**TODAY...LEADER IN MUSIC OF TODAY...LEADER IN MUSIC**

## THE ACE TONE TOP-1

Advanced 1969 combo model!

A 49 note portable electronic organ with the professional features to make it the 'IN' model.

### PROFESSIONAL FEATURES

- Double duty 12 note BASS section. Choice of deepest foot-pedal bass tones or extension of Flute voice to provide one continuous 49 note keyboard.
- TREBLE tab to put extra punch in your right hand.
- HEADPHONES and special built in headphone amplifier for private practice and warm up without plugging into any external amplifier.

\$410.00 (B)

### SPECIFICATIONS

- Completely transistorized electronic portable organ.
- 4 octaves, 49 full size piano keys including 12, identified by reverse key coloring, playable as special bass notes.
- 8 tablets—1 double bass, 5 melody voices (flute, organ, sax, reed and string), 1 treble brightener and 1 vibrato on-off.
- 5 panel controls—bass volume, bass-treble balance, vibrato depth, vibrato speed and master volume.
- On-off rocker switch with pilot light.
- Foot operated expression pedal.
- Detachable protective lid; 4 heavy metal legs; music rack.
- Sturdy wood cabinet, Leatherette covered; heavy duty handle.
- Plugs into any amplifier.
- 31½" x 18" x 6½" high—32½" high on legs.
- Complete carrying weight, with lid and legs: 46 pounds.

### SUGGESTED COMPANION

No. OR-30 Transistorized bench amplifier. Sturdy wooden cabinet and thick cushion top covered in black vinyl. Power output is 25 watts undistorted music power and 50 watts peak. Each . . . . . \$129.95 (see page 48 for complete specifications)

### SPECIAL VALUE "MUSI-CAL" OUTFIT

The perfect professional instrument on which to learn to play. Ideal for the musical family. So compact, it fits the smallest space. So lightweight and really portable, you take it with you everywhere. Makes you the life of the party at friends and neighbors.

Special price for TOP-1 Ace Tone organ with headphones and OR-30 transistorized bench amplifier complete as pictured.

## ACE TONE TOP-9

**A TRUE PROFESSIONAL!** Outstanding features, exceptional full-bodied tone and range, quality electronic components and sturdy construction make the TOP-9 ideal for the travelling organist needing the FINEST portable.

61 note keyboard includes 18 double duty keys playable as deep bass notes or extension of 4' and 8' flute, oboe, trumpet and string voices. Right hand half has expansive and haunting SUSTAIN built in. Bass notes have 16' and 8' tablets with soft and bright qualities and attack variations with cymbal effects. Melody tablets range through 16', 8' and 4' voices with pre-mix tabs, a treble boost, and 4 vibrato settings. Equipment includes volume foot pedal and sturdy chrome stand which tilts for playing ease when sitting or standing. Dimensions with lid attached for carrying: 38 1/4" x 17 3/4" x 6 1/4", 52 lbs. Stand carries separately. Organ plugs into any amplifier for playing, the larger the better.

TOP-9 Professional Portable Organ, with stand . . \$725.00 (B)

## BASS PEDALS

Optional plug-in attachment for the TOP-9 organ. 13 notes controlled on the organ panel: 16', 8', soft or bright, with cymbal effects and attack variations. Separate volume control to balance loudness with keyboard as well as volume changing with expression pedal. Dimensions: 19 3/4" x 12 1/2" x 3", 18 lbs.

model PK-2 Organ Bass Pedals \$74.50 (B)

To assure the BIG ORGAN SOUND, we recommend our biggest professional amplifier: the SOLID ACE 10 with SP-10 Dual Speaker System. Over 330 watts undistorted peak power with 4 special 15" speakers and 4 heavy 8" speakers. (See page 11 for full description and prices).

# ACE TONE TOP-9

# Canary S-3

an ACE TONE exclusive

A unique keyboard instrument, compact, yet with an exciting 7 octave range for solo or rhythm (string bass style). Plays one note at a time and usually is an instrument added to the group for completely full and different sound. (Does not play chords.)

## FEATURES

- Completely transistorized
- 36 full size piano keys
- 4 voices—bass, tenor, alto and soprano—which can be played singly or together over a 7 octave range
- 5 tone coloring tabs
- Vibrato—with speed and depth controls plus on-off tab
- Tuning control—on front panel with range approximately a full tone both up and down
- 2 percussion rhythm buttons with separate volume control
- Expression lever, master volume control, on-off switch and pilot light
- 23" x 11½" x 4½" high—29" high on 3 sturdy, self-leveling legs
- Complete carrying weight, with legs: 19 lbs.
- Plugs into any amplifier

RM-10 amp connecting cable . . . . . 3.00

**FUZZ MASTER FM-2**

• Intriguing foot switch connection to get the raspy growl you want for today's gutsy music. Equipped with balance adjustment and fuzz quality control (from muted to bright). Complete with 10-foot connecting cable and standard 9-volt transistor radio battery.

