinations. The Θ et al. variants are conflations. We are left with the txt reading, the P4, O1* reading and the B reading. The singular B reading is possibly a homoioarcton error from the P4, O1* reading (AD... AD..).

It is possible that the P4, 01* reading is a transcriptional error (AMINADAM - ADAM).

In Lk, as in Mt, it is very probable that the original genealogy obeys the Hebdomadic principle (gr. "seventh"), there are $11 \times 7 = 77$ generations. This has to be taken into account.

The important point here is that the name $K\alpha\iota\nu\alpha\nu$ is not found in the Hebrew OT. But it appears overwhelmingly in the LXX.

The name reappears in Lk 3:37, where it does parallel Gen 5:9 and 1. Chr 1:1.

Since the name $K\alpha\iota\nu\alpha\nu$ reappears in verse 37, it has been suggested that its appearance in verse 36 is some kind of copying error. But there is no obvious cause for it.

To the contrary, the omission is much more likely to be accidental. Note similar omissions in the genealogy:

It is also possible that the name has been omitted

- a) because it could not be found in the OT or
- b) because it appears a second time in verse 37.

The name ELAM (Aιλαμ) in Sy-S could be a confusion: LXX Genesis 10:22 υἱοὶ Σημ Aιλαμ καὶ Aσσουρ καὶ Aρφαξαδ καὶ Λουδ καὶ Αραμ καὶ Καιναν Aιλαμ is a brother of Καιναν.

The LXX evidence:

Another question is, why is the name in the LXX, but not in the Masoretic text? It has been argued that the name has possibly been added by Christians in order to bring the genealogy in Genesis in line with Luke. But is this really probable? Is it not also possible that this is just one of the many differences of the LXX and the Masoretic text and that Luke read the name in his LXX? Perhaps the name was omitted at some stage to get rid of the problem that $K\alpha\iota\nu\alpha\nu$ in Gen 10:22 is the brother of $A\rho\varphi\alpha\xi\alpha\delta$, but in 10:24 he is his son?

But note:

Josephus (37-100 CE), who quotes the LXX, does not have $K\alpha\iota\nu\alpha\nu$. In Ant. book 1 he explicitly writes: "Shem, the third son of Noah, had <u>five</u> sons", and also: "Sala was the son of Arphaxad".

And Julius Africanus (ca. 160-240) wrote in his Chronography, ca. 220 CE: "And after the flood, Sem begot Arphaxad. Arphaxad, when 135 years old, begets Sala in the year 2397. Sala, when 130 years old, begets Heber in the year 2527. Heber, when 134 years old, begets Phalec in the year 2661, so called because the earth was divided in his days." [he clearly cites the LXX]

So, he omits $K\alpha\iota\nu\alpha\nu$, too, probably because he did not read it in his LXX (he writes Greek).

The following was given on the LXX-list (Dec. 2005):

- "There are Old Latin manuscripts with and without $K\alpha\iota\nu\alpha\nu$ in Genesis 11. Vulgate is uniform in rejecting $K\alpha\iota\nu\alpha\nu$." [vg is translated from the Hebrew]
- "The name is also found in Jubilees (Ethiopic for sure)"
- "Gen 10:22-24 and Gen 11:12-13 are not found in the Dead Sea Scrolls, are not found in any of the pre Christian LXX manuscripts, are only found in 2 LXX manuscripts that predate the Great Codices, see P.Berlin Graec.Fol.66 I,II (Rahlfs 911), a Christian MS of about the late 3rd century, and P.Beatty IV (Rahlfs 961), a Christian MS of about the early 4th century."
- "The sequence KAIKAINANKAI at Gen 10.22 is ripe for corruption and variation. If you want to see how much, check Wevers' Gottingen edition. There is much confusion in the textual witnesses on these matters. I doubt that there is anything certifiably "Christian" about any of it."
- "the Genesis Apocryphon lists the sons of Shem at 1QapGen 12:11. The beginning of the list has been lost, but the end is there. The list is in the same order as the LXX, so fortunately we can see where the $K\alpha\iota\nu\alpha\nu$ would have been at the end of the list. It is not there. We have: ...WR)RPK\$D LWD W)RM WBNN NQBN XM\$ (...ur Arpachshad Lud and Aram and five daughters). No QYNN."

Looking this up in the Göttingen edition, the papyri P833, P911 and P961 omit $K\alpha\iota\nu\alpha\nu$ in 10:24, but not 10:22, and have it in chapter 11. Only MS 319 omits in all cases.

So, the earliest evidence in the LXX we have for $K\alpha\iota\nu\alpha\nu$ is from the late 3rd CE (P911).

The only (possible) pre-Christian reference to $K\alpha\iota\nu\alpha\nu$ can be found in Jubilees. Jubilees was written around 109-105 BCE. The possible references are in ch. 7 and 8.

There is no $K\alpha \iota \nu\alpha\nu$ in chapter 7 (equals Gen 10:22): "And these are the sons of Shem: Elam, and Asshur, and Arpachshad -this (son) was born two years after the flood- and Lud, and Aram."

But $K\alpha\iota\nu\alpha\nu$ is mentioned in ch. 8, 1-5: " $_1$ In the twenty-ninth jubilee, in the first week, [1373 A.M.] in the beginning thereof <u>Arpachshad</u> took to himself a wife and her name was Rasu'eja, the daughter of Susan, the daughter of Elam, and 2 she bare him a son in the third year in this week, [1375 A.M.] and he called his name <u>Kainam</u>. [...] 5 And in the thirtieth jubilee, [1429 A.M.] in the second week, in the first year thereof, <u>he [Kainan or Arpachshad]</u> took to himself a wife, and her name was Melka, the daughter of Madai, the son of Japheth, and in the fourth year [1432 A.M.] he begat a son, 6 and called his name <u>Shelah</u>: [...] and Shelah grew up and took to himself a wife, [...] 7 And she bare him a son in the fifth year [1503 A.M.] thereof, and he called his name Eber

So, depending on who the "he" is in vs. 5, we possibly have the succession from the LXX and Lk 3:36: $A\rho\phi\alpha\xi\alpha\delta$ - $K\alpha\iota\nu\alpha\nu$ - $\Sigma\alpha\lambda\alpha$ - $E\beta\varepsilon\rho$

List-comment: "None of the Qumran fragments contain Jubilees 8. A Syriac fragment has most of 8:2-4. The Latin and Ethiopic manuscripts of Jubilees tend to be harmonized to the Vulgate and LXX (via the Ethiopic OT). However, the Syriac could be an independent witness to the pre-Christian text of Jubilees if it is translated directly from the Hebrew, as Tisserant argued."

IQP's Crit. ed. has the Matthean ὁ διάβολος εἰς ὅρος [[ὑψηλὸν λίαν]] with ὑψηλὸν λίαν in double brackets indicating doubt that text was present there. This is odd, because both Mt and Lk have ὑψηλὸν. Fleddermann ("Q - A reconstruction", 2005) has ὁ διάβολος εἰς ὅρος ὑψηλον without λίαν.

Both words mean essentially the same ("open"), but $\mathring{\alpha}\nu\alpha\pi\tau\mathring{\upsilon}\sigma\sigma\omega$ is used especially for "unrolling scrolls". It is possible that it is a harmonization to immediate context, verse 20 (so Weiss). $\pi\tau\mathring{\upsilon}\sigma\sigma\omega$ means "close (a book)". $\mathring{\alpha}\nu\alpha\pi\tau\mathring{\upsilon}\sigma\sigma\omega$ is a rare word. It appears only here in the NT and only 6 times in the LXX. $\mathring{\alpha}\nu\circ\mathring{\iota}\gamma\omega$ on the other hand is a very common word, appearing 260 times in the Bible (77 times in the NT).

'Ioυδαίας is very strange. If it's an error, it must be a very early one, possibly even by Lk himself (in which case we should not correct it, but we will never know). The last mentioned place was in verse 14, Galilea. The next mentioned place, in the following verse 5:1, is the lake of Gennesaret. Also the parallels, including Luke's source Mk, have Galilea.

On the other hand it is possible that Galilea is a harmonization to the parallel accounts. It is quite possible that $\dot{I}o\upsilon\delta\alpha\acute{\iota}\alpha\varsigma$ was the original text and that later scribes tried to work around that by changing it to the Mt/Mk parallel or into $\tau \dot{\omega} \nu$ $\dot{I}o\upsilon\delta\alpha\acute{\iota}\omega\nu$ or $\alpha\dot{\upsilon}\tau\dot{\omega}\nu$.

There is no reason why someone should change Galilea into Judea here, except accidentally. The large array of witnesses makes this quite improbable.

Is it possible that the "other cities" in the previous verse 43 inspired some scribes to think of Judea?

Another possibility is that Judea is meant here as "land of the Jews" as in Mk 1:5 (so Weiss). This is also clearly meant in Lk 1:5 and possibly also in Lk 7:17 and Lk 23:5. This interpretation would also be in line with the statement in verse 43 "I must proclaim the good news of the kingdom of God to the other cities also".

It is interesting that the majority of Lectionaries apparently read $'Io\upsilon\delta\alpha\acute{\iota}\alpha\varsigma$ here (Wachtel, SBL 2005).

Interesting, because a diminutive appears. Similar to Jo 6:23, see there. Blass notes that diminutives are not accepted in "good Greek", so it is possible that scribes changed $\pi\lambda\sigma\iota\acute{\alpha}\rho\iota\alpha$ into $\pi\lambda\sigma\hat{\iota}\alpha$.

Difficult.

Weiss (Textkritik, p. 23) notes that it is possible that scribes found the little boats too small for $\tau\grave{o}\nu$ $\mathring{o}\chi\lambdao\nu$ of verse 1. Placing $\delta\acute{u}o$ in front of $\pi\lambdao\iota\acute{\alpha}\rho\iota\alpha$ should emphasize it. He also suggests a possible conformation to Lk 5:3 and 5:7.

Th. Zahn (Comm. Lk.) thinks that the word order variation of $\delta \upsilon \grave{o}$ makes it suspect.

Very probably a harmonization to Mt, Mk (so Weiss). There is no reason for an omission.

The omission makes a statement out of a question. Jesus answers in verse 34 although it merely says: δ $\delta \epsilon$ 'Inσοῦς ϵ ἶπεν πρὸς αὐτούς' So, on the one hand it is possible that the δ ιὰ τί has been added to create a question. On the other hand it is possible that the absence of ἀποκριθεὶς in verse 34 led to the excision of δ ιὰ τί in verse 33 (so Hoskier).

Compare Mk 2:18 where first the statement is made which is then followed by the question!

One of the rare cases with an omission in the Byzantine text (note also next variant).

Both parallel accounts have the genitive without the preposition, but both use different words here and also the sense is slightly different. It seems that $\sigma\chi\dot{\iota}\zeta\omega$, "tear", is required in the first place, because $\kappa\alpha\dot{\iota}$ tò $\kappa\alpha\iota\nu\dot{o}\nu$ $\sigma\chi\dot{\iota}\zeta\epsilon\iota$ = "also the new will be torn" takes up the word again. Possibly it has been added for this reason?

The only reason to omit $\sigma\chi\acute{\iota}\sigma\alpha\varsigma$ would be to make it more conform to the parallel accounts.

The verse is not in Mt and not in Mk. It has either been omitted due to the harmonizing tendency of D in Lk or it is a secondary interpolation. Since the external evidence is overwhelming, the latter is not very probable.

Why Marcion omitted the sentence is clear, because he thought it validated the authority of the OT.

The saying also appears in the Gospel of Thomas.

The Byzantine reading indicates a misinterpretation: The person who sticks with the old does not do it because the old is better (in his view), but because it is good (enough). External against internal evidence.

A real mystery. The word occurs nowhere else (M.A. Robinson notes the titles of several psalms, which also contain similar references of (today) unknown meaning). The reading is normally considered as originating through some strange scribal blunder. But the given explanations are quite unsatisfactory. The best is that of Skeat who thinks of a dittography BATWBATW, which was subsequently interpreted as -BATW BA-TW with B and A representing numbers.

Another explanation is that some scribe wrote $\pi\rho\omega\tau\psi$ here, with reference to the other Sabbath in 6:6, but then remembered an earlier Sabbath in 4:31 and correct the $\pi\rho\omega\tau\psi$ into $\delta\epsilon\upsilon\tau\epsilon\rho\psi$, which then led to $\delta\epsilon\upsilon\tau\epsilon\rho\sigma\pi\rho\omega\tau\psi$, but this appears very far-fetched. Klein argues that actually Luke himself wrote $\pi\rho\omega\tau\psi$.

François Bovon in his Luke commentary conjectures $\sigma\alpha\beta\beta\acute{\alpha}t\psi$ $\delta\epsilon\upsilon t\acute{\epsilon}\rho\psi$ $\pi\rho\omega\mathring{\iota}$. The problem with this suggestion is, as Bovon himself acknowledges, that Luke does not like the word $\pi\rho\omega\mathring{\iota}$ and avoids it when he finds it in Mark. However, the advantage of the emendation for the narrative is that the early time of the day explains the hunger of the disciples.

H. Sahlin (NovT 24 (1982) 160-79) notes the word-order variant later in the verse:

NA²⁷ Luke 6:1 καὶ ἤσθιον τοὺς στάχυας ψώχοντες ταῖς χερσίν. BYZ Luke 6:1 τοὺς στάχυας καὶ ἤσθιον ψώχοντες ταῖς χερσίν

Sahlin suggests that some scribe wrote $\delta \in \acute{\upsilon} \tau \in \rho \circ \nu$ $\pi \rho \circ \tau \circ \nu$ above the words to indicate exchange. Another scribe misunderstood this and created the variant.

The meaning was already unknown in Jerome's time. He asked Gregor Nazianz about it, but he didn't know it either.

Eustratius (in his life of Eutychius) refers to the $\delta \in \text{U} \tau \in \rho \circ \pi \rho \omega \tau \eta$ kurický as the first Sunday after Easter. The word $\delta \in \text{U} \tau \in \rho \in \sigma \chi \alpha \tau \circ \zeta$ is also known (see Th. Zahn, Comm. Lk.).

It remains strange. If the word is correct, it must have been borrowed from something in the Jewish calendar, and should have been generally known. Then there would be no reason for an omission.

It might additionally be noted that $\delta \in \text{ut} \in \rho \circ \pi \rho \omega t \omega$ is visually and acoustically similar to the following word $\delta \iota \alpha \pi \circ \rho \in \dot{\upsilon} \in \sigma \theta \alpha \iota$.

"On the same day he saw a man working on the Sabbath and said to him: Man, if you know what you are doing, you are blessed, but if you do not know, you are accursed and a transgressor of the law."

This passage is generally referred to as Lk 6:5D, but D actually shifts verse 5 after verse 10. This way D has three incidents concerning Jesus and the Sabbath which are finished by the statement of Jesus' sovereignty over the Sabbath. Good composition, but excluded by external evidence.

WH: "Possibly from the same source as the Section on the woman taken in adultery."

E Bammel writes: "The old Latin codex Palatinus (e) introduces Luke 6:1 by the addition of *mane* to the normal text, that means in a way which suggests that another story was to follow later on the same day - as it actually does in D. If this is right, it would point to the existence of the pericope at some stage of the Latin version and thereby to a more widespread occurrence, the last trace of which is found in e."

P4 is not noted in NA. In IGNTP it is not noted as defective and also not in the apparatus (except that it omits $\delta \tau \iota$). So one must assume that it reads Byz. But this is certainly not correct. P. Comfort has P4 for txt, but the ed. princeps (J. Merell RB 47, 1938, 5-22) reads (letters in red doubtful):

[TOY]C IEPEIC · KAI EAE
[TE]N AYTOIC KC ECTIN
[KAI TOY CABBATOY O]
[YIOC] TOY ANOPWHOY
EFENETO AE EN TW ETE
PW CABBATW EICEAOEIN

This also Skeat (NTS 1997) notes, without presenting the text: " $\kappa\alpha$ i $\tau\sigma$ 0 $\sigma\alpha\beta\beta\alpha\tau\sigma$ 0: the $\kappa\alpha$ i is required by the space". From the above reconstruction this seems reasonable, but it would create a singular reading (note that this is the reading of the TR in Mt!).

Unfortunately the image I have is too bad to make out any letter.

NA²⁷ Mark 2:28 ώστ \in κύριός $\dot{\epsilon}$ στιν \dot{o} υἱὸς τοῦ ἀνθρώπου καὶ τοῦ σαββάτου.

Either the txt reading is a harmonization to Mt or the Byzantine reading is a harmonization to Mk (so Weiss). Generally a harmonization to Mt is more probable than to Mk. Also the support is quite limited for the txt reading.

The $\check{o}\tau\iota$ is not in the Matthean parallel (but there is a $\gamma\check{\alpha}\rho,$ and in verse 12:6 there is a $\check{o}\tau\iota$). There is no reason to omit the $\check{o}\tau\iota$ in Lk. It was possibly added to separate $\kappa\acute{u}\rho\iota\acute{o}\zeta$ from the preceding, because one could interpret the words as $\kappa\alpha\grave{\iota}\ \ \check{\epsilon}\lambda\epsilon\gamma\epsilon\nu$ $\alpha\grave{u}\tauo\hat{\iota}\zeta$ \grave{o} $\kappa\acute{u}\rho\iota\acute{o}\zeta$...

Note also that some witnesses at Mt 12:8 have the reading with $\kappa\alpha \hat{\iota}$, either as a harmonization to Byz-Lk or to Mk. Interestingly some witnesses in Mt insert the $\kappa\alpha\hat{\iota}$ between $\hat{\epsilon}\sigma\tau\iota\nu$ and $\tauo\hat{\upsilon}$ $\sigma\alpha\beta\beta\acute{\alpha}\tau\upsilon\upsilon$, without parallel. This is possibly the reading of P4 in Lk.

The term $\mathring{o}\chi\lambda o\zeta$ ($\pi o\lambda \mathring{v}\zeta$) $\mu\alpha\theta\eta\tau \mathring{\omega}\nu$ = crowd of disciples, appears nowhere else. But in Lk 5:29 appears $\mathring{o}\chi\lambda o\zeta$ $\pi o\lambda \mathring{v}\zeta$ $\tau \in \lambda \omega \nu \mathring{\omega}\nu$.

It is possible that $\pi o \lambda \grave{\upsilon} \zeta$ has been added as an enhancement or from 5:29. The support is not very good.

Weiss (Textkritik, p. 132) thinks that $\pi o \lambda \hat{\upsilon} \zeta$ has been omitted, because it seemed too much for the group of disciples.

There is no reason for an omission. Except possibly to make it more terse, as an aphorism. The addition on the other hand would be quite natural. It could be a partial harmonization to Mt (so Weiss). The support for txt is rather slim. IQP's Crit. ed. has $0\rlap{\sc v}\tau\omega\zeta$ $\pi\sigma\iota\epsilon\hat{\iota}\tau\epsilon$ $\alpha\rlap{\sc v}\tau\sigma\hat{\iota}\zeta$ for Q, a reading that is neither in Mt nor in Lk. The variant reading $\mu\eta\delta\acute{\epsilon}\nu\alpha$ does not fit the context. It probably arose as a transcriptional error: MHDENDDIED MHDENDIZONTEC

Accidentally the A has been doubled (so Weiss).

Weiss (Textkritik, p. 33) notes additionally that it could also be a reflection on $\tau o \dot{\upsilon} \zeta \ \dot{\epsilon} \chi \theta \rho o \dot{\upsilon} \zeta$ which, then, requires the masculine.

What is most interesting here are the two words $\mathring{b}\pi o\kappa \in \mathring{l}\tau \alpha \iota \ \mathring{b}\pi o\kappa \rho \in \iota \tau \acute{\alpha}$. It has been suggested (e.g. Vogels) that this is a very early dittography error in a Greek ancestor of the "Western" text. This may point to an underlying common ancestor of the Old Latin.

Note also the very interesting fact that Sy-C has this text in Mt (where D and Sy-S unfortunately have lacunae)!

ίκανὸς here: "many, quite a few"

ίκανὸς appears 14 times elsewhere in the Gospels, 3 times in Mt, 3 times in Mk and 8 times in Lk and 18 times (!) in Acts. So, it is a typical Lukan word. Note especially the occurrence in the next verse with the same meaning.

There is no reason for an addition here, except for a conformation to the next verse 12 (so Weiss). It is possible that it has been omitted, because it is unusual and strange to mention so many disciples. Those many disciples have been mentioned before at 6:17 and here a variation occurs, too:

 NA^{27} Luke 6:17 Kαὶ καταβὰς μετ' αὐτῶν ἔστη ἐπὶ τόπου πεδινοῦ, καὶ ὄχλος πολὺς μαθητῶν αὐτοῦ,

Here, $\pi o \lambda \dot{\nu} \zeta$ has been omitted by:

A, D, Q, Θ , Ψ , f13, 33, 1342, Maj, Latt, Sy-S, Sy-H, bo

The difference between these two variants is that in 6:17 it is the Byzantine + Western text that omits and here it is the Alexandrian + Western text.

Overall, it is more probable that is has been omitted than added.

 $\dot{\upsilon}\pi\acute{\alpha}\rho\chi\omega$ is a Lukan favorite (15 times in Lk, 3 times in Mt). There are two different meanings:

- a) substantivally as $\tau\grave{\alpha}~\acute{\nu}\pi\acute{\alpha}\rho\chi o\nu\tau\alpha$, with the meaning "possessions, property"
- b) with the meaning "to be".

There is evidence that scribes felt uncomfortable with the occurrences of $\dot{\upsilon}\pi\dot{\alpha}\rho\chi\omega$ with the meaning "to be". Almost always some witnesses changed the word (see above).

Jesus is already in the house of the Pharisee from verse 7:36 on. The woman enters the scene only later, so the $3^{\rm rd}$ person is perfectly fitting.

It is possible that $\in l\sigma \hat{\eta} \lambda \theta o \nu$ is a conformation to the previous verse 44. On the other hand it is equally possible that the difficult 1^{st} person has been changed to 3^{rd} person.

