ACKNOWLEDGEMENTS

This list was compiled by E.M.Holden and funded by the British Mycological Society, together with English Nature, Scottish Natural Heritage and Plantlife International. It also has the support of The Countryside Council for Wales and the Environment and Heritage Service Northern Ireland.

Thanks must go in particular to members of the Project Steering Group - Carl Borges (English Nature), Shelley Evans (British Mycological Society), Martin Harper (Plantlife) and Stephen Ward (Scottish Natural Heritage) as well as to the BMS Working Group convened by Shelley Evans and including Ted Blackwell, Stefan Buczacki, Geoffrey Kibby, Paul Kirk, Patrick Leonard, Peter Roberts, Maurice Rotheroe and Malcolm Storey who worked to very tight deadlines to keep the project moving.

A special mention goes to Vaughan Fleming whose extensive and meticulous research on this topic over many years laid a foundation stone for the project.

Many other people have also contributed to the compilation of this list with their suggestions and comments. Whilst it has not been possible to accept all of these, the consultation process has hugely improved the list.