model FM-2 . . . . . \$39.95

**PSYCHE LIGHT PL-125**

• For motion-stopping effects and "wild" flashing lamps for musical groups and other entertainers. Sturdy black covered wooden cabinet, 9" x 9" x 9". Equipped with 3 colored filters, remote START and SPEED control on 24-foot extension and 16-foot cable to plug into additional light to synchronize as slave. Operates on 60 cycle 110-120 volt AC current.

model PL-125 . . . . \$179.95 (B)

**ACE TONE MULTI-VOX EX-100**

- for amplifying woodwinds and brass
- exciting and dramatic
- new tonal dimensions

More than mere amplification. A convenient transistorized package complete with microphone attachments for saxes, clarinets and brass. Will provide variety of sounds, singly and in unison, octaves up and down, mellow or bright.

**INQUIRE FOR DETAILS AND PRICES!**

**EXPANDER EXP-4**

• Combination Special Effects pedal and ruggedized foot-operated Volume control for greatest playing convenience. Sturdily made with steel case and molded rubber tread. Equipped with 10-foot connecting cable — ready to use.

model EXP-4 . . . . . \$24.00

# ADD A COMPLETE RHYTHM SECTION TO YOUR ORGAN OR PIANO

FR-2L

THE SOUNDS OF 10 INSTRUMENTS  
16 BASIC RHYTHMS  
UNLIMITED IN COMBINATION

## AUTO RHYTHM ACE

Add an exciting new dimension to your music with the fantastic Auto Rhythm Ace. Think of it, all electronically at your fingertips! Just a light finger touch automatically gives you snare, bass drum, brushes and cymbal, plus conga drum, low bongo, high bongo, claves, maracas and cowbell all "playing" as professionally selected in the rhythms of the Waltz, Dixieland, Western, fast or slow Rock 'n' Roll, Bossa Nova, Fox Trot, Swing, Tango, Beguine, Rhumba, Samba, Mambo, Cha Cha, Shuffle or March. Then create variations by pressing more than one button at a time.

Whether you play organ or piano—alone or in a combo—the rhythm-section background of the Auto Rhythm Ace adds stimulating new fun and dramatic new beats to your music. Ideal for practicing, performing and teaching.

## SPECIFICATIONS

11 lb. computerized transistor electronic unit with volume and tempo controls, pilot light, rhythm indicating light and 16 push buttons. Additional buttons allow particular instruments to be silenced for greater variety or play-along. Neat wooden cabinet 23½" x 11¾" x 3" sets right on top of your organ or piano. Equipped with wire music rack, a start-stop foot switch, and two cables—one for connection to 60 cycle 110-120 volt AC electric current, the other to plug into the amplifier in your organ or any other. Always starts on the Downbeat.

# PORTABLE RHYTHM SECTION

Whatever your activity in music,  
an AUTO RHYTHM ACE is for you!

FR-1  
\$299.50 (B)

FR-3  
\$215.00 (B)

Here are exciting portable devices that electronically generate the sounds of rhythm instruments for background accompaniment of vocals and instruments—for teaching aid, for practicing or performing. Complete rhythm sections "playing" professionally as you select rhythms with the push of a button and turn of a knob.

## MODEL FR-3 AUTO RHYTHM ACE

More than any other portable, the FR-3 with its combination of knobs and switches allows your own individual talent to show. 9½ lb. transistorized electronic unit with computer circuitry to provide the sounds of 8 instruments (bass drum, snare, low conga, high conga, claves, rim shots, maracas and cymbal) in 8 pre-set rhythms (Waltz, Slow Rock, Rock 'n' Roll, Bossa Nova, Samba, Mambo, Rhumba and Beguine) selected with push buttons and a rotary switch to mix bass drum, snare and cymbal in Fox Trot, Swing, March and Latin variations. Control panel includes pilot-tempo light, on-off switch, start lever, push buttons for 2-beat and 4-beat drum patterns and knobs for speed, loudness and balance or emphasis of bass drum or treble sounds. Sturdy wooden cabinet is 15" x 9½" x 5" and covered with black leatherette. Equipped with start-stop foot switch and 2 cables—one for connection to 60 cycle 110-120 volt AC electric current, the other to plug into your amplifier or Hi Fi. Always starts on the Downbeat.