α) τὴν κεφαλήν

The reading $\tau \dot{\eta} \nu$ $\kappa \epsilon \dot{\varphi} \alpha \lambda \dot{\eta} \nu$ is clearly the harder reading. The mention of anointing the head is rather unmotivated, because from verse 45 (and from the parallel 12:3 in John it appears that the woman anointed the feet of Jesus. Thus it is only natural to change $\tau \dot{\eta} \nu$ $\kappa \epsilon \dot{\varphi} \alpha \lambda \dot{\eta} \nu$ here into $\tau o \dot{\upsilon} \zeta$ $\tau o \delta \alpha \zeta$ or to omit an object altogether as in Sy-S, Sy-C.

b) τοὺς πόδας μου

Compare the symmetry:

44 you gave me no water for my feet,

but she has **bathed my feet** with her tears and dried them with her hair.

45 You gave me no kiss,

but from the time I came in she has not stopped kissing my feet.

46 You did not anoint my head with oil,

but she has anointed my feet with ointment.

In all three verses "my feet" appears in the second part. It is possible that $\tau o \dot{\upsilon} \zeta$ $\pi o \delta \alpha \zeta$ $\mu o \upsilon$ has been omitted as redundant.

Konrad Weiß argues that omission and word-order variants are an indication of a secondary addition. He notes that in verse 38 there is no explicit object for $\mathring{\eta}\lambda\in\iota\varphi\in\nu$. One could of course use the previous $\tauo\grave{\upsilon}\varsigma$ $\pi\acute{o}\delta\alpha\varsigma$ $\alpha\grave{\upsilon}\tauo\grave{\upsilon}$, but it is also possible that it should be a simple $\alpha\grave{\upsilon}\tau\acute{o}\nu$. Then we do not have an anointment of the feet anymore but a normal anointment of Jesus (probably head). In this respect then the omission of D et al. in verse 46 is only consequential.

It is more logical that she wiped her tears from his feet with her hair, but you cannot dry oil. An anointment of the guests feet is historically unknown (Petronius: "Inauditus mos!").

It is possible that the Anointment story in Mk 14:3-9 is basically the same story. Here, too, Jesus' head is anointed.

The parallels in John are inconsistent:

11:2 Mary was the one who anointed the Lord with perfume and wiped his feet with her hair;

12:3 Mary ... anointed Jesus' feet, and wiped them with her hair.

It is thus possible that originally no anointment of feet happened at all and the D reading in verse 46 is original. The equivocal style in verse 38 and the explicit John 12:3 led to the addition of $\tau o \dot{\nu} \zeta$ $\pi \dot{o} \delta \alpha \zeta$ in verse 46.

An interesting conjecture might be noted, originally proposed by S.A. Naber 1881 (Mnemosyne) and repeated by H. Sahlin (NovT 24 (1982) 160-79): That in verses 44-46 the 00K should be omitted:

7:44 you gave me__water for my feet,

but she has bathed my feet with her tears and dried them with her hair.

45 You gave me_a kiss, but from the time I came in she has not stopped kissing my feet.

46 You did anoint my head with oil, but she has anointed my feet with ointment.

Lk always adds $to\hat{v}$ $o\hat{v}\rho\alpha\nu o\hat{v}$ after $t\hat{\alpha}$ $\pi\epsilon t\epsilon \iota\nu\hat{\alpha}$.

The birds here may be taken as a reference to the devil in verse 12. Then the $\tau o \hat{\upsilon} ~o \dot{\upsilon} \rho \alpha \nu o \hat{\upsilon}$ would of course not be appropriate.

Mt has different words, but the same meaning. Mk does not have the words. Is it possible that P75, B had the words in the f1, 579 order and then omitted them due to h.t. (SIN - SIN)? The support for the omissions is quite considerable. The omission of ${}^{2}\!\Pi\sigma\sigma\hat{\upsilon}$ might be due to harmonization to Mt. Note the same omission by f1, 700 in Mk. $\tau\sigma\hat{\upsilon}$ $\theta\varepsilon\sigma\hat{\upsilon}$ is safe in the parallels. The omission could be due to homoioarcton $(\tau\sigma\hat{\upsilon}-\tau\sigma\hat{\upsilon})$.

It is interesting to note that Mk has the fullest form here.

The term υίὸς ὑψίστου appears two more times in Lk (1:32 and 6:35).

It is quite possible that $I\eta\sigma o\hat{\upsilon}$ and $\tau o\hat{\upsilon}$ $\theta \varepsilon o\hat{\upsilon}$ have been added here as a harmonization to Mt and/or Mk.

The omission is strange. There is no reason for it. Has it to do with Luke being a physician?

If it is a secondary addition, it is very unusual. Scribes normally harmonize to the parallels by using identical or very similar words. But here we have a skillfully rewritten condensation. Aland: "sounds Lukan". P. Comfort: "could be a true Lukan condensation" (Encountering, p. 333). Nevertheless Weiss (Lk Com.) thinks that it is a free gloss from Mk.

Both words have been possibly omitted because they are not really needed. The emphasis is on the touching and the fringe is only marginally interesting, so it is possible that in the Latin translation the words have been omitted. It is also possible that the words have been omitted due to homoioarcton (TOU ...OU - TOU ...OU).

On the other hand it is possible that the omission is original and the addition happened very early in the transmission. Note the secondary addition in Mk!

The words $\tau o \hat{\upsilon}$ $\kappa \rho \alpha \sigma \pi \acute{\epsilon} \delta o \upsilon$ constitute one of the so called <u>Minor Agreements</u> between Mt and Lk against Mk. It is possible that the omission of $\tau o \hat{\upsilon}$ $\kappa \rho \alpha \sigma \pi \acute{\epsilon} \delta o \upsilon$ is a harmonization to Mk 5:27.

The omission of $\mathring{o}\pi\iota\sigma\theta \varepsilon\nu$ is not clear. It has been omitted neither in Mt nor in Mk.

Lk uses four times of $\sigma \dot{\nu} \nu$ $\alpha \dot{\nu} \tau \hat{\phi}$ (3 times in Acts) and once $\kappa \alpha \dot{\nu}$ of $\mu \in \tau'$ $\alpha \dot{\nu} \tau \circ \hat{\nu}$ (Lk 6:3) which he probably took over from Mk.

Thus it is clear that Lk prefers $\sigma \dot{\nu} \nu \alpha \dot{\nu} \tau \hat{\omega}$.

It is strange why so may witnesses inserted here $\kappa\alpha \hat{\iota}$ of $\sigma \hat{\upsilon} \nu$ $\alpha \hat{\upsilon} \tau \hat{\wp}/\mu \epsilon \tau'$ $\alpha \hat{\upsilon} \tau o \hat{\upsilon}$ if it's not original. It is rather improbable that it is a partial harmonization to Mark's of $\mu\alpha\theta\eta\tau\alpha\hat{\iota}$ $\alpha \hat{\upsilon} \tau o \hat{\upsilon}$, but Weiss thinks so. The words have probably been omitted as awkward. The support is not coherent (Π , 700*).

There is no reason for an omission. There is no omission or variation in Mk. It seems that scribes added first the Markan words as in C^* , D, et al. In a second step the words are harmonized to immediate context: D conformed 45a to the added Markan words and A, W et al. changed the Markan words to conform 45a.

Only $\alpha\pi o \sigma t \delta \lambda o u \zeta$ has any claim to be original. $\mu\alpha\theta\eta t \lambda \zeta \alpha u t \delta u$ is probably from Mt 10:1 (so Weiss). It is interesting how many diverse witnesses support this addition, which is rather unusual ($\delta \omega \delta \epsilon \kappa \alpha \ \alpha \pi o \sigma \tau \delta \lambda \omega \nu$ appears only once in the Gospels at Mt 10:2). ἀποστόλους is either derived from context 9:10 or from the parallel Mt 10:2 (so Weiss).

It might be noted here the curious fact that Codex Ξ has this sentence three times on three pages, one verse per page! This is certainly deliberate and could be explained as a strong amplification of the word (power over demons and diseases).

T "the infirm." Sy-C, Sy-S

As Metzger (commentary) notes: "the evidence of the Old Syriac is weakened by its reading 'the infirm' as the object of 'heal' at the close of verse 1. Likewise, in Lk $\mathring{\iota}\acute{\alpha}o\mu\alpha\iota$, except when passive, always has a direct object."

This is true everywhere in the NT.

Lat, Sy and other versions are not clear.

Metzger: "... only d, Sy-H and goth express the force of $\alpha\nu\dot{\alpha}$, but whether the others simply omit to render the word or whether they rest upon a Greek text that lacked it, is difficult to say. Sy-S reads: "and not even two coats".

It is not clear why the word should have been added here. It is not in the parallels and it is not improving style or meaning.

 $\dot{\alpha} \nu \dot{\alpha}$ appears only 9 times in the Gospels. Meanings:

- 1. of position in an area: "among, in the midst of"
 - $\dot{\alpha}$. μ . τ o $\hat{\nu}$ σ í τ o ν Mt 13:25

 $\mathring{\alpha}$. $\mathring{\mu}$. $\mathring{\tau} \mathring{\omega} \nu \ \mathring{\delta} \rho \acute{\iota} \omega \nu \ \Delta \in \mathsf{K} \alpha \pi \acute{o} \lambda \in \mathsf{W} \zeta$ "into the (midst of the) district of Decapolis" Mk 7:31

2. distributive, with numbers: "each, apiece"

ἀνὰ δηνάριον "a denarius apiece" Mt 20:9-10

 $\mathring{\alpha}$ πέστειλεν $α\mathring{v}$ το \mathring{v} ς $\mathring{\alpha}$ ν $\mathring{\alpha}$ δύο "he sent them out two by two" Lk 10:1

ἀνὰ μετρητὰς δύο ἢ τρεῖς "two or three measures apiece" Jo 2:6 ἀνὰ ἑκατὸν καὶ ἀνὰ πεντήκοντα Mk 6:40 v.l. Lk 9:3.

The word appears twice in the following context: 9:14 and 10:1. It is possible that scribes added it here, remembering 10:1. On the other hand it could have been omitted as carrying no special meaning. The support for the omission is very strong.

Weiss (Textkritik, p. 175) thinks that it has been omitted as a conformation to immediate context, where 4 times $\mu \dot{\eta} \tau \epsilon$ without preposition appears.

NA²⁷ Luke 4:42 Γενομένης δὲ ἡμέρας ἐξελθών ἐπορεύθη εἰς ἔρημον τόπον·

Strange collection of all thinkable variants.

It is possible that $\pi \acute{o} \lambda \iota \nu$ was the original reading and that scribes felt the discrepancy between the "deserted place" mentioned in verse 12 and the $\pi \acute{o} \lambda \iota \varsigma$ $B \eta \theta \sigma \alpha \ddot{\iota} \delta \acute{\alpha}$. It makes no sense to have a feeding in the city. So they changed the passage in various ways.

On the other hand it is also possible that the Byzantine reading is original. It has the same difficulty: Either there is a deserted place or it is the city Bethsaida. So the reading $\tau \acute{o}\pi o\nu$ $\acute{e}\rho \eta \mu o\nu$ $\pi \acute{o}\lambda \epsilon \omega \zeta$ $\kappa \alpha \lambda o \nu \mu \acute{e}\nu \eta \zeta$ $B \eta \theta \sigma \alpha \ddot{\iota} \delta \acute{a}\nu$ ("a desert place of a city called Bethsaida") is a contradiction or at least a difficulty. The other readings are then attempts to correct this.

It has been suggested that the Byzantine reading is a conflation of πόλιν and τόπον $\tilde{\epsilon}$ ρημον (WH § 143).

These verses in Lk are the end of Luke's so called Great Omission from Mk.

Streeter (Four Gospels, p. 176-78) has an interesting suggestion here. He assumes that Luke's copy of Mk actually lacked the omitted part for whatever reason, possibly mutilation. Luke's copy of Mk looked something like this:

6:44 καὶ ἦσαν οἱ φαγόντες [τοὺς ἄρτους] πεντακισχίλιοι ἄνδρες. 45 Καὶ ... 46 ἀπῆλθεν εἰς τὸ ὅρος προσεύξασθαι. ... 47 καὶ αὐτὸς μόνος ...

. . .

8:27 ... καὶ ἐν τῆ ὁδῷ ἐπηρώτα τοὺς μαθητὰς αὐτοῦ λέγων αὐτοῖς τίνα με λέγουσιν οἱ ἄνθρωποι εἶναι;

This explains why Luke omits the local reference to Caesarea Philippi which both Mk and Mt have. Luke has guite an abrupt end of the Feeding story.

The textcritical problem here is the word $\sigma \upsilon \nu \dot{\eta} \nu \tau \eta \sigma \alpha \nu$ by B et al. It makes good sense, because Jesus was alone and then quite suddenly the disciples are with him?

"And it came to pass, as he is praying alone, the disciples were with him, and he questioned them"

With the B reading the sense would be:

"And it came to pass, as he is praying alone, his disciples <u>met with him</u> and he questioned them"

It could be argued though that $\kappa\alpha\tau\grave{\alpha}$ $\mu\acute{o}\nu\alpha\varsigma$ is taken with $\sigma\upsilon\nu \hat{\eta}\sigma\alpha\nu$ and not with $\pi\rho\sigma\epsilon\upsilon\chi\acute{o}\mu\epsilon\nu\sigma\upsilon$:

"And it came to pass, as he is praying, his disciples were with him alone and he questioned them"

Streeter thinks that the B reading is ("as so often") original: "It translates Mark's $\dot{\epsilon} \nu \ \tau \hat{\eta} \ \dot{\delta} \delta \hat{\omega}$ in the only meaning that could be given to it, if it followed just after Mk 6:47."

In a footnote (p. 177) he adds: "Probably the original reading was $\eta \nu \tau \eta \sigma \alpha \nu =$ 'met'. $\sigma \upsilon \nu \hat{\eta} \sigma \alpha \nu =$ 'were with', the reading of most MSS, is a very early scribe's emendation. Someone then tried to correct an ancestor of B by this text and wrote $\sigma \upsilon \nu$ over the $\eta \nu$, but the next copyist combined the two."

Possibly it is a simple accidental scribal error, $\sigma \nu \nu \hat{\eta} \sigma \alpha \nu$ is a rare word (only three times in the NT, all in Lk/Acts: Lk 8:4; 9:18; Acts 22:11)

The words make good sense both ways. But an omission is more likely, probably due to h.t. (OUS - OUS). Accidental omission is also supported by the fact that the supporting witnesses are not the same in both cases.

But note what Ross writes: "The decisive consideration in this case is that neither Mark nor Luke would have written $\tau o \dot{\upsilon} \zeta \ \dot{\epsilon} \mu o \dot{\upsilon} \zeta \ \lambda \acute{o} \gamma o \upsilon \zeta$ unless with the intention of giving special emphasis to $\dot{\epsilon} \mu o \dot{\upsilon} \zeta$, of which there is no sign in the context; had they wished to convey the sense "ashamed of me and my words" they would have written $\tau o \dot{\upsilon} \zeta \ \lambda \acute{o} \gamma o \upsilon \zeta \ \mu o \upsilon$. Mark uses the possessive $\mu o \upsilon \ 29$ times elsewhere but both he and Luke rarely use $\dot{\epsilon} \mu \acute{o} \zeta$, and never in a possessive sense with a noun. [...] It therefore seems highly probable, on stylistic grounds alone, that $\lambda \acute{o} \gamma o \upsilon \zeta$ was missing from the original text both here and in Luke."

On the other hand the words could have been omitted due to homoioarcton (KAI - KAI) or to improve style (remove redundancy).

A. Pallis (Notes, 1928) writes: "In several documents this is preceded by $\kappa\alpha$ ὶ ἡήσσει, which I believe to be right. It was probably omitted because ἡήσσει

was thought to express the same as $\sigma\pi\alpha\rho\acute{\alpha}\sigma\sigma\varepsilon\iota$; but it signifies throws down, and this is what happens to the unfortunate epileptics."

A strange variation.

a) the P45 reading:

James R. Royse (Scribal Habits, 2008, p. 177) is probably correct in proposing that the P45 reading is a corruption of the L et al. reading due to parablepsis ($\kappa\alpha\theta$ ' $\dot{\nu}\mu\hat{\omega}\nu$ - $\kappa\alpha\theta$ ' $\dot{\nu}\mu\hat{\omega}\nu$). The scribe omitted the middle part, "but not making sense of this, the scribe then inserted $0\dot{\nu}\delta\dot{\epsilon}$ and also, seeking brevity, omitted the superfluous $\dot{\epsilon}\sigma\tau\iota\nu$."

So, P45 should be counted to the L et al. reading.

b) The L, Ξ et al. reading:

There is no obvious reason for a secondary origin of this longer reading. On the face of it, it appears redundant. But it makes good sense, because it first states clearly that the man is not against you. Then it is declared that someone who is not against you, is for you.

Forbid him not! For he is not against you! For whoever is not against you, is for you.

So, either the words have been added as a clarification or they have been removed as redundant.

It is also possible that some form of parablepsis is involved, either as dittography or as haplography.

Externally the witnesses are overwhelmingly against it.

Nevertheless the support for the longer reading is interesting. On the one hand we have strong Alexandrian witnesses (L, Ξ) and some mixed ones (33, 892, 1342). But there is also considerable support from the Byzantine: One majuscule (Ψ) and (at least) 11 minuscules and 10 lectionaries.

Von Soden labels the minuscules: 7, 267, 659, 1391, 1402, 1606 = $I^{\phi b}$ 349 = $I^{\phi a}$ 1194 = $I^{\phi r}$ 1654 = I^{α} 60 = K^{X} 1630 = K^{r}

No parallel.

The incident is reported in 2.Ki 1:10, 12:

2 Kings 1:10 But Elijah answered the captain of fifty, "If I am a man of God, let fire come down from heaven and consume you and your fifty." Then fire came down from heaven, and consumed him and his fifty. 11 Again the king sent to him another captain of fifty with his fifty. He went up and said to him, "O man of God, this is the king's order: Come down quickly!" 12 But Elijah answered them, "If I am a man of God, let fire come down from heaven and consume you and your fifty." Then the fire of God came down from heaven and consumed him and his fifty.

There is no reason for an omission. It has probably been added to give the reference for the LXX passage.

Zahn thinks that the words have been deleted in connection with the words in 55b-56a. Because only with Elijah included do we have an explicit OT reference, against which the words in 55-56 are directed. Only in that case the words would have suited Marcion well. But the support is quite different. See next variant below.

Chrysostom (4^{th} CE) mentions the saying 5 times: Homily on Matthew 29, 56, Homily on John 51, Homily on Romans 22, Homily on 1. Cor 33.

It has often been assumed (e.g. Zahn, WH) that the passages belong together with the addition in verse 54 (see previous variant).

Th. Zahn thinks that the words have been omitted because they suited Marcion so well. But why is it that just those Byzantine MSS support the text which are normally considered the most "catholic"? WH think that the addition of 55-56 is older than 54b, because it is "bolder", even though the support is not so good. In their rejected readings section they have 56a in brackets, because it is omitted by D.

The diverse support and also the content mark the readings as old. For 55b there is no parallel in the Gospels. It is a very prominent saying, even today well known to everybody through the Textus Receptus. It could very well go back to Jesus, but the limited support makes it unlikely that it originally belonged to Luke's Gospel.

The support for the words is Western (D, Lat + Sy) plus part of the Byzantine text. Of the better Alexandrian MSS only 579 supports the words, but this MS shows signs of tampering with the text (see above). The Old Syriac is divided. Sy-C has the words, whereas Sy-S omits. It could be argued that the originally purely Western text intruded into part of the Byzantine text with its tendency to have the fullest, most complete text.

It is possible that the words have been added to explain and expand the short "but he turned and rebuked them". So, Weiss (Lk Com.) thinks that the words 55b have been added by D to explain the short $\dot{\epsilon}\pi\epsilon\tau\dot{\iota}\mu\eta\sigma\epsilon\nu$ $\alpha\dot{\upsilon}\tauo\hat{\iota}\varsigma$. The addition in verse 56 then comes from Lk 19:10.

On the other hand Zahn notes that without the words this piece would appear "curiously meager" in the row of the 6 short episodes 9:46-62. In all of them Jesus has a profound answer.

There is a catena by Macarius Chrysocephalus which possibly goes back to Clement, who then cites 55b. From Tischendorf:

"Clem teste Macar. Chrysoceph agnoscere videtur. Cf Clem fragment ap Mac Chrysoc or. 8 in Mt cap 8 etc (ed. Mign. 2,765.) At mihi dubium vdtr, extrema eius loci verba sintne et ipsa ex Clem. excerpta: ταυτα τοι και ο κυριος προς τους αποστολους ειποντας εν πυρι κολασι τους μη δεξαμενους αυτους κατα τον ηλιαν ουκ οιδατε, φησι, ποιου πνευματος εστε.

Unfortunately we don't know anything about the Diatessaron on this passage.

Harnack (Marcion, p. 204*) thinks that Marcion invented these words. So also Harris (Codex Bezae, p. 233). Tertullian does not mention this though, and he seems to have had the words in his own text (see Zahn, Comm. Lk, Exc. VIII). Tertullian would not have hesitated to note such gross interpolations.

P45:

B.M. Metzger writes: "The present writer has examined this passage in P45 under natural and artificial light, and has assured himself that the Greek character which follows the letter omicron (standing for '70') is neither b, as Kenyon supposed, nor v, as Roberts thinks, but merely a *diple*, or space filler (>), which scribes would use occasionally in order to bring an otherwise short line even with the right-hand margin of the column. In fact, by consulting Kenyon's volume of Plates of P45 anyone can see the similarity between the disputed character and the diple which appears on the same folio near the top of the column."

For the reading of R in verse 17 Metzger notes: "ex indice capitum" The reading of Sy-S in verse 17 is acc. to Burkitt "not quite clear".

