## Charting Guam's Growth

*Hafa Adai!* Guam is the fastest growing community in the region. We have risen to every challenge and adapted to every change throughout the years. Today we thrive as leaders for the Asia Pacific region.

The 2010 Guam Statistical Yearbook is an important tool for investors, leaders and entrepreneurs alike. Charting a clear course for a progressive future relies greatly on understanding where we came from in recent years.

This publication allows potential investors to understand the dynamics of our community. We hope this information provides readers with the statistics and knowledge needed to make sound business and financial decisions to ensure a successful venture.

Exciting times are ahead for Guam. We invite you to join us in building a new era of opportunity in the Pacific.

*Si Yu'os Ma'asse*

GOVERNOR OF GUAM

**THOMAS A. MORRISON**  
DIRECTOR

THE HONORABLE  
**RAY TENORIO**  
LIEUTENANT GOVERNOR

## **Bureau of Statistics and Plans**

*Sagan Planu Siha Yan Emfotmasion*  
Government of Guam

### **A MESSAGE FROM THE DIRECTOR**

*Buenas yan Hafa Adai!* In our continued commitment to provide the public and our stakeholders with a comprehensive picture of our community and economy, the Bureau of Statistics and Plans is pleased to present to you the “2010 Guam Statistical Yearbook.” This sourcebook presents a collection of current and historical socio-economic information that portrays Guam’s economic trend and performance over time.

As our economy continues to improve from the benefits of increased tourism arrivals, improved job opportunities, Guam’s growing military presence, and the anticipated construction growth and infrastructure development, the Guam Statistical Yearbook serves as a valuable resource tool in providing information needed to promote economic diversification and prosperity for the people. We trust this report will provide our government, business and civic leaders with the tools needed to effectively develop immediate and long term strategies to address our island’s needs and generate investment opportunities to local and prospective businesses alike.

I would like to commend the staff of the Bureau for their dedication and hard work and acknowledge the valuable contributions of the various government agencies and private sector businesses whose efforts have made this publication possible. It is my hope that the information contained in this report presents a clear picture of Guam’s economic condition and outlook in the upcoming years.

Dangkulo Na Si Yu’os Ma’ase’,

A handwritten signature in blue ink, appearing to read "Thomas Morrison".

**THOMAS A. MORRISON**  
Director  
Bureau of Statistics and Plans

Capt. D. Damian de Esplana	June 16, 1674
Capt. D. Juan de Santiago	May 2, 1674
Capt. D. Juan de Santa Cruz	June 16, 1668

## Guam's Past Legislatures

### **30th Guam Legislature (2008 General Election)**

Speaker Judith T. Won Pat [Democrat]  
Vice-Speaker Benjamin J. Cruz [Democrat]  
  
Senator Tina Rose Muña Barnes [Democrat]  
  
Senator Rory Respicio [Democrat]  
  
Senator Judith P. Guthertz, DPA [Democrat]  
  
Senator Tom Ada [Democrat]  
  
Senator Matt Rector [Democrat]  
  
Senator Ben C. Pangelinan [Democrat]  
  
Senator Adolpho Palacios [Democrat]  
Senator Frank Aguon, Jr. [Democrat]  
Senator Eddie J.B. Calvo [Republican]  
Senator Ray Tenorio [Republican]  
Senator James V. Espaldon [Republican]  
Senator Frank F. Blas, Jr. [Republican]  
Senator Telo Taitague [Republican]

Uni-cameral Legislature (15 Members)  
Speaker of the Thirtieth Guam Legislature, Chairman, Committee on Education  
Vice-Speaker of the Thirtieth Guam Legislature  
Chairman, Committee on Tourism, Cultural Affairs, Youth and Public Broadcasting

Chairman, Committee on General Governmental Operations and Organization  
Chairman, Committee on Health, Human Services and Homeland Security

**28th Guam Legislature (2004 General Election)**

Speaker Mark Forbes [Republican]

Vice-Speaker Joann Salas Brown [Republican]

Senator Frank B. Aguon [Democrat]  
Senator Edward J.B. Calvo [Republican]  
Senator Benjamin J.F. Cruz [Democrat]  
Senator Mike Cruz, M.D. [Republican]  
Senator Lawrence F. Kasperbauer, Ph.D. [Republican]  
Senator Robert Klitzkie [Republican]

Senator Lou A. Leon Guerrero [Democrat]  
Senator Jesse A. Lujan [Republican]  
Senator Adolpho B. Palacios [Democrat]  
Senator Rory J. Respicio [Democrat]  
Senator Ray Tenorio [Republican]

Senator Antonio R. Unpingco [Republican]

Senator Judith T. Won Pat [Democrat]

**27th Guam Legislature (2002 General Election)**

Vicente "Ben" C. Pangelinan - [Democrat]

Frank B. Aguon, Jr. - [Democrat]

Tina R. Muna-Barnes - [Democrat]

Joann M.S. Brown - [Republican]  
Carmen Fernandez - [Democrat]

Mark Forbes - [Republican]  
Lawrence F. Kasperbauer - [Republican]  
Robert Klitzkie - [Republican]  
Lou Leon Guerrero - [Democrat]  
Jesse Anderson Lujan - Republican  
John M. Quinata "JQ" - [Democrat]  
Rory J. Respicio - [Democrat]

Antoinette "Toni" D. Sanford - [Democrat]

Ray Tenorio - [Republican]  
F. Randall Cunliffe - [Democrat]

Uni-cameral Legislature (15 Members)  
Speaker of the Twenty-Eighth Guam Legislature

# GUAM ECONOMIC OUTLOOK

## **GUAM ECONOMIC OUTLOOK**

---

### **Summary**

Guam's economic outlook for Fiscal year 2012 is positive with modest aggregate growth anticipated. The pace of growth is largely dependent on the timing of scheduled construction activity, recovery in Japan tourism and continued strength in the Korea and Taiwan tourism markets, although a number of other factors will make their contributions. Positive growth is likely, but this outlook is not immune to a variety of risks. Key risks include the volatility in the Middle East and North Africa, which heightens concerns of fuel price spikes and their dampening effect on worldwide economic recovery, expansion and overseas travel as well as the stabilization and containment of leaking radiation from Japan's tsunami damaged nuclear reactors at Fukushima and the related impacts. An increasing accumulation of funds appropriated or available, but not yet contracted, for defense construction and other purposes leads to the conclusion that construction is likely to increase dramatically and economic activity is likely to increase modestly in FY 2012, and moderately, thereafter. The growing federal deficit and calls for federal budget reductions makes it likely that the recent trend of increasing non-defense expenditures on Guam may reverse. However, Section 30 funding is expected to increase moderately in FY 2012 and FY 2013 due to positioning of military support personnel and reconciliation of the Section 30 ledger may yield additional revenue, but this fund source will not peak until full relocation of the Marines is achieved. An unprecedented level of funding, over \$1.6 billion, is available for contractual obligation for defense construction and other infrastructure projects. These are funded by U.S. and Japan appropriations as well as bond and American Recovery and Reinvestment Act (ARRA) grants. Substantial additional U.S. and Japan funds may become available in the not too distant future providing upside potential for

significantly greater growth rates. Future policy actions of the federal and local governments, as well as Japan's government regarding the buildup, are likely to further influence the pace and direction of Guam's economy in the years ahead.

## **Defense Buildup Plans**

The Record of Decision (ROD) was announced in September 2010, stating the Department of Defense's decision to proceed with plans to relocate a portion of U.S. Marine Corps forces to Guam from Okinawa. This enacts the blueprint for defense buildup projects on Guam and implementation of these plans will be the major force driving economic changes into the foreseeable future. Implementation has several components: These include: (1) Marine Corps: Relocation of approximately 8,600 Marines and their 9,000 dependents from Okinawa to Guam and development of facilities and infrastructure to support training and operations on Guam and Tinian. (2) Navy: Construction of a new deep-draft wharf with shore-side infrastructure improvements creating the capability in Apra Harbor, Guam to support a transient nuclear powered aircraft carrier, but has deferred site selection. (3) Army: Relocation of approximately 600 military personnel and their 900 dependents to establish and operate an Air and Missile Defense Task Force (AMDTF). As of the date of this ROD, the DOD has not decided to construct and operate an AMDTF. Advancement in Chinese military capabilities bring Guam within reach of a variety of offensive military capabilities from China and suggest that plans for such a facility are likely to remain under active consideration. (4) Utilities: Renovation and development of additional capacity for power, water and wastewater systems, both on and off base. (5) Off-base Roadways: Improvements to off base roads, bridges, and intersections.

