

# M26 12-Gauge Modular Accessory Shotgun System (MASS)

## Specifications

Open architecture allows attachment to M4 carbines as well as operation as a stand-alone weapon

Provides the capability to fire lethal, less-than-lethal, and door breaching 12-gauge rounds

Ambidextrous capability

The M26 12-Gauge Modular Accessory Shotgun System (MASS) is a lightweight 12-gauge shotgun that attaches to the M4. It zeroes to the host weapon and fires lethal, less-than-lethal, and door-breaching rounds.

The M26 is also designed to operate as a stand-alone system, and comes with a collapsible buttstock. With a Picatinny rail on top, the receiver can be used to mount sighting equipment.

The bolt handle is mountable on either side for ambidextrous handling.

M26 mounted on M4