No parallel. Very difficult.

K. Aland argues in a minority vote for omission of the brackets. He sees (correctly) the overwhelming examples for 70 in the LXX. It would be thus only natural to use it here too (so also Weiss).

One important parallel are the 70 elders who were appointed to share the burden of Moses' work (Num 11:16-17, 24-25, Exo 24:1).

It has also been suggested that the confusion has to do with the Septuagint which is most often referred to as LXX = 70, but sometimes (Aristeas) 72 is used as the number of translators (6 elders \times 12 tribes).

It is noteworthy that the witnesses are almost identical in verses 1 and 17.

If there is a connection with the other $\delta \upsilon \grave{o}$ $\delta \upsilon \grave{o}$ variant later in verse 1 is not clear (see next variant).

Another point has been suggested: A widespread tradition in the ancient world, both in Jewish tradition and also in Graeco-Roman sources, was that there were altogether 72 nations (compare Gen 10, LXX). In that case, Luke would be using the Table of Nations to emphasize the universalistic aspect of Jesus and his ministry. Ephrem the Syrian (306-73 CE) saw this connection. Against this has been argued that the disciples were sent in pairs.

Compare:

- B.M. Metzger "Seventy or Seventy-two disciples?" NTS 5 (1958/59) 299-306; also in "Historical and Literary Studies", Leiden, 1968, p. 67-76 [sees the evidence very evenly balanced and argues for bracketed $\delta\upsilon\dot{\delta}$]

Probably added from immediate context 10:9 (so Weiss). There is no reason for an omission. At 10:9 only very few witnesses omits.

It is possible principally that the words have been omitted, because the phrase is more general then and appears four times without them in the Gospels. But then it would have happened similarly at 10:9.

The reading of f1 is not clear. NA and IGNTP have 1582* for the 1 reading against Swanson, who has it for the L, Ξ reading (probably in error). Both IGNTP and Swanson then have 1582^{C} for the above noted reading $\dot{\nu}\psi\dot{\omega}\theta\eta\varsigma$. Amy Anderson consulted the microfilm and wrote:

"From my microfilm, I'd say Ephraim almost certainly wrote H. There is too little space for MH and no sign of erasure.

On Swanson's opinion of a correction in the last word, I'm not sure I agree. There certainly is a large space there, but Ephraim often does that. What appears to be a smudge where the final HI would be might be a letter showing through from the other side. I'd have to make overhead photocopies of both sides of the folio and lay them together to be sure. More important, the smudge does not include any sign of a high left side extender as is typical in Ephraim's H (looks like an "h"). And there is really not enough room for the iota adscript. (Though I do have to add that some of the corrector's erasures are absolutely invisible on the microfilm.)"

B (p. 1324 B 4): The corrections in B are not entirely clear. NA and Tis have H for B^{C} (Tis: " B^{3} ?"). Swanson has MH. The M is there, but it is not clear if it is enhanced or not. The M is not canceled. It's slightly less dark than the previous M, difficult to judge. An γ from the verso shines through the page and can give the impression as if there is a weak cancel bar through it. It is possible that it has been erased and later rewritten. But, what is clear is that there is a canceled rough breathing above the H.

The TOY has been written above the line in dark uncial script. It is not clear by what corrector. Tis thinks by B^3 .

 B^{C} also reads $\mathring{b}\psi\omega\theta\mathring{\eta}\sigma\in\iota$ with the E1 written above the unenhanced H. Weiss, following Tis thinks that the H has been canceled by a corrector. It is possible that there is a stroke from top left to bottom right through the H. This then has subsequently been changed into E1.

Tischendorf thinks that B^3 canceled the M from MH (and added a rough breathing above the H) and canceled the final H from $b\psi\omega\theta\eta\sigma\eta$, but later restored it back to MH (erasing the rough breathing) and $b\psi\omega\theta\eta\sigma\epsilon\iota$.

Note that $\mathring{\alpha} \kappa o \mathring{\nu} \omega$ takes a Genitive object.

The addition by Θ et al. is possibly intended to make the saying more symmetrical:

He who is hearing you, does hear me;

and he who is putting away you, does put away me;

and he who is putting away me, does put away him who sent me;

and he who is hearing me, does hear him who sent me;

Joachim Jeremias ("Unknown Sayings") regards the addition as "a pedantic expression of the *parallelismus membrorum*". He thinks that it spoils the structure of step parallelism.

It is also possible that it is a conflation of the Western reading and the txt reading.

The origin of the Western reading is strange. Possibly it is just another (oral?) version of a well known saying?

The insertion of $\dot{\delta}$ ${}^{2}I\eta\sigma o\hat{\upsilon}\varsigma$ at different places clearly indicates a secondary addition. The last explicit mentioning of Jesus was in Lk 9:62, 21 verses away and is here only natural.

The omission of $\tau\hat{\omega}$ $\dot{\alpha}\gamma\dot{\iota}\omega$ is probably due to the strangeness of the phrase. It is unique in the NT. Weiss (Lk Com.): "the dative instr. gave offence". Externally the omission is clearly secondary.

On the other hand it could be argued that scribes were used to add $\grave{\alpha}\gamma \acute{\iota} \varphi$ to $\pi\nu \in \acute{\upsilon}\mu\alpha\tau\iota$. Or they added the word to distinguish the spirit in verse 21 from "the spirits" in verse 20.

ἀγαλλιάω sometimes appears with $\dot{\epsilon}\nu$ in the LXX. The witnesses for the addition/omission of $\dot{\epsilon}\nu$ are very evenly divided. It might be worth checking Luke's dative usage.

Parallel:

NA²⁷ Matthew 11:27 Πάντα μοι παρεδόθη ὑπὸ τοῦ πατρός μου, ... καὶ στραφείς does not appear in Mt.

In the Byzantine text Jesus turns round to his disciples in two subsequent verses. This is very probably in error. It is possible that an early ancestor of the Byzantine text copied this accidentally from the next verse. It is also possible that the scribe wanted to move the verse from verse 23 to verse 22, but forgot to delete it in verse 23, or he deleted it incompletely and the next copyist copied it in error.

If the words were omitted to avoid repetition, they would have been omitted in verse 23 and not in the first place (so Weiss).

It should be noted that at Lk 10:22 a lection begins. This could explain possibly the move of the phrase? It makes good sense at this position, because it smoothes down the abrupt transition from Jesus prayer to the words to the disciples.

It could be argued that in verse 23 the $\kappa\alpha\tau$ ' $\mathring{\iota}\delta\mathring{\iota}\alpha\nu$ belongs to $\sigma\tau\rho\alpha\varphi\varepsilon\mathring{\iota}\varsigma$, so that in this verse he turns around generally and in verse 23 he turns to the disciples privately. But Metzger thinks it is more probable that $\kappa\alpha\tau$ ' $\mathring{\iota}\delta\mathring{\iota}\alpha\nu$ has to be taken with $\varepsilon\mathring{\iota}\pi\varepsilon\nu$.

IQP's Crit. ed. omits the words in both verse 22 and 23 for Q.

The sentence with $\gamma \in \nu \acute{o} \mu \in \nu o \varsigma$ and $\acute{e} \lambda \theta \grave{o} \nu$ is a bit redundant. The question is if the Byzantine text is a conflation of the other texts or if the other texts are attempts to remove the redundancy.

It is possible that the 'redundancy' is intended:

"he came to the place, going and seeing, he passed by on the other side."

If $\dot{\epsilon}\lambda\theta\dot{\omega}\nu$ was present originally, then there is no reason for adding $\gamma\epsilon\nu\dot{\phi}\mu\epsilon\nu\sigma\varsigma$.

It is possible that scribes missed a verb with $\kappa\alpha\tau\dot{\alpha}$ (in verse 31 $\kappa\alpha\tau\dot{\epsilon}\beta\alpha\iota\nu\epsilon\nu$

and in 33 $\mathring{\eta}\lambda\theta \in \nu$ $\kappa\alpha\tau$ ') and inserted $\gamma \in \nu \acute{o}\mu \in \nu \acute{o}$. Later or at the same time $\acute{e}\lambda\theta\grave{\omega}\nu$ has been omitted.

Weiss (Textkritik, p. 151) argues for the omission, that the word has been inserted because scribes overlooked that $\dot{\epsilon}\lambda\theta\dot{\omega}\nu$ belongs to $\kappa\alpha\tau\dot{\alpha}$ $\tau\dot{o}\nu$ $\tau\dot{o}\pi\sigma\nu$. They missed a verb and added $\gamma\epsilon\nu\dot{o}\mu\epsilon\nu\sigma$.

In B (p. 1325 B 7), the words $\in i\zeta$ $t \grave{o} \nu$ $o \grave{i} \kappa o \nu$ $\alpha \mathring{\upsilon} \tau \hat{\eta} \zeta$ are written above the line and into the right margin in minuscule script, but have been erased later. The different additions indicate a secondary cause. The additions are only natural. There is no reason for an omission.

The argumentation of Weiss (Textkritik, p. 23f.) is this: The words $\in i\zeta$ $\tau \grave{o}\nu$ $o \grave{i}\kappa o \nu$ were in the ancestor of B, but B omits due to h.t. $(o\nu$ - $o\nu$). For the omission of $\alpha \grave{v} \tau \hat{\eta} \zeta$ MSS 01, C et al. are additional proof, but for the decision $o \grave{i}\kappa o \nu$ - $o \grave{i}\kappa \acute{u} \nu$ Weiss goes with B. [curious!]

ὑποδέχομαι appears 9 times in the Bible, but nowhere with this addition. The phrase ϵ ἰς τὸν οἶκον appears 15 times in Luke, ϵ ἰς τήν οἰκίαν 5 times.

The support is slim and not coherent.

Fee: "One is clearly the deliberate revision of the other. The real question the is, which variant came second? That is, which one can best be explained as the revision of the other?"

The meaning of the longer reading is probably (Godet, 1890): "There needs but little (for the body), or even but one thing (for the soul)."

Fee: "Few things are really needed, or, if you will, only one; for that is indeed what Mary has chosen ..."

This longer reading is rather difficult to understand (Godet: "There is subtlety in this reading, too much perhaps.").

But there is no reason why someone should change the rather straightforward txt reading to the longer one. It has been argued that the uncompromising exclusiveness of the txt reading should be qualified, but is this probable?

Metzger thinks that the longer reading is a conflation of the txt reading and the reading of 38 et al. But the 38 reading is just too weakly attested to take it seriously. It seems more probable to see it as an other attempt to smooth down the longer reading.

The $\pi o \lambda \lambda \dot{\alpha}$ - $\dot{o}\lambda \dot{i}\gamma \omega \nu$ makes a good contrast.

Fee notes that the $\gamma \grave{\alpha} \rho$ following $M \alpha \rho \iota \grave{\alpha} \mu$ makes no real sense with the short reading (and has been changed to $\delta \grave{\epsilon}$ in the Byzantine text), but it fits good with the long reading as an explanation of the $\mathring{\eta}$ $\grave{\epsilon} \nu \grave{\delta} \varsigma$.

Possibly the complete omission by D is just another attempt to avoid the difficult $\dot{o}\lambda\dot{i}\gamma\omega\nu$ $\delta\dot{\epsilon}$ $\dot{\epsilon}\sigma\tau\iota\nu$ $\chi\rho\epsilon\dot{i}\alpha$ $\ddot{\eta}$ $\dot{\epsilon}\nu\dot{o}\varsigma$ (see next variant).

A. Pallis (Notes, 1928) writes: "A locus desparatus. Part of the corruption is $\mathring{\eta}$ $\mathring{\epsilon}\nu\grave{o}\zeta$, which probably represents a marginal comment referring to $\mathring{o}\lambda\acute{l}\gamma\omega\nu$ and meaning 'or write $\grave{\epsilon}\nu\grave{o}\zeta'$."

Compare:

Gregory and Maximus state expressly that Luke has "holy spirit" where Mt has "kingdom".

The wording of the reading in Marcion (known from Tertullian) is not completely clear. It is possible acc. to Harnack (Marcion) that it was the same as that in 700.

These readings are probably the adaption of a different liturgical prayer into the Lord's prayer. Metzger notes: Compare the similar prayer in the Greek form of the Acts of Thomas, 27:

έλθὲ τὸ ἄγιον πνεῦμά καὶ καθάρισον τοὺς νεφροὺς αυτῶν καὶ τὴν καρδίαν αυτῶν.

Possibly the words are inspired from Lk 11:13.

Streeter ("Four Gospels", p. 277) writes: "Now in view of the immense pressure of the tendency to assimilate the two versions of this specially familiar prayer, and of the improbability that various orthodox Fathers should have adopted (without knowing it) the text of Marcion, the probability is high that the reading of 700, 162, which makes the Gospels differ most, is what Luke wrote."

As Metzger notes, the expression "appears to be a Semitism in the Lukan style". But the support for the shorter reading is very weighty.

It is very probable that the txt reading is correct. There is no reason for an addition. To the contrary, the omission is only natural, to improve style and understanding (Weiss: "to directly connect $\delta\alpha\iota\mu\acute{o}\nu\iota\omicron\nu$ with the adjective"). Misreading $\alpha \mathring{\upsilon} t\grave{o}$ as $\alpha \mathring{\upsilon} t\grave{o} \zeta$ would mean, that Jesus himself is mute.

IQP's Crit. ed. has the Matthean (9:33) καὶ ἐκβληθέντος τοῦ δαιμονίου ἐλάλησεν ὁ κωφός as safe for Q.

Matthew has this twice (9:32-34 and 12:22-24). $\kappa\alpha\lambda$ $\alpha\dot{\nu}\tau\dot{\rho}\zeta$ $\dot{\eta}\nu$ is a typical Lukan expression (7 times, see above).

Pete Williams comments on Sy-S, C:

"SC read 'and it happened as he was casting out a demon from a deaf man, and when it came out ...'. [...] This expression is probably motivated by a desire to avoid the dual attribution of the term 'dumb' as found in Greek texts. These use $\kappa\omega\phi\delta\zeta$ both of the spirit and of the person from whom the spirit is cast out. In sum, whatever their Vorlage, SC paraphrase, but there are plausible reasons internal to Syriac why they might not represent $\kappa\alpha\lambda$ $\alpha\dot{\nu}\dot{\nu}\dot{\rho}\zeta$ $\dot{\eta}\nu$ if it were in their Vorlage."

Note that P45 has a curious singular reading in this verse:

For εἶπον it reads: ἐλάλησαν ὀχυροὶ λέγοντες

ὀχυρός "strong, firm; substantivally bold persons"

It has been suggested that this is a mishearing of $\dot{o}\chi\lambda o\lambda$.

See Ehrman "Corruption", p. 135-136:

If the scribes wanted to supply a prepositional phrase as a personal object (as with the previous verbs), $\kappa\alpha\tau$ ' $\dot{\epsilon}\mu o\hat{\upsilon}$ would be the natural addition. The addition of $\mu\epsilon$ makes no sense in context.

Ehrman sees this as a corruption against the Gnostic separation of Jesus and Christ.

The meaning is basically the same. Possibly due to h.t.

Acc. to Harnack Marcion omitted this too, but Marcion completely slashed verses 11:29-32.

Mt has the same verse in identical wording. But the interesting fact is that Lk has the two verses reversed. Mt has the more logical order because in the preceding verses Jonah is the topic. It would be natural to end with "something greater than Jonah is here!" and then go on with the queen of the south.

It is possible that the omission by D is original and that some early scribe added the verse as a harmonization to Mt, but added it at the wrong place. But this is rather improbable.

On the other hand it is possible that in an ancestor of D the verse has been labeled for omission and transfer before verse 31. This lead accidentally to complete omission.

This addition is very probably inspired from Mt/Mk. There is no reason to omit it, except possibly as a harmonization to 8:16, but the wording in 8:16 is different. This is not very probable.

Compare especially the harmonization by 579.

Weiss (Lk Com.) argues that the words have been omitted as unnecessary: It has already been noted that the $\lambda \dot{\nu} \chi \nu o \nu$ has been put $\epsilon \dot{\iota} \zeta$ $\kappa \rho \dot{\nu} \pi \tau \eta \nu$, why then put it $\dot{\nu} \pi \dot{o}$ $\tau \dot{o} \nu$ $\mu \dot{o} \delta \iota o \nu$?

IQP's Crit. ed. has: καὶ τίθησιν αὐτὸν [[εἰς κρύπτην]] with the double brackets indicating doubt that text was present. They also indicate (by grey highlighting) that it's not clear what text might have been present within the brackets. In their earlier, preliminary text they have ὑπὸ τὸν μόδιον here (so also Fleddermann).

In "Die Spruchquelle Q" (WBG, Darmstadt, 2007, p. 127) Paul Hoffmann says that the IQP editors consider οὐδὲ ὑπὸ τὸν μόδιον in Lk secondary. The committee was undecided also, if ὑπὸ τὸν μόδιον (Mt) or εἰς κρύπτην (Lk) was the original Q reading.

In 8:16 $\phi \hat{\omega} \zeta$ is safe.

There is no reason to insert $\varphi \acute{\epsilon} \gamma \gamma o \zeta$ here. Weiss also argues that $\varphi \acute{\omega} \zeta$ is probably a conformation to the $\varphi \acute{\omega} \zeta$ in 8:16 (so also Hoskier).

This is one of the cases suggested by Metzger ("Lucianic recension", 1959) where one could have an old relict of the earliest Antiochian text. Not necessarily correct, but at least older than any possible recension.

 NA^{27} Luke 11:47 Οὐαὶ ὑμῖν, ὅτι οἰκοδομεῖτε τὰ μνημεῖα τῶν προφητῶν, οἱ δὲ πατέρες ὑμῶν ἀπέκτειναν αὐτούς.

In the Gospels oikoδομέω is almost always used transitively with an object. The two exceptions are:

17:28 is a listing, an object is not needed. In 11:48 and 14:30 the object must be supplied from context.

So, the addition is only natural and there is no reason for an omission.

The $\tau\acute{\alpha}\varphi$ ous by f1, f13 is from Mt.

The location is mentioned in verse 37: "While he was speaking, a Pharisee invited him to dine with him; so he went in and took his place at the table."

The addition by D, Θ et al. is strange, possibly inspired from 8:47? $\dot{\epsilon}\nu\dot{\omega}\pi\iota\sigma\nu$ $\pi\alpha\nu\tau\dot{\delta}\varsigma$ appears only in Lk in the Gospels. It is possible that it has been added to explain the hostility, because Jesus denounced them "in the presence of all the people".

The txt reading is rather short and not completely clear: "lying in wait for him, to catch him in something he might say." The Byzantine addition makes it clear why they are lying in wait.

On the other hand the words could have been omitted due to h.t. ($\alpha \mathring{v} \tau o \hat{v}$ - $\alpha \mathring{v} \tau o \hat{v}$).

WH: "The figurative language of txt is replaced in D et al. by a simply descriptive paraphrase. ... In Byz both phrases are kept, the descriptive being used to explain the figurative."

It is possible that the readings by it, Sy-C, Sy-S are just a free rendering of the Byzantine reading and that the D reading then is a back-translation into Greek.

Both words $\dot{\alpha}\phi o\rho\mu\dot{\eta}$ and $\theta\eta\rho\epsilon\dot{\upsilon}\omega$ appear only here in the Gospels.

According to Tischendorf, Swanson and NA 01* omits $\tau\hat{\omega}\nu$ $\alpha\gamma\gamma\dot{\epsilon}\lambda\omega\nu$. According to IGNTP 01* omits $\tau\hat{o}\hat{\upsilon}$ $\theta\hat{\epsilon}\hat{o}\hat{\upsilon}$.

Tischendorf writes: " $\tau\hat{\omega}\nu$ $\dot{\alpha}\gamma\gamma\acute{\epsilon}\lambda\omega\nu$ $\tau\hat{\upsilon}$ $\theta\acute{\epsilon}\hat{\upsilon}$: haec omnia videtur A scripsisse, prioribus litteris $\tau\hat{\omega}\nu$ $\dot{\alpha}\gamma$ in litura positis. Scripserat prima manus, ni fallor, nil nisi $\tau\hat{\upsilon}$ $\theta\acute{\epsilon}\hat{\upsilon}$."

Dirk Jongkind studied the passage and concluded "that Tischendorf was right but that the replacement of $\tau o \hat{\upsilon}$ $\theta \epsilon o \hat{\upsilon}$ with $\tau \hat{\omega} \nu$ $\alpha \gamma \gamma \epsilon \lambda \omega \nu$ $\tau o \hat{\upsilon}$ $\theta \epsilon o \hat{\upsilon}$ was made by scribe D and not by scribe A who wrote the main text."

Timothy A. Brown from the Sinaiticus transcription project wrote: In verse 8 the letters TWN AT are written by the first hand over an erasure. What the first hand originally wrote and then erased is not clear. The $TO\gamma$ $\Theta\gamma$ at the end of the line appears to have been written by a first hand and then reinforced by a later corrector since the article is certainly a first hand and traces of the associated nomen sacrum appear beneath the corrector's ink.

Amy Myshrall is the other transcriber in the Codex Sinaiticus Project. She has independently concluded the same correction scenario I've outlined above.

According to the apparatus of NA, 01^* omits both times, verse 8 and 9. This is not correct. Timothy A. Brown confirmed this. The omission in verse 9 is also not in Tischendorf, Swanson and IGNTP.

τὴν βασιλείαν Ρ75

892: Harris notes in his collation that it omits $\tau 0\hat{\upsilon}$ $\theta \in 0\hat{\upsilon}$. This is wrong. Royse confirmed from the microfilm (Scribal Habits, p. 12) that 892 reads $\alpha \hat{\upsilon} \tau 0\hat{\upsilon}$. It is correctly noted in NA and IGNTP.

 NA^{27} Luke 12:30 ταῦτα γὰρ πάντα τὰ ἔθνη τοῦ κόσμου ἐπιζητοῦσιν, ὑμῶν δὲ ὁ πατὴρ οἶδεν ὅτι χρήζετε τούτων.