## **Construction**

The approximately \$1.6 billion currently available primarily for contractual obligation for defense construction and other infrastructure projects not yet contracted is from several sources and fiscal years. These include, Japan appropriated funds JFY 2009, \$300 million, JFY 2010 \$500 million and yet to be contracted US Defense FY 2010 appropriations of \$367 million. ARRA funds awarded to the Government of Guam of \$139.5 million remained available for obligation as of December 31, 2010. Millions of bond financing is

available for utility projects. GPA recently sold \$205 million in bonds on the municipal market. GWA borrowed \$118.8 million in bonds in November 2010. The Port Authority of Guam has \$50 million available from Supplemental FY 2010 appropriations administered by the U.S.

Transportation Department's Maritime Administration. A portion of those funds will be expended in FY 2012 and FY 2013.

Sources of funds that are not available for immediate obligation likely to be authorized soon, primarily for construction total over an additional billion dollars. These funds should begin to generate some economic activity in FY 2012 and more in FY 2013.

These funding sources include the Guam Museum Bond in the amount of \$86.4 million which is delayed due to a procurement protest, budgeted Japan FY 2011 funds of about \$400 million for Guam utilities have been passed into law as appropriations but the Japan bond funding to back them has not been authorized and their authorization requires approval from both houses which may be difficult. US Defense Construction Authorizations for FY 2011 of about \$500 million have been passed into law as appropriations but cannot be

contracted until the funds are made available with the passage of the FY 2011 budget. The FY 2011 funds are likely to be available late in the year so the impact of their expenditure will be limited in FY 2012 and will extend to 2013 and beyond. The FY 2012 DOD military construction request of \$367 millions plus \$33 million for civilian infrastructure could begin to have significant impact in FY 2013. Most of the expected construction activity for FY 2012 will be limited to expenditure of funds already contracted or available for contracting.

Of the \$370 million in Department of Defense construction projects of \$5 million and above awarded in FY 2010, nearly all was awarded to off-island firms. In recent years past, the distribution of contract awards between local and off-island firms was more evenly divided. This raises the concern that while the total amount of the construction projects has increased, it is not clear what portion of the contracted amounts will make its way to Guam. This makes forecasting Guam construction and employment levels based on contract amounts more uncertain and likely having less impact per dollar contracted.

There was virtually no economic activity in FY 2010 from the items covered in the Final Environmental Impact Statement (FEIS) since the Record of Decision was not issued until late that year. While a number of contract awards were made in September 2010, the awards were too late in the year to have any impact on FY 2010. Delays occurred in commencing work on the FY 2010 projects for a variety of reasons including resolution of issues necessary to permit signing of the programmatic agreement. Construction is expected to increase substantially in 2012, but as the relocation construction projects will be mostly just starting near the beginning of

FY 2012 and ramping up throughout the year, the average for the year will be somewhere in between the start and ending levels.

The largest project of the FY 2010 Military Construction funding is for a replacement Naval Hospital complex in Agana Heights. The groundbreaking ceremony took place about three months after the \$158 million contract was awarded for the project.

The contracting agreements for the U.S. funded buildup projects were put in place with the Navy's May 11, 2010 \$4 billion contract award selecting seven companies for indefinite-quantity contracts. These firms will be given the bulk of the design and construction work for Marine Corps relocation and other military projects with specific projects to be awarded with task orders.

The Japan Mamizu funds are available but the contracting authority for their expenditure with indefinite-quantity Multiple Award Construction Contracts is not yet in place. The request for proposals for these contracts is due in April 2011. Task orders from these contracts are scheduled for contracting beginning in summer 2011. Construction will lag months until after that so little project activity will occur in FY 2011 but will commence and ramp up in FY 2012.

The largest Government of Guam project currently underway is the new John F. Kennedy High School; it is scheduled for completion by July 2011.

Private sector projects of note include the \$95 million 30 floor Bayview Hotel tower, to be the tallest on Guam and convention center which is scheduled for completion and opening in spring 2012. Construction of the \$15 million New Harmon Apartments owned by Tanota Partners commenced in January 2010. The \$100 million Emerald Ocean Park condominium construction, stated in March 2008, is currently at a standstill. On April 11, 2011, the Guam Healthcare and Hospital Development Foundation announced that it has begun designing Phase I plans with 130 acute beds estimated to cost \$197 million with plans to expand to 350 beds.

While the projects outlined in the FEIS are proceeding, the timeframes for the activity have been delayed and stretched out over a longer time frame. Measures of growth of population, employment and revenue, provided in the FEIS therefore, will remain largely unachieved in the FY 2012 and 2013 time periods.

It appears that the commencement of substantial growth originally projected in the NAVFAC Pacific Draft Environmental Impact Statement (DEIS) assumptions for population growth and additional revenues from buildup construction in 2010 will be deferred until FY 2012 and increase at a slower rate.

NAVFAC Pacific DEIS constrained assumptions for additional revenues realized from Gross Receipts, Corporate and Personal Income taxes projected to be realized from buildup construction by year are:

## DEIS Revenue Growth Forecast

<u>Year</u>	<u>Revenue Growth Forecast</u>
2010	\$ 67.414 million
2011	\$143.295 million
2012	\$235.480 million

## FEIS Projected Population Increased (Unconstrained)

<u>Year</u>	<u>Guam Population Growth</u>
2010	11,039
2011	27,835
2012	44,301

## Tourism

In 2010, air service to Guam was expanded, visitor arrivals rebounded, employment increased and gross receipts tax revenue, a measure of business activity, increased. The improvement in visitor industry statistics from FY 2009 to FY 2010 is impressive. Visitor arrivals were up 11.2% and hotel occupancy tax receipts were up 11.9%. Two Tumon Bay hotels, the Aurora Resort and the Sherwood remain closed. Reopening is planned this year for the Aurora's Island Wing along with offering 75 one and two bedroom converted apartments under new ownership.

month of FY 2011.

By country of residence, the number of visitors increased significantly from each of the four largest markets: Japan, Korea, Taiwan and the US mainland. Other markets of interest showing large percentage increases over the year include Hong Kong up 140%, Australia up 28%, and China up 45%. The fiscal year ended strongly with total visitor arrivals for the month of September compared to September last year, up 15.6% and hotel occupancy tax collections up 24.6%. The tourism sector's recovery and growth in FY 2010 has continued into the first five

That growth in the Japan market experienced an abrupt reversal on March 12, 2011, the day immediately following the earthquake, tsunami and nuclear power plant damage at Fukushima. The loss of life, homes, jobs and displacement of residents was of such severity that the Japanese Prime Minister Naoto Kan said "Within 65 years after the end of World War II, this is the most difficult and most difficult crisis for Japan." The disaster has been officially named Great East Japan Earthquake. The U.S. Department of State has issued a March 21 Travel Warning

discouraging U.S. residents from visiting Japan at this time. The U.S. Department downgraded on March 21 the Travel Warning and announced specific areas where U.S. Citizens should defer non-essential travel including Tokyo (Tokyo Capital Region). As a precaution, U.S. citizens within 50 miles of the Fukushima Daiichi Nuclear Power Plant are advised to evacuate the area or take shelter indoors if evacuation is not possible. Flights to Guam and the United States from Japan have been reduced somewhat. Commercial flights have resumed at all airports, except Sendai airport which remains closed. All of this is particularly important to Guam's economy as the Japan segment for 2010 comprised 75% of Guam's visitors. Given the magnitude of the disaster, the downturn in Japan arrivals to Guam was expected. Japan daily arrivals have dropped off approximately 20% since the March 11 disaster. For the entire month ending March 31, Japan arrivals are down 9.4% and total arrivals to Guam are down 5.8% compared to figures one year ago.

The economic ramifications of the earthquake and tsunami disruptions in transportation, electrical power generation and supply lines affecting businesses and individuals. The expenditure of private and government resources are likely to be refocused to reconstruction efforts with travel for business and leisure purposes being curtailed. Typically, tourism declines following a natural or economic crisis, and over a period of time, recovers. The expectation is that in 2012 tourism on Guam from outbound Japanese travelers will be in gradual recovery.

The assumption is that tourism levels for FY 2012 will be below those achieved in FY 2010 and will remain above the depressed levels of FY 2009. Since tourism is a much larger component of Guam's economic activity than construction, whether measured by revenues or employment, a larger percentage increase in construction is necessary to off-set any decline in visitor industry expenditures.

