

**Cheetah**

# Cheetah knock spots off the competition

## high standards of comfort in a first-class travelling environment

For more than a decade the Plaxton Cheetah has led the way, marking a path along which others have followed but none has surpassed. Cheetah has maintained its position at the front of the chasing pack and with the new generation of Cheetahs, the leader has made a huge leap into the future.

### Best for the smaller group

Cheetah has style; still sleek, seductive and full of the charm which has made Cheetah such a firm favourite with operators and passengers alike but with a distinctive new profile. Cheetah isn't just built for speed, it's equipped to offer all the comforts of a full size touring coach in a package tailor made for the smaller group.

### Best for the operator

Operators will relish the reliability of the renowned Mercedes Benz Vario chassis, a true classic which offers economy and practicality approaching legendary proportions. Combine this with the build quality and aftercare for which Plaxton have become renowned, add the maximum capacity of 33 passengers in air-conditioned comfort and Cheetah is off to a flying start.

### Best for the passenger

For passengers, the appeal and stature of Cheetah is instant, imposing itself in any environment, whether on the motorway or around our congested cities, Cheetah will turn heads. Once inside they'll appreciate the comprehensive specification, fixed or reclining seats with 3 point seatbelts; smooth finish interior racks with stylish new lighting and ventilation to each seat and a high quality audio system to entertain them on the journey.

### Best for the driver

At the front, drivers will be impressed with a dash and cockpit specifically designed around their needs. This includes newly upgraded demisting and integral housings for controls and equipment such as the audio system and optional satellite navigation and video systems. From the comfort of an air suspended seat, driver's have excellent visibility to the front, sides and through the ergonomically located mirrors, the rear.

## designed for both passengers and drivers

### Spacious cabin.

Cheetah has always been noted for efficient use of space, the benefit of up to 33 seats offers maximum flexibility for the operator without compromising comfort for the passenger. In comfort trim, Cheetah adds additional locker capacity for touring and when even greater comfort is desired, you can specify reclining seats and increased legroom to offer your clients a truly memorable travelling environment.

### Add to the atmosphere.

With the variety of climate systems available for Cheetah, you are in control of the environment, whatever the weather outside. With convactor heating as standard, you can specify full air-conditioning in addition or integrate the heating and cooling into one compact and lightweight package.

### Contemporary style.

Outside, Cheetah has a stunning and unmistakable profile. When you draw up with something this distinctive, your customers will really stand up and take notice. Once inside, they'll find things equally exciting. Attention to detail and contemporary design gives the cabin a sleek modern appearance which is both eye-catching but still extremely practical.

### Driving forward.

The driver enjoys an equal placing in our eyes. The sprightly performance of the MB Vario platform has long made the Cheetah a driver's favourite and from the comfort of an air-suspended seat, the view of the open road will be so alluring, your drivers just won't want to stop. Once again attention to detail has been high on our list of priorities and the controls are laid out in a logical and easy to use fashion.

### Comfort and safety – hand in hand.

The seating on Cheetah offers the comfort and support your customers would expect even on the longest of journeys. The standard trim selection can be enhanced further with your choice of optional enhancements such as fabric or leather piping and headrest inserts. Adjustable armrests are fitted as standard to all aisle side seats and three point seatbelts are fitted as standard.

## we're with you all the way

When you invest in a new Plaxton coach, you're also investing in top-quality aftersales service.

Plaxton Customer Support is dedicated to keeping your vehicles where they belong – on the road, earning money.

The Plaxton Customer Support operation is staffed by people who understand the coach business. They realise the importance of a prompt response, whether it's ensuring that a vital part is delivered promptly to your workshop, or attending to a vehicle breakdown.

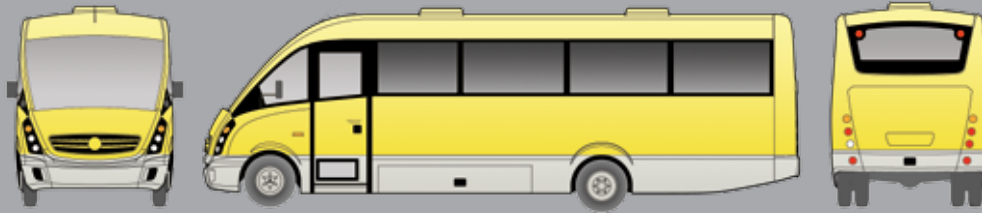

Roadside support is provided 24/7 by a network of UK and European service agents, managed and monitored from a dedicated control centre.

We also offer an unrivalled glass replacement service with teams covering the UK.

For parts and service Plaxton Customer Support provides the back-up you need, when you need it. Fast.