No. J1716 Adjustable chrome stand . . . . \$12.00

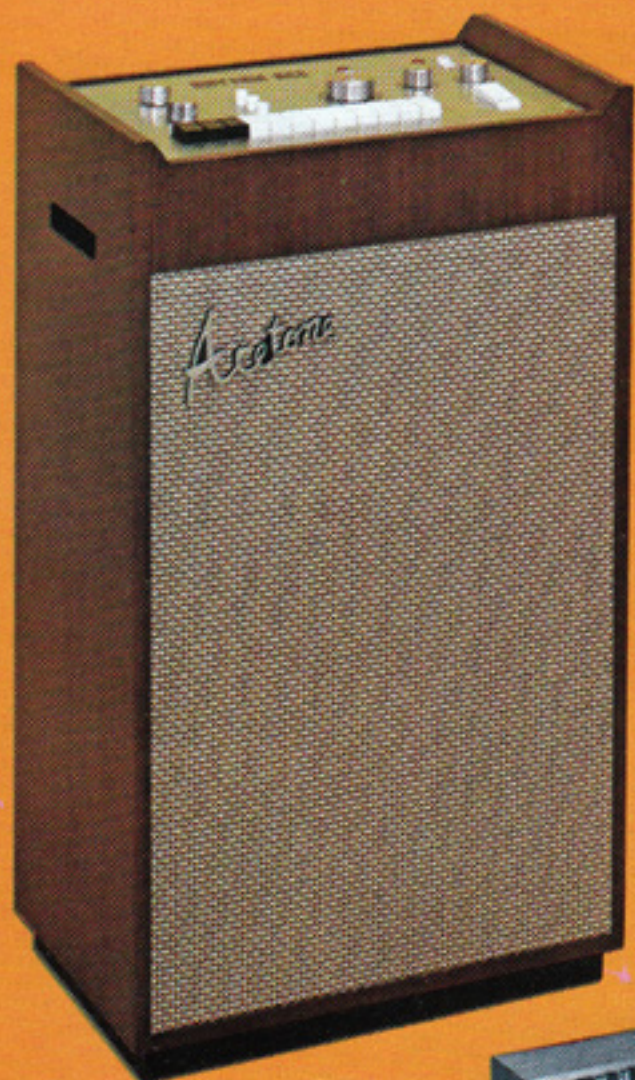

## MODEL FR-1 AUTO RHYTHM ACE

Electronic, solid state unit with computer circuitry to provide the sounds of 10 instruments "playing" pre-set patterns of rhythmic background that you select with push buttons. Instruments include bass drum, snare, brushes, cymbal, conga drum, low bongo, high bongo, claves, maracas and cowbell. Rhythms are Waltz, Dixieland, Western, Slow Rock, Rock 'n' Roll, Bossa Nova, Fox Trot, Swing, Tango, Beguine, Rhumba, Samba, Mambo, Cha Cha, Shuffle and March. Unlimited variations are possible with pressing more than one button at a time. Control panel includes tempo control, pilot light, rhythm indicating light, 16 push buttons and 4 additional buttons to allow particular instruments to be silenced for greater variety of play-along. Wooden cabinet measures 21¼" x 7¼" x 8½" and is two-tone black and grey covered. Weight is 15 lbs. Equipped with start-stop foot switch and 2 cables—one for connection to 60 cycle 110-120 volt AC electric current, the other to plug into your amplifier or Hi Fi. Always starts on the Downbeat.

**SORKIN / ACE TONE**

# EXCITING BACKGROUND RHYTHMS with these self-contained AUTO RHYTHM ACES

## FR-20 AUTO RHYTHM ACE with built-in 20 watt (RMS) amplifier

A complete rhythm section—the sounds of bass drum, conga, bongo, snare drum, rim shot, claves, maracas, cowbell and cymbal—in a transistorized unit with pre-set patterns of Waltz, Tango, Beguine, Rhumba, Mambo, Samba, Bosa Nova, Slow Rock, Rock 'n' Roll plus 2-Beat and 4-Beat dance patterns with variable cymbal and snare drum (including offbeats).

Built into a sturdy, polished wood cabinet 28" high x 16½" wide x 10" deep which also contains a 20 watt transistorized amplifier with heavy 12" speaker and 2 tweeters for coverage of full sound range from deep bass drum to cymbal and brushes. Variable controls for tempo, tone and volume. Push buttons to cancel bass drum, cymbal and snare drum. On-off switch with pilot, rhythm indicating light and separate start lever.

You merely supply the AC electric current and this entire group of instruments "plays" alongside of you. No other connections nor amplifier required. Ideal for jobbing pianists and organists and where access to other amplifying systems is impractical. Equipment includes remote start-stop foot switch. Amplifier has a separate input jack to accommodate a musical instrument or microphone and an output to plug into any external amplifying system for extra power or remote coverage. Total weight: 36½ lbs.

FR-20 AUTO RHYTHM ACE . . . . . \$500<sup>00</sup> (B)

## FR-30 AUTO RHYTHM ACE

A modification of the complete FR-20 rhythm section described above. The FR-30 is self-contained with its own 20 watt (RMS) transistorized amplifier but compared to the FR-20 is offers less choice in snare drum and cymbal variations, has one less pre-set pattern, has no cancel buttons, and is equipped with only two 8" speakers. Wooden cabinet measures: 26½" x 15½" x 9½" deep. Total weight: 32 lbs.

FR-30 AUTO RHYTHM ACE . . . . . \$360<sup>00</sup> (B)

## PUSH BUTTON PERCUSSION!

Add a full range of percussion instruments to your group . . . or play along with your favorite records. Reproduce faithful sounds of tom toms, woodblocks, claves, maracas and cymbal as you push the buttons.