### **Outlook in 2013**

The outlook for FY 2013 at this time is continuing recovery, with modest growth in the tourism sector. In the construction sector, activity is expected to continue to ramp up. While the aggregate economic activity in FY 2012 is likely to be positive, the robust growth over the year expected in construction will be somewhat offset by the still somewhat recovering Japanese tourism market. It is possible that by 2013 the Japan tourist sector may have recovered so that the entire amount of increase construction revenue will be added to the base. By then, there is a possibility that tourism from China may continue growth to become a significant share. The potential is for FY 2013 to be significantly stronger than FY 2012, not only in the tourism sector but also in construction. The beginning construction level in FY 2013 will be the year end high

of FY 2012 and is expected to ramp up further, assuming buildup plans and funding remain as currently planned.

## **Conclusion**

The most reasonable economic growth scenarios range from little to moderate to robust. Economic contraction in FY 2012 or FY 2013 appears unlikely. Given current information, Guam's economy is expected to expand moderately in FY 2012 & 2013 driven by construction activity levels rising substantially throughout the year. Increased construction expenditures in the economy over time are likely to more than offset an expected decline in tourist activity since the dollar amount of major construction projects planned is immense. However, this expectation will change if tourist reductions are greater than anticipated and budgeted construction projects are delayed substantially. An important budgetary note is that while FY 2012 revenues are expected to increase modestly over FY 2010 and FY 2011, the average revenue levels will not be available at the beginning of the fiscal year. Revenues are expected to start the year near status quo levels and ramp up during the year as tourism continues recovery and construction projects get underway.

Source: Catholic Education Office; Department of Defense Education Activity (DoDEA); Other Private Schools and Guam Public School System. Catholic Schools includes Dominican Child Development School; Infant of Prague Nursery & Kindergarten; Maria Artero; Mercy Heights; Bishop Baumgartner; Dominican Catholic School; Our Lady of Mount Carmel; Saint Anthony; Santa Barbara; Saint Francis; San Vicente; Academy of Our Lady; Father Duenas; Notre Dame; and Saint Thomas Aquinas.

DoDEA = Department of Defense Education Activity

Other Private Schools includes Asmuyao Community School, Evangelical Christian Academy, Guam Adventist Academy, Guam International Christian Academy, Harvest Christian Academy, Pacific Christian Academy, Saint Paul Christian School, Southern Christian Academy, St. John's School, Tamuning Christian Academy, Temple Baptist Christian School, and Trinity Christian School.

1/ Providence International Christian Academy opened SY2008-SY2009.

2/ Tamuning Christian Academy closed SY2007-SY2008.

Per pupil cost is calculated by dividing the total amount of expenditures per year by the average daily membership. The figures does not include cost for transportation from Department of Public Works.

Private School Graduates includes Catholic Schools, DoDEA, and Other Private Schools Graduates.

Cohort Graduation Rate: Based on the capability of tracking the high school experience of each member of the ninth grade cohort.

After four years of high school, each member of the ninth grade cohort is identified as either 1) a graduate; 2) still in school; 3) a transfer; 4) a dropout; or 5) a withdrawal due to illness or death. A four year cohort graduation rate may then be calculated by dividing the number of cohort graduates after four years of high school by the total 9th grade cohort less the number of transfers and the number of students that withdrew during the four years due to illness or death.

Does not include Santa Barbara's figures in 2006-2007

nr = Not reported

Draft 2010 CMHS Uniform Reporting System (URS)

Client counts for Guam and the Territories are unduplicated, whereas the United States has 43 states with unduplicated client counts.

All denominators use US Census data from 2009.

Regional groupings are based on SAMHSA's Block Grant Regions.

Prostate	16	81	0	19

Percentages are based on rounded totals.  
 Early = localized; Late = regional and distant. Localized, regional and distant are invasive. In situ cases (non-invasive) are not included.  
 \*Fewer than 5 cases in the five-year time period.  
 Breast includes female cases only.  
 Colorectal includes cancer of the colon, rectum, anus, and rectosigmoid.  
 Lung includes cancer of the lung and bronchus.

Definitions:

- 1/ Child Abuse and Neglect: Any recent act or failure to act on the part of a parent or caretaker which results in death or serious physical or emotional harm sexual abuse or exploitation; or an act or failure to act which presents an imminent risk of serious harm.
- 2/ Physical Abuse: Non-accidental injury of a child or punching, beating, kicking, biting, burning, shaking, otherwise harming a child.
- 3/ Emotional Abuse: Patterns of behavior that attacks a child's emotional development and sense of self worth; name calling, blaming, belittling, terrorizing, humiliation and rejection.
- 4/ Sexual Abuse: Any act of a sexual nature upon or with a child; Fondling a child's genitals, intercourse, incest, rape sodomy, adult showing his or her genital area (indecent exposure), exposure to pornographic materials and commercial exploitation through prostitution or the production or the production of pornographic materials.
- 5/ Physical Neglect: Purposely failure to act on behalf of a child or to provide adequately for a child; refusal of or delay in seeking health care (medical attention), abandonment, expulsion from the home, inadequate supervision (lack of adult supervision); failure to enroll a child of mandatory school age in school (educational neglect); or failure to attend to a special education need and chronic truancy.
- 6/ Emotional Neglect: Purposely not providing for a child's emotional needs; or marked inattention to the child's need for affection, refusal or failure to provide needed psychological care, spouse abuse/family violence in the child's presence, and permission of drug/alcohol use by the child.

The Uniform Crime Report Program counts one offense for each female victim of a forcible rape, attempted forcible rape, or assault with intent to rape, regardless of age.

Forcible Rape: The carnal knowledge of a female forcibly and against her will. Assaults and attempts to commit rape by force or threat of force are also included. However statutory rape (without force) are excluded.

Program classifies as Part II offenses all other crimes of sexual nature and, as such, collects only arrest statistics concerning them.

1/ Days away from work include those that result in days away from work with or without job transfer or restriction. Excludes farms with fewer than 11 employees. Dashes indicate data not available.

2/ Median days away from work is the measure used to summarize the varying lengths of absences from work among the cases with days away from work. Half the cases involved more days and half involved less days than a specified median. Median days away from work are represented in actual values.

Note: Because of rounding, components may not add to totals. Dashes indicate data not available.

1/ Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.

2/ Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data

3/ The relative standard error (RSE) is a measure of the reliability of a survey statistic. The smaller the relative standard error, the more precise the estimate.

4/ Wages for some occupations that do not generally work year-round, full time, are reported either as hourly wages or annual salaries depending on how they are typically paid.

5/ This wage is equal to greater than \$80.00 per hour or \$166,400 per year.

8/ Estimates not released.

Source: Occupational Employment Statistics, Bureau of Labor Statistics, Guam Department of Labor, Government of Guam

1/ Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately.

Estimates do not include self-employed workers.

2/ Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours;

for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data

3/ The relative standard error (RSE) is a measure of the reliability of a survey statistic. The smaller the relative standard error, the more precise the estimate.

4/ Wages for some occupations that do not generally work year-round, full time, are reported either as hourly wages or annual salaries depending on how they are typically paid.

8/ Estimates not released.

Total breakfasts served	1,323,433	1,291,871	1,247,014	1,311,025	1,391,998
Cash payments (US Dollars)	2,100,813	1,932,212	1,781,985	1,731,779	1,763,005

Source: Food and Nutrition Service, USDA. All data are subject to revision.

1/ Preliminary

Payments to State agencies are based on per meal rates which are adjusted annually to offset changes in food prices.

Administrative costs not included.

Participation is based on average daily meals divided by an attendance factor of 0.927.

Participation data are nine-month averages; summer months (June-August) are excluded.

# GLOSSARY

\_ A \_

- Age\_Sex Structure      The age-sex structure is the composition of a population as determined by the number or proportion of males and females in each age category. The age\_sex structure of a population is the cumulative result of past trends in fertility, mortality, and migration. Information on age\_sex composition is essential for the description and analysis of many other types of demographic data. See also *Population Pyramid*.
- Average      The average is the amount obtained by dividing the aggregate or total of a particular variable in the statistical universe by the number of units in that universe.

\_ B \_

- Bankruptcy      A legal procedure for dealing with debt problems of individuals and businesses. These procedures are covered under Title 11 of the United States Code (Bankruptcy Code). Bankruptcy laws help people who can no longer pay their creditors get a fresh start by liquidating their assets to pay their debts, or be creating a repayment plan. Bankruptcy laws also protect troubled businesses and provide for orderly distributions to business creditors through reorganization or liquidation.
- Birth      A birth (live birth) is the complete expulsion or extraction from is mother of a product of human conception, irrespective of the duration of the pregnancy, which, after such expulsion or extraction, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord or definite movement of the voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.
- Birth Rate      The birth rate is the number of live births per 1,000 population in a given year. It should not be confused with the growth rate. See also *Growth Rate*.

