1. General description

The MP9 is a compact, lightweight submachine gun and the perfect tool for personal protection and defense. At the size and the weight of a pistol, the MP9 is offering fire power and effective range of a rifle-sized submachine gun. Although being very small, the MP9 is offering many interfaces to install today tactical accessories such as suppressors and electro-optical aiming devices.

Actually, the MP9 is not only a weapon but a weapon family, including the fully automatic MP9, the semi-automatic TP9, the training weapon MP9-FX for Simunition 9mm FX cartridges and finally the completely inert red MP9-M.

2. Nomenclature and technical data

2.1 Nomenclature

Fig. 2.1

Fig. 2.2

Technical Specifications

2.2 Technical Data

Function:	Locking Rotating Barrel System Locked Closed Bolt Action Blow Back operated Bolt remains open after last shot
Safety System:	Double trigger safety Drop safety
Firing modes:	Semi-Automatic Full-Automatic (MP9 only) Ambidextrous fire selector switch
Magazines:	15, 20, 25 and 30 cartridges High-strength, translucent polymer
Sighting System:	Ghost-ring sight, fully adjustable MIL-STD 1913 Picatinny rail
Length:	523 mm (stock extended) 303 mm (stock closed)
Height:	166 mm (w/o magazine) 173 mm (with 15 round magazine) 246 mm (with 30 round magazine)
Width:	45 mm (stock folded out) 56 mm (stock closed)
Barrel Length:	150 mm
Sight Radius:	190 mm
Weight:	1.4 kg without magazine
Magazine Weight:	240 g 15 cartridges loaded (NATO 124 g) 300 g 20 cartridges loaded (NATO 124 g) 370 g 25 cartridges loaded (NATO 124 g) 440 g 30 cartridges loaded (NATO 124 g)
Colours:	black, green, tan

Ordering informations:

Item	Part number
MP9 cal. 9x19 mm in black, green or tan	BT-30104
Idem with side rail	BT-30104-1
TP9 cal. 9x19 mm in black, green or tan	BT-30105
Idem with side rail	BT-30105-1

3. Operating principle

<p>Phase 1: Ready for firing</p> <ul style="list-style-type: none"> - cartridge in chamber - hammer cocked under force of hammer spring 	 <p style="text-align: center;">Fig 3.1</p>
<p>Phase 2: Ignition</p> <ul style="list-style-type: none"> - trigger releases hammer - hammer hits firing pin - firing pin ignites powder in cartridge - gases of burning powder drive bullet through barrel 	 <p style="text-align: center;">Fig. 3.2</p>
<p>Phase 3: Muzzle departure</p> <ul style="list-style-type: none"> - impulse of accelerating bullet drives locked firing unit (barrel and bolt) rearward against force of recoil spring - after muzzle departure of bullet, locked firing unit continues running rearward - barrel starts rotating around his axis, guided by the locking pin of the barrel guide running in the control cam of the barrel - bolt starts pushing hammer down against force of hammer spring 	

<p>Phase 4: Ejection</p> <ul style="list-style-type: none"> - barrel completes rotation and unlocks from receiver - barrel remains in position, bolt continues travelling rearward - extractor pulls empty cartridge case out of chamber and ejector throws it through the ejection port out of the weapon - bolt travels rearward until rearmost position while fully cocking hammer 	<p style="text-align: center;">Fig. 3.3</p> 
<p>Phase 5: Reloading</p> <ul style="list-style-type: none"> - compressed recoil spring pushes bolt back against barrel - forward travelling bolt feeds new cartridge out of magazine into chamber - forward riding bolt locks with barrel - locked firing unit rides to foremost position - disconnecter reengages trigger for next shot - ready for firing as fig. 3.1 	<p style="text-align: center;">Fig. 3.4</p>  <p style="text-align: center;">Fig. 3.5</p>

4. Compatible ammunition

Caliber: 9x19 NATO (also named 9 mm Luger, 9 mm Parabellum)

Cartridge Minimum Length: 27.0 mm recommended

Cartridge Minimum Impulse: 2.3 Ns recommended

Sight-In Distance: 10 m recommended

Point-Blank-Range: 0 m to 100 m (for target dia. 100 mm)

Practical Accuracy (meas.): Standard deviation 19 mm at 25 m (2.5 MOA)

6. Accessories

6.1 Standard delivery

Standard delivery includes:

- Weapon with 15 rds magazin
- 30 rds magazine
- cleaning kit
- carrying sling
- hardcase
- operator manual

Fig. 6.1

6.2 Magazines

Capacity:	Part number:
15 rds magazine	BT-30209
20 rds magazine	BT-30296
25 rds magazine	BT-30298
30 rds magazine	BT-30183

6.3 Aimpoint reflex sight

Performance:

- Fast and sure target acquisition;
- doubles hit probability;
- compatible with nighvision devices.

Sight-in distance: 15 m recommended

Point-Blank-Range: 2 m to 100 m (for target dia. 100 mm)

Operation and maintenance: Refer to manufacturer manuals.

Fig. 6.2

6.4 Top Covers with Side Rails

Performance:

- Feature Picatinny Mil-Std 1913 rails on right side (fig. 6.2 with attached light module) or both left and right side;
- complete with iron sights

Part numbers:

BT-30300 with one siderail (right only)

BT-30358 with two siderails (right and left side). Note: Does not work with holsters in section 6.7!

6.5 Sound suppressor

Performance:

- Reduces muzzle flash;
- attachment for underbarrel laser/light module;
- sound reduction (see table below):

Ammunition:	w/o suppressor	w/ suppressor	Sound reduction
9x19 Standard	163.3 dB A	130.1 dB A	33.2 dB A
9x19 Subsonic	158.7 dB A	125.1 dB A	33.6 dB A

Part number: B&T SD-988401

Fig. 6.3

6.6 Brasscatcher

Brasscatcher (fig. 6.3) attaches to siderail topcovers. Recommended in sensitive environment such as vehicles.

Part number: BT-30110

6.7 Holsters

Duty Holster

Part numbers:

BT-30339R Right hand

BT-30339L Left hand

Fig. 6.4

High Ride Holster

Part numbers:

BT-30341R Right hand

BT-30341L Left hand

Fig. 6.5

Tactical Holster

Part numbers:

BT-30332R Right hand

BT-30332L Left hand

Fig. 6.6

6.8 Fix stock

The fix stock is a replacement to the regular folding stock. No permanent modifications to the weapon are required to install it.

Part number: BT-30189

Fig. 6.7

6.9 Training aids

Fig. 6.8

MP9-FX

Force on force training weapon for marking cartridges 9mm FX

Part number: BT-30106

Fig. 6.9

MP9-M

Inert, non-firing model for basic instruction or non-shooting scenario training.

Part number: BT-30289

6.10 Adaptor Light Laser

Provides additional interface for IT M3, M6 and similar laser light modules. Reduces muzzle flip as secondary effect.

Part number: BT-30120

Fig. 6.10

7. Manufacturer's warranty information

- a. The manufacturer's warranty covers the complete system with all genuine components and accessories.
- b. The warranty is valid three years from the date of acceptance of the weapon system by the customer's authority.
- c. The warranty is applicable on all non-conformities in material or workmanship detected during the period.
