

APPENDIX
COMPARATIVE WORDLISTS

A NOTE ON THE ORTHOGRAPHY

The wordlists presented here come from twenty different sources (see the specification given below) using orthographies ranging from completely impressionistic to accurately phonetic, or phonemic. In this Appendix, therefore, an attempt has been made to unify the spelling by using an orthography which is neither phonemic nor accurately phonemic, but which, for comparative purposes, gives a workable approximation of the phonic shape of the words. The symbols used are:

- p for all voiceless bilabial stops
- b for all voiced bilabial stops
- t for all voiceless dental or alveolar stops
- d for all voiced dental or alveolar stops
- c for the voiceless alveopalatal stop
- j for the voiced alveopalatal stop
- k for all non-backed, voiceless velar stops
- g for all non-backed, voiced velar stops
- q for voiceless and voiced backed velar stops
- ʔ for the glottal stop
- m for bilabial nasals
- n for dental or alveolar nasals
- ŋ for velar nasals
- f for voiceless bilabial or labiodental fricatives
- v for voiced bilabial or labiodental fricatives
- s for voiceless alveolar or alveopalatal fricatives
- z for voiced alveolar or alveopalatal fricatives
- x for voiceless and voiced velar fricatives
- h for glottal fricatives and voiceless continuants

l for laterals
 r for all flaps and trills (including lateral flaps)
 w for non-syllabic u
 y for non-syllabic i
 i for all unrounded high-front vowels
 ɨ for all unrounded high-central vowels
 ü for rounded high-front vowels
 e for all unrounded mid-front vowels
 ö for rounded mid-front or mid-central vowels
 ə for unrounded mid-central vowels
 u for all rounded high-back vowels
 o for all rounded mid-back vowels
 a for all low vowels
 V any vowel
 ~ nasalization
 : lengthening of vowel

Stress and pitch are not indicated.