The Byzantine text is probably a harmonization to Mt (so Weiss). The object to which $\alpha \dot{\upsilon} \tau o \hat{\upsilon}$ refers is in the previous verse $\dot{\upsilon}$ $\pi \alpha \tau \dot{\eta} \rho$. The question is if there was an object at all originally. There is no reason for an omission, neither for Byz nor for txt. But P75 is known to omit personal pronouns. IQP's Crit. ed. has $\alpha \dot{\upsilon} \tau o \hat{\upsilon}$ safe for Q.

The variants are probably attempts to expand the rather condensed style. Words are borrowed from the previous verse. The $\dot{\epsilon}\sigma\pi\epsilon\rho\iota\nu\dot{\eta}$ $\varphi\upsilon\lambda\alpha\kappa\dot{\eta}$ is strange, though. Possibly a common term.

Weiss and Aland think the words are from Mt. In Mt the words are safe.

It is possible that the omission is due to h.t. (..AI - ..AI). This is supported by the 01^{C1} correction.

The later omission by D, d must be accidental, because it makes no sense: "If he had known the hour the thief comes, he would not (come)." It is possible that D, d have omitted one line.

Is it possible that it originated in a parablepsis omission from $\xi \rho \chi \in \tau \alpha \iota$ verse 39 to $\xi \rho \chi \in \tau \alpha \iota$ verse 40 with an subsequent incomplete correction?

It is also possible that the ancestor of f1 read $\kappa\alpha$ i ϵ i $\pi\epsilon\nu$ in verse 41 as does D, so that a $\kappa\alpha$ - $\kappa\alpha$ parablepsis error would be possible.

It is possible that $0\tilde{l}\delta\alpha\tau\epsilon$ has been inserted and the verb changed to the infinitive for stylistic reasons, to make the saying more symmetrical. On the other hand the words could have been changed to avoid the repetition.

It is interesting to note that $\mathring{\upsilon}\mu \hat{\alpha}\zeta$ in verse 25 is safe. It is probable that it has been added in verse 27 as a harmonization to immediate context (so Weiss). It is also possible that it is a harmonization to Mt (note especially the D reading). On the other hand it is possible that $\mathring{\upsilon}\mu \hat{\alpha}\zeta$ has been omitted to make for a more smooth/straight reading.

There is no reason for an omission. Probably added to harmonize with Mt (so also Weiss). It is also possible that the word has been added as a clarification. Interesting distribution of the minuscules. All the good minuscules (except 579) are for Byz.

Clement of Alexandria once cites the words with $\tilde{\epsilon}\rho\eta\mu\sigma\zeta$ (Paed. 1.79.3), but it is impossible to know if he is quoting Mt or Lk.

IQP's Crit. ed. has the short form as safe for Q.

One of the very rare cases where a reading is adopted that is read by D almost alone!

"you will not see me until (the time) comes when you say"

ὅτ \in with subjunctive (ὅτ \in εἴπητ \in) is a very rare construction. There is no other example in the Greek Bible. There are attempts to change that to ὅτι οr ὅταν. The construction with ὅταν is common (66 times in the NT).

Therefore it is very improbable that $\delta \tau \epsilon$ is a secondary insertion.

The construction of $\alpha\nu$ with a future $\eta\xi\in\iota$ is also rare (2 times in NT, 9 times in LXX). The normal way would be a subjunctive.

Luke has one other example of this kind at 15:4 ... $\xi\omega\zeta$ $\xi v\rho\eta$ $\alpha v t o$. Here the subjunctive is used.

Weiss (Textkritik, p. 152) thinks the omission of $\eta \xi \in \iota$ $\delta \tau \in i$ s a harmonization to Mt 23:39.

IQP's Crit. ed. has $\eta \xi \in \iota$ $\delta \tau \in \iota$ in double brackets indicating doubt that text was present. Fleddermann ("Q - A reconstruction", 2005) has it in his text.

Overall the main point is: If it is permissible to rescue on the sabbath an animal that has fallen into a well, a fortiori it is permissible to heal a human being. $\upsilon \dot{\iota} \dot{o} \varsigma$ makes no real sense in this respect. But if it's an error, it must be a very early one, because the attestation is excellent and widespread.

It has been conjectured (John Mill) that $\upsilon \dot{\iota} \dot{\varrho} \dot{\varrho} \dot{\varrho}$ is a corruption of $\ddot{\varrho} \ddot{\iota} \dot{\varrho} \dot{\varrho} \dot{\varrho}$ (lat. ovis).

It is possible that "son" was felt a bit inappropriate here and has been changed to either "donkey" or "sheep" fitting better to "ox".

Weiss (Lk Com.) thinks that $\mathring{o}\nu o \zeta$ comes from Lk 13:15 (so also Tregelles) and $\pi \rho \acute{o} \beta \alpha \tau o \nu$ from Mt 12:11.

This is what Edward Cook wrote on his blog (28th June 2005):

"I'm still plugging along in Casey's *Aramaic Sources of Mark's Gospel*. I observe that he approves (p. 30) of Matthew Black's hypothesis of Aramaic wordplay at the origin of Luke 14:5. Here's the text of the NIV with the proposed Aramaic originals in parentheses: "If one of you has a son (*bar*) or an ox (*be'ir*) that falls into a well (*ber*) on the Sabbath day, will you not immediately pull him out?" Casey calls this "perfectly plausible." There are at least two problems with this theory. One is that *be'ir* (בעיר) is not the Aramaic word for "ox," which is *tor* (תור). *Be'ir* just means "livestock, large domestic animal," and could include other animals as well as oxen. One of Casey's methodological principles is that one should not just translate backwards to get at the original Aramaic, but also ask how a suggested Aramaic original would have likely been translated. In this case, I think that *be'ir* would surely have been rendered as *ktenos*, not as *bous*, which is what the Lukan text has. *Bous* most reasonably points back to *tor*, and that dissolves the wordplay.

That's one problem. Another one is the textual problem in this verse. For "son" (*huios*) in the Nestle-Aland critical text, the Textus Receptus has "ass" (*onos*), which is supported by Sinaiticus, among others. "Son" looks to be better attested; on the other hand, "son" spoils the *a fortiori* argument apparently used by Christ in this verse (compare the similar story in Matt. 12:9-13): If animal, why not human? On the other hand, perhaps the argument is not *a fortiori*, but *a maiori ad minus*; since the custom allows the greater breach of Sabbath law, it should allow the lesser: If lifting, why not healing? It's a toss-up, and the textual decision is interwoven with the exegetical choice.

A remote possibility is that the original Aramaic (if there was such a thing) read *bar torin*, calf, literally, "son of oxen," and that this somehow made it into the Gospel as "son or ox" (*bar o tor*). I doubt that's what happened, but I mention it for the sake of completeness."

The more difficult question is, if it reads $\dot{\epsilon}\sigma\tau\iota\nu$ or $\epsilon\dot{\iota}\sigma\iota\nu$. The question is to what this refers. Since $\dot{\epsilon}\tau\sigma\iota\mu\alpha$ is neuter, it should be the dinner or the meals:

Weiss (Textkritik, p. 80) notes that the plural and the addition of $\pi\acute{\alpha}\nu\tau\alpha$ could have originated from the want to indicate that many things must be prepared for a supper.

Different insertion points are sometimes an indication for a secondary cause. Weiss (Lk Com.) notes that the $\mathring{\omega}\delta\varepsilon$ separates $\lambda\iota\mu\mathring{\varphi}$ and $\mathring{\alpha}\pi\acute{o}\lambda\lambda\upsilon\mu\alpha\iota$ which belong together. He also suggests that the omission might be due to h.t. from the D et al. reading: $\mathring{\epsilon}\gamma\mathring{\omega}$ $\underline{\delta}\grave{\varepsilon}$ $\mathring{\omega}\underline{\delta}\varepsilon$.

Burgon suggests that the D reading could have originated from a misinterpretation of $\dot{\epsilon}\gamma\dot{\omega}$ $\delta\dot{\epsilon}$ = $\epsilon\Gamma\omega\Delta\epsilon$. Perhaps some scribe reduplicated the three last letters $\omega\Delta\epsilon$ and got $\dot{\epsilon}\gamma\dot{\omega}$ $\delta\dot{\epsilon}$ $\delta\delta\epsilon$.

2. Clement seems to cite from memory. His text is a combination of verses 12 and 10 plus an allusion to Mt 25:21.

The reading of B, L is probably one of the typical HM - UM scribal errors.

On the other hand the $\dot{\nu}\mu\dot{\epsilon}\tau\dot{\epsilon}\rho\sigma\nu$ could be a conformation to the immediately following $\dot{\nu}\mu\hat{\iota}\nu$ (so Weiss). $\dot{\eta}\mu\dot{\epsilon}\tau\dot{\epsilon}\rho\sigma\nu$ is certainly the more difficult reading.

NA²⁷ Luke 16:16 Ὁ νόμος καὶ οἱ προφῆται μέχρι Ἰωάννου ἀπὸ τότε ἡ βασιλεία τοῦ θεοῦ εὐαγγελίζεται καὶ πᾶς εἰς αὐτὴν βιάζεται.

"The law and the prophets were in effect until John came; since then the good news of the kingdom of God is proclaimed, and everyone tries to enter it by force."

It is not really logical to say in verse 16 that the law and the prophets go until John, and then in verse 17, that the law will never pass away.

It is possible that very early a $\mu o v$ fell out due to h.t. as Lipsius suggested. Marcion's version is naturally suspect as fitting perfectly his own teaching.

See Scrivener Codex Bezae, p. LI.

Scrivener notes that several lectionaries have the words and also M in its margin. But this is not unusual, because it's a typical introduction for a lection.

It is not certain though that this addition by D indicates an early lectionary system. It is more probable that it was just meant to smooth down the abrupt start of the story after the discussion with the Pharisees.

Zahn (Comm. Lk) notes that from early on (Tert., Ambrose, Jerome) it was the question if the following story was a parable or a historical account.

The Latin pseudo-Cyprianic treatise "De pascha computus" written 242 CE in Africa or Rome declares (ch. 17):

"Fire has been prepared by God for all sinners, in the flame of which, as was indicated by the son of God himself, that rich man Finaeus is burned."

Compare:

LXX Exodus 6:25 καὶ $\underline{E\lambda\epsilon\alpha\zeta\alpha\rho}$ ὁ τοῦ $A\alpha\rho\omega\nu$ ἔλαβεν τῶν θυγατέρων Φουτιηλ αὐτῷ γυναῖκα καὶ ἔτεκεν αὐτῷ τὸν $\underline{\Phiινεες}$ αὖται αἱ ἀρχαὶ πατριᾶς $\Lambda\epsilon$ υιτῶν κατὰ γενέσεις αὐτῶν

Compare next verse:

Luke 16:20 πτωχὸς δέ τις <u>ὀνόματι Λάζαρος</u>

It seems probable that a name has been added for the rich man, because also the poor man has a name. Note that the rich man is the more important character in the story!

Originally proposed by Gressmann 1918, it seems possible that the story ultimately goes back to an old Egyptian folktale (at least it resembles it in certain aspects) in which this name possibly appeared. This then would explain the emergence of the name in the Sahidic dialect. For the story see Grobel.

Grobel suggests that the name is a combination of the Fayyumic NINE (= none) and OYE (= someone), resulting in "Nobody".

The name "Niniveh" may also be an allusion to the rich city of Nineveh and God's judgment upon it.

It is probable that the spelling of P75 is just a scribal error for $N\iota\nu\epsilon\nu\eta$, possibly as a haplography ONOMATININEYHC.

In the LXX Aaron's son Eleazar has a son named Phinehas, $\Phi\iota\nu\epsilon\epsilon\zeta$. The name appears 34 times in the LXX. It is possible that the names have been associated: Eleazar = Lazarus; Phinehas = Niniveh? This has originally been suggested by Harnack (compare Zahn).

Grobel proposes that Finees may be a combination of the Bohairic article ϕ and the name $N \in \text{U} \in \text{C}.$

Amenofis is an Egyptian kings name.

Cyril notes an early Jewish tradition ($\dot{\omega}\zeta$ $\dot{\eta}$ $\dot{E}\beta\rho\alpha\dot{\iota}\omega\nu$ $\pi\alpha\rho\dot{\alpha}\delta\sigma\sigma\iota\zeta$ $\ddot{\epsilon}\chi\epsilon\iota$) that there was a poor and sick man in Jerusalem with the name Lazarus. Lazarus is the only named character in any of the parables.

Another suggestion is that possibly the rich man is the high priest Caiaphas:

"According to chapter 16, the rich man wears purple, he keeps Lazarus 'outside the gate', he's rich, he denied the resurrection, and he had five brothers. High priests wear purple. High priests opened and closed the gates to the Temple compoles. High priests are rich. Sadducean high priests denied the resurrection. Caiaphas was a high priest, he wore purple, he was very wealthy, he was a Saducee and he had **five** brother-in-laws who reigned as high priests in Jerusalem." διὰ μέσον appears only here in the Greek Bible.

This is the only instance in the N.T. of $\delta\iota\grave{\alpha}$ with the accusative in the local sense of "through". It is either an error or original. If original, the other readings are attempts to correct this.

Compare:

NA²⁷ Luke 4:30 αὐτὸς δὲ διελθών <u>διὰ μέσου</u> αὐτῶν ἐπορεύετο. Here the text is safe. It's the only instance of διὰ μέσου in the NT.

The meaning is different for the two variants. The variation is curious, there is no obvious reason for it. With $\xi\sigma\eta\sigma\alpha\nu$ the meaning is clear and normal. There would be no reason for a change. On the other hand, why should one change $\mathring{\alpha}\nu\acute{\epsilon}\sigma\eta\sigma\alpha\nu$?

Perhaps $\dot{\alpha}\nu\dot{\epsilon}\sigma\tau\eta\sigma\alpha\nu$ has been inspired by the previous $\dot{\alpha}\pi\dot{\eta}\nu\tau\eta\sigma\alpha\nu$? The support by F is strange and suggests an error.

Support for omission of $\tilde{\eta}$: D, L, W, [H, K, Π , S], f13, 28, 33, 2542, al, Lat, Sy-S, Sy-C, Sy-P

In the facsimile this is difficult to see. That there was some correction is probable, but what exactly this was is difficult to judge, an ω is possible. Also it is not clear which corrector is responsible for that. Tischendorf writes: "ex $\hat{\omega}\delta\epsilon$ priore correctum est $\hat{\epsilon}\kappa\hat{\epsilon}\hat{\iota}$, a B³ demum ut vdtr".

Parallels:

NA²⁷ Matthew 24:23 Τότε έάν τις ὑμῖν εἴπη· ἰδοὺ ὧδε ὁ χριστός, ἤ· ὧδε, μὴ πιστεύσητε· NA²⁷ Mark 13:21 Καὶ τότε ἐάν τις ὑμῖν εἴπη· ἴδε ὧδε ὁ χριστός, ἴδε ἐκεῖ, μὴ πιστεύετε·

The support for the omission of $\mathring{\eta}$ in verse 23 is not very good, mainly Western. When compared with the addition of $\mathring{\iota}\delta o\mathring{\upsilon}$ in verse 21, the support is similar. But in verse 21 the committee did not add $\mathring{\iota}\delta o\mathring{\upsilon}$ (not even in brackets). The brackets have probably been added because 01 and L deviate from B here. But 01 is a singular reading (except for some Old Latins).

The variation in order is probably inspired from verse 21, where it's $\hat{\omega}\delta \epsilon$ - $\hat{\epsilon}\kappa \epsilon \hat{\iota}$ without variation. Also a (corrected) scribal error from parablepsis is thinkable (IDOU - IDOU). There is no reason for a deliberate change to the txt order.

 NA^{27} Mark 13:21 Καὶ τότε ἐάν τις ὑμῖν εἴπη· ἴδε ὧδε ὁ χριστός, ἴδε ἐκεῖ, μὴ πιστεύετε·

P75, B, f13 probably omitted $\mathring{\alpha}\pi \acute{\epsilon}\lambda\theta\eta\tau \epsilon$ $\mu\eta\delta \grave{\epsilon}$ as redundant. A secondary addition of the words is quite improbable. It is also possible that the omission originated in a parablepsis error from the N reading, or in a h.t. error from the f1 reading.

The omission by 157, pc is probably due to h.t. (..HTE - ..HTE).

The f1 reading is a partial harmonization to Mt.

The term could have been omitted due to h.t. (so Weiss). But this is improbable in light of the variety of very good witnesses. It could also have been omitted as a harmonization to Mt.

The reading by D et al. is an attempt to make the saying more symmetrical, by using the same word as in the second part of the verse. $\theta \in \lambda \dot{\eta} \sigma \eta$ is probably an allusion to the same saying in Mk 8:35par. From here also comes the Byzantine $\sigma \hat{\omega} \sigma \alpha \iota$, which replaced the rare $\pi \in \rho \iota \pi \circ \iota \dot{\eta} \sigma \alpha \sigma \theta \alpha \iota$. This word appears 31 times

The question here is to what $\pi\rho\delta\varsigma$ $\dot{\epsilon}\alpha\upsilon\tau\delta\nu$ belongs and what it means.

If it goes with "standing", it is difficult to understand what "standing by himself" should mean. This interpretation is only possible with the Byzantine reading, so, it could be that the txt reading is an attempt to get rid of this problem.

If it goes with "praying", there are two possibilities:

- a) it means "standing, he prayed this by himself" or
- b) "standing, he prayed this to himself".

The omission by 01 et al. is due to h.t.: $\tau\alpha\hat{v}\tau\alpha$ $\underline{\pi\rho\delta\zeta}$ $\dot{\epsilon}\alpha v\dot{\delta}\nu$ $\underline{\pi\rho\sigma}\eta\dot{v}\chi\dot{\epsilon}\tau\sigma$. So, one could count it as supporting the P75, B reading.

 $\lambda\alpha\mu\beta\acute{\alpha}\nu\omega$ is always slightly equivocal. It can mean "take" or "receive". This problem is overcome by the prefix $\mathring{\alpha}\pi o$.

It is clear that D is a harmonization to Mk. Its support for $\lambda\acute{\alpha}\beta\eta$ is therefore of little value.

 $\mathring{\alpha}$ πολαμβάνω is a Lukan word (5 times, only once in Mk). Note that also in Lk 6:34 $\lambda\alpha\beta\epsilon$ îν has been replaced by $\mathring{\alpha}$ πολαβε $\hat{\imath}$ ν.

It is possible, as Metzger argues, that the Byzantine reading arose as an attempt to make the text more precise: Not what they all, together, gained, but what each man on his own gained.

It is also possible that an early error lies behind this, a confusion of the TISTI (so Weiss): $\tau i \varsigma$ requires the singular, but without it the plural is needed.

The omission of δ $\beta\alpha\sigma\iota\lambda\epsilon\dot{\nu}\varsigma$ is clearly a harmonization to the parallels (which are safe).

D expands the txt reading in two separate clauses.

The support by B only is extremely slim.

Weiss (Textkritik, p. 121) considers the B reading difficult which then results in various changes. He notes that the omission by 01 might be due to h.t.: $\dot{\underline{o}}$ $\dot{\epsilon}\rho\chi\dot{o}\mu\epsilon\nu\sigma\varsigma$, $\dot{\underline{o}}$ $\beta\alpha\sigma\iota\lambda\epsilon\dot{\upsilon}\varsigma$. D to the contrary moves the difficult \dot{o} $\beta\alpha\sigma\iota\lambda\epsilon\dot{\upsilon}\varsigma$ after $\dot{\epsilon}\dot{\upsilon}\lambda\sigma\gamma\eta\mu\dot{\epsilon}\nu\sigma\varsigma$.

Zahn (Comm. Lk) notes that the 01* reading is very improbable because in this case $\dot{\epsilon}\nu$ $\dot{o}\nu\dot{o}\mu\alpha\tau\iota$ κυρίου would depend on $\dot{\epsilon}\dot{\upsilon}\lambda o\gamma\eta\mu\dot{\epsilon}\nu o\varsigma$, which is a very unusual construction.

The article before $\beta\alpha\sigma\iota\lambda\epsilon\dot{\nu}\zeta$ also has to be rejected because in that case $\dot{\epsilon}\nu$ $\dot{\delta}\nu\dot{\delta}\mu\alpha\tau\iota$ $\kappa\nu\rho\dot{\epsilon}\delta\nu$ is not connected with $\dot{\delta}$ $\dot{\epsilon}\rho\chi\dot{\delta}\mu\epsilon\nu\delta\zeta$ anymore.

The Byzantine reading is for Zahn also not acceptable due to its strange word order. Èn ονόματι κυρίου and ὁ ἐρχόμενος belong together. Zahn therefore favors the D reading.

On the other hand it is quite possible that one of these more difficult readings gave rise to the smooth D reading.

This is a case of external against internal arguments. Internally everything is in favor of $\hat{\iota} \in \rho \in \hat{\iota} \varsigma$. But the external support is overwhelmingly against it.

It is possible that of $\alpha\rho\chi\iota\in\rho\in\hat{\iota}\zeta$ is a harmonization to Mt/Mk. Especially the combination with $\gamma\rho\alpha\mu\mu\alpha\tau\in\hat{\iota}\zeta$ and $\pi\rho\in\sigma\beta\upsilon\tau\in\rho\iota\iota\zeta$ makes a change to $\alpha\rho\chi\iota\in\rho\in\hat{\iota}\zeta$ likely.

οἱ ἀρχιερεῖς appears 33 times in the NT, but nowhere else is a variation, except in Mk 2:26 where Δ reads ἱερέως but for a different reason (internal difficulty).

To the contrary, in some of the cases, where $i \in \rho \in i \subseteq \rho$ appears, some witnesses changed it to $\alpha \rho \chi i \in \rho \in i \subseteq \rho$ (Mk 1:44 by f13, 33, 892^{mg}, pc, Lat; Mk 2:26 by 28, 579, Lk 5:14 by 047; Lk 17:14 by 047, pc; Jo 1:19 by Sy-S, C).

