## P r e f a c e

Kosovo Agency of Statistics (KAS), publishes final results at settlements' level of 2011 Population, households and housing census which took place from 1 to 15 April 2011 based on the state on March 31, 2011 at 24:00 pm (census critical moment).

This publication contains final results of the Population Census in Municipalities by Gender, Ethnicity and Urban-Rural Settlements.

The publication provides data at settlement level in order to make possible for the users of statistical data the use of results at the smallest geographical level.

The tables contained in this publication are "made", "extracted", "created" directly by electronic computing system, after completion of required technical and graphical processing.

Data users should consider methodological explanations that are necessary to understand and interpret the data correctly.

In case of using this data the source shall be cited.

## METHODOLOGICAL EXPLANATIONS

Under the Law on Population, Households and Housing Census 2011, no. 03/L-237 adopted on October 7, 2010 by the Assembly of Kosovo, the Census has been conducted from 1 to 15 April 2011 based on the state on March 31, 2011 at 24:00. (Census critical moment).

In the census are included persons with usual residence (permanent) in the Republic of Kosovo (regardless of their citizenship) and regardless if during the census they were present in their usual residence or temporarily absent (absent or expected to be absent for less than 12 months).

As it is known, municipalities with Serbian majority: Zvečan, Leposaviç, Zubin Potok and North part of Mitrovica didn't participate in population census conducted in April, 2011. For this part-municipalities the data is taken from the update 2008-2009.

About the quality of these data see the report: Estimation, Kosovo population 2011, which you can find also in: <http://esk.rks-gov.net/>.

In this category of population are included:

- Persons with usual residence in Kosovo, who cross the border on daily basis to work abroad;
- Homeless people, nomads without a fixed place of usual residence enumerated in Kosovo;
- Persons temporarily absent from Kosovo due to work; holiday trips abroad or medical treatment abroad (provided that they have lived out of Kosovo not more than 12 months);
- Persons foreign civilians and their families, who live in Kosovo for a continuous period of at least 12 months before the Census day, or who have arrived in Kosovo during last 12 months before the Census day, with the intention to stay there for at least one year (except diplomatic representatives of foreign governments and their families, KFOR and EULEX, regardless of duration of their stay in Kosovo);
- Asylum seekers and persons who have applied for refugee status, or to whom that status has been granted, or any similar kind of international protection, if duration of their stay in Kosovo is or is expected to be at least 12 months, as for the rest of population.

When comparing 2011 Census data with the data from previous censuses (1981, 1971, ... etc.) there should be taken into account methodological changes in definition of resident population (permanent). In previous censuses as resident population are considered all persons present at the place of enumeration, as well as those absent regardless the length of their absence.

## Settlements

Municipal and settlement Registry is provided based on the state at the time of census, therefore changes made officially after this date, haven't been taken into consideration when drafting tables.

By type, settlements are divided in Urban and Rural. Municipal Assemblies have issued specific decisions on promulgation of urban settlements.

### Ethnic or cultural group

In 2011 Census, the data on ethnic group (ethnicity) or cultural group have been collected based on free statement of the citizens.

These data have been obtained from the question in Individual Questionnaire (Form R3) which has been formulated: «9. Which ethnic or cultural group do you belong to? (According to the Constitution of Kosovo, the enumerated person may choose not to declare).

The question has been closed. In total, there were 10 modalities. On the ground the question has been made as an open question, meaning that the enumerator didn't read modalities at all, in order not to influence the respondent.

Under the constitution of the Republic of Kosovo full freedom of declaring of ethnicity or cultural group is guaranteed to the citizens.

Under these constitutional provisions, enumerator has been obliged to write down the answer on this question exactly as stated by the person enumerated who has responded that belong to one of ethnicities such as: Albanian, Serbianian, Turkish, Bosnian, Roma, Ashkali, Egyptian, Gorani, Others.

Under the same constitutional provisions, the citizen is not obliged to declare and determine ethnicity or cultural group that she/he belongs. When citizen uses this constitutional right, not to declare or determine her/his ethnic affiliation, the enumerator in the question 9 of individual questionnaire was supposed to write this response: «I prefer not to answer.»