\_ C \_

- Census      A census is the canvassing of a given area, resulting in an enumeration of the entire population and often the compilation of other demographic, social, and economic information pertaining to that population at a specific time. See also *Survey*.
- Census Designated Place      Census designated places (CDP) are delineated for each decennial census to provide census data for concentrations of population, housing, and commercial structures that are identifiable by name but are not within an incorporated place. CDP boundaries usually are defined in cooperation with state, local, and tribal officials. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as in an earlier census does not necessarily have the same boundary. All places in Guam are CDPs.

Child Abuse and Neglect	Child abuse and neglect is at a minimum any recent act or failure on the part of a parent or caretaker which results in death, serious physical or emotional harm, sexual abuse or exploitation; or an act or failure to act which presents an imminent risk of serious harm.
Childbearing Years	Childbearing years is the reproductive age span of women, assumed for statistical purposes to be 15_44 or 15_49 years of age.
Civilian	A civilian is a person who is not in the armed forces, including dependent members of the armed forces.
Civilian Labor Force	The civilian labor force is all persons 16 years and older employed for pay or profit plus those who are unemployed but seeking work. See also <i>Employed, Unemployed, and Not in Labor Force</i> .
Cohort	A group of people sharing a common temporal demographic experience who are observed through time. For example, the birth cohort of 1900 is the people born in that year.
Consumer Price Index	The Consumer Price Index (CPI) measures the rate at which the prices of consumer goods and services are changing over time. In practice, most CPIs are calculated as weighted averages of the percentage price changes for a specified set, or “basket”, of consumer products, the weights reflecting their relative importance in household consumption in some period. A monthly or quarterly price index compiled and published by an official statistical agency that measures changes in the prices of consumption goods and services acquired or used by households.
Crude Birth Rate	See <i>Birth Rate</i> .
Crude Death Rate	See <i>Death Rate</i> .
Crude Divorce Rate	See <i>Divorce Rate</i> .

\_ D \_

Death	Death is the permanent loss of all evidence of life after a live birth has occurred.
Death Rate	The death rate is the number of deaths per 1,000 population in a given year.
Defined Benefit Plan	The Defined Benefit Plan provides for retirement, disability, and survivor benefits to members of the plan prior to October 1, 1995 (all government employees are required to participate in the Defined Contribution Plan after October 1, 1995). Under the Defined Benefit Plan, retirement benefits are based on age and/or years of credited service and an average of the three (3) highest annual salaries received by a member during the years of credited service, or six thousand (\$6,000), whichever is greater.

Defined Contribution Plan	Created by Public Law 23-42:3, this plan provides an individual account retirement system for any person who is employed by the Government of Guam. This plan is a single-employer pension and is the only plan for all new employees whose employment commences on or after October 1, 1995.
Density	Population density and housing unit density are computed by dividing the total population or number of housing units within a geographic entity by the land area of that entity measured in square kilometers or square miles. Density is expressed as both “people (or housing units) per square kilometer” and “people (or housing units) per square mile” of land area.
Dependency Ratio	The ratio of the economically dependent part of the population to the productive part; arbitrarily defined as the ratio of the elderly (ages 65 and older) plus the young (under age 15) to the population in the working ages (ages 15_64).
Disability Status	<p>Disability status was derived from answers to two Census questionnaire items. The first asked about the existence of the following long-lasting conditions: (a) blindness, deafness, or a severe vision or hearing impairment (sensory disability) and (b) a condition that substantially limits one or more basic physical activities, such as walking, climbing stairs, reaching, lifting, or carrying (physical disability) for the population 5 years old and over.</p> <p>Disability status was also determined by asking if the individual had a physical, mental, or emotional condition lasting 6 months or more that made it difficult to perform activities in four categories: (a) learning, remembering, or concentrating (mental disability); (b) dressing, bathing, or getting around inside the home (self_care disability); (c) going outside the home alone to shop or visit a doctor’s office (going outside the home disability); and (d) working at a job or business (employment disability). Individuals were classified as having a disability if any of the following three conditions were true: (1) they were 5 years old and over and had a response of “yes” to a sensory, physical, mental or self_care disability; (2) they were 16 years old and over and had a response of “yes” to going outside the home disability; or (3) they were 16 to 64 years old and had a response of “yes” to employment disability.</p>
Divorce	A divorce is the legal termination of a marriage.
Divorce Rate	The divorce rate is the number of divorces per 1,000 population in a given year.

\_ E \_

Educational Attainment	The classification of people according to the level of education attained (the highest level of school completed or the highest degree received).
Election District	An election district is the official term for what is commonly called a “village”; there are the nineteen (19) election districts or villages on Guam.
Emotional Abuse	Patterns of behavior that attacks a person’s emotional development and sense of self worth (name calling, blaming, belittling, terrorizing, isolation, humiliation, and rejection).
Emotional Neglect	Purposely not providing for a person’s emotional needs (marked inattention to the person’s need for affection, refusal or failure to provide needed psychological care)
Employed	All civilians 16 years old and over were classified as employed if they were “at work” or “with a job but not at work” during the reference week, including temporarily absent. See also <i>Unemployed</i> and <i>Not in Labor Force</i> .
Ethnic Origin	Ethnic origin refers to an individual’s origin or descent, “roots,” heritage, or place where the individual or his/her parents or ancestors were born. Respondents reported their ethnic group regardless of the number of generations removed from their place or origin. Responses to the ethnic origin or race question reflected the groups with which respondents identified and not necessarily the degree of attachment or association the individual had with the particular group(s). See also <i>Race</i> .
Ethnicity	The cultural practices, language, cuisine, and traditions — not biological or physical differences — used to distinguish groups of people.

\_ F \_

Family	A family includes a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder’s family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may be comprised of a group of unrelated people or of one person living alone.
Family Income	In compiling statistics on family income, the incomes of all members 15 years old and over related to the householder are summed and treated as a single amount.

Fertility	The data on fertility (also referred to as “children ever born”) were derived from the answers to the Census question which asked women 15 years old and over—regardless of their marital status—how many babies they have ever had. Stillbirths, stepchildren, and adopted children were excluded from the number of children ever born. Data are most frequently presented in terms of the aggregate number of children ever born to women in specified population groups and in terms of the rate per 1,000 women.
Fetal Death	A fetal death is a death prior to the complete expulsion or extraction from its mother of a product of human conception, irrespective of the duration of the pregnancy; the death is indicated the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.
Freely Associated States	The Freely Associated States (FAS) consists of the Federated States of Micronesia (FSM), Republic of the Marshall Islands (RMI), and the Republic of Palau. Formerly a part of the Trust Territory of the Pacific Islands (TTPI), they became independent nations in free association with the United States.

\_ G \_

General Fertility Rate	The general fertility rate (GFR) is the number of live births per 1,000 women ages 15_44 or 15_49 years in a given year.
Gross Domestic Product	The gross domestic product (GDP) is the total market value of all the goods and services produced within a country in a given period of time.
Gross Reproduction Rate	The gross reproductive rate (GRR) is the average number of daughters that would be born alive to a woman (or group of women) during her lifetime if she passed through her childbearing years conforming to the age_specific fertility rates of a given year. See also <i>Net Reproduction Rate</i> and <i>Total Fertility Rate</i> .
Group Quarters	Group quarters is used to describe places in which people reside that are not considered “housing units,” such as prisons, long-term care hospitals, military barracks, and dormitories. The group quarters population includes all people not living in households. Two general categories of people in group quarters are recognized: <ol style="list-style-type: none"> <li>(1) the institutionalized population which includes people under formally authorized, supervised care or custody in institutions at the time of enumeration. Such people are classified as “patients or inmates” of an institution regardless of the availability of nursing or medical care, the length of stay, or the number of people in the institution. Generally, the institutionalized population is restricted to the institutional buildings and grounds (or must have passes or escorts to leave) and thus have limited interaction with the surrounding community. Also, they are</li> </ol>

generally under the care of trained staff who have responsibility for their safekeeping and supervision, and

- (2) the noninstitutionalized population which includes people who live in group quarters other than institutions. It also includes staff residing in military and nonmilitary group quarters on institutional grounds who provide formally authorized, supervised care or custody for the institutionalized population.

**Growth Rate** The growth rate is a general expression of the number of people added to (or subtracted from) a population in a year due to natural increase and net migration expressed as a percentage of the population at the beginning of the time period.