The Rhythm Ace clamps to your amplifier, piano . . . or just hold it in your hand. Plays through any amp or your phono-jack. Complete with demonstration record prepared by Sam Ulano, noted drummer-teacher.

model R-1 Rhythm Ace with record . . . . . \$59<sup>95</sup> (B)

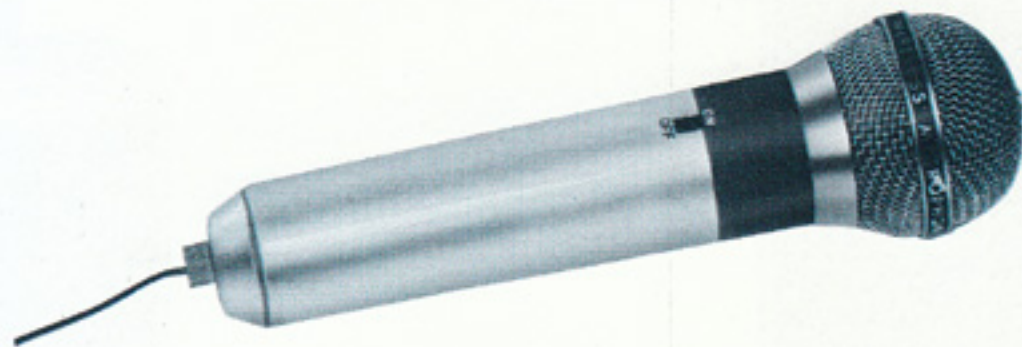

SEND FOR THE NEW LP RECORD,  
"SWINGIN' WITH THE RHYTHM ACE!"

IT'S YOURS for ONLY 50¢ (postage and handling).

Demonstration and instruction record for all the popular rhythm beats.

# ACE TONE crashes the scene with out-of-sight engineering, super versatility and plenty of solid state muscle!

## Wireless!

### THE PRO'S BIG GUN— THE 400-WATT MIXER-SOUND SYSTEM

#### VM-200 WITH WIRELESS MICROPHONE

**6-Channel Professional Amp/Reverb including Receiver for Wireless Mike, Wireless Mike and 2 Column Speakers.**

A high powered portable solid state Mixer-P.A. system that features 1 channel useable with wireless microphone or normal mike plus 5 regular independent channels, reverberation, 2 large column speakers AND 400 watts peak power output (120 watts RMS).

Control panel includes for each of the 6 channels a lighted push button Standby switch, Volume and Reverb intensity "slide" controls, separate Bass and Treble "slide" controls and 2 input jacks so you can match the output of your microphone or musical instrument—high impedance or low. (Channel 1 has in addition: FM receiver with fine tuning meter and AFC for the wireless microphone.) Master controls include pilot light, On-Off toggle, Ground switch, Master Volume with Output Level meter, Echo On-Off, Reverb On-Off and switches with Anti-Howling circuits (High and Low frequency).