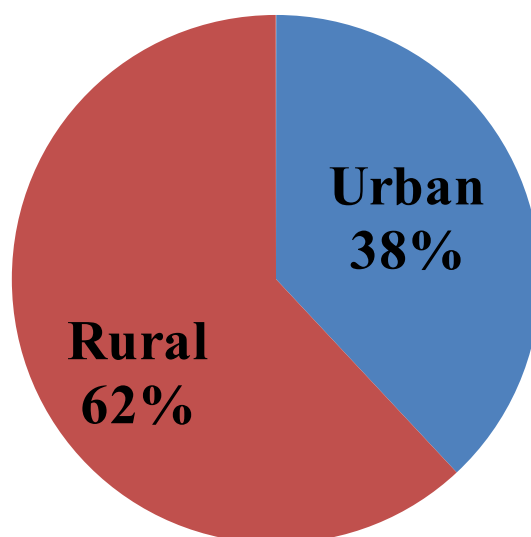

For children up to 15 years and persons who are not able to speak, the answer shall be given by parents or custodian.

Under the Law on 2011 Population, households and housing census, enumerators and other persons who participated in the census have been recommended that they should not influence the citizens and make them to declare their ethnicity or cultural group against their will. Under this law, the person who makes this minor offense is subject to punitive provisions.

## ANNEX

### EXPLANATION IN ANNEX

#### Data on municipalities of Leposaviç, Zubin Potok, Zveçan and Northern Mitrovica

- **Data from the update: the source of information from KAS (2008-2009).**

#### Update of Enumeration Areas

**In the framework of preparations for population census and other activities, in 2008 and 2009 KAS has updated all Enumeration Areas (EAs).**

#### Coverage

**The Update 2008 - 2009 project has been conducted throughout territory of Kosovo. There has been no refusal including the smallest level such as enumeration area (EA). All municipalities and communities living in Kosovo were involved in this project**

#### The aim of the project

**The importance of this project was the preparation of a successful census based on the lack of statistical data from relevant institutions and municipalities for a long periode of time, since the last official census has been conducted in 1981. In addition, due to big demographic changes and numerous population movements that ocured after 1999 both inside and outside Kosovo, it was impossible to organize a successful census without a solid basis for some indicators.**

**The Update 2009 enabled the extraction of approximate data on: the number of households and persons, ethnicity, and later these data were used as the basis for:**

**Division of Enumeration Areas (EAs), the number of enumerators engaged at municipal and settlement level, number of controllers, number of supervisors, number of trainers, allocation- the amount of material at the levels of EAs, settlements and municipalities such as: forms, manuals, maps, etc, organization and distribution of the awareness campaign as well division of training centers by the language of communities.**

**At the same time, the Update was intended to be an monitoring instrument of changes that may appear during the generic population census process in any particular area (participation - participation-non participation in the population census).**

#### Methodology of data collection

**Data collection from the Update 2009 has been carried out by visiting the households door- to- door and data have been obtained through questionnaires and guidelines drafted by KAS. In cases where a household was not directly contacted, the data were provided from other relatives. Also, in this form has been recorded (counted) only resident population.**

**2009 Update project has been implemented by economic operator (while there have been engaged also consultant from other foreign countries), whereas the project manager, supervisors and key trainers have been provided by KAS. Enumerators and controllers have been selected from those settlements and communities living in those areas.**

#### Quality of the data from the update of EAs

## **Population**

**If we compare the data from the “Update 2009 “, with final data derived from the population census in 2011, it can be noticed that, in statistical terms, there is a great compliance of common indicators. In some cases (the data at municipal level) were so approximate, so it was difficult to distinguish them taking into account different period of time (reference date) when these projects were realized.**

**From the Census (2011) the total number of enumerated people in Kosovo was 1,739,825, excluding municipalities that didn’t participate in the census.**

**Also excluding municipalities that didn’t participate in the census, the total number of residents enumerated in Kosovo in Update 2009 was 1,766,768.**

**The difference at country level was: only 1:55% more residents enumerated in the Update 2009.**

## **Conclusion**

**Based on data from the Update of EAs which are factual and approximate with the data derived from the Population Census 2011, KSA will use these data as official data for municipalities of: Leposaviç, Zubin Potok, Zveçan and Northern Mitrovica up to their updating.**