## \_ H \_

**Homeless** According to the Stewart B. McKinney Act, 42 U.S.C. § 11301, et seq. (1994), a person is considered homeless who "lacks a fixed, regular, and adequate night\_time residence and; and... has a primary night time residency that is: (A) a supervised publicly or privately operated shelter designed to provide temporary living accommodations... (B) an institution that provides a temporary residence for individuals intended to be institutionalized, or (C) a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings." 42 U.S.C. § 11302(a) The term "'homeless individual' does not include any individual imprisoned or otherwise detained pursuant to an Act of Congress or a state law." 42 U.S.C. § 11302(c).

**Household** A household includes all of the people who occupy a housing unit. (People not living in households are classified as living in group quarters.) Separate living quarters are those in which the occupants live separately from any other people in the building and that have direct access from the outside of the building or through a common hall. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated people who share living quarters.

**Household Income** Household income is the sum of all incomes of all members 15 years old and over of a household which are treated as a single amount.

**Housing Unit** A housing unit is a house, an apartment, a mobile home, a group of rooms, or a single room occupied (or if vacant, intended for occupancy) as separate living quarters. See also *Tenure*.

**HTSUSA** Acronym for *Harmonized Tariff Schedule for the United States Annotated*. The HTSUSA provides the applicable tariff rates and statistical categories for all merchandise imported into the United States. It is based on the international Harmonized System, the global system of nomenclature that is used to describe most world trade in goods.

\_ I \_

Income	Income is the wages or revenue accruing from labor, business enterprise, or investments. See also <i>Household Income</i> , <i>Family Income</i> , <i>Individual Income</i> , <i>Mean Income</i> , <i>Median Income</i> , and <i>Per Capital Income</i> .
Individual Income	Income for individuals is obtained by summing the total income for each person.
Immigration	Immigration is the process of entering one country from another to take up permanent or semi-permanent residence.
Industry	Industry relates to the kind of business conducted by a person's employing organization described by its economic product or activity.
Infant Death	An infant death is a death occurring to an individual of less than one year of age
Infant Mortality Rate	The infant mortality rate is the number of deaths of infants under one year of age per 1,000 live births in a given year.

\_ L \_

Labor Force	The labor force is all persons employed for pay or profit plus those who are unemployed but seeking work. See also <i>Employed</i> , <i>Unemployed</i> , and <i>Not in Labor Force</i> .
Life Expectancy	Life expectancy is the average number of additional years a person could expect to live if current mortality trends were to continue for the rest of that person's life. It is most commonly cited as life expectancy at birth.

\_ M \_

Marriage	A marriage is a social institution involving legal or religious sanction whereby a man and a woman are joined together for the purpose of founding a family unit (traditional).
Maternal Death	A maternal death is a death wherein the physician has designated a maternal condition as the underlying cause of death.
Mean	This measure represents an arithmetic average of a set of values. It is derived by dividing the sum (or aggregate) of a group of numerical items by the total number of items in that group.
Mean Age	The mathematical average age of all the members of a population.

Mean Income	Mean income is the amount obtained by dividing the aggregate income of a particular statistical universe by the number of units in that universe. Thus, mean household income is obtained by dividing total household income by the total number of households.
Median	The median divides a distribution into two equal parts: one_half of the cases falling below the median income and one_half above the median. This measure represents the middle value (if n is odd) or the average of the two middle values (if n is even) in an ordered list of n data values. The median divides the total frequency distribution into two equal parts: one_half of the cases falling below the median and one_half above the median.
Median Age	The age that divides a population into two numerically equal groups; that is, half the people are younger than this age and half are older.
Median Income	The median divides the income distribution into two equal parts: one_half of the cases falling below the median income and one_half above the median. For households and families, the median income is based on the distribution of the total number of households and families including those with no income.
Migration	The movement of people across a specified boundary for the purpose of establishing a new or semi-permanent residence. Divided into international migration (migration between countries) and internal migration (migration within a country).
Minor Civil Division	Minor Civil Divisions (MCD) are the primary governmental or administrative divisions of a first_order subdivision. On Guam, they are Guam's election districts (villages). The MCDs in Guam are geographic subdivisions of the first_order subdivision(s) and are not governmental units.
Mortality	Mortality is a general term for deaths as a component of population change.
_ N _	
Natality	Natality is a general term for births as a component of population change.
Natural Increase (Decrease)	The surplus (or deficit) of births over deaths in a population in a given time period.
Neonatal Death	A neonatal death is death occurring to an individual of less than 28 days of age.
Neonatal Mortality Rate	The neonatal mortality rate is the number of deaths of infants under 28 days of age in a given year per 1,000 live births in that year.

Net Migration	The net effect of immigration and emigration on an area's population in a given time period, expressed as an increase or decrease.
Net Migration Rate	The net effect of immigration and emigration on an area's population, expressed as an increase or decrease per 1,000 population of the area in a given year.
Net Reproduction Rate	The net reproduction rate (NRR) is the average number of daughters that would be born to a woman (or a group of women) if she passed through her lifetime conforming to the age-specific fertility and mortality rates of a given year. This rate is similar to the gross reproduction rate but takes into account that some women will die before completing their childbearing years. An NRR of one means that each generation of mothers is having exactly enough daughters to replace itself in the population. See also <i>Total Fertility Rate</i> .
Not in Labor Force	All people 16 years old and over who are not classified as members of the labor force. This category consists mainly of students, individuals taking care of home or family, retired workers, seasonal workers enumerated in an off_season who were not looking for work, institutionalized people (all institutionalized people are placed in this category regardless of any work activities they may have done in the reference week), and people doing only incidental unpaid family work (fewer than 15 hours during the reference week). See also <i>Employed</i> and <i>Unemployed</i> .
Nuptiality	Nuptiality is the general term for the frequency, characteristics, and dissolution of marriages in a population.

\_ O \_

Occupation	Occupation describes the kind of work a person does on the job or a position in the labor force..
------------	---

\_ P \_

Part I Offense	Part I Offenses is the first of two main groupings of Uniform Crime Reporting Program (UCR) crime classifications consisting of eight offenses reported whether or not they involve arrests:
----------------	--

1. Criminal Homicide,
2. Forcible Rape
3. Robbery
4. Aggravated Assault
5. Burglary
6. Larceny\_theft (except motor vehicle theft)
7. Motor Vehicle Theft
8. Arson

See also *Part II Offenses* and *Uniform Crime Report*.

Part II Offense

Part II Offenses is the second of the two main Uniform Crime Reporting Program (UCR) groupings of crime classifications not already designated in Part I. Agencies are limited to reporting arrest information only for Part I offenses with the exception of simple assault.

Law enforcement agencies report to the FBI only arrest data involving the Part II crimes:

9. Other Assaults
10. Forgery and Counterfeiting
11. Fraud
12. Embezzlement
13. Stolen Property: Buying, Receiving, Possessing
14. Vandalism
15. Weapons: Carrying, Possessing, etc.
16. Prostitution and Commercialized Vice
17. Sex Offenses
18. Drug Abuse Violations
19. Gambling
20. Offenses Against the Family and Children
21. Driving Under the Influence
22. Liquor Laws
23. Drunkenness
24. Disorderly Conduct
25. Vagrancy
26. All Other Offenses
27. Suspicion
28. Curfew and Loitering Laws—(Persons under 18)
29. Runaways—(Persons under 18)

See also *Part II Offenses* and *Uniform Crime Report*.

Per Capita Income

The per capita income is the amount obtained by dividing the aggregate income of all individuals, including those without incomes, by the total number of individuals.

Percentage

This measure is calculated by taking the number of items in a group possessing a characteristic of interest and dividing by the total number of items in that group, and then multiplying by 100.

Permanent Resident

A permanent resident is any person not a citizen of the United States who is residing in the U.S. under legally recognized and lawfully recorded permanent residence as an immigrant (also known as "Permanent Resident Alien", "Lawful Permanent Resident," "Resident Alien Permit Holder," and "Green Card Holder"). See also *Temporary Resident*.

Physical Abuse

Non-accidental injury of a person (punching, beating, kicking, biting, burning, shaking, otherwise harming a person).

