## Biographical Note

Grover Sanders Krantz was born on November 5, 1931 to Swedish immigrants in Salt Lake City, Utah and spent his childhood in Salt Lake City and Rockford, Illinois. His undergraduate studies began at the University of Utah in 1949 but were postponed in 1951 by 18 months of service in the United States Air Force. After being honorably discharged, Krantz attended the University of California, Berkeley and earned his bachelor's and master's degrees in Anthropology. In 1970, he earned his doctorate in physical anthropology from the University of Minnesota.

From 1968-1998, Krantz served as a professor of physical anthropology at Washington State University in Pullman, Washington. He was considered a leading authority in hominoid evolution and an expert on primate bone structure, specializing in the reconstruction and casting of hominid fossils. Among his numerous publications are the books *Climatic Races and Descent Groups*, *The Process of Human Evolution*, and *Geographical Development of European Languages*. Publicly known for his interest in cryptozoology, Krantz was one of the first established researchers to pursue the question of Bigfoot, or Sasquatch, from a scientific approach. Other research interests included the origin of language and speech, sex identification of skeletons, and early human immigration into America.

After a battle with pancreatic cancer, Krantz passed away on February 14, 2002. At his request, his remains were sent to the University of Tennessee's Anthropology Research Facility, where scientists performed skeletal research of great forensic value. His bones were processed and sent to the Smithsonian Institution's National Museum of Natural History to be used in an educational capacity. In 2010, Grover Krantz's skeleton and that of his Irish Wolfhound Clyde were mounted in the museum's exhibit, "Written in Bone: Forensic Files of the 17th-Century Chesapeake."

## **Scope and Content Note**

This collection contains the personal papers of Dr. Grover S. Krantz and documents his research in physical anthropology as well as his 30-year teaching career. The collection also contains materials on Krantz's activities in the field of cryptozoology, especially his investigations of Sasquatch. Materials include his writings, correspondence, notes, sketches, newspaper clippings, sound recordings, photographs, and electronic records. Some materials in the collection are written in code and noospel, a phonetic spelling system he had developed.

## **Restrictions on Access**

Materials that include student grades are restricted until 2081. Nude photographs of Grover are restricted until 2017. Electronic records are restricted due to preservation concerns.

## **Restrictions on Use**

Contact the repository for terms of use.

## **Extent**

The total extent of the collection is 6 linear feet (consisting of 14 boxes) plus 9 audio cassette tapes, 47 computer disks, 1 oversize box, and 47 computer disks.

## **Provenance**

These papers were donated to the National Anthropological Archives by Grover Krantz's wife Diane Horton and his brother Victor Krantz, a former Smithsonian photographer.

## **Related Collections**

The Patterson-Gimlin films, 1601, 2, and 3, have been transferred to the Human Studies Film Archives.

Grover S. Krantz's specimens were donated to the National Museum of Natural History's Physical Anthropology Collections.

## **Processing Note**

The papers of Grover S. Krantz were organized by Krantz and his wife Diane Horton before they were deposited at the National Anthropological Archives. They assigned folder numbers, which have been retained along with the original folder titles. Titles assigned by the processing archivist were placed within square brackets. Some of the notes below are based on Krantz and Horton's original inventory. Not all of their notes have been included in this finding aid. Consult with the reference archivist to access their inventory.

The archivist organized the collection into 9 series. Some folders were moved out of numerical sequence into their appropriate series. Oversized materials were separated and replaced with a note indicating original and new locations. Numerous newspaper prints were also photocopied onto archival paper. The electronic records are unprocessed.