So the only possibility for a change from $\mathring{\alpha}\rho\chi\iota\in\rho\in\hat{\iota}\zeta$ to $\mathring{\iota}\in\rho\in\hat{\iota}\zeta$ is an accidental error. If on the other hand $\mathring{\iota}\in\rho\in\hat{\iota}\zeta$ is original, the error must be a very early one to have infected all strands of the transmission.

Weiss (Textkritik, p. 25) notes that it might be a reminiscence of Act 4:1 where also the apostles talk $\pi\rho\grave{o}\zeta$ $\tau\grave{o}\nu$ $\lambda\alpha\grave{o}\nu$.

H. Greeven argues in favor of the Byzantine reading (NTS 6, 1959/60, 281-96, p. 295).

WH: "the absolute use of $\pi\alpha\rho\alpha\tau\eta\rho\dot{\eta}\sigma\alpha\nu\tau\epsilon\zeta$ was evidently a stumbling block." In Lk 6:7 $\pi\alpha\rho\alpha\tau\eta\rho\dot{\epsilon}\omega$ is combined with transitive with $\alpha\dot{\upsilon}\tau\dot{\eth}\nu$: "they watched him". Here we have no personal pronoun "him". They were watching their chance. Interestingly no one added a pronoun.

The replacements "go away" might have been suggested from Mk 12:12 to add the missing departure of the $\gamma\rho\alpha\mu\mu\alpha\tau\epsilon\hat{\iota}\zeta$ ka $\hat{\iota}$ o $\hat{\iota}$ $\mathring{\alpha}\rho\chi\iota\epsilon\rho\epsilon\hat{\iota}\zeta$ from verse 19.

The reading of X, f1 et al. is clearly a harmonization to Mt/Mk.

The reading of 01, B et al. could be a harmonization, too, but with the addition of $\mathring{\omega}\delta\varepsilon$ at a different position, but this is rather improbable.

On the other hand it could be argued that the 01, B reading is original and that the omission (of the $\delta\delta\epsilon$ in position 2) is a harmonization to Mt/Mk (improbable, too). Or it has been omitted to improve style. The $\delta\delta\epsilon$ at position 2 does not appear in the parallels and it seems rather out of place.

Note the omission of $\hat{\omega}\delta\varepsilon$ in Mk 13:2, also by the Byzantine text. It is possible that the omission is intended to make the saying more general. Compare also the omission at Lk 15:17.

The meaning is different regarding the position of $\kappa\alpha$ i.

txt "there will be great earthquakes, and in various places famines and plagues"

Byz "there will be great earthquakes in various places, and famines and plagues"

The term $\sigma \in \iota \sigma \mu o \iota \kappa \alpha \tau \alpha \tau \delta \pi o \upsilon \zeta$ appears in the Matthean and Markan parallels. It is thus possible that $\kappa \alpha \iota \iota$ has been moved after $\tau \delta \pi o \upsilon \zeta$ as a harmonization to the parallels. The evidence of 0102, 892 and 1241 regarding $\kappa \alpha \iota \iota$ is indecisive, because it is not clear at what point in the sentence $\kappa \alpha \iota \iota$ has been omitted.

Either this is a curious multiple error, or the B or the L reading is original. Since both the B and the L reading are rather awkward, it would be only natural to change them.

Also the meaning of the sentence is not clear.

Robertson (Wordpictures) writes:

"Until the times of the Gentiles be fulfilled" (acre on $\pi\lambda\eta\rho\omega\theta\omega\sigma\iota\nu$ kairou $\epsilon\theta\nu\omega\nu$). First aorist passive subjunctive with acre on like $\epsilon\omega\zeta$ on. What this means is not clear except that Paul in Ro 11:25 shows that the punishment of the Jews has a limit. The same idiom appears there also with acre on on the aorist subjunctive."

The D reading makes no sense, because an object is missing. The only explanation is that it is a parablepsis error from the B reading. D therefore seems to be a witness for the B reading.

It is possible that $\kappa\alpha$ $\tilde{\epsilon}\sigma o \nu \tau \alpha$ fell out due to homoioarcton $\kappa\alpha \iota$ - $\kappa\alpha \iota$ (from the B reading) or $\kappa\alpha \iota \rho o \iota$ - $\kappa\alpha \iota \rho o \iota$ (from the L reading).

A secondary origin of $\kappa\alpha i$ $\xi\sigma\sigma\nu\tau\alpha i$ is difficult to explain. Some kind of dittography error has been suggested with the beginning of verse 25, but I cannot see how this could be reasonably explained. It appears more probable that either the B or the L reading are original.

Note that only 01, B, D read ἔσονται in verse 25.

The only possibility I can see is that perhaps someone wrote $\kappa\alpha$ ì $\xi\sigma\sigma\nu\tau\alpha\iota$ next to $\kappa\alpha$ ì $\xi\sigma\tau\alpha\iota$ in verse 25 as a possible replacement and a subsequent scribe added it at the wrong place.

With the B, L et al. reading it is possible to take $\kappa\alpha$ ì $\xi\sigma\sigma\nu$ tal $\kappa\alpha\iota\rho\sigma$ ì with the following:

"and Jerusalem shall be trodden down by nations, till the times be fulfilled. And there will be times of the Gentiles, there will be signs in the sun, the moon, and the stars, ..."

Weiss (Lk Com.) notes: "D, it add the object to $\pi\rho\sigma\beta\acute{\alpha}\lambda\omega\sigma\iota\nu$, but wrongly, because the fruits do not come when the summer is near."

The lectionary reading for Pentecost was Jo 7:37-52 + 8:12. Some MSS excised the PA therefore and placed them at some other appropriate place. One such place was after Lk 21:38, because the situation seemed similar to that described in John 8:1-2.

Luke 21:37-38 "Every day he was teaching in the temple, and at night he would go out and spend the night on the Mount of Olives, as it was called. 38 And all the people would get up early in the morning to listen to him in the temple."

It is possible that the omission is a harmonization to Mt/Mk. This is supported by the fact that N adds the Matthean $\mathring{\alpha}\pi\grave{o}$ $\tau\acute{o}\tau\acute{e}$, too.

It is also possible, at least in part, that the omission is accidental, due to the many KAIs in the immediate context. Note that e.g. f1 omits $\kappa\alpha \hat{\iota}$ $\hat{\epsilon}\chi\acute{\alpha}\rho\eta\sigma\alpha\nu$ in verse 5.

The words are also omitted in several lectionaries, so maybe there is a lectionary reason? Lk 21:37-22:8 was the normal Friday lection (12th week) in the Synaxarion.

On the one hand $0 \mathring{\upsilon} \kappa \acute{\epsilon} \tau \iota$ could have been added to soften the abrupt saying: "I will not eat until..." - "No more will I eat until..."

On the other hand $0\mathring{U}\kappa\acute{\epsilon}\tau\iota$ could have been omitted to remove the double negation. The same thing happened in Mk 14:25. It is also possible that the omission is a conformation to verse 18.

Of course it is also possible that the omission in Mk is due to harmonization to Lk.

Weiss (Lk Com.) thinks that $0\mathring{U}\kappa\acute{\epsilon}\tau\iota$ could have been omitted accidentally in front of $0\mathring{U}$. If $0\mathring{U}\kappa\acute{\epsilon}\tau\iota$ would be a harmonization to Mk, a better insertion point is of course verse 18.

A. Pallis (Notes, 1928) writes: "[the variant $\dot{\epsilon}\xi$ $\alpha\dot{\upsilon}\tau o\hat{\upsilon}$] seems to me to be far preferable to $\alpha\dot{\upsilon}\tau\dot{o}$, for it is intelligible that $\alpha\dot{\upsilon}\tau\dot{o}$ should be substituted in accordance with the foregoing $\tau\dot{o}$ $\pi\dot{\alpha}\sigma\chi\alpha$ $\phi\alpha\gamma\epsilon\hat{\imath}\nu$, whereas I do not see that any one would think of altering $\alpha\dot{\upsilon}\tau\dot{o}$ into the less obvious construction of $\dot{\epsilon}\xi$ $\alpha\dot{\upsilon}\tau o\hat{\upsilon}$."

The phrase $\mathring{\alpha}\pi\grave{o}$ $\tau o \hat{\upsilon}$ $\nu \hat{\upsilon} \nu$ appears in the Gospels 5 times in Lk (+ once in Acts) and once in the PA (Jo 8:11). In the LXX it appears 29 times (15 times apocrypha).

It is interesting to note that in verse 16 Byz adds $0\mathring{\upsilon}\kappa\acute{\epsilon}\tau\iota$, whereas here Byz omits $\mathring{\alpha}\pi\grave{o}$ $\tauo\^{\upsilon}$ $\nu\^{\upsilon}\nu$ (compare previous variant):

	verse 16	verse 18

The omission by Byz is either due to homoioarcton ($\mathring{\alpha}\pi\grave{o}$ $\tauo\hat{\upsilon}$ - $\mathring{\alpha}\pi\grave{o}$ $\tauo\hat{\upsilon}$) or deliberately to avoid the double $\mathring{\alpha}\pi\grave{o}$ $\tauo\hat{\upsilon}$.

Note that D et al. moved the phrase in front of $0\mathring{\upsilon}$ $\mu\mathring{\eta}$ $\pi\acute{\iota}\omega$ (and omitted $\mathring{\delta}\tau\iota$) probably for that reason.

Weiss (Lk Com.) suggests that it has been omitted as a harmonization to Mk by scribes who overlooked that it replaced the $0\mathring{U}K\acute{E}$ TL of Mk.

δτι: λέγω γὰρ ὑμῖν appears almost always with ὅτι. In 22:16 it is omitted also by some witnesses. The other instances in Lk (Lk 3:8; 10:24; 14:24; 22:37) are safe. The support for the omission in this case is very good.

Compare also Didache 9:2-3:

2 <u>πρωτον περι του ποτηριου</u> ευχαριστουμεν σοι πατερ ημων υπερ της αγιας αμπελου δαυιδ του παιδος σου ης εγνωρισας ημιν δια Ιησου του παιδος σου σοι η δοξα εις τους αιωνας

3 <u>περι δε του κλασματος</u> ευχαριστουμεν σοι πατερ ημων υπερ της ζωης και γνωσεως ης εγνωρισας ημιν δια Ιησου του παιδος σου σοι η δοξα εις τους αιωνας

This is the same sequence as preserved in D et al. (cup - bread).

Externally the longer form is clearly superior. That Marcion supports the longer text is a strong argument for its originality. Schürmann makes it probable that also Justin and Tatian attest the longer form.

The proponents of the shorter form normally argue that the longer version is an adaption of 1.Co 11:24-25. This is possible, but it is equally probable that the words are so similar, because they are used liturgically from early on.

Sequence:

15 eat this Passover

16 I will not eat it until

17 Then he took a <u>cup</u>, 18 from now on I will not drink

19 he took a loaf of bread,

20 the cup after supper,

The problem felt by some scribes with the longer text was possibly that they mixed the two separate blocks. If one takes verses 17+18 with 19+20, then the strange sequence cup - bread - cup appears.

For this reason D et al. omitted 19b+20 getting the sequence cup - bread. A few witnesses similarly omitted verses 17+18 to get rid of the problem. This is the argumentation of Metzger.

The first problem with these explanations is that it would have been much better for a scribe to omit the first cup (verse 17) to get the normal Pauline sequence bread - cup. It is the first cup, that is problematic, not the second. It would be very improbable that a scribe chose that part of the section for omission that was most familiar to him through Paul's words in 1. Cor.

It could be argued that a scribe, who had written 17-19a already, noted the strange composition only then and chose to omit the last cup.

The second problem is, why has verse 19b been omitted?

The simplest way to get rid of the problem of the wrong sequence is shown by the Old Latin b and e: Taking the short version, they transposed verses 17+18 after 19a and got the common Pauline formula.

Another attempt was apparently more successful: The addition of an adaption of Paul's familiar words.

The reading of Sy-5 is a secondary attempt to remove any repetition in the sequence.

Along these lines is the argumentation of WH for the shorter reading.

Chadwick notes that in verse 15 the bread is not explicitly mentioned but implied. Perhaps Luke found in his source only 15-18 and added 19a for the overlooked bread? "The result of this operation was to produce the extraordinary confusion of the shorter text. ... it was the third evangelist himself who initiated a long development of correction and expansion."

Schürmann also argues that the verses 15-18 are a closed unit to which 19a did not belong. Then some redactor added 19a. But 19a is a torso, a rudiment of an originally two-part liturgy. Continuing from 19a with verse 21 $\Pi\lambda\dot{\eta}\nu$ $\dot{\iota}\delta\dot{o}\dot{\upsilon}$... is awkward (J. Jeremias: "äußerst hart"):

- 19a Then he took a loaf of bread, and when he had given thanks, he broke it and gave it to them, saying, "This is my body."
 - 21 But see, the one who betrays me is with me, and his hand is on the table.

Other internal observations:

Schürmann observes that verses 19b-20 contain 7 differences to the Pauline text 1.Co 11. This makes a direct adaption from Paul unlikely.

It is possible that the differences in order and wording reflect actual differences in the execution of the Supper in the various early Christian groups. Note e.g. that Paul has the cup separately "after" the meal and not during the meal.

Steven Notley wrote [private communication, Jan. 2003]:

"The blessings at any Jewish meal (regardless whether this is a Passover or not) over the bread (and always in conjunction with the wine) is at the beginning of the meal. Certainly not during or after the meal. In pre-70 Jewish Passovers there was also an additional cup following the meal (thus also Paul). Mk/Mt clearly present Jesus reversing the order of blessings (unlike Paul). Something that is unheard of in the history of Jewish tradition outside of Qumran. I presented a paper at SBL last year and have an article forthcoming exploring what might possibly have motivated the early Church (and perhaps also the Qumran sectarians) to change the order." and, clarifying:

"At all Jewish meals (including Passover) there is a blessing (Qiddush) at the beginning of the meal which is always cup-bread. In addition at Passover there is an additional cup (or cups). Prior to 70 the evidence indicates that at Passover there was only one additional cup (the Kos Brachah--cup of blessing) after the meal.

Luke's shorter and longer versions both accord with Jewish tradition. In other words, at the beginning of the meal the order was cup-bread (Qiddush). Mk/Mt by presenting the bread-cup together give us an order of blessing for the Qiddush unknown outside of the DSS.

What is scarcely noticed by scholarship is that Paul's deft insertion of META TO DEIPNHSAI indicates he is not following Mk/Mt's presentation of a reversal of the Qiddush. Instead, he is now identifying the cup as that which followed the meal (i.e. the Kos Brachah) not the cup at the beginning of the meal (as Mk/Mt)."

Nestle, Zahn, Dobschuetz, Burkitt and others think that the shorter form is original. Of the newer scholars it is defended by Ehrman and Parker.

Ehrman and Parker note that in the short form there is no reference to the death of Jesus. Parker writes (Living Text):

"It is a rite more or less just handed over - the cup is given with the brief instruction 'Divide it among ourselves.' They are to do this 'in memory of me'. Jesus has no part in this. He will eat and drink only in the kingdom of God. There is virtually no liturgical elaboration and above all no reference to the death of Jesus. ... It is [this] absence that shorter Luke stands out most markedly as an original contribution. ... This leads us to conclude that shorter Luke is to be preferred. For longer Luke harmonizes on two counts: in wording with 1Co, and in sense with Mark (who is here Pauline in thought).

With the previous verse the 'Dispute about Greatness' ended. But Jesus continues to speak, so a new introduction is not needed.

On the one hand the words could have been added for lectionary purposes to indicate a new pericope.

On the other hand the words could have been deleted as being inappropriate with Jesus still speaking.

Weiss (Lk Com.) thinks that the words have been added to smooth the abrupt transition from the promise to the disciples to the warning of Peter.

As in Lk 20:27 and 22:16 we have here the problem of a double negation. In both cases it is the Byzantine textform that has the double negation. This addition of $\mu\dot{\eta}$ is probably intended to intensify the negation as in $0\dot{0}$ $\mu\dot{\eta}$.

One additional problem is that $\mu\dot{\eta}$ and $\mu\epsilon$ sound identical. Since both make sense it was probably the origin of several readings. E.g. the variant by Ψ , 1 is probably one.

Weiss (Lk Com.) thinks that the $0\mathring{\upsilon}$ $\mu\mathring{\eta}$ comes from Jo, but the $\check{\epsilon}\omega\zeta$ has been changed into $\pi\rho\grave{\iota}\nu$ $\mathring{\eta}$ from (Mt)/Mk. The $\mu\mathring{\eta}$ has been omitted accidentally after $\mathring{\alpha}\pi\alpha\rho\nu\mathring{\eta}\sigma\mathring{\eta}$ and the $\mu\epsilon$ has been moved to the end to supply an object for $\epsilon\grave{\iota}\delta\acute{\epsilon}\nu\alpha\iota$.

- All f13 MSS, except 174 and 230, have the text in Mt! But 174 has a reference to Lk in Mt and 230 has a reference to Mt in the margin of Lk. 174 and 230 are probably just displaying the standard Byzantine text here.
- 124, 543 do not have the text or a note on it in Lk at all, but have a link to Lk in Mt.
- 13*, 69, 788 and 826 have $\mathring{\omega}\varphi\theta\eta$ $\delta\grave{\epsilon}$ either in the text or in the margin of Lk.
- 13 and 346 have the verses in the margin of Lk. 13 unfortunately has a lacuna in Mt. 346 has the verses in the text of Mt.
- 828, 983 and 1689 have the verses in the text of Lk without signs of doubt, but all three have also a reference to Mt (828 in Mt and 983 in Lk).

So the f13 reading is to have the text in Mt. But all f13 MSS show and note some knowledge that the verses also belong to Lk. Five MSS actually have the full text in Lk (13^{mg} , 346^{mg} , 828, 983, 1689). The simple statement in NA "f13 om. hic et pon p. Mt 26:39" is therefore misleading.

Clivaz writes: "The scribe even indicates the Eusebian number of the Lukan passage, and quotes from Lk 22:43 to 22:45a ... Three little crosses can be seen in this marginal note ..."

Regarding the date Clivaz writes: "This marginal note in C has not been dated by NA. Returning to Tischendorf's remarks, we can learn that the little crosses are a reminder of the text's use in liturgical readings, and can be traced to the second corrector, who lived in Constantinople in the 9^{th} CE (C3)."

Lectionary usage:

The reason for the inclusion of the verses in Mt is clearly lectionary usage. Raymond E. Brown writes ("The Death of the Messiah" p. 181, n. 4):

"Luke 22:43-45a was read on Holy Thursday (between Mt 26:21-39 and Mt 26:40-27:2); when it became customary to read Lk 22:39-23:1 as a pericope on Tuesday of the last week before Lent, Lk 22:43-44 was omitted from it to avoid duplication."

It is thus clear that the transfer of the verses between Mt and Lk has no impact on the textual problem of the originality of these verses. This variation is secondary and is due to liturgical influences.

Aland is wrong if he assigns f13 a strategic role here for the solution of the problem: "This kind of fluctuation in the NT manuscript tradition is one of the surest evidences for the secondary character of a text."

This may be true in other cases, but here it has no relevance.

It is possible that the omission in later witnesses has to do with this lectionary usage. Hoskier (Codex B, I, p. 407ff.) thinks that the passage was labeled with certain marks either to indicate transfer to Mt or simply to indicate the passage for lectionary use. These marks then misled some scribes to omit.

P69:

In P69 (3rd CE, POxy 2383) also verse 42 is omitted. Due to the fragmentary state of the papyrus the text is not completely safe. After verse 41 it continues probably with verse 45 $\kappa\alpha i$ $\alpha\nu\alpha\sigma\tau\alpha\zeta$ Possibly this indicates a secondary deletion in the exemplar of P69?

There is an extra file with images on this paleographic problem, click here.

P69 probably reads:

Note that this reconstruction is based on a new suggestion for line 4 by T.A. Wayment (ref. below). The old reconstruction by Turner (ed. pr., followed by IGNTP) suggested an omission of verse 45a, too. This is obsolete now.

P69: reconstructed text: P69 omits the red parts.

Discussion of P69:

According to Aland (Festschrift Ramon Roca-Puig, 1987) this omission points to a deliberate excision of the prayer.

If the verses 43-44 were present in the exemplar of P69 is impossible to say. Agreements of P69 with the D text may increase the probability that the verses were originally present.

There are two possibilities:

- 1. The P75, A, B et al. reading is original. Then the scribe of P69 deleted verse 42, perhaps deliberately to get rid of the equally problematic saying of the cup to pass from him.
- 2. The 01*, D et al. reading (inclusion of the verses) is original. Then the scribe of P69 deleted the words either accidentally or deliberately, similar to point 2.

Both points are equally possible and probable. Therefore one cannot assign P69 as a witness for the omission of verses 43-44, but only, as a "third way", for the omission of 42-44.

Clivaz suggests that P69 could be "a fragment of Marcion's redaction of the Gospel of Luke". The excision only makes sense "in a type of Christianity that preserved a single Gospel, as did Marcion", because the sentence of the cup is present also in Mt 26:39 and in Mk 14:36. We don't know for certain, but there is no evidence that these verses were in Marcion's gospel (compare Clivaz for references).

P69 is not noted in NA and incorrectly (for the omission of 43-44 only) in SQE.

Fathers evidence:

Justin (2nd CE): Dialogue with Trypho, ch. 103

εν γαρ τοις απομνημονευμασιν - [γεγραπται] οτι <u>ιδρως ωσει</u> θρομβοι κατεχειτο αυτου ευχομενου και λεγοντες παρελθετω, ει δυνατον, το ποτεριον τουτο.

"For in the memoirs - [it is recorded] that with sweat like drops he was covered, while He was praying, and saying, 'If it be possible, let this cup pass.'

