

BLU-122/B PENETRATOR

BLU-122/B - GBU-28 C/B

From lab to battle, General Dynamics provides the warfighter with the ordnance systems needed for today and tomorrow. We understand the theory and application of emerging technology, innovating today's designs into tomorrow's weapons.

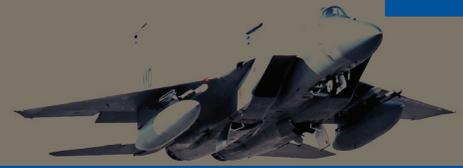

The BLU 122/B penetrator results from our collaboration with defense laboratories and system program offices. As the "business" end of the GBU-28 C/B weapon, it provides enhanced performance against hard and deeply buried targets.

- Replaces BLU-113 with enhanced blast and fragmentation
- Improves case survivability and penetration performance
- Used in GBU-28 Bunker Buster
- SEEK Eagle certified for carriage on F-15 and B-2

BLU-122/B PENETRATOR

BLU-122/B - GBU-28 C/B

Case and Explosive:

- Transitions AF laboratory's ES-1 steel into production
- Enhanced case survivability and fragmentation
- Deeper target penetration
- Enhanced blast

Insensitive Munition Features:

- Employs General Dynamics' unique approach to IM
- Enhanced IM protection with improved weapon performance

Characteristics

Weight	4,450 lb
OD	15.30 in
Length	159 in
Explosive	AFX 757
Case	ES-1 Steel
