### Origin of the name 広島 “Hiroshima”

The Otagawa delta was called “Gokamura,” meaning five villages in Japanese, but with the ground-breaking ceremony for the castle on April 15 1589, a more appropriate name was called for. The character 広 (hiro) was borrowed from the name of Oeno Hiromoto, an ancestor of Mori family, and added to 島 (shima) taken from Fukushima Motonaga who guided Terumoto to the site.

There is another tradition that the name Hiroshima originates from a large island at the mouth of the Otagawa River-thus Hiroshima (wide island).

### Origin of the “Carp Castle” Nickname

Hiroshima castle is also called “Carp Castle” and is pronounced RIJO in Japanese. Since this area where the castle was built was then called Koi-no-ura (Koi Sea Shore) and “Koi” means carp in Japanese, the castle was given the nickname “Carp Castle” in later years.

## Historical Data on Hiroshima Castle

Hiroshima Castle was established by Mori Terumoto, one of Toyotomi Hideyoshi's council of “Five Great Elders.” It is representative of a flatland castle.

In the Nambokucho period (14th century), the Mori family members were overlords of Koriyama Castle in Yoshida (about 45km north-east of Hiroshima), but during the Sengoku (Warring States) period (from the latter half of the 15th century to the latter half of the 16th century), Terumoto's grandfather Motonari became the feudal lord of most of the Chugoku region. His successor, Terumoto, established his castle in 1589 at the delta of the Otagawa River called at the time “Gokamura (Five Villages),” and entered the castle in 1591 to govern nine provinces that today comprise Hiroshima, Shimane, Yamaguchi, and parts of Tottori and Okayama prefectures.

In 1600, following the battle of Sekigahara, Terumoto was forced to retreat to Hagi (Yamaguchi Pref.) and Fukushima Masanori from Kiyosu (Aichi Pref.) became the lord of Aki and Bingo provinces (present day Hiroshima Pref.). However, as a penalty for restoring the castle from the flood of 1619 without the permission of the Tokugawa shogunate, Masanori was dismissed to Kawanakajima (Nagano Pref.). Asano Nagaakira then became the lord of Aki and the 8 counties of Bingo. The Asano family, 12 generations, continued to hold this position for the 250 years up to the Meiji restoration.

Following the abolition of feudal domains and the establishment of prefectures in 1871, the castle gradually came to serve more as a military facility, where the Imperial General Headquarter came to be established during the Sino-Japanese war of 1894/95.

On August 6th 1945, the castle was destroyed by the atomic bomb blast. The present tower was reconstructed in 1958 and is now used to exhibit historic artifacts.

During the Edo period, Hiroshima castle occupied an extensive area which was surrounded by three moats in addition to the Otogawa River which formed a natural moat. However, between the Meiji and Showa periods the outer and middle moats were gradually filled in. Most of original castle grounds are now occupied by office blocks and schools. The remaining inner moat, Honmaru (main compound) and Ninomaru (second compound) were designated as a national historic site in 1953.