Physical Neglect	Purposely failure to act on behalf or to provide adequately for the person (refusal of or delay in seeking health care, abandonment, expulsion from home).
Place	Places, for the reporting of decennial census data for the Pacific Island Areas, include census designated places (CDP) and incorporated places.
Population	The total population of a country may comprise either all usual residents of the country (de jure population) or all persons present in the country (de facto population) at the time of the census. For purposes of international comparisons, the de facto definition is recommended.
Population Estimate	Population estimates are approximations of current or past population of an area at a given time, or its distribution or composition in absence of complete enumeration.
Population Density	The population density is the population per unit of land area; for example, people per square mile or people per square kilometer of arable land.
Population Projection	Population projections are the computations of future changes in population numbers, given certain assumptions about future trends in the rates of fertility, mortality, and migration. Demographers often issue low, medium, and high projections of the same population, based on different assumptions of how these rates will change in the future.
Population Pyramid	A bar chart, arranged vertically, that shows the distribution of a population by age and sex. By convention, the younger ages are at the bottom, with males on the left and females on the right.
Poverty	<p>Poverty is an economic and social condition for an individual, family, or household whose level of living in terms of food, housing, clothing, medical needs, and so on are determined to be below the community standard.</p> <p>Following the Office of Management and Budget's (OMB) Statistical Policy Directive 14 (1978), the Census Bureau uses a set of money income thresholds designed in the 1960s that vary by family size and composition to determine who is poor. If a family's total income is less than that family's threshold, then that family, and every individual in it, is considered poor. The poverty thresholds do not vary geographically, but they are updated annually for inflation using the Consumer Price Index (CPI_U). The official poverty definition counts money income before taxes and does not include capital gains and noncash benefits (such as public housing, medicaid, and food stamps). Poverty is not defined for people in military barracks or institutional group quarters or for unrelated individuals under age 15 (such as foster children). They are excluded from the poverty universe — that is, they are considered neither as “poor” nor as “nonpoor.”</p>

Poverty Status

For the 2000 Census, the poverty status of families and unrelated individuals in 1999 was determined using 48 thresholds (income cutoffs) arranged in a two dimensional matrix. The matrix consists of family size (from 1 person to 9 or more people) cross\_classified by presence and number of family members under 18 years old (from no children present to 8 or more children present). Unrelated individuals and 2\_person families were further differentiated by the age of the reference person (RP) (under 65 years old and 65 years old and over).

To determine a person's poverty status, one compares the person's total family income with the poverty threshold appropriate for that person's family size and composition. If the total income of that person's family is less than the threshold appropriate for that family, then the person is considered poor, together with every member of his or her family. If a person is not living with anyone related by birth, marriage, or adoption, then the person's own income is compared with his or her poverty threshold.

\_ Q \_

Quartile

Quartile is a measure that divides a distribution into four equal parts. The first quartile (or lower quartile) is the value that defines the upper limit of the lowest one\_quarter of the cases. The second quartile is the median. The third quartile (or upper quartile) is defined as the upper limit of the lowest three quarters of cases in the distribution. Quartiles are presented for certain financial characteristics, such as housing value and contract rent. The distribution used to compute quartiles is the same as that used to compute medians for that variable.

Quintile

Quintile is a measure that divides a distribution into five equal parts on the basis of the ranked total incomes. Hence, the lowest quintile is the bottom 20 percent of the population or households; the highest quintile is the highest 20 percent on the same basis.

\_ R \_

Race

The racial classification used by the Census Bureau adheres to the October 30, 1997, Federal Register Notice entitled "Revisions to the Standards for the Classification of Federal Data on Race and Ethnicity" issued by the Office of Management and Budget (OMB). These standards govern the categorization of race in census data products. The OMB identified five minimum race categories (White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or Other Pacific Islander). In addition to the five race groups, the OMB also states that respondents should be offered the option of selecting one or more races. See also *Ethnic Origin*.

**Rate** A rate is a measure of occurrences in a given period of time divided by the possible number of occurrences during that period. Rates are sometimes presented as percentages.

**Rate of Natural Increase (or Decrease)** The rate of natural increase (or decrease) measures the population increase (or decrease) in a given year due to a surplus (or deficit) of births over deaths, expressed as a percentage of the base population.

**Ratio** A ratio is a measure of the relative size of one number to a second number expressed as the quotient of the first number divided by the second. For example, the sex ratio is calculated by dividing the total number of males by the total number of females, and then multiplying by 100.

**Rural** See *Urban and Rural*.

\_ S \_

**Sex Ratio** The sex ratio is a measure derived by dividing the total number of males by the total number of females, and then multiplying by 100.

**Survey** A survey is a canvass of selected persons or households in a population usually used to infer demographic characteristics or trends for a larger segment or all of the population. See also *Census*.

\_ T \_

**Temporary Resident** A temporary resident is a nonimmigrant alien who seeks temporary entry to the United States for a specific purpose. The alien must have a permanent residence abroad (for most classes of admission) and qualify for the nonimmigrant classification sought. The nonimmigrant classifications include: foreign government officials, visitors for business and for pleasure, aliens in transit through the United States, treaty traders and investors, students, international representatives, temporary workers and trainees, representatives of foreign information media, exchange visitors, fiancé(e)s of U.S. citizens, intracompany transferees, NATO officials, religious workers, and some others. Most nonimmigrants can be accompanied or joined by spouses and unmarried minor (or dependent) children. See also *Permanent Resident*.

**Tenure** Tenure represents the condition or nature by which occupancy of a housing unit is held. All occupied housing units are classified as either owner occupied or renter occupied. A housing unit is owner occupied if the owner or co\_owner lives in the unit even if it is mortgaged or not fully paid for. All occupied housing units that are not owner occupied, whether they are rented for cash rent or occupied without payment of cash rent, are classified as renter occupied.

Total Fertility Rate (TFR) The total fertility rate is the average number of children that would be born alive to a woman (or group of women) during her lifetime if she were to pass through her childbearing years conforming to the age-specific fertility rates of a given year. This rate is sometimes stated as the number of children women are having today. See also *Gross Reproduction Rate* and *Net Reproduction Rate*.

\_ U \_

Unemployed All civilians 16 years old and over were classified as unemployed if they were neither “at work” nor “with a job but not at work” during the reference week, were looking for work during the last 4 weeks, and were available to start a job. Also included as unemployed were civilians 16 years old and over who: did not work at all during the reference week, were on temporary layoff from a job, had been informed that they would be recalled to work within the next 6 months or had been given a date to return to work, and were available to return to work during the reference week, except for temporary illness. See also *Employed* and *Not in Labor Force*.

Uniform Crime Report (UCR) Uniform crime reporting is a collective effort on the part of city, county, state, tribal, and federal law enforcement agencies to present a nationwide view of crime. Agencies throughout the country participating in the Uniform Crime Reporting (UCR) Program provide summarized reports on eight Part I offenses known to law enforcement and reports on persons arrested. They also provide information about law enforcement officers killed and assaulted and on hate crime.

The UCR Program divides offenses into two groups—Part I and Part II. The Program collects data on all Part I offenses that become known to law enforcement whether or not they involve arrests. These crime totals are essential to measuring the level and scope of crimes occurring across the country. Part II offenses are all crime classifications other than those defined as Part I. The UCR Program collects arrest data for both Part I and Part II offenses. See also *Part I Offenses* and *Part II Offenses*.

Urban and Rural The U.S. Census Bureau classifies as urban all territory, population, and housing units located within urbanized areas (UAs) and urban clusters (UCs). It delineates UA and UC boundaries to encompass densely settled territory, which generally consists of:

- A cluster of one or more block groups or census blocks each of which has a population density of at least 1,000 people per square mile at the time, and
- Surrounding block groups and census blocks each of which has a population density of at least 500 people per square mile at the time, and
- Less densely settled blocks that form enclaves or indentations, or are used to connect discontinuous areas with qualifying densities.

Rural consists of all territory, population, and housing units located outside of UAs and UCs. Geographic entities such as first\_order subdivisions, minor civil divisions, and places often contain both urban and rural territory, population, and housing units.

The urban and rural classification applies to the 50 states, the District of Columbia, Puerto Rico, American Samoa, Guam, the Northern Mariana Islands, and the Virgin Islands of the United States.

There are UCs in all the Pacific Island Areas, but only the Northern Mariana Islands has a UA (Saipan).

Urban Cluster (UC) An urban cluster (UC) consists of densely settled territory that has at least 2,500 people but fewer than 50,000 people, except in Guam. By agreement with the Government of Guam, the U.S. Census Bureau recognizes Hagåtña as a UC rather than an urbanized area.

Urbanized Area (UA) An urbanized area (UA) consists of densely settled territory that contains 50,000 or more people, except in Guam (see below). The U.S. Census Bureau delineates UAs to provide a better separation of urban and rural territory, population, and housing in the vicinity of large places.

\_ V \_

Veterans Status For Census data products, a civilian veteran is a person 18 years old and over who, at the time of the enumeration, had served on active duty in the U.S. Army, Navy, Air Force, Marine Corps, or Coast Guard in the past (even for a short time), but was not then on active duty, or who had served in the Merchant Marine during World War II. People who had served in the National Guard or Military Reserves were classified as veterans only if they had ever been called or ordered to active duty, not counting the 4 to 6 months for initial training or yearly summer camps. All other civilians 18 years old and over were classified as nonveterans.