It is noteworthy that Justin does not mention blood, he only says: "sweat like drops".

Irenaeus (2nd CE): Against Heresies, III, ch. 22

"... nor would he have wept over Lazarus, nor have sweated great drops of blood $(o\upsilon\delta'\ \alpha\nu\ \iota\delta\rho\omega\sigma\epsilon\ \theta\rhoo\mu\betao\upsilon\varsigma\ \alpha\iota\mu\alpha\tauo\varsigma)$; nor have declared, 'My soul is exceeding sorrowful' nor, when his side was pierced, would there have come forth blood and water. For all these are tokens of the flesh which had been derived from the earth, which he had recapitulated in himself, bearing salvation to his own handiwork."

Hilarius (ca. 350 CE), De Trinitate X:41 (text from CCSL 62A as found in CLCST):

"Nec sane ignorandum a nobis est, et in graecis et in latinis codicibus conplurimis uel de adueniente angelo uel de sudore sanguinis nihil scribtum repperiri. Ambigentes, utrum hoc in libris uariis aut desit aut superfluum sit incertum enim hoc nobis relinquitur de diuersitate librorum;

Certe si quid sibi ex hoc heresis blanditur, ut infirmum adfirmet cui opus fuerit angeli confortantis auxilio, meminerit creatorem angelorum creationis suae non eguisse praesidio; tum deinde necessario eo modo eum confortari, quo modo et tristem esse. Nam si nobis tristis est, id est propter nos tristis est, necesse est ut et propter nos sit confortatus et nobis: quia qui de nobis tristis est et de nobis confortatus est, ea confortatus est condicione qua tristis est. Sudorem uero nemo infirmitati audebit deputare: quia et contra naturam est sudare sanguinem, nec infirmitas est, quod potestas non secundum naturae consuetudinem gessit.

Neque ad heresim infirmitatis pertinere ullo modo poterit, quod aduersum heresim fantasma mentientem proficiat per sudorem sanguinis ad corporis ueritatem."

"Certainly we cannot overlook that in very many Greek and Latin manuscripts nothing is recorded of the angel's coming and the sweat like blood. So, someone may have doubt, if this, in different books, is either missing or considered redundant - this is left undetermined, because of the differences in the books.

Some heresy utilizes the words, to assert Jesus weakness, who needed the help of an angel, but please consider that the creator of the angels does not need this protection.

[...] The bloody sweat is a witness against the heresy, which speaks mendaciously of an illusion [of Jesus body, docetism], the sweat manifests the truth of the body."

Epiphanius, "Ancoratus" 31.5 and 37.1 (374 CE) writes (from Harnack, NT Textkritik, 1931):

άλλὰ καὶ "ἔκλαυσεν" κεῖται ἐν τῷ Λουκᾶν εὐαγγελίῳ ἐν τοῖς ἀδιορθώτοις ἀντιγράφοις, καὶ κέχρηται τῇ μαρτυρία ὁ ἄγιος Εἰρηναῖος ἐν τῷ κατὰ <u>αἱρέσεων πρὸς τοὺς δοκήσει</u> τὸν Χριστὸν πεφηνέναι λέγοντας. <u>ὀρθόδοξοι δὲ ἀφείλαντο</u> τὸ ῥητὸν φοβηθέντες καὶ μὴ νοήσαντες αὐτοῦ τὸ τέλος καὶ τὸ ἰσχυρότατον·

"καὶ γενόμενος ἐν ἀγωνίᾳ ἰδρωσεν, καὶ ἐγένετο ὁ ἱδρώς αὐτοῦ ώς θρόμβοι αἵματος καὶ ὤφθη ἄγγελος ἐνισχύων αὐτόν."

NA for comparison:

44 καὶ γενόμενος ἐν ἀγωνία ἐκτενέστερον προσηύχετο· καὶ ἐγένετο ὁ ἱδρὼς αὐτοῦ ώσεὶ θρόμβοι αἵματος καταβαίνοντες ἐπὶ τὴν γῆν.

43 <u>ἄφθη</u> δὲ αὐτῷ <u>ἄγγελος</u> ἀπ' οὐρανοῦ <u>ἐνισχύων αὐτόν.</u>

Harnack thinks that Epiphanius has read the words in reversed order, but this might simply be due to inaccurate quoting.

Jerome:

"In quibusdam ["certain"] exemplaribus tam Graecis quam Latinis invenitur scribente Luca: *Apparuit illi angelus ...* "

Testament of Abraham 20:5 (original probably Jewish, 1^{st} or 2^{nd} CE): κατήλθε ὁ $\dot{}$ δρώς ἐκ τής ὄψεως αὐτοῦ $\dot{}$ ωσεὶ θρόμβοι αἵματος "the sweat came down from his eyes like drops of blood"

This is the closest verbal parallel to Lk 22:44, perhaps a Christian interpolation? The Testament also presents the theme of the cup (as "bitter cup of death"), the confrontation between the will of Abraham and the will of God, and Abraham's triple request to Death for going away.

Justin the Apostate (331-363 CE) is quoted by Theodore of Mopsuestia, possibly from the (now lost) Emperor's 2^{nd} book against the Galilaeans (= Christians):

άλλὰ καὶ τοιαῦτα προσεύχεται ὁ Ἰησοῦς, οἷα ἄνθρωπος ἄθλιος συμφορὰν φέρειν εὐκόλως οὐ δυνάμενος, καὶ ὑπ' ἀγγέλου ὢν ἐνισχύεται.

"And even such things Jesus prays, such as a wretched man unable to bear misfortune calmly, and from an angel being strengthened."

Historia passionis Domini (Latin, 14th CE): cited from Clivaz/SQE

"Sequitur Luc. 22. Apparuit autem ei angelus de celo confortans eum. Qualiter autem angelus Christum in agonia sue oracionis confortaverit dicitur in Evangelio Nazareorum. Et idem ponit Anselmus in planctu suo. Constans esto domine modo enim venit tempus quo per tuam passionem redimendum est genus humanum in Adam venditum."

"According to Luke 22. So an angel appeared to him, strengthening him. And the words by which the angel strengthened Christ in his struggle in prayer, are reported in the Gospel of the Nazarenes. And the same is also adduced by Anselm in his lamentation: Be constant, Lord, for now comes the time in which through thy passion mankind sold in Adam will be ransomed."

WH: "These verses and the first sentence of 23:34 may be safely called the most precious among the remains of this evangelic tradition which were rescued from oblivion by the scribes of the second century." They also write: "Notwithstanding the random suggestions of rash or dishonest handling thrown out by controversialists there is no tangible evidence for the excision of a substantial portion of narrative for doctrinal reasons at any period of textual history."

Metzger writes: "Nevertheless, while acknowledging that the passage is a later addition to the text, in view of the evident antiquity and its importance in the textual tradition, a majority of the Committee decided to retain the words in the text but to enclose them within double square brackets."

Nestle: Not original, but from an early time.

Vocabulary and Style:

Harnack (and also Blass) think that the words are original: They have a typical Lucan flavor. Compare:

 NA^{27} Luke 1:11 ἄφθη δὲ αὐτῷ ἄγγελος κυρίου ...

 $\mathring{\omega} \Phi \theta^*$ appears 10 times in Lk/Act, but only once in Mk (9:4) and once in the parallel Mt (17:3).

Hapax legomena: ἀγωνία, ἱδρὼς, θρόμβοι appear only here in the NT. But this is not really surprising, Luke has an extensive vocabulary.

R. Brown (Death) writes: "in style and vocabulary this passage is closer to Lk than to any other NT author."

Hoskier notes that the use of γ ίνομαι in γ ενόμενος ἐν ἀγωνία and καὶ ἐγένετο ὁ ἱδρώς αὐτοῦ might be medical language, at least language typical for Luke. Compare:

NA²⁷ Acts 10:4 ἔμφοβος γενόμενος "becoming afraid" (again 24:25)
NA²⁷ Acts 12:11 ἐν ἑαυτῷ γενόμενος "came to himself"
NA²⁷ Acts 16:27 ἔξυπνος δὲ γενόμενος "having come out of sleep"
NA²⁷ Acts 16:29 ἔντρομος γενόμενος "trembling"
NA²⁷ Acts 15:25 γενομένοις ὁμοθυμαδὸν "come together with one accord"
NA²⁷ Acts 28:8 ἐγένετο δὲ ... πυρετοῖς καὶ δυσεντερίῳ "lay sick with fever and dysentery"

This indicates that the wording in this passage appears to be typical for Luke.

On the other hand $\mathring{\alpha}\gamma\gamma\in\lambda\circ\zeta$ $\mathring{\alpha}\pi'$ $\circ\mathring{\upsilon}\rho\alpha\nu\circ\hat{\upsilon}$ appears nowhere else in Lk nor the NT. Lk uses $\mathring{\alpha}\gamma\gamma\in\lambda\circ\zeta$ kurio $\hat{\upsilon}$ etc.

Compare also John 12:27-30:

"Now my soul is troubled. And what should I say 'Father, save me from this hour'? No, it is for this reason that I have come to this hour. 28 Father, glorify your name." Then a voice came from heaven ($\varphi\omega\nu\dot{\eta}$ $\dot{\epsilon}$ K $\tau\sigma\dot{\nu}$ $\sigma\dot{\nu}$ 0 $\sigma\nu\dot{\nu}$ 0.", "I have glorified it, and I will glorify it again." 29 The crowd standing there heard it and said that it was thunder. Others said, "An angel has spoken to him." 30 Jesus answered, "This voice has come for your sake, not for mine.

According to Harnack these words were adapted from Lk. But John changed them considerably: the angel and the blood have been removed, the strengthening is not for Jesus, but for the others.

So, if John was inspired from Luke, he must have read the verses in his edition of Luke.

Luke parallels several accounts of his passion narrative in Acts. It has been suggested (Tuckett), that the Agony story is paralleled by Paul's shipwreck: Acts 27:23-25 For last night there stood by me an angel of the God to whom I belong and whom I worship, 24 and he said, 'Do not be afraid, Paul; you must stand before the emperor; and indeed, God has granted safety to all those who are sailing with you.' 25 So keep up your courage, men, for I have faith in God that it will be exactly as I have been told. The parallelism seems clear.

R. Brown (Death of the Messiah, p. 186-7) notes that there might be an allusion to the LXX version of Deu 32:43:

LXX Deuteronomy 32:43 εὐφράνθητε οὐρανοί ἄμα αὐτῷ καὶ προσκυνησάτωσαν αὐτῷ πάντες υἱοὶ θεοῦ εὐφράνθητε ἔθνη μετὰ τοῦ λαοῦ αὐτοῦ καὶ ἐνισχυσάτωσαν αὐτῷ πάντες ἄγγελοι θεοῦ ὅτι τὸ αἷμα τῶν υἱῶν αὐτοῦ ἐκδικᾶται καὶ ἐκδικήσει καὶ ἀνταποδώσει δίκην τοῖς ἐχθροῖς καὶ τοῖς μισοῦσιν ἀνταποδώσει καὶ ἐκκαθαριεῖ κύριος τὴν γῆν τοῦ λαοῦ αὐτοῦ

"Rejoice, ye heavens, with him, and <u>let all the angels of God worship him;</u> rejoice ye Gentiles, with his people, and <u>let all the sons of God strengthen themselves</u> in him; for he will avenge the <u>blood</u> of his sons, and he will render vengeance, and recompense justice to his enemies, and will reward them that hate him; and the Lord shall purge the land of his people."

Discussion:

The words were known from the earliest times on. Justin and Irenaeus (2^{nd} CE) quote them and they appear, already in an expanded form, in the Gospel of the Nazarenes (2^{nd} CE).

The wording appears to be typically Lukan.

It is possible that the verses had been edited out, because it was felt inappropriate for Jesus to show such human weakness ($\alpha\gamma o\nu i\alpha$ and strengthening by an angel). Elsewhere in Lk Jesus is always calm and in control. This is supported by Epiphanius, who thinks that the passage was suppressed by anxious orthodox (anti-ebionitic). Also Hilarius hints at this (see above).

On the other hand it has been suggested that the words have been added to show that Jesus was a real human being and not a super-human God (anti-docetic, ebionitic).

See Ehrman, Orthodox Corruption, p. 187 - 194: "...three writers of the 2nd century: Justin, Irenaeus and Hippolytus. Remarkably, in all three cases the verses are cited to the same end, to counter any notion that Jesus was not a real flesh and blood human being."

But is a strengthening by an angel really necessary to show that? The agony and sweat would have been sufficient.

So, either

- a) someone omitted the words because they possibly indicated a not fully divine Jesus, or
- b) someone added the words to show that Jesus was a real flesh and blood human being.

It is noteworthy that the equally shocking word from the passing of the cup, which was so offensive to Celsus, has not been edited out in the same way. We only know this omission from P69.

Both, addition and omission are explicable on doctrinal grounds, so not decisive. In favor of the omission is the note by Epiphanius. Hilarius notes both arguments (ebionitic and docetic). Very early patristic support and stylistic reasons support the originality of the words.

Against this stands strong external support for the omission:

But the support in favor of the words is also not bad:

Very difficult! Overall, I think there is a slight edge in favor of the words.

Compare also the variant Lk 23:34, where the external evidence is similar.

It is basically possible that the verse has been added as a harmonization to Mt (so actually the NEB!). But the support is just too weak for that. It is therefore more probable that the words have been omitted accidentally (the next verse 63 also begins with $\kappa\alpha i$).

The text of fragment 0171 has been carefully reconstructed by J. N. Birdsall: J. Neville Birdsall, "A fresh examination of the fragments of the Gospels of St. Luke in MS 0171 and an attempted reconstruction with special reference to the recto)" in: "Philologia Sacra", Festschrift for Frede/Thiele, Freiburg 1993. He concludes: "We have confidence that the study of the extant fragments have laid a sure foundation for our contention that, ...the whole of verse 62 was not found in the folium when still undamaged."

D. Parker writes (Living Text): "There is no obvious reason why a scribe should deliberately omit the reference, and the likelihood is that the words are a later addition from Matthew."

A serious objection to the originality of the verse comes from the fact that the $\alpha \mathring{\upsilon} \tau \grave{\diamond} \nu$ in the next verse 63 does not refer to Peter, but to Jesus. In verse 62 Peter is the subject. So the $\alpha \mathring{\upsilon} \tau \grave{\diamond} \nu$ would naturally refer to Peter in verse 63, too. This has been felt from early on and the Byzantine text replaces $\tau \grave{\diamond} \nu$ 'Inooû ν for $\alpha \mathring{\upsilon} \tau \grave{\diamond} \nu$.

61 The Lord turned and looked at Peter. Then Peter remembered the word of the Lord, how he had said to him, "Before the cock crows today, you will deny me three times."

62 And he went out and wept bitterly.

63 Now the men who were holding him began to mock him and beat him;

On the other hand without verse 62 the situation is not much better. In verse 61 still Peter could be seen as the last mentioned subject.

CM Tuckett (in G. Strecker "Minor Agreements", p. 134) writes: "The theory of a textual corruption of the text of Luke, with a harmonizing addition being made fairly early, still seems to be the best solution. Such a theory can claim (little) support in the manuscript tradition; it eases the problem of the Lukan narrative sequence; it makes the gospel texts differ; and moreover, when coupled with a theory of Matthew's text is a secondary attempt to explain and ease the very hard Markan text, it provides a reasonably coherent explanation of the manuscript evidence of all three synoptic texts."

The words could have been added as a harmonization to the parallels, but the words are not identical.

It is possible that the words have been omitted due to h.t. (HTE - HTE, so Weiss). Note the evidence of 1278! It appears that the personal pronoun has been added independently.

It is possible that the words have been added to give some kind of explanation as to what the question might be.

The whole verse is slightly strange, so it is no surprise that some witnesses omitted it altogether.

Weiss (Lk Com.) thinks that the words are too difficult to have been added secondarily, note the missing object!

 $\kappa\alpha$ i here with the meaning "even, also".

- 11 But having treated him with contempt <u>also</u> Herod with his soldiers, <u>and</u> having mocked, having dressed him in a bright robe, he did send him back to Pilate."

On the other hand it could have been omitted because an explicit rejection is not mentioned. Both arguments are not very probable.

It is possible that it has been added to intensify the expression, "even he". It is also possible that the word has been omitted because of the rare meaning. Weiss (Textkritik, p. 165) thinks that the $\kappa\alpha$ has been added (in view of the following $\xi\mu\pi\alpha i\xi\alpha\zeta$) in retrospect at verse 22:63.

Metzger writes: "In the transmission of this clause, copyists became hopelessly confused..."

The txt reading makes the best sense. First Pilate sent Jesus to Herod, Herod sent him back to Pilate. So the natural answer of Pilate would be: "Herod has not found this man guilty, for he sent him back to us."

The Byzantine reading seems to mean: "I have examined him in your presence and have not found this man guilty - nor has Herod - for I sent you back to him." The Byzantine reading does not deal with the Herod clause at all.

The other readings are probably just errors.

Compare next verse:

 NA^{27} Luke 23:18 Aνέκραγον δὲ παμπληθεὶ λέγοντες ...

It is possible that the verse has been omitted very early due to homoioarcton $(\mathring{\alpha}\nu\mathring{\alpha}\gamma\kappa\eta\nu\ \delta\acute{\epsilon}\ -\ `A\nu\acute{\epsilon}\kappa\rho\alpha\gamma\sigma\nu\ \delta\acute{\epsilon}\)$. Later some witnesses inserted it at the wrong place. But the insertion after verse 19 could also be explained as D having an exemplar that was originally without the verse. Possibly the words were written in the margin and then inserted at the wrong place.

On the other hand it is possible that the sentence has been added as an early attempt to harmonize the text with Mt/Mk (so Weiss).

Problematic with this view is that the harmonization is not exactly like the Mt/Mk wording. Especially $\mathring{\alpha}\nu\mathring{\alpha}\gamma\kappa\eta$ does not appear here. $\mathring{\alpha}\nu\mathring{\alpha}\gamma\kappa\eta$ appears 3 times in Lk and once in Mt. Note that some witnesses have $\sigma\upsilon\nu\mathring{\eta}\theta\varepsilon\iota\alpha\nu$ here from John.

It has also been suggested that without the words the story is rather difficult to understand.

P. Williams "Early Syriac Translation Technique and the textual criticism of the Greek Gospels", Gorgias Press, 2004, p. 146.

It is probable that the variation here is due to the similarity of the letters. The question is if it's an omission or an addition.

On the one hand it is possible that $\kappa\alpha$ í has been omitted to improve style (omitting a redundant word) or due to parablepsis. On the other hand $\kappa\alpha$ í could have been added to avoid an error like that in L, mixing up the two e-sounds.

Bill Warren suggests on the textualcriticism list (13. Sept 2006) that the $\kappa\alpha\acute{\iota}$ has been added to get the meaning "both ... and" or "not only ... but also": "and among them were women who were both lamenting and wailing for him." Warren writes: "Clarity is added that the women (professional or customary social mourners?) were the ones doing both acts of lamenting him and singing/wailing a funeral dirge for him (and not the large multitude of the people, although such an understanding would be awkward anyway). $\kappa\alpha\acute{\iota}$ could have been added for both clarity and as a fairly common way to unite the two participles with a common subject."

It is possible that $\kappa\alpha i$ has been added for this reason. On the other hand αi $\kappa\alpha i$ could already be the original reading with this meaning.

The support for $\kappa\alpha i$ without αi is just too slim, otherwise one could presume that αi $\kappa\alpha i$ is a conflation.

Gospel of the Nazarenes (2nd CE): for the Latin texts see SQE to the passage

- "As it is said in the Gospel of the Nazarenes: Due to this word [Lk 23:34a], Thousands of Jews who were standing around the cross became believers." (found in Haimo (of Auxerre, 9th CE) Halberstatensis, Comm. in Isa 53:12)
- "Note that in the Gospel of the Nazarenes one can read that due to this word, 8000 have been converted later, namely 3000 on Pentecost (Acts 2) and later 5000 (Acts 4)." (found in Historia passionis Domini f. 55r, also quoted in Chronicon Salernitanum, see Flusser)

Gospel of the Hebrews (possibly, quoted by Jerome in epistle 120, 8, 9):

But so much loved the Lord Jerusalem, that he wept and lamented over the city and, hanging on the cross, he said: "Father, forgive them, for they know not what they do." And he achieved what he begged for, and immediately many thousands of Jews believed, and up to the 42nd year they had time to repent. (see SQE for the Latin).

Marcion (2nd CE), acc. to Epiphanius Haer 42.11.6, lemma 0α' (71), reads: 23:33 Καὶ ἠλθόντες εἰς τόπον λεγόμενον Κρανίου τόπος, ἐσταύρωσαν αὐτὸν 34 καὶ διεμερίσαντο τὰ ἱμάτια αὐτοῦ ἔβαλον κλήρους, 45 καὶ ἐσκοτίσθη ὁ ἥλιος.

Tatian (2nd CE): Arabic Diatessaron:

SECTION 52: 1 And after that, Jesus knew that all things were finished; and that the scripture 2 might be accomplished, he said, I thirst. And there was set a vessel full of vinegar: and in that hour one of them hasted, and took a sponge, and filled it with that 3 vinegar, and fastened it on a reed, and brought it near his mouth to give him a 4 drink. And when Jesus had taken that vinegar, he said, Everything is finished. 5 But the rest said, Let be, that we may see whether Elijah cometh to save him. 7 <u>And Jesus said</u>, <u>My Father</u>, <u>forgive them</u>; <u>for they know not what they do</u>. And Jesus cried again with a loud voice, and said, My Father, into thy hands I commend my spirit. He said that, and bowed his head, and gave up his spirit.

Fathers evidence:

No early father can be found for the omission in the 2^{nd} , 3^{rd} or 4^{th} CE, except possibly Marcion.

Ignatius (2nd CE), to the Ephesians, ch. 11

He threatened not, but prayed for His enemies, "Father, forgive them, they know not what they do."