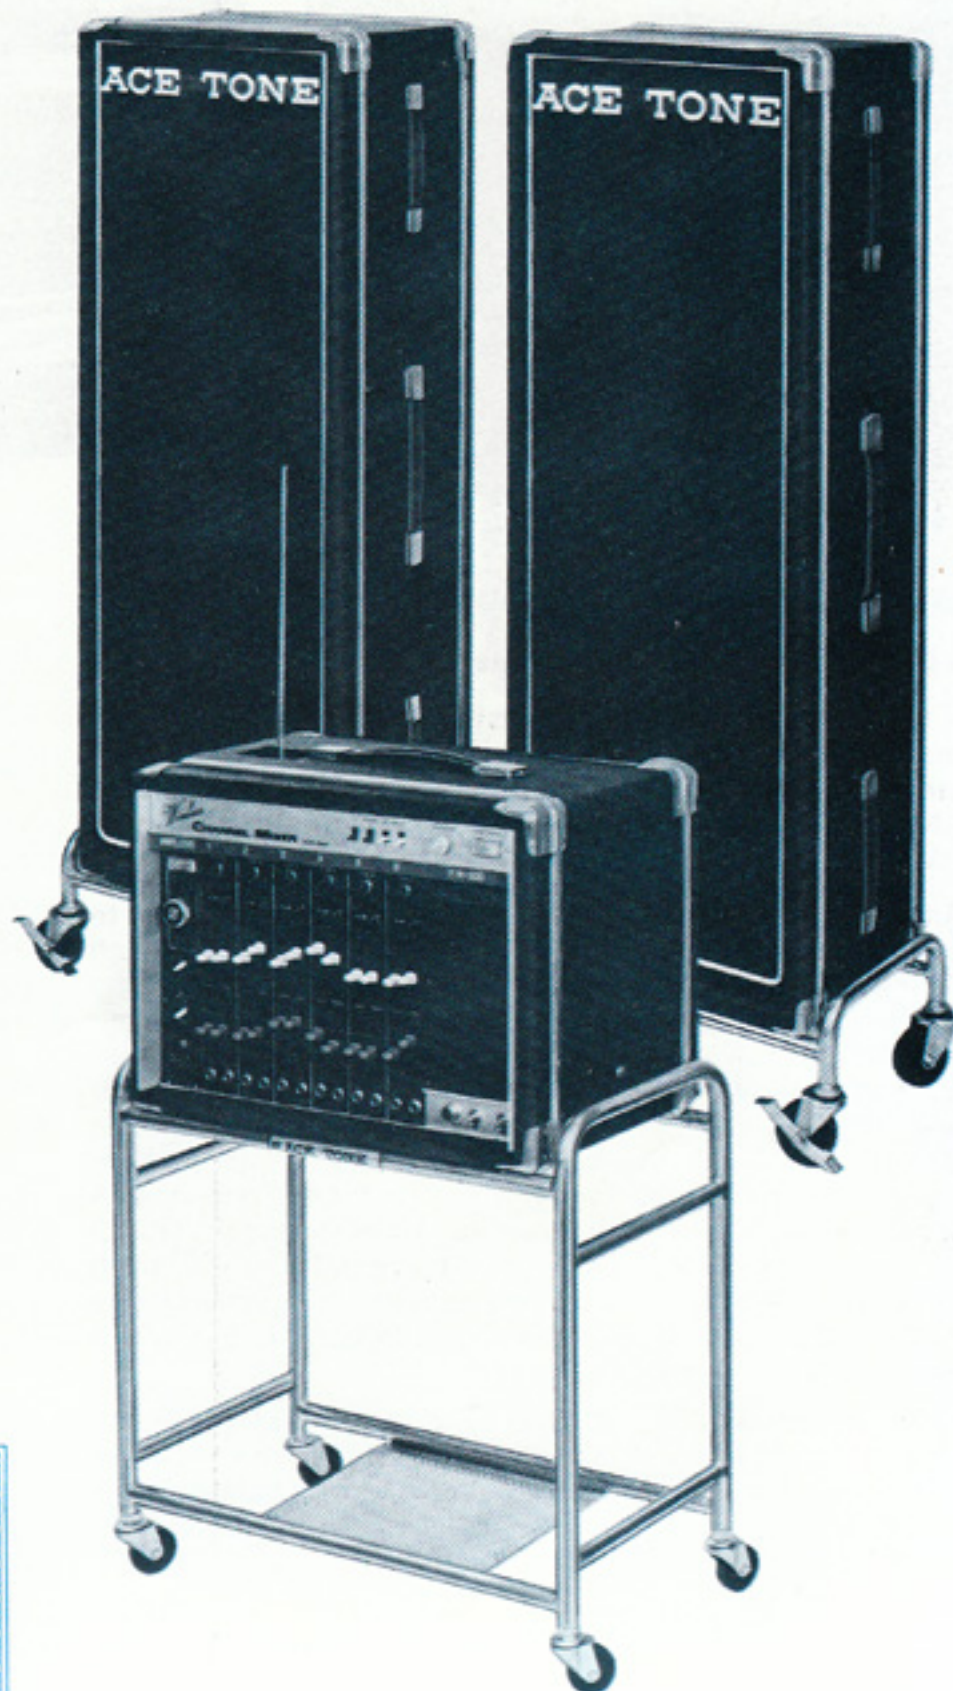

The back panel accommodates the 2 speaker cable plugs, has a circuit breaker re-set button, AC receptacle and output to line or recording amplifier with separate attenuating control to match line output as required.

Speaker cabinets are sturdily built, braced and padded—with extra chrome binding and oversize corner protectors. Each contains 2 heavy, special extended range 10" speakers, 1-12" heavy woofer and a 30-foot connecting cable.

Dimensions: Amplifier: 21" x 15" x 12" deep, 56 lbs. 35" high when mounted on chrome stand. Speaker columns, each: 48" x 18" x 12" deep, 72 lbs. with cable. 54" high when mounted on chrome stand.

The microphone is a professional uni-directional model, well balanced ball type with On-Off switch and special wireless circuit. Total weight: a convenient 11 ounces.

