EDICOM, international reference in EDI and Electronic Invoicing, is dedicated to the development of transmission and data integration models between businesses, through products and services developed with the highest standards of **professionalism, transparency and efficiency**.

This working philosophy, allows us implement advanced technological solutions, freeing our clientes from the problems and responsibilities associated with the sending and reception of all types of electronic transmissions.

EDICOM's technological solutions, all of which are developed in-house, are perfectly adapted to the needs of the client beyond borders, laws, and technical complexities. We achieve this through a powerful infrastructure composed of technological and human resources that each day is placed at the service of more than 8,000 clients for the administration and management of their B2B communications platform. EDICOM establishes the necessary connections with all trading partners that need to interchange any type of electronic transaction.

"EDICOM serves over 8,000 customers worldwide from its offices en Europe and America"

Our Services

- XML/EDI Transactions
- Electronic Invoicing Platform
- Secure Publication of Electronic Documents (invoices, orders, payrolls, etc.)
- CRP/VMI Software
- Enterprise Application Integrator (EAI) for integration of applications
- Value Added Network (VAN) EDICOMNet
- Communications via AS2 and OFTP
- Certification Authority
- Time Stamping Authority
- Electronic Signature services
- Hardware and Software Management in ASP-SaaS (Software as a Service)
- Comprehensive Outsourcing Service
- Onboarding projects for the integration of clients and suppliers
- EDI Management Group for a continuous partners maintenance.

Our Customers

- **Retailers**
El Corte Inglés, Carrefour, Harrods, Alcampo, Mercadona, Consum, Delahiza, Atac, Cortefiel, Consum, Soriana, Jeronimo Martins, Chedraui...
- **Suppliers**
Nestlé, Reckitt Benckiser, Proctec & Gamble, Valentino, Sony, Microsoft, Danone, Kraft, Riso Gallo, Red Bull, Whirlpool, Adidas, Unilver, Bonduelle...
- **Logistics and Transport**
Logista, FCC, Exel Logistcs, Aldeasa, TNT Express, Cat, DHL, Kuehne & Nagel, Logitrago, Rhenus Tetrans, SDF Iberia, Transnatur, Carreras, Gerposa...
- **Pharmaceutical**
Lilly, Roche, Glaxo Smith Kline, Pfizer, Novartis, Bristol-Myers, Abbot, Becton Dickinson, Bayer, Pierre Fabre, Cofares, Baxter, Janssen.Cilag, Nadro...
- **Automotive**
Bridgestone, Fiosa, Midas, Daimler Chrysler, Nissan, Arcelor Mittal, Pirelli, Gestamp, Durex, Fujitsu Ten, Good Year, Michelin, Henkel Automotive, Robert Bosch...
- **Tourism**
El Corte Inglés, Viajes Barceló, Carlson Wagonlit España, Halcón, Air Europa, PepeCar, Logitravel, Beds Online, Costa Crociere, Avis, Hertz, Record Go, ABBA Hoteles, NH, Europcar, Atesa...
- **Advertisement and Media**
El País, Box News, Unión Radio (Cadena Ser, 40 Principales, M80 Radio...), Santillana, Media Planning, Anaya, Planeta de Agostini, Random House Mondadori, Everest, Espasa Calpe, Europa Press...
- **Finance**
Cesce, Mapfre, Nacional Financiera, Banca Inbursa, Caixa Laietana, Inverseguros Gestión...

OFTP COMMUNICATIONS (Odette File Transfer Protocol)

OFTP (Odette File Transfer Protocol) was originally designed for the interchange of data between partners in the European automobile sector.

Nowadays, it is still the most widely used communication protocol in the sector, and most European automobile manufacturers use it to interchange transactions with all their suppliers.

The latest version of the protocol is identified as OFTP2 and provides a greater number of security functionalities for the secure interchanging of data on IP networks.

The OFTP2 protocol is being taken up by the majority of the automobile sector companies, and 2010 is the year that signals the definitive transition to this new protocol.

Features

Total availability

Using internet as communication channel, ensuring total service availability in any part of the world.

Saving

Quicker transfer time and use of internet allow a drastic reduction in costs compared with OFTP1 and other protocols.

EDI & CAD interchanges

Edicom-Oftp2, through EOS (Edicom OFTP Server) enables the interchange of structured EDI transactions and technical documents (CAD/CAM/CAE) quickly and securely.

Reliability

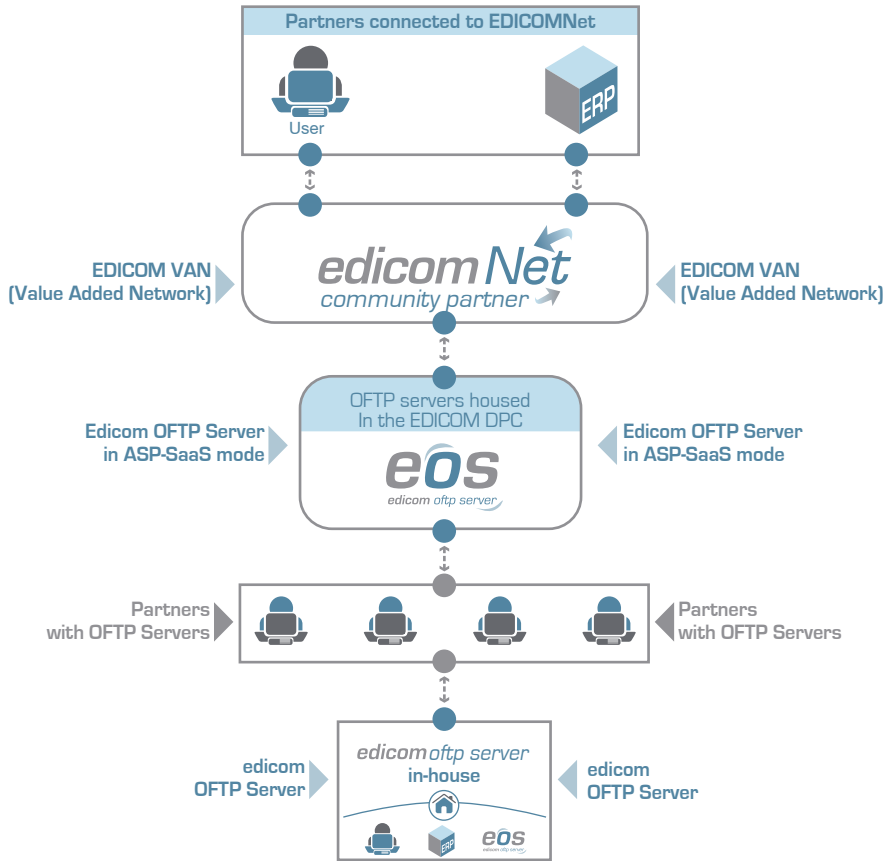

Edicom-Oftp2 can re-establish halted data transmission processes. Transmissions can take place in push and pull mode.

Security

Edicom-Oftp2 adds the security features needed for intensive data interchange via internet.

To this end, it implements:

- Data encryption by asymmetric cryptography.
- Verification of source processes and information integrity by means of electronic signature.

In-house OFTP Server

For those users handling a high volume of transactions via OFTP, the EDICOM OFTP Server can be installed "in house".

This way, the client can quickly set up secure point to point communications directly with their customers and suppliers.

Access to OFTP Server via EDICOMNet

Partners with an EDICOMNet mailbox will have access to the OFTP server infrastructure, installed in the EDICOM DPC (Data Processing Centre).

Access to this OFTP Server is directly through the EDICOMNet interconnection services.