Vital Statistics Vital statistics is the collection of Demographic data on births, deaths, fetal deaths, marriages, divorces, and related events usually compiled through a registration system or other administrative record system.

**2011 STATE OF THE  
ISLAND ADDRESS**

## The State of the Island Address By Governor Eddie Baza Calvo (March 14, 2011)

Good morning, my fellow Guamanians,

Christine and I, Notch and Ray have reserved a seat here in the front. It is dedicated to the unborn, those who came before us, and our sons and daughters off at war. Consul General Kimura, we also dedicate this place to those who perished from the earthquake and tsunami that hit Japan.

Before I begin, may I just reflect upon our blessings from above? Three nights ago, the most concentrated waves from a tsunami passed just miles north of the Marianas. I was conducting a Cabinet meeting when a note was passed to me that a massive earthquake rocked Japan, and a Tsunami Watch was in effect for Guam. My senior staff and I left immediately to Civil Defense to command the island's emergency operations, when the event was upgraded to a Tsunami Warning.

I considered my duty as governor. I considered the trust you placed in me to keep you safe. It was, by far, the most concerning experience I have had as a leader. I had to consider the possibility that a tsunami may harm Guamanians. The government's brave first responders acted swiftly to protect you. The mayors and vice mayors, always the leaders on the front lines of our community, were with you. They accommodated every special need and answered your concerns, without regard for their own safety. By God's Grace, our island was spared. But our brothers and sisters in Japan were not so fortunate. Many died. Many are injured. Many are missing. I know we have many problems on our island, but it is at the core of who we are to help others in need. Consul General Kimura, I have prepared a letter to Prime Minister Kan expressing the sentiments and support of Guamanians. Please tell the people of Japan that their neighbors in Guam are coordinating a relief effort to help as much as we can.

Madam Speaker, on March 11, 1980, my father took the podium at the historic Guam Legislature building across from the Cathedral to deliver the State of the Territory address. He said, "I...believe that the 1980s will be referred to as the decade of Guam's emergence...With the help of this Legislature and the people of Guam, we can truly make the 1980s the decade of a new Guam—A Guam which can become a bright star in America's future."

He was right. The 1980s, thanks to the leadership of my father, Governor Ricky Bordallo and Governor Joseph Ada, were the height of economic development and wealth in this island. We can reemerge. We can be stronger and we can create the Guamanian Century of prosperity. But the most important point he made was that this vision of prosperity only could be possible with the help of the Legislature and the people of Guam. The opportunities are right in front of us, but it will take a collaborative approach to bridge this island from its near-poverty to the prosperity we all want.

As a gesture of my commitment to work with you, by the end of my tenure, we will once again be delivering this address at the historic Guam Legislature building. I commit to you, senators, my full support in rebuilding the original house of the people.

The state of the island depends on whom you talk to. For some, the prospects of the future are great. For others, struggling and living paycheck-to-paycheck consumes their daily life. And for the most vulnerable, the state of the island means nothing when they don't have a home, when their children have nowhere to sleep, when they are not allowed to be born, or when their disabilities are ignored.

We are on the cusp of what can be the greatest economic upsurge in our history. Yet, when we look at the island we know today, there is a great divide between poverty and prosperity. We're told about a great future, but before us now are problems that hardly lend to our ability to focus on what's ahead. Today, my dear people, too many Guamanians are living in poverty.

Parents are struggling on inadequate wages, or none at all. As of the latest employment reports and wage projections, 11,500 workers earn the minimum wage. 6,510 people are looking for a job, and more than 43,000 adults are not working, some of them facing medical challenges or disability. That is nearly 50,000 Guamanians not earning an income. These are men and women with families to feed. They have children to raise and elderly parents to take care of.

But the cruel cycle of poverty doesn't afford them this opportunity. For the great majority of the jobless, they did not receive the education they need to qualify even for entry-level positions. They did not have the money after high school to get certified for a trade, or to pursue higher education. For others, they did not have the proper family models to encourage them to be self-sufficient. This is how the cycle of poverty perpetuates itself.

The economic situation for the jobless and the underemployed brought thousands to the welfare rolls. At least 43,000 Guamanians are now on some form of public assistance. Today, entire families are struggling.

The increase in public assistance means fewer dollars for public schools to bring opportunity. It means fewer dollars for tax refunds. It means less funding for disease prevention and increased public health. All of this means less income for families to get by.

There are 115,000 adults on this island. Unfortunately, 52,000 adults make less than \$11,000 a year. That figure is important, because it represents the national poverty threshold. Nearly half of the people are not making enough to pull themselves out of poverty. Income levels are not enough for families. To make matters worse, the speculation in the market increased the cost of homes, moving the dream of homeownership even further away from the working family's reach.

There are nearly 45,000 homes in this population of 183,000 people. Half of these homes are occupied by renters. That earns us the unwelcome distinction of having one of the lowest homeownership rates in the nation. Families are saving what little they can to make a down payment on a home, only to see prices rise and to be turned down by the bank. They cannot afford land. They cannot afford construction. They can't even afford to buy one of the 9,100 existing homes that are vacant.

Our people are suffering. They're our neighbors. They're our friends. They are single mothers and fathers deep in debt, with foreclosures upon them, or struggling to pay the rent, with just enough gas to make it to work. They are married Guamanians who work more than one job and hardly get to see their children. And we see what's happened to these poor kids. We see what's occurred when children fall through the cracks. Problems show up at school, their education is interrupted, and the cruel cycle of poverty takes hold.

My fellow Guamanians, the strength of society is tested upon the weakest and most vulnerable among us. I cannot, in good faith, stand here and tell you the state of the island is strong, when so many families struggle, and so many children traverse through the circumstances they are dealt. The most important point here is that the state of the island today is the condition through which children are growing up. If we want to break the cruel cycle of poverty, if we want to stop the suffering from becoming generational, if we want today's generation of children to have more than we ever had, my dear people, the time to act is now!

The government itself, for the past 20 years, has directly contributed to lower incomes and poverty. You work hard for your money. Every time you get your paycheck, the government takes part of it. Every year, you file for your return and every year you are supposed to get a refund if you overpaid taxes.

My first priority, during the transition and upon taking office, was to determine the financial health of our government. The preliminary findings of my fiscal team disclosed the alarming level of liabilities of this government, to include tax refunds. These tax refunds rightfully belong to you. The government has been using your money to keep itself running. This is your money, not the government's. Not since 1991 were tax refunds paid to you in the same year you filed. This lowered your disposable income and deprived you of your opportunity to spend or save. For 20 years, the government used your money to finance its operations and the deficit, and right now, it owes you hundreds of millions in tax refunds. The average filer expecting a refund is owed thousands of dollars.

None of this includes the money owed to private vendors. These companies provided goods and services to Guamanians and the government still owes them. I instructed agency heads to look at their finances and report any prior year unrecorded expenditures and unpaid debts. Preliminary estimates, which we are verifying, indicate this unrecorded debt is in the millions of dollars. These debts hurt many small businesses and may have caused some vendors to shut down or eliminate jobs.

After a careful and lengthy review of the government's finances, it has become evident that the cash situation has escalated to a critical level. Almost every year, the government spends more than it is able to collect. In the past, it was adequate to focus on the budgeted revenues and appropriations. However, because of the critical cash position, our focus now has to be on the careful management of the cash we collect and the debts we pay. This is why I instructed the Department of Administration to develop and maintain a cash flow projection. This is an integral part of our cash management policies and decisions.

Thankfully, we are working with partners to help alleviate the cash burden. Within the past two months, we negotiated a manageable payment plan to repay the money previously transferred out of the Solid Waste Operations Fund. We worked with the Federal Management Team overseeing the mental health permanent injunction to push back the scheduled payment dates by two months. These agreements have enabled this government to avert payless paydays.

Finally, during my recent trip to Washington, D.C., we successfully prevented losing up to \$75 million of ARRA funds for the Department of Education. I look forward to working with the legislature to finalize the reprogramming of this money.

We must strengthen our financial posture in preparation for the anticipated economic surge. There is a fiscal gap between our present financial situation and the expected growth in revenues as a result of the buildup. We must confront the current budgetary and cash shortfalls and work collaboratively to overcome this fiscal challenge.