**Price, complete VM-200 system (amp with wireless mike, 2 columns and 3 stands) .....\$2495.00**

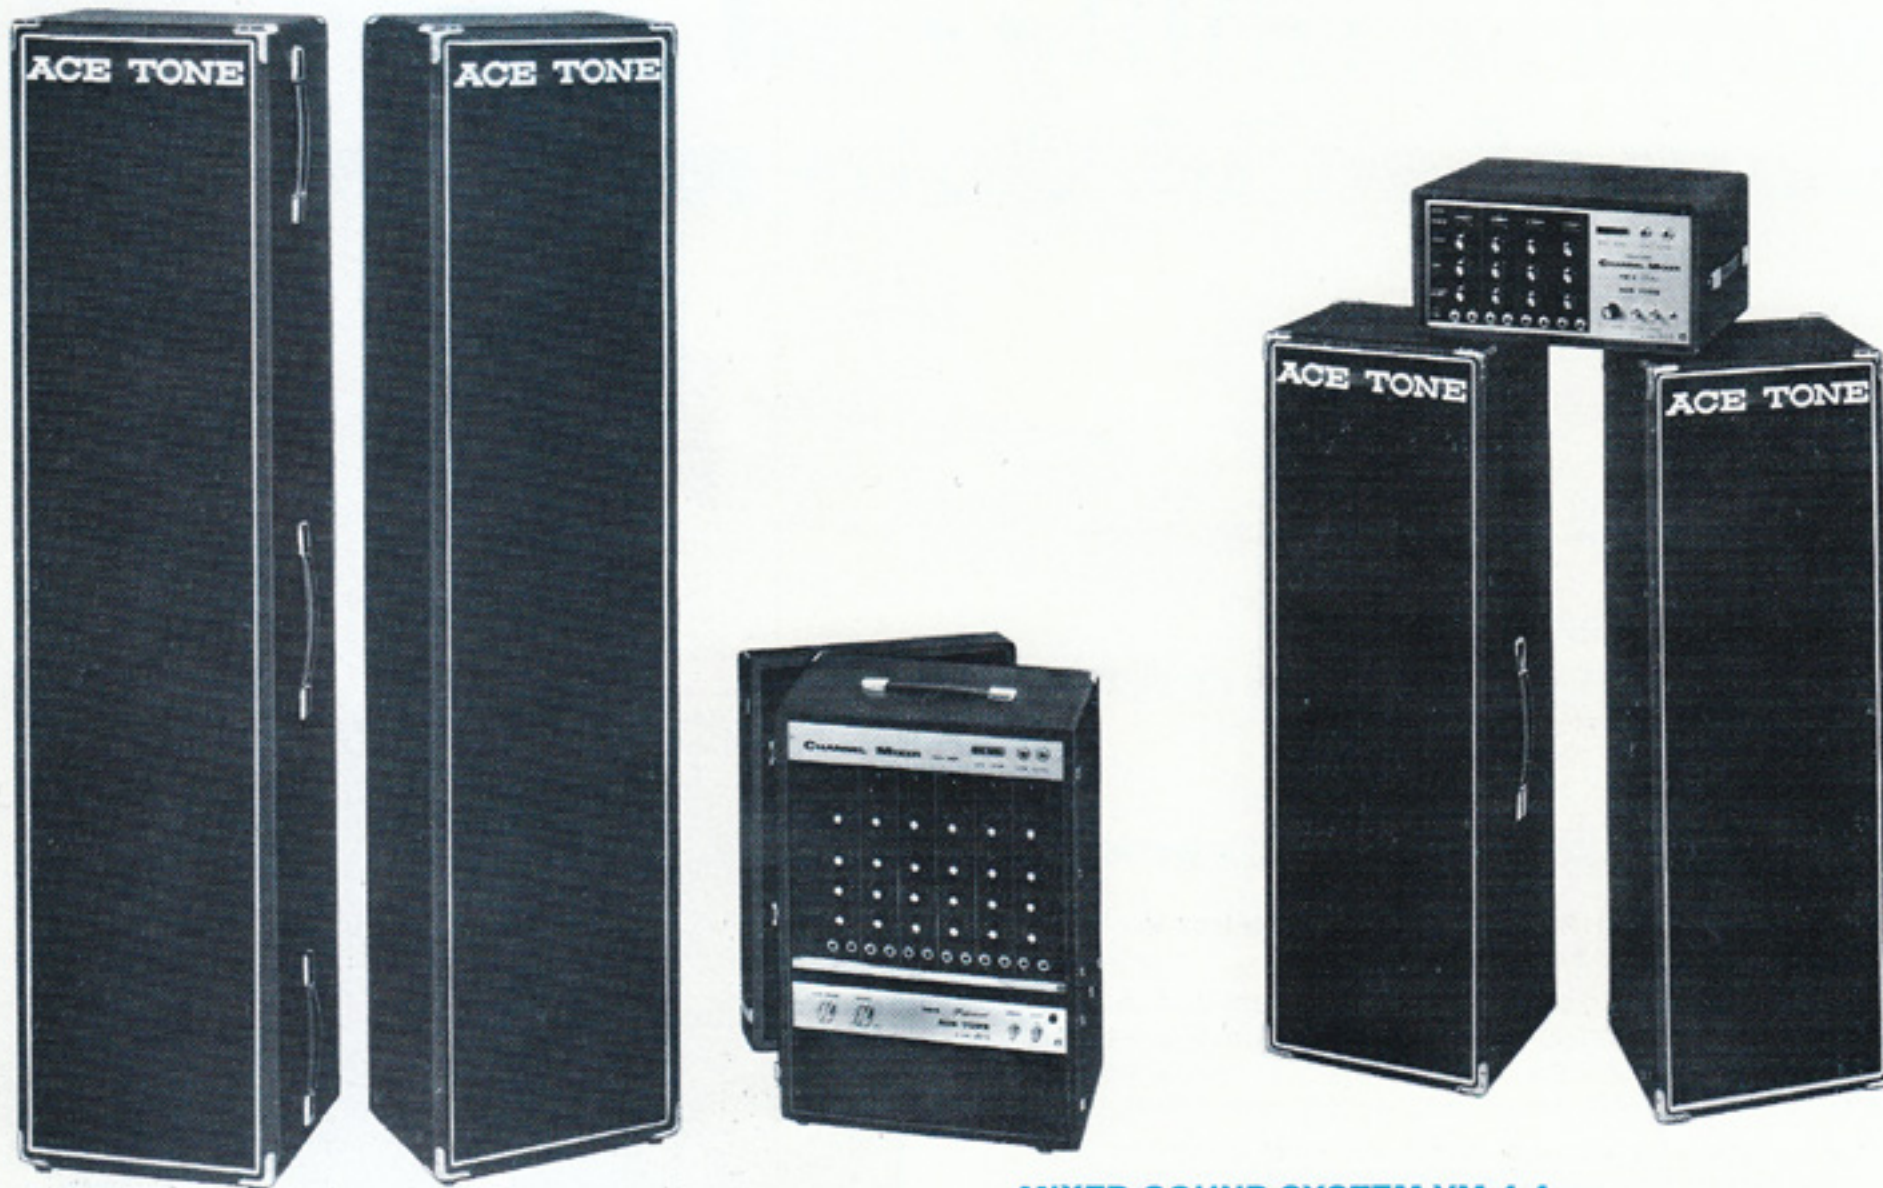

### LIFETIME GUARANTEE

ON ALL ACE TONE AMPLIFIERS

Each Ace Tone Amplifier is accompanied by a printed guarantee certificate. While the original registered purchaser owns the amplifier, it is warranted against defects in materials and workmanship. Repairs will be made without charge when returned to Sorkin Music Company or the Ace Tone dealer where purchased. Effective when certificate with a copy of the sales slip is sent to Sorkin Music Company within 10 days of purchase.

# ACE TONE

## MIXER-SOUND SYSTEMS

### MIXER-SOUND SYSTEM MODEL VM-6-6

#### 6-Channel Professional Amp/Reverb with Column Speakers

A high powered, portable solid state Mixer-P.A. system that features 6 independent channels, built-in reverberation, 2 large column speakers for most effective sound coverage, AND 460 watts undistorted peak power output (140 watts RMS undistorted).

Amplifier is built with protective, hinged lid, detachable to expose controls for use. Control panel includes for each of the 6 channels a push button Standby switch, Volume control, Treble control, Bass control, Reverb intensity control and 2 input jacks so you can match the output of your microphone or musical instrument—high impedance or low. Master controls include pilot light, On-Off toggle, Ground switch, Main volume control, and a balance control for the separated left and right speaker columns. A special feature is jacks to receive an independent ECHO deck (if you have one) with appropriate on-off push switches. The back panel accommodates the speaker cable plugs and has a circuit breaker reset button, output to line amplifier, and AC receptacle.