Irenaeus (2nd CE), Against Heresies Book III

- 16.9 and when He underwent tyranny, He prayed His Father that He would forgive those who had crucified Him.
- 18.5 He exclaimed upon the cross, "Father, forgive them, for they know not what they do,"

Clement of Alexandria (around 200 CE)

Recognitions book VI, ch. 5

Wherefore, in short, the Master Himself, when He was being led to the cross by those who knew Him not, prayed the Father for His murderers, and said, "Father, forgive their sin, for they know not what they do!"

Homily XI

For the Teacher Himself, being nailed to the cross, prayed to the Father that the sin of those who slew Him might be forgiven, saying, "Father, forgive them their sins, for they know not what they do."

Origen^{Lat} (early 3rd CE), Homily on Leviticus 2,1

Hippolytus (early 3rd CE), Zahn quotes Hippolytus c. Judaeos 3:

Christ, talking in Psalm 69, is saying: ἔλεγον "πάτερ, ἄφες αὐτοῖς" τοις ἔθνεσιν

Expository Treatise against the Jews: David the son of Jesse. He, singing a certain strain with prophetic reference to the true Christ ... in which (strain) the Christ who humbled Himself and took unto Himself the form of the servant Adam, ... speaks thus in the $\underline{69th\ Psalm}$: ... Wherefore "they that sit in the gate spoke against me," for they crucified me without the gate. "And they that drink sang against me," that is, (they who drink wine) at the feast of the passover. "But as for me, in my prayer unto Thee, O Lord, $\underline{\mathbf{I}}$ said, Father, forgive them," namely the Gentiles, because it is the time for favor with Gentiles. "Let not then the hurricane (of temptations) overwhelm me ...

also "Benedictions of Jacob" (Eig tag ϵ ulogiag tou Iak ω β):

<u>Didascalia Apostolorum</u> (3rd CE), ch. 6, II.16:

For our Saviour Himself also was pleading with His Father for sinners, as it is written in the Gospel: My Father, they know not what they do, neither what they speak: but if it be possible, do Thou forgive them.

Apostolic Constitutions (4th CE), an adaptation of the Didascalia Apostolorum

Book II, ch. 16 For our Saviour Himself entreated His Father for those who had sinned, as it is written in the Gospel: "Father, forgive them; for they know not what they do."

Book V, ch. 14 And a little afterward, when He had cried with a loud voice, "Father, forgive them, for they know not what they do,"

<u>Hilarius</u> (ca. 350 CE) quotes the word several times in refuting Arian misinterpretations, De Trinitate I: 32, X:48, X:71.

<u>Pseudo-Justin</u> (ca. 400 *CE*), Quaestiones et Responsiones ad Orthodoxos, no. 119 (Some manuscripts ascribe this work to Justin Martyr (about 150), but it is generally recognized as a much later work. It has been ascribed to Theodoret (who died about 458), to Diodorus of Tarsus (about 370), and left as an anonymous work of about 400.)

ποτε μεν λεγων ο κυριος πατερ αφες αυτοις ου γαρ οιδασι τι ποιουσι (see Harnack for full quote).

Jerome (ca. 400 CE), epistle 120, 8, 9

He quotes 23:34 as a prove for Jesus' love for Jerusalem and adds:

"Itaque inpetravit quod petierat multaque statim de Judaeis milia crediderunt." (compare the Hebrew Gospels above)

Cyril Alex.

(ca. 425 CE) considered the words an interpolation in his book XIII of 'Contra Julianum' (lost, but cited by Arethas in his "Commentary on Revelation", 9th CE):

"πάτερ, ἄφες αὐτοῖς, οὐ γὰρ οἴδασι τί ποιοῦσιν." εἰ καὶ Κυρίλλω τῷ Αλεξανδρεῖ ἐν ιγ' τῶν κατὰ Ιουλιανοῦ ἐλέγχω πρὸς νόθον τοῦτο τὸ ρητὸν ἔδοξεν ἀποσκυβαλίσαι ἀλλ' εἰ ἐκεῖνος οὕτως, ἡμῖν οὐ τοῦτο δοκεῖ. ὅτι μηδὲ πάντες οἱ παρόντες Ἰουδαῖοι τῆς τόλμης τῶν ἀρχιερέων ἐκοινώνουν, οῦς πάντας εἰκὸς ὕστερον σφραγισθῆναι τῆ πίστει, καθὸ καὶ δούλους αὐτοὺς Θεοὺ ὁ Ἄγγελος καλεῖ. (from: J. A. Cramer "Catenae Graecorum Patrum in Novum Testamentum VIII", Oxford 1840, p. 287 on Rev 7:4-8)

No Gospel parallel.

Other parallels:

The stoning of James the Just, transmitted by Hegesipp (ca. 180 CE):

Eusebius Church History book 2, chapter 23

"And they began to stone him, for he was not killed by the fall; but he turned and knelt down and said, 'I entreat you, Lord God our Father, forgive them, for they know not what they do.'"

K. Haines-Eitzen notes that the words can be seen as a reminiscence to Isa 53:12:

LXX Isaiah 53:12 καὶ διὰ τὰς ἁμαρτίας αὐτῶν παρ ϵ δόθη

"and for their sins he was given over"

Haines-Eitzen notes Luke's fondness for Isa 53 and verse 12 (compare Lk 11:22 and 22:37): "Each time, the reference cites a portion of the Isaiah verse in chronological order."

K. Haines-Eitzen notes also the following interesting parallel:

NA²⁷ Acts 3:17 Καὶ νῦν, ἀδελφοί, οἶδα ὅτι κατὰ ἄγνοιαν ἐπράξατε ὥσπερ καὶ οἱ ἄρχοντες ὑμῶν·

"And now, brothers, I know that you acted in ignorance, as did also your rulers."

Compare also: The Stoning of Stephen

NA²⁷ Acts 7:60 θεὶς δὲ τὰ γόνατα ἔκραξεν φωνῆ μεγάλη· κύριε, μὴ στήσης αὐτοῖς ταύτην τὴν ἁμαρτίαν. καὶ τοῦτο εἰπὼν ἐκοιμήθη. Then he knelt down and cried out in a loud voice, "Lord, do not hold this sin against them."

It is possible that the words have been omitted, because

- 1. of anti-Judaic tendencies in the post-apostolic church. The words could be interpreted as Jesus forgiving the Jews. The discussion in the early church shows that this word was very offensive to Christians in light of the strong anti-Judaism.
- 2. they might contradict Jesus previous pronouncement of judgment (23:29-31).

The words basically fit Luke's thinking and motives. The vocabulary is typically Lukan. It can also be noted that Luke uses $\pi \acute{\alpha} \tau \in \rho$ as an address in prayer several times, two more times in the passion narrative (22:42, 23:46).

Blass, Zahn and Harnack consider the words genuine.

Note the similar support for the verses 22:43-44!

Of the important MSS only A, D, Θ and 1241 read different in both verses. Especially interesting is that 01 has been corrected in both verses by C1, obviously from a different source! (This has already been noted by Streeter: "Four Gospels" p. 123)

This looks very much like an intentional deletion ('recensional activity'). Both words are clearly problematic on doctrinal grounds. But the deletion must have happened very early, because the support is early, widespread and good.

But these arguments were not convincing to all textual critics:

Hort wrote: "Its omission, on the hypothesis of its genuineness, cannot be explained in any reasonable manner. Willful excision, on account of the love and forgiveness shown to the Lord's own murderers, is absolutely incredible: no various reading in the NT gives evidence of having arisen from any such cause. [...] Few verses of the Gospels bear in themselves a surer witness to the truth of what they record than this first of the Words from the Cross: but it need not therefore have belonged originally to the book in which it is now included. ... Nevertheless ... it has exceptional claims to be permanently retained, with the necessary safeguards, in its accustomed place."

Nestle: "ganz merkwürdig" (quite peculiar).

Weiss: "schlechterdings nicht [zu] erklären" (= [secondary omission] quite impossible).

The problem is to come up with a good explanation for a secondary addition of the words.

It has been suggested that the words have been added in reminiscence of Act 7:60. It is also possible that the words come from Hegesippus (Stoning of James the Just, see above). This has been suggested by D. Flusser. But why only in Lk and not also in Mt and Mk, which are very similar at this point? And why with a different wording?

The words do not fit very good into the context:

33 When they came to the place that is called The Skull, they crucified Jesus there with the criminals, one on his right and one on his left. 34 <u>Then Jesus said, "Father, forgive them; for they do not know what they are doing."</u> And they cast lots to divide his clothing. 35 And the people stood by, watching; but the leaders scoffed at him, saying, "He saved others; let him save himself if he is the Messiah of God, his chosen one!"

This might indicate a secondary interpolation.

It should be noted that from a narrative point of view, Jesus words are probably not directed to the Jews, but to the Roman soldiers. They do not understand what is happening. Nevertheless the words have been taken as directed to the Jews (compare the Jewish Christian Gospels above).

Whitlark and Parsons give another argument by pointing out that with these words, the number of sayings spoken by Jesus from the cross is now Seven. Seven is a symbol for completeness. When the four Gospels were collected into a single collection, it was realized that one saying was 'missing' to make up a complete Seven. This lead to the addition of the saying from some "floating tradition". Perhaps it was Tatian, our first witness to the saying, who originally added the words?

Whitlark and Parsons also point out that the support for the reading prior to the 4^{th} CE is limited to the Western texttype. This is interesting, because such an addition fits the character of the texttype.

Peter Head comments on this (ETC Blog, Aug. 2006):

"To me this argument is interesting, even somewhat clever, but not actually convincing. To be fair I don't accept the starting point about the four-gospel collection, so never really get on board with the basic assumptions, but for me the whole approach seems a little problematic. Basically to accept this argument you have to be able to envisage a scribe in the mid-to-late second century, familiar with a four-gospel collection, interested in counting the sayings of Jesus, finding something problematic in the resultant number six, having access to a "floating" saying (perhaps through the Diatessaron) and adding this in order to make up the number to seven, not after the other six but at this point in Luke. I find most of these steps fairly problematic myself. They certainly haven't shown any evidence that a scribe is likely to count sayings like this."

Very difficult!

There is no reason for an omission. A secondary cause is indicated by the different introductory words in early witnesses and the different order of the languages. On the other hand the diversity is limited. It is interesting that the wording and order of the languages is not identical to that in Jo. This seems to indicate a recollection from memory (compare $\epsilon \pi \iota \gamma \epsilon \gamma \rho \alpha \mu \mu \epsilon \nu \eta$ by A, D, Q from Mk).

It is also interesting to mention that in John f13 and 579 add the words not in verse 20, but in verse 19, the position where they are in Lk (579 has them again in verse 20):

B p. 1347 A 39: There is a brown dot, a low point squeezed between the N and the M. I would term it "of unknown origin". There is no extra space between the letters which one would expect if this is a comma. It is at least clear, that this is not from the original scribe. First, he did not use such dots and even if he did, he would have added an extra space, but there is none. So, it is either a blot, or someone for whatever reason added a dot later. The ink looks similar to that of the letters, so it is either enhanced or has been added later with a similar ink. If it is deliberate, it is unusual, the enhancer did not add such things.

Those dots appear elsewhere. I have not looked into this systematically, but have been pointed to p. 1452 (Rom 7-8) in B. Here those dots appear quite often. There are high and low points. B uses high points elsewhere, probably at least in part by the original scribe. This should be investigated in more detail! There is an extra file with images on this paleographic problem, click here.

If the dot in B is deliberate one could interpret this as:

"Truly I tell <u>you today</u>, <u>you</u> will be with me in Paradise." against txt:

"Truly I tell you, today you will be with me in Paradise."

Note also the Gospel of Nicodemus (4-5th CE, compiled from older sources): cited from Tischendorf

ο δε ειπεν αυτω· σημερον λεγω σοι αληθειαν ινα σε εχω εις τον παραδεισον μετ' εμου. (Part 1: Acts of Pilate)

"And he said to him: 'Today I tell you the truth, that I should have you in Paradise with me.'"

(Part 2: Descent of Christ into Hades)

"And immediately he said to me: Amen, amen, today I tell you, You will be with me in Paradise.'"

The question has also been discussed by church fathers:

Makarius of Magnesia (ca. 400 CE): Zahn writes in his commentary on Lk: "Makarius agitates against those who, unable to believe in Christ's ability to reach the paradise, punctuate after $\sigma \acute{\eta} \mu \in \rho o \nu$."

αλλοι - το ρητον εκβιαζονται λεγουσι γαρ δειν υποστιζοντας αναγινωσκειν αμην λεγω σοι σημερον, ειτ ουτος επιφερειν το μετ εμου εση etc.

"Others press upon what is spoken; for they say it must read by putting a comma thus: 'Truly I tell you today,' and then adding the expression this way: 'You will be with me' etc."

Burkitt comments on the Syriac:

"Ephraim quotes the words of Jesus three times and each time without the prefixed 'To-day', as in C and in A 437. But he says also 'Our Lord shortened his distant liberalities and gave a near promise, To-day and not at the End ... Thus through a robber was Paradise opened.' The punctuation attested by C is referred to but not approved by Barsalibi, who says (in his Commentary on S. Matthew): 'Some hold that when he said Today, it was not of that Friday that he said that in it the robber should be in Paradise, but at the end of the world; and they read the passage Amen, amen (sic), to-day, adding a colon, and afterwards With me thou shalt be in Paradise, i.e. at the end of the world.' But possibly this is an extract from some Greek commentator, for in Greek no change would be required in the text if this view were adopted, while in Syriac it involves [a] transposition." [Burkitt Evangelion Da-Mepharreshe, Vol. 2, p. 304]

It might also be interesting that already Origen (185-254 CE) writes: "It belongs to the resurrection that one should be on the first day in the paradise of God" (Comm. John, book 10, 21). But this is only a general statement, not focusing on this verse and should be read in context.

This punctuation is a relevant issue for Jehovah's witnesses, because they have the comma after "today" in the NWT, which suits their beliefs.

If we accept the dot in B to be deliberate, then the only thing we can safely say is that one person at one time found it useful to place a comma here. It was certainly NOT the original scribe.

The dot in B is not of much relevance because the punctuation question exists independent of it. The punctuation, if there was any at all, was, like spelling, very irregular in the early MSS. Any punctuation in ancient MSS is VERY doubtful. The punctuation in Nestle-Aland or GNT is NEVER based on a punctuation in a MS. It is ALWAYS a decision based on grammar, syntax, linguistics and exegesis.

Some MSS added a $\delta\tau\iota$, to make clear that $\sigma\eta\mu\varepsilon\rho o\nu$ has to be taken with the following. D adds $\theta\alpha\rho\sigma\varepsilon\iota$.

This is not really a textcritical issue, but one that has to be decided by exegetes and translators. An immediate thought is that it would be banal, to note that Jesus is saying this today, when else should he be saying it? It would be rather awkward. On the other hand it is not clear that Jesus entered the paradise on that day. Was he not in Hades for three days?

Interestingly B. Weiss concludes ("Die Vier Evangelien"), that the $\pi\alpha\rho\acute{\alpha}\delta\epsilon\iota\sigma\sigma$ must therefore be within the Hades.

Carl Conrad wrote on the Bgreek mailing list (Jan 15 2000):

"I have personally come around to think that associating the SHMERON with AMHN LEGW SOI is not only likely but that Jesus-saying here cited in Luke's narrative seems better suited to its context. I'll add too, that while some may have theological reasons for wanting to understand SHMERON with ESHi MET' EMOU ..., my own thinking here has more to do with a judgment of historical probability in the context.

I should add also that one thing about this text that's always struck me as fascinating is that, IF one assumes that SHMERON belongs with ESHi (as I have until now thought preferable), this Jesus-saying is surely inconsistent with the generally-consistent futuristic eschatology of a delayed Parousia which we find set forth in Luke. And while one may occasionally find items in any one NT book that are hard to square with other data in the same NT book, yet this is jarringly inconsistent, and the more I've thought about it, the more unlikely the meaning derived from understanding SHMERON with ESHi seems to me."

LXX Psalms of Solomon 17:31 τί φωτεινότερον ἡλίου καὶ τοῦτο ἐκλείπει "What is brighter than the sun? Yet it can be eclipsed."

The txt reading is a Genitivus Absolutus. The meaning is not entirely clear. It could mean "the sun's light failed" or "the sun was eclipsed".

The Byzantine reading is the easier reading. It is possible that the prophesies of Isa 13:10 and Amos 8:9 provide a basis for reading the verb $\sigma \kappa \sigma t \zeta \sigma \mu \alpha t$.

33 omits probably due to homoioarcton (KAI ES.. - KAI ES..).

It is possible that the txt reading indicates an (at full moon impossible) eclipse. Then a change is only natural.

[Jews and others in the ancient Near East followed a lunar calendar in which each month averaged 29.5 days in length. They had twelve months in most years, each month beginning with a new moon. The Old Testament specifies that the Passover/Pascha is to be observed on the 14^{th} day of the first month (alternately known as Abib or Nisan, see Deuteronomy 16:1-7).]

Zahn (Comm. Lk) thinks that the txt reading is an attempt to explain the darkening in a physical way as an eclipse. He tends to adopt the Byz reading.

According to him it is not the sun which caused the darkening, but that the darkness was so complete that also the sun was dark.

2. The addition by D et al.:

This is thought to be a Latin verse which was translated into Greek by the scribe of D (so J. Rendel Harris) and which Scrivener has traced back to Homer's Odyssey (IX. 240).

Odyssey IX. 240: The part is from the Cyclops story: ἀτὰρ ἔπειτα ἐπέθηκεν θυρεὸν μέγαν ὑψόσε ἀείρας ὄβριμον. But then he put a door-stone large high lift up strong. οὐκ ἀνὰ τόν γε δύο καὶ εἴκοσι ἄμαξαι ἐσθλαὶ τετράκυκλοι Not up it at least two and twenty wagons good four-wheeled ἀπὸ οὕδεος ὀχλίσσειαν τόσσην ἠλίβατον ἐπέθηκεν θύρησιν.

"Then he [the cyclops] rolled a huge stone to the mouth of the cave, so huge that two and twenty strong four-wheeled wagons would not be enough to draw it from its place against the doorway."

It is possible that $\alpha \hat{\iota}$ and $\delta \acute{\upsilon}o$ are attempts to specify that known women are meant. The names are given in Lk 24:10 (more than two!). $\delta \acute{\upsilon}o$ possibly comes from the parallels, which have the two Marias at the tomb.

On the other hand it is equally possible that the word has been omitted because it is not clear which women are meant.

Weiss (Textkritik, p. 121) thinks that the omission is a thoughtless conformation to verse 49. He further notes that L writes $\Delta \in \Gamma \gamma N \lambda I K \in C$, which could then easily result in an omission.

Regarding the proposed Erasmus error $\kappa\alpha i$ $\gamma \nu \nu \alpha i \kappa \epsilon \zeta$ it might be interesting to check the actual MS 2, which contained printer notes. The only other MS besides MSS 1 and 2 Erasmus did use (for the Gospels) is MS 817. He did know 69 also.

The Byzantine addition is strange. In 23:55 only "women" are noted. So why is it needed to add here "and certain others with them"? Is it possible that it is inspired from the similar term in verse 10?

WH: "the combination of \dot{o} $\kappa \dot{\upsilon} \rho \, \iota o \varsigma$ 'Ihooû is not found in the genuine text of the Gospels, though perhaps in Mk 16:19".

But the term is found in Acts 15 times! In the epistles it appears 37 times and twice in the Revelation, in sum 54 times. So, actually it is rather surprising that the term is NOT in the Gospels, except here. It is possible that the title $\kappa\acute{\nu}\rho\iota\sigma \varsigma$ ${}^{2}\eta\sigma\sigma \hat{\nu}\varsigma$ was intended only for the resurrected Jesus and has therefore been omitted here.

If the term is not original here, it must be a very early addition. Why should it have been omitted? See Ehrman, Orthodox Corruption, p. 219: It might be an

"orthodox corruption" to make sure that it was indeed the body of the Lord Jesus that was in the tomb. When the verse ends with $\sigma\hat{\omega}\mu\alpha$, it could mean that the heavenly Christ has left the (physical) body of Jesus before he died.

D. Parker (Living Text) speculates of "a three-stage development of this text, from:

'And entering they did not find the body' to:

```
' ... the body of Jesus' to:
' ... the body of the Lord Jesus'".
```

But it is also quite possible that the variant by 579 et al. is probably influenced from 23:52.

Note that D alone adds $\tau \delta \sigma \omega \mu \alpha \tau \sigma \hat{\nu}$ 'In $\sigma \sigma \omega$ in 23:53. Probably this is simply a repetition from verse 52, but it shows that the scribe seems not too concerned with this issue.

The problem is that without the words, the text does not really make sense:

5 The women were terrified and bowed their faces to the ground, but the men said to them, "Why do you look for the living among the dead? <u>He is not here, but has risen.</u> 6 Remember how he told you, while he was still in Galilee, 7 that the Son of Man must be handed over to sinners, and be crucified, and on the third day rise again."

The wording is not the same as in the parallels. Nevertheless $0\mathring{\upsilon}\kappa$ $\xi \sigma \tau \iota \nu$ $\mathring{\omega}\delta \varepsilon$ could be a harmonization to the parallels (so Weiss).

The reading of C^* is clearly a harmonization to Mt.

The words could have been added to clarify and strengthen the reality of the Resurrection.

Weiss in his Lk Com. notes that the words are not needed, because already in verse 3 the women noted that he is not there:

A good suggestion came from Jim Snapp (on the TC list, 6 Dec. 2002). If the reading by it-c was the original (Western) reading, then the omission could be due to h.t.:

B: no umlaut

The sentence $\tilde{\eta}\sigma\alpha\nu$ $\delta \tilde{\epsilon}$... $\alpha \tilde{\upsilon} \tau \alpha \hat{\iota} \zeta$ breaks the continuation from verse 9 to the following $\tilde{\epsilon}\lambda \epsilon \gamma o \nu$... It looks like an editorial gloss. Note especially the double $\kappa\alpha \hat{\iota}$ $\pi \hat{\alpha} \sigma \iota \nu$ $\tau o \hat{\iota} \zeta$ $\lambda o \iota \pi o \hat{\iota} \zeta$ - $\kappa \alpha \hat{\iota}$ $\alpha \hat{\iota}$ $\lambda o \iota \pi \alpha \hat{\iota}$ $\sigma \hat{\upsilon} \nu$ $\alpha \hat{\upsilon} \tau \alpha \hat{\iota} \zeta$.

