

1. Restore Tokyo's beauty as a city of water and greenery

Cool ocean breezes flowing through Tokyo

In 10 Years

- **Tokyo will have a green island as large as the grounds of the Imperial Palace**
 - The "Umi-no-Mori (green island)" park will be created at the Inner Central Breakwater Landfill Site
- **A green road network will be developed that connects to green areas totaling 700 ha in central Tokyo (twice the size of New York's Central Park)**
 - A wind tunnel will be created by linking "Umi-no-Mori" to existing large scale plots of greenery in central Tokyo by tree-lined arterial roads.
 - Large plots of greenery in central Tokyo
Green hubs include Harumi, Outer Garden of the Imperial Palace, Outer Garden of Meijiingu Shrine, Yoyogi Park, and Shinjuku Gyoen National Garden
 - Arterial roads in central Tokyo
The newly established Loop Road No.2, the existing Sotobori-dori Avenue, Yasukuni-dori Avenue, Shinjuku-dori Avenue, Aoyama-dori Avenue, and Omotesando Avenue

- **1,000 ha of new greenery will be created (equal to the total area of 1,500 football fields)**
 - Every urban gap will be filled with greenery (400 ha)
Greenery will be created on roofs, wall surfaces, parking lots, etc. with the support of residents and companies in Tokyo
 - Lawns will be planted in schoolyards of all public elementary and junior high schools in Tokyo (300 ha)
 - Urban parks will be created (300 ha)
 - Waterfront spaces will be connected by greenery
 - A network of scattered vacant lots will be revitalized as small parks to serve as firebreaks.
- **The number of roadside trees in Tokyo will be doubled to one million**
- **A "Green Movement" will be promoted throughout the entire city**
 - Urban developers will make efforts to increase greenery
 - A new scheme for fundraising will be established; residents and companies will cooperate together
 - "Tokyo Lawn Supporters" in local communities will manage schoolyard lawns
 - Environmental education will be implemented using surrounding greenery as a teaching tool

Fill all urban spaces with greenery to enhance people's daily lives

Newly planted schoolyard
(Izumi Elementary School,
Suginami Ward)

Rooftop Greenery
connected to roadside
trees (Omotesando Hills)

Green Parking
(Nippon Express Shinjuku
Branch)