Speaker cabinets are sturdily built, braced and padded. Each contains 6 heavy, special design 8" Jensen speakers with 10 oz. magnets and a 25 foot connecting cable.

Dimensions: Amplifier: 21¼" x 15¼" x 12¼" deep with lid. 42 lbs.

Speaker columns, each: 57" x 13¼" x 9" deep. 60 lbs. including cable.

**Price, complete 3-piece VM-6-6 system . . . . . \$1,025.00**

Price of VM-6 amplifier if purchased separately . . . \$555.00

### MIXER-SOUND SYSTEM VM-4-4

#### 4-Channel Professional Amp/Reverb with Column Speakers

A compact solid state Mixer-P.A. system that features excellent portability, 4 independent channels, built-in reverberation, 230 watts undistorted peak power output (70 watts RMS undistorted) and 2 column speakers for most effective sound coverage.

Control panel includes for each of the 4 channels a push button Standby switch, Volume control, Tone control, Reverb intensity control and 2 input jacks so you can match the output of your microphone or musical instrument—high impedance or low. Master controls include pilot light, On-Off toggle, Ground switch and Main volume control. A special feature is jacks to receive a separate ECHO deck (if you have one) with appropriate on-off push switches to use the ECHO with this equipment. The back panel accommodates the speaker cable plugs and has a circuit breaker reset button, output to line amplifier, and AC receptacle.

Speaker cabinets are sturdily built, braced and padded. Each contains 4 heavy, special design 8" Jensen speakers with 10 oz. magnets and a 25 foot connecting cable.

Dimensions: Amplifier: 15½" x 8" x 11¾" deep, 23½ lbs.

Speaker, columns, each: 39½" x 13" x 9" deep, 37 lbs. including cable.