By omission of the $\tilde{\eta}\sigma\alpha\nu$ $\delta\dot{\epsilon}$ it is possible to continue the sentence from verse 9 and to supply a subject for $\tilde{\alpha}\pi\tilde{\eta}\gamma\gamma\epsilon\iota\lambda\alpha\nu$. It is also possible to start a new sentence with $\tilde{\eta}$ $M\alpha\gamma\delta\alpha\lambda\eta\nu\tilde{\eta}$ $M\alpha\rho\dot{\iota}\alpha$ though. In that case a $\alpha\hat{\iota}$ is not allowed before $\tilde{\epsilon}\lambda\epsilon\gamma\sigma\nu$.

 $\mathring{\eta}\sigma\alpha\nu$ δè without a αι could mean that a new sentence starts with και αι λοιπαι. In that case the curious situation is that it were the unnamed αι λοιπαι who report the events to the disciples. To avoid that interpretation a αι was added.

The verse could be a composition from Joh 20:3-6,10 (so Weiss). But this would be a rather creative composition, which was alien to later scribes. Luke is missing the other disciple. Also the reaction of the disciples is described differently: in John it is faith, in Luke it is astonishment. Luke 24:12 would be a clumsy summarization of John 20:3-10, for Luke 24:12 misses the essential point of John 20:3-10. So either this verse in Lk is a *very* early addition or both

evangelists drew from a common source. Aland (NT Papyri II) writes: "If there is a connection between Lk and Jo, then Lk is primary and Jo is secondary."

This verse has an un-Lukan feature, the historic present $\beta\lambda\dot{\epsilon}\pi\epsilon\iota$. Of the 93 occurrences of the historic present in Mk, Lk changed 92 (Ehrman, Orthodox Corruption, p. 212 - 217). Compare also the present in Lk 24:36: $\lambda\dot{\epsilon}\gamma\epsilon\iota$, another Western non-interpolation. Luke has 12 instances of the historic present in his Gospel, mainly verbs of speech.

Other words or phrases not used by Luke elsewhere are: παρακύψας, $\dot{0}\theta\dot{0}\nu\iota\alpha$, $\dot{\alpha}\pi\eta\lambda\theta\epsilon\nu$ πρὸς $\dot{\epsilon}\alpha\upsilon\tau\dot{0}\nu$.

All these features appear in the Johannine parallel.

On the other hand there are some typical Lukan features as well:

- 1. $\vec{\alpha}\nu\alpha\sigma\tau\dot{\alpha}\varsigma$: appears 28 times in Lk/Acts. Elsewhere 2 times in Mt and 6 times in Mk.
- 2. θαυμάζω: Mt-Mk-Lk-Act: 7-4-13-5
- 3. $\dot{\tau}\dot{o}$ $\gamma \in \gamma o \nu \dot{o} \varsigma$: this term appears 5 times in Lk and 3 times in Acts, but elsewhere only once in Mk.

Neirynck: "the joining of the verb $\theta \alpha \nu \mu \dot{\alpha} \zeta \in \nu$ and $\tau \dot{\delta}$ $\gamma \in \gamma \dot{\delta} \nu \dot{\delta} \zeta$ in one expression creates a valid example of Lukan style."

If the verse is a secondary addition based on John, its origin is difficult to explain. M. Matson ("In Dialogue with another Gospel, SBL 2001, p. 207) writes: "The scribe must have

- 1. turned to a copy of Jo 20:3-10, or known it fairly closely by heart
- 2. modified the account by deleting the reference to the other disciple (despite the presence of a reference to another disciple in 24:24)
- 3. added the Lukan stylistic form of a pleonastic $\mathring{\alpha}\nu\alpha\sigma\tau\grave{\alpha}\varsigma$
- 4. modified the term $\pi\rho o \in \delta\rho\alpha\mu \in \nu$, in which $\pi\rho o$ must clearly refer to the race between Peter and the other disciple, to $\delta\rho\alpha\mu \in \nu$, yet
- 5. left the term $\beta\lambda \in \pi \in L$ uncorrected, and
- 6. added the Lukan terms θ αυμάζω and τὸ γεγονός.

In other words, the interpolation would not have been a simple harmonization to a variant version in John. What is necessary to this reconstruction is a fairly sophisticated editor of text or traditions with an eye to Lukan style."

It is very difficult to find a reason for the omission of the verse, except accidental. In John there are two disciples, in Luke it is only one, perhaps this discrepancy was a reason for deletion? Ehrman suggests that the verse has been

omitted to avoid its Johannine flair within the Synoptics since there was a significant opposition to the Gospel of John in the 2nd and third CE.

Note what Ehrman writes in footnote 129 (page 254/55): "Franz Neirynck has convincingly shown that Marcion, the Diatessaron, and the Palestinian Syriac cannot be cited in support of the Western text here, despite their appearance in most of the apparatuses. See his "Lc xxiv 12: Les temoins du texte occidental. [Evangelica, p. 313-28, Leuven, 1982]"

Weiss (Lk Com.) notes that when the apostles in verse 11 found "these words ... an idle tale, and they did not believe them" it is not really logical for Peter getting up and running immediately to the tomb. Also the $\dot{\epsilon}\xi$ $\alpha\dot{\upsilon}\tau\hat{\omega}\nu$ of verse 13 refers back directly to verses 10/11 ($\alpha\dot{\upsilon}\tau\hat{\omega}\nu$).

Compare:

The verse could be omitted without disrupting the sense and flow of the narrative.

It also seems that verse 24 is in contradiction to verse 12, because in verse 24 one is told that more than one went to the tomb:

NA²⁷ Luke 24:24 καὶ ἀπῆλθόν τινες τῶν σὺν ἡμῖν ἐπὶ τὸ μνημεῖον καὶ εὖρον οὕτως καθώς καὶ αἱ γυναῖκες εἶπον, αὐτὸν δὲ οὐκ εἶδον.

"Some of those who were with us went to the tomb and found it just as the women had said; but they did not see him."

This contradiction could be an argument for the originality of the shorter reading, but could also be the cause for the omission of verse 12.

τό στάδιον: a distance of about 190 meters, almost a furlong stade, one-eighth mile, about 600 feet. 60 stadia = 12 km, 160 stadia = 30 km.

The village Emmaus cannot be determined with certainty. BDAG (3rd ed, 2000) mentions 3 possibilities:

- 1. The old Emmaus of Maccabaean times, not infreq. mentioned by Josephus, later Nicopolis, and now Amwâs; so Eusebius and Jerome (Onomastikon). It is located rather far from Jerusalem for the 60 stades of vs. 13; but F-MAbel (RB 34, 1925, 347-67) prefers to take the v.l. 160 stades as the original (but s. Metzger).
- 2. Since the middle ages some have thought of present-day el-Kubêbe (65 stades from Jerusalem; Baedeker, Plummer, Zahn et al.
- 3. The military colony of Vespasian, about 34 stades west of Jerusalem, called $A\mu\mu\alpha o\hat{\upsilon}\zeta$ in Jos. (Bell. 7, 217, where a v.l. has $\xi\eta\kappa o\nu\tau\alpha$ for $\tau\rho\iota\dot{\alpha}\kappa o\nu\tau\alpha$: an assimilation to Lk 24:13?) and presumably identical w. present-day Kaloniye.

The distance must be short enough to go back to Jerusalem in the evening, see verses 29, 33:

- 29 But they urged him strongly, saying, "Stay with us, because it is almost evening and the day is now nearly over." So he went in to stay with them.
- 33 That same hour they got up and returned to Jerusalem; and they found the eleven and their companions gathered together.

It is possible to go from Amwas/Nikopolis to Jerusalem in 5 hours.

It is possible that the 60 stades have been changed to 160 to conform to the identification by Eusebius and Jerome.

V. Michel (in the Fleckenstein book, 2003) makes it quite clear that from local tradition and early fathers witnesses, only Amwas/Nikopolis can be the Emmaus of the Lukan story. There were two streets connecting Emmaus and Jerusalem, one 147 (27 km) stades long, the other 186 (35 km) stades long.

We have therefore two contradictory arguments: 60 stades is better attested in the MSS tradition, but Amwas/Nikopolis (160 stades) is better attested by early tradition.

It has also been suggested that what Luke originally meant was that they were still on the way to Emmaus and after walking 60 stades the narrated things happened (so actually the Peschitta!).

For the $O\dot{\upsilon}\lambda\alpha\mu\mu\alpha o\dot{\upsilon}\zeta$ of D compare:

LXX Genesis 28:19 καὶ ἐκάλεσεν Ιακωβ τὸ ὄνομα τοῦ τόπου ἐκείνου Οἶκος θεοῦ καὶ <u>Ουλαμλους</u> ἦν ὄνομα τῇ πόλει τὸ πρότερον

Α: <u>Ουλαμμαους</u>

"And Jacob called that place "house of God"; and the name of the city was Oulamlous at the first."

The Hebrew reads "Luz" for "Oulamlous": "Ancient place and seat of worship in Ephraim on border of Benjamin, identif. with Luz (former name); later important place of worship; abode of prophet; Jereboam set up one of the golden calves at Bethel." (Whittaker) - Bet-El is about 90 stades (17 km, 12 miles) south of Jerusalem. Today it is called El Bireh.

Is D preserving the original here or is it an independent correction to overcome the problem of the distance?

Eusebius in his "Onomasticon" writes: "Bethel $(B\alpha\iota\theta\dot{\eta}\lambda)$ is now a village twelve miles from Jerusalem to the right of the road going to Neapolis. It was formerly called Oulammaus $(O\dot{\upsilon}\lambda\alpha\mu\mu\alpha o\hat{\upsilon}\zeta)$ and also Luza. It was given to the lot of the tribe of Benjamin, near Bethaven and Gai. Josue also fought there killing the king." Jerome writes in his Onomaticon translation: "porro quod quidam putant secundum errorem Graecorum uoluminum Ulammaus antiquitus nuncupatam, uehementer errant."

It is possible that it's a harmonization to Jo (so Weiss). Several witnesses harmonized even further by adding Jesus words "Don't be afraid" from the Walking on the Water story.

Without the words the story is more coherent, because when Jesus greets them it would be more difficult to understand why they then think, it is a ghost.

On the other hand it is possible that scribes just for that very reason, to make the story more dramatic, have omitted the words. Note $\varphi\acute{\alpha}\nu\tau\alpha\sigma\mu\alpha$ by D in the following verse.

Note the un-Lukan historic present $\lambda \acute{\epsilon} \gamma \epsilon \iota$, as in 24:12. While $\lambda \acute{\epsilon} \gamma \epsilon \iota$ appears several times in Lk, it is not common.

"they saw a charcoal fire there, with fish on it, and bread."

The term appears 9 times in the LXX. There is no reason for an omission, except possibly due to h.t. $\kappa\alpha i$ - $\kappa\alpha i$. Also possible it that Egyptian asceticism was adverse to so sweet a food as honey (so Burgon).

Metzger notes: "Since in parts of the ancient church honey was used in the celebration of the Eucharist and in the baptismal liturgy, copyists may have added the reference here in order to provide scriptural sanction for the liturgical practice."

On the other hand it is basically possible that the words have been omitted as a partial harmonization to Jo 21:9, where bread and fish are mentioned and not fish and honey.

Note that both Justin and Tertullian mention it! Even Clement Alex. alludes once to it:

"Have you anything to eat here? said the Lord to the disciples after the resurrection; and they, as taught by Him to practice frugality, "gave Him a piece of broiled fish;" and having eaten before them, says Luke, He spoke to them what He spoke. And in addition to these, it is not to be overlooked that those who feed according to the Word are not debarred from dainties in the shape of honeycombs. For of articles of food, those are the most suitable which are fit for immediate use without fire, since they are readiest; and second to these are those which are simplest, as we said before." (Paedagogus, book 2.1.15.2-3)

Is it even possible that the words got into the MSS from this Clement quote? In Greek the relevant sentence is:

Πρὸς τούτοις οὐδὲ τραγημάτων (καὶ) <u>κηρίων</u> αμοίρους περιορατέον τοὺς δειπνοῦντας κατὰ Λόγον.

Compare also the story of Joseph and Aseneth 16. Here the angelic visitor says: τὸ μέλι τοῦτο πεποιήκασιν αἱ μέλισσαι τοῦ παραδείσου τῆς τρυφῆς, καὶ οἱ ἄγγελοι τοῦ θεοῦ ἐξ' αὐτοῦ ἐσθίουσιν, καὶ πᾶς ος φάγεται ἐξ' αὐτοῦ οὐκ ἀποθανεῖται εἰς τὸν αἰῶνα.

This food of immortality may be connected with the resurrection. For Kilpatrick this is an argument for originality, but it is none. It could equally well be the reason for a secondary addition.

External support is quite slim.

Both words are conform to Lukan usage (see Acts 5:31).

The term with $\in i\zeta$ is probably better known to scribes from John the Baptist's story and so they changed from $\kappa\alpha i$ to $\in i\zeta$. This is quite possible because the support is slim and Egyptian only (except Sy-P).

It is also possible that the first $\in i\zeta$ has been changed to $\kappa\alpha i$ because another $\in i\zeta$ is following with a different reference, to improve style (so Weiss).

 $\xi \omega$ is superfluous: $E \xi \eta \gamma \alpha \gamma \in \nu$... $\xi \omega$. It could be argued that the duplication is an imitation of Semitic style, but that does not necessarily mean that it is secondary. The construction appears about 10 times in the LXX.

This case is similar to the previous cases of double negation (20:27, 22:16, 22:34). In all cases the double form is supported by the Byzantine text, here, too. Weiss (Lk Com.) notes that this is a very frequent addition.

The longer reading could also be a conflation of the P75, B and the Western reading.

On the other hand it is possible that $\xi \omega$ has been deleted as unnecessary.

 $NA^{26,27}$ take $\xi \omega \xi \omega \zeta$ as one variant and $\pi \rho \delta \zeta$ as another. This results in a reading that is not supported by any witness. This is not very fortunate.

On the other hand it is also clear that the words do not really belong together as one variant. $\xi \xi \omega$ belongs to $\xi \xi \eta \gamma \alpha \gamma \epsilon \nu$ and could be taken as one variant. The other variant then would be $\xi \omega \zeta = \pi \rho \dot{o} \zeta$. I think this would be a more natural separation.

With or without the words stand or falls the classification of the pericope as an ascension story.

It is possible that the words have been omitted due to homoioarcton (...N KAI A... - ...N KAI A...). This is possibly the case for the omission in 01*. That the omission in the Western text is accidental is improbable, though, because it is connected with similar changes in Acts 1:2, 9. The evidence points here clearly to a deliberate change.

Luke points back to the ascension in Acts 1:1-2: "I wrote about all that Jesus did and taught from the beginning until the day [$\mathring{\alpha}\chi\rho\iota$ $\mathring{\eta}\varsigma$ $\mathring{\eta}\mu\acute{\epsilon}\rho\alpha\varsigma$] when he was taken up [$\mathring{\alpha}\nu\epsilon\lambda\acute{\eta}\mu\varphi\theta\eta$] ..."

It is not clear if the phrase "until the day" means, that the ascension itself has already been narrated. There is a Western tradition (Codex Gigas, Augustinus) which omits the words $\mathring{\alpha}\nu\in\mathring{\lambda}\mathring{\eta}\mu\varphi\theta\eta$ in Acts 1:2. Codex D has the word but appears to be a mixture of Gigas and the normal text.

It is possible that the words have been deleted deliberately to remove a double ascension in Luke - Acts: First in Luke, shortly after the resurrection (recapitulated in Act 1:2), second in Acts 1:9, 40 days later.

On the other hand it is possible that the words have been added, when Luke and Acts were separated by one or more Gospels in the canon, for clarity. Streeter ("Four Gospels", p. 142) writes regarding an assimilation to Acts: "If so, it is an assimilation of an incredibly unskillful kind; for it makes the Ascension take place on Easter Day instead of forty days later as the Acts relates."

But it is not completely clear that the events in 24:44-53 follow immediately those in 24:36-43.

See also Ehrman (Orthodox Corruption, p. 227 - 232), who argues that the words have been added to strengthen the orthodox emphasis on the bodily ascension of Jesus. This argument can be reversed of course. It is equally possible that the words have been omitted to deny a bodily ascension of Jesus.

Weiss (Textkritik, p. 180) sees the phrase as a free reminiscence of Act 1:9-10. He further notes (Lk Com.) that it could have been added to explain the unclear $\delta\iota\acute{\epsilon}\sigma\tau\eta$ $\mathring{\alpha}\mathring{\pi}$ $\alpha\mathring{\upsilon}\tau\mathring{\omega}\nu$.

ἀναφέρω appears only 3 times in the Gospels, here and in Mk 9:2/Mt 17:1. But in the parallel Lk 9:28 to Mk 9:2/Mt 17:1 Lk changes ἀναφέρει into ἀνέβη. But it is possible that Lk changed the word to get rid of the historic present. Note that Lk in Acts 1:2 uses ἀνελήμφθη. ἀναφέρω could thus be labeled "un-Lukan".

It is possible, even probable that this omission is connected with the omission of $\pi\rho\sigma\sigma\kappa\nu\nu\eta\sigma\alpha\nu\tau\epsilon\zeta$ $\alpha\dot{\nu}\dot{\tau}\dot{o}\nu$ in verse 52. It is not really conceivable that both omissions are accidental. G. Lohfink noted that in Hellenistic rapture stories the element of Proskynesis is closely related to an ascension.

Regarding the change of $\delta \iota \acute{\epsilon} \sigma \tau \eta$ into $\mathring{\alpha} \pi \acute{\epsilon} \sigma \tau \eta$:

Zwiep notes that

- ἀπέστη fits better to ἀπ' αὐτῶν
- D several times replaces a verb by some form of $\dot{\alpha}\phi$ is $\dot{\alpha}$
- D also has a similar change in Act 1:9:
 νεφέλη ὑπέλαβεν αὐτὸν καὶ ἀπήρθη ἀπὸ ὀφθαλμῶν αὐτῶν.
 for ἐπήρθη καὶ νεφέλη ὑπέλαβεν αὐτὸν ἀπὸ τῶν ὀφθαλμῶν αὐτῶν.
- $\alpha \dot{\phi}$ iστημι is the more conventional term for the disappearance of a heavenly being according to Lohfink, p. 170-1.

Overall a deliberate omission to harmonize Lk with Acts appears to be the most probable explanation. Taking the editorial activity in Lk 24:51-52 and Act 1:2+9 together, it accords well with other changes of the Western text.

Zwiep concludes: "The conclusion that emerges from the preceding analysis is that in all three textual units (Lk 24:50-3, Act 1:1-2, 9-11) a development from the B-text to the Western text gives a more convincing (while more consistent) explanation of the evidence than the reverse. The Western reviser quite consistently removes stylistic, chronological and theological obstacles throughout the whole narrative and thereby creates a new 'de-mythologized' narrative picture, conform to his own theological (or more precisely, christological) outlook: he removes any suggestion that Jesus ascended physically - with a body of flesh and bones - into heaven. [...] it appears that the 2nd and 3nd CE christological controversies [gnostic and docetic] provide a most plausible setting in which a radical reinterpretation of the ascension narrative such as undertaken by our 'Western' scribe could take place."

 NA^{27} Matthew 28:17 καὶ ἰδόντες αὐτὸν προσεκύνησαν, οἱ δὲ ἐδίστασαν.

This omission is probably related to the omission in the previous verse 51. It would seem possibly not appropriate to worship Jesus without an ascension being mentioned. G. Lohfink noted that in Hellenistic rapture stories the element of Proskynesis is closely related to an ascension.

Weiss (Lk Com.) thinks that the words have been added from Mt 28:17.

 $\alpha i \nu \in \omega$ appears 7 times in Lk-Acts (4 times in Lk), but nowhere else in the Gospels. Only once in the epistles (Rom 15:11).

 $\in \mathring{U}\lambda O\gamma \acute{e}\omega$ appears 14 times in Lk, 5 times in Mt, 6 times in Mk and once in Jo. In the epistles it appears 16 times.

Overall $\alpha i \nu \acute{\epsilon} \omega$ is the more rare word and more specific to Lk.

It is possible that $\in \mathring{\upsilon}\lambda \circ \gamma \in \omega$ has been changed to $\alpha \mathring{\iota} \nu \in \omega$, because in the two previous verses 50 and 51 $\in \mathring{\upsilon}\lambda \circ \gamma \in \omega$ is used as Jesus blessing the disciples. So here it would then appear in a different meaning ("praise") and possibly considered inappropriate (so Weiss).

The Byzantine reading is a clear conflation of txt and the Western reading.

M. Robinson Oct. 2002 on the TC list:

"Lk ends on one page bottom, recto, with 5 lines left empty (leaf 148). Next page (verso of leaf 148) contains the pericope complete before the list of kephalaia for Jn. It is written in a darker ink, but not necessarily by a different scribe, since there are a number of similarities to the style of the opening segment of John which follows. The title of the PA page reads EUa EIS T> K/ TOU OKTWs Tu OSIas PELAGIAS (= the lectionary reading for Pelagia, Oct 8th). Also, the PA is written in 2 cols., 26 ll per page, as in the rest of the MS. In the main text of John, the PA is not present. However, in loc. 7:53 there is a stylized cross at the end of 7:52, and written in the margin between columns is something regarding '... H PERIKOPH TOU ... GUNAIKOS', part of which was not decipherable."