**Price, complete 3-piece VM-4-4 system . . . . . \$695.00**

Price of VM-4 amplifier if purchased separately . . . \$345.00

### MIXER-SOUND SYSTEM VM-4-46

Same as above but with larger speaker columns 57" tall.

**Price, complete 3-piece VM-4-46 system . . . . . \$755.00**

# A Wild Combination of Fidelity and Super, Super Versatility!

## ACE TONE VM-30

### 1-PIECE REVERB/SOUND SYSTEM

An extremely convenient portable P.A. with solid state amplifier built right into the speaker column. Features 2 independent channels, built-in reverberation, over 100 watts peak power output (30 watts RMS) and output to 600 ohm line or slave columns.

Control panel includes 2 inputs for each of the 2 channels, a Music/Speech switch and a Volume control. 3 Master controls adjust Bass, Treble and Reverb as desired. Lower panel has pilot light, On-off toggle, Ground Hum switch, a circuit breaker re-set button and a 600-ohm output jack to line or slave amplifier.

Cabinet measures 36½" x 11½" x 8¼" deep, is sturdily built and braced, and contains 3 special design 8" speakers. Carrying weight 31 lbs.

Price, 1-piece VM-30 system .....\$335.00

## ACE TONE SL-30

### MATCHING POWER-SPEAKER COLUMN (SLAVE) FOR ABOVE

Not merely an extension speaker. Adds its own output up to 100 watts peak (30 watts RMS).

In a cabinet identical to above, 3 special 8" speakers and a line amplifier. Amp is fed by the pre-amp of the master unit and is equipped with both input and output jacks so an endless chain of "slaves" can be linked together for the desired volume and/or space coverage. Each column has its own independent volume control.

Price, SL-30 power column .....\$245.00

# ACE TONE's PROFESSIONAL SA-10

## The Lead and Organ Amp that's

### The Most In Power & Flexibility!

MODEL SA-10-11

### A powerful solid state performer!

2 channels with "red blooded" tone, smooth wide range and built-in reverb and tremolo. All the requirements to handle any job any time. "Big Sound", brilliant or mellow with advanced transistor circuitry that provides 400 watts undistorted peak power output (120 watts RMS undistorted) — more than enough for 3 acres of auditorium. Can be played mounted on top of speakers, as pictured, or as a remote unit with extension cable.

Control panel includes for each of the 2 channels: 2 instrument inputs, a volume control, treble control and bass control. Two controls for tremolo speed and depth in Channel 1 and two controls for reverb: one intensity and one to balance the effect between Channel 1 and Channel 2. Master features are pilot light, On-off toggle and a large VU meter to warn of overloading. The back panel has jacks for the reverb and tremolo foot switches and the speaker cable plugs, a circuit breaker reset button, and a Ground toggle switch.

Dimensions: Amplifier 23¾" x 6½" x 15¾" deep, 32½ lbs. Equipment includes 2 foot switches, for reverb and tremolo.

Price of SA-10 amplifier if purchased separately . . . \$420.00

## ECHO CHAMBER EC-1

### Exciting, Professional Echo and Reverb that Challenges Comparison

A superior tape deck with continuous loop, engineered for fidelity, simplified operation, wide range of effects and trouble-free service. Built with 5 magnetic heads including one movable playback for fine control of reverb and echo delay. Control panel includes for each of 3 channels a Volume control, Tone control and 2 input jacks so you can match the output of your microphone or musical instrument—high impedance or low. Master controls include VU Level meter with Main Output control, 4-push-button selector for mode of reverb or echo, a slide control for number of repeats, and a foot switch input jack for remote start and stop. Special switch on tape deck can eliminate your straight signal when desired.

Cabinet is solidly built with detachable lid, sturdy handle and chrome hardware. Dimensions: 15" x 7¼" high x 10" deep, 19 lbs. complete with foot switch.

Price, EC-1 Echo Chamber . . . . . \$375.00 (B)

### Professional 4-channel Pre-Amp/Reverb

Outstanding PROFESSIONAL equipment in every way! Extremely good reverberation effect, well planned control features, top quality components, advanced solid state circuitry and sturdy construction. Features 4 independent channels plus master controls.

Control panel includes for each of the 4 channels a separate reverb intensity control, a volume control, a slide switch to engage circuitry compensated for speech or music and 2 input jacks so you can match the output of your musical instrument or microphone—high impedance or low. Master controls include an ON-OFF toggle switch, pilot light, master volume control and ON-OFF reverb switch. Three output jacks enable you to plug simultaneously into 1 or 2 guitar style amplifiers and the 600 ohm line that some large built-in P.A. systems or recording studios require.

The MP-4 is a compact package 12½" x 7½" x 9" deep, weighing only 8½ lbs. It has a sturdy wooden cabinet, black leatherette covered, a strong re-inforced handle, and a rear compartment for carrying cables, etc. It operates on 60 cycle 110-120 volt AC current.

Price, MP-4 Echo-Mixer . . . . . \$169.95