Two months into this administration, our fiscal team has had the tremendous responsibility of finding out just how much this government owes Guamanians. This is not an easy task. It is extremely complex. The Public Auditor has been assisting us in this regard and is close to finalizing her validation of certain liabilities. However, based on the preliminary draft report from the Public Auditor, it appears that the deficit grew by approximately \$84 million to a level of \$349 million as of September 30, 2010.

I earlier stated the major component of the deficit is the tax refunds. We also owe millions due to businesses, daycare centers, non-profit organizations and many others, who depend on those payments to meet their day-to-day cost of living. In addition, we still owe millions to the COLA class recipients with interest that continues to accrue. This government also owes money to the Permanent Injunction, the Federal Bureau of Prisons, and the list continues.

All of these liabilities existed when we got into office. The cash available to pay these liabilities was negative, which was further compounded by the need to repay borrowings of restricted and special funds that occurred in the prior year. This is why, my dear people of Guam, I have been saying that a cash crisis exists. Further details will soon be released in a forthcoming Public Auditor's report.

Despite the magnitude of the existing fiscal challenges, we believe there is a way forward with a new direction. There are options to help, including:

- reordering of our liabilities
- making investments in Revenue and Taxation to improve collections, which will enhance our existing revenue streams
- working collaboratively with the Legislature, Chamber of Commerce and all stakeholders to plug the holes in our existing tax systems and to determine whether we should explore a new system to replace the Gross Receipts Tax
  
- considering government reorganization to reduce costs
  
- considering alternative means of delivering existing government services.

Our commitment to hold government finances structurally-balanced only works moving forward. It does nothing to pay off what we already owe. We can't just pretend the deficit, now estimated to be \$349 million as of September 30, 2010, will disappear. We have to get rid of the deficit in order to stabilize the finances. We need to pay your tax refunds, otherwise a balanced budget for the next fiscal year will mean nothing. The prior debts will just continue eating into our current year revenues, which are already allocated to pay for our current year obligations.

There are only four options before us. We can raise \$349 million. We can cut \$349 million in spending. We can borrow \$349 million. Or we can do a combination of two or three of these options. I am proposing a strategic plan to stabilize our finances starting now. This is what I am proposing:

First, I will not raise taxes. The people should not have to bear the burden of the government's inability to live within its means. But we are aggressively seeking both cash and revenues. The Department of Revenue and Taxation is pursuing a Guam Property Assessment System, Computer Assisted Mass Appraisal and tax mapping projects. Together, these improvements to revenue identification technology will ensure fair and equitable assessments of property taxes. We are in the process of hiring more agents and revenue officers to enhance enforcement, to aggressively collect delinquent taxes and to audit industries for leakages. We believe these efforts can raise nearly \$40 million in revenues.

We will be going soon to the federal government with a renewed request to obtain reimbursement for the Earned Income Tax Credit. This could save your government another \$40 million annually. Simultaneously, we are working with the federal government to reconcile and update Section 30 reimbursements. This could mean an additional \$5 million annually.

As for cost containments, senators, we are holding the line on spending, but the structural imbalance of the General Fund is a result of not enough revenues to fund the operational requirements of this government. These are the result of unfunded mandates the executive agencies must abide by. These include programs and services that are largely underfunded and understaffed.

We can't possibly cut \$349 million from the budget. That's practically the entire budget. But we will make sacrifices. We will stick to cost containments over the foreseeable future. First, we stopped hiring for non-critical positions. Non-essential travel has come to a halt. Some agencies will decline legal services contracts. Others are consolidating rental spaces. All agencies are reducing the use of supplies, power and water and other communications. All contracts will be scrutinized and cancelled if found to be unnecessary.

One of our most critical solutions is the conversion of services to information technology platforms. This includes electronic health records and the routing and posting of government documents online. Our long-term goal is to offer more government services through agency websites, cutting down traffic on the roads and lines in the agencies.

These efforts will reduce the General Fund deficit, considerably. But, we still need cash to pay the hundreds of millions owed to you in refunds.

The people of Guam want their tax refunds now. It is, by far, the single largest request made by constituents. Paying the refunds in full, right now, will, without a doubt, solve the financial troubles of thousands of Guamanians. That money will stimulate the economy, increase homeownership opportunities, and assist those among us who need help the most.

My administration is looking into financing the deficit. The immediate cash infusion will be used to pay tax refunds this year. And with a commitment to fiscal responsibility, we can fund operations and pay tax refunds on time from next fiscal year forward. The most important part of this plan is that it will help a lot of people at a time when Guam must be focusing all its efforts toward the future.

Senators, this is a true economic stimulus, and it could not come at a better time. I look forward to working collaboratively with you to make this a reality.

Our island has been talking about an era of unprecedented opportunity for five years now. The signing of the Programmatic Agreement brought that era upon us. We are no longer in the advent of the buildup. It is here. And the question that has loomed for five years, "are we ready yet?", weighs heavily on us all. The decisions we make now will dictate the course of the buildup. Most importantly, it will set the stage for either Guamanian prosperity or poverty after the buildup. So this is the question I have for us all to ponder: "How can we move forward, if we're stuck in the problems of the present?" This is the eleventh hour. Prosperity is knocking at our door, yet we are not ready to welcome her.

The government, by and large, lacks the service levels needed to foster a new economy and greater economic capacity. We don't have enough law enforcement and public safety officers. There aren't enough classrooms and teachers. The provision of medical services is sorely lacking. The system of care for people living with disabilities is incomplete. Roads, power and water infrastructure require overhauls. And this is only considering the service levels needed for today's population.

Despite the lack of resources, you should know that the executive branch is achieving unprecedented progress on the few resources available. Government workers are being creative. Agency heads are demanding accountability, transparency and improved customer service.

While we are still some time away from our first 100 days report, here are some highlights of the accomplishments of this government since coming to office January 3. None of these include the hundreds of achievements made by the executive branch agencies and the mayors:

- We ordered immediate cash containment throughout the government and cut spending in the executive branch
- My Chief of Staff, Franklin Arriola, instituted a transparency policy throughout the government, removing any existing gag orders, and directing the release of public information timely. Senator Taijeron, as a journalist for life, I am sure you will be our biggest ally in promoting transparency and accountability throughout the government of Guam.
- We introduced two measures to protect unborn children. Thank you, Senator Rodriguez, for conducting swift hearings. I ask that these measures be considered and passed in session this month. Let us not spend another minute waiting to save the lives of unborn children!
- It is the lives of children needing foster care that is driving my wife's special project as First Lady. Christine is coordinating a foster care initiative to find more foster families
- We established economic relations with Taiwan and Australia, with trade missions ahead this year
- Thanks to Congressman Underwood, Congresswoman Bordallo and Assistant Secretary Babauta, 450 acres of land, including the historic village of Hila'an, were returned
- We received unprecedented commitments from Congressional leaders and the State Department on a visa waiver program with China
- We invited Hawaiian investors to bring their money to our island
- In the last two months, the Guam State Clearinghouse, through the leadership of Lt. Governor Tenorio, cleared or is in the process of clearing close to \$45 million in federal grant applications
- He and his wife, Attorney Naoko Shimizu, are leading the Islandwide Beautification Task Force
- We increased the fleet of school buses from 88 to 110
- And we made sweeping and long-overdue changes at the Guam Memorial Hospital

The challenges at GMH are many, but a new management team is in place. We're also in the process of hiring a top-notch and experienced permanent hospital administrator. The current management team is stabilizing the finances and improving patient care. We paid medical supply vendors millions in overdue bills, allowing GMH to restock its supply shelves. And in a sign that financial health is being restored, the hospital made gross payroll for the first time in months. As for the recent controversy regarding patient care, let me just say this. I don't condone sensationalism, but when it comes to the lives of the people and the children of Guam, I will not tolerate anything short of excellence. There must be transparency and accountability in every profession of this government. What happens at GMH, and how its operations affect the patients under medical care, is every bit a matter for public scrutiny. When we go there, when our families go there, we are placing lives in the hands of others. So, to answer anyone's question on whose side I will take on this issue, I will always side with the patients. They are who matter most.

Too many families are coping with cancer, heart disease, diabetes and other afflictions. Too many loved ones bear the burden of disease and the financial expense of treatment. The Medically Indigent Program and Medicaid serve 47,033 lower-income patients who wouldn't have healthcare benefits without these services. I want to thank the doctors who accept MIP and provide care to those who can't afford treatment. As for our elderly, we are actively pursuing Medicare acceptance in the Philippines, where more specialists and surgeons are available for your needs.

I also want to allay some concerns about response to your medical emergencies. We came to office with nearly all ambulances broken and sitting in the shop for repair. The firefighters and medics in the Guam Fire Department have been criticized, prodded and persecuted. Yet, tell me how they can meet their missions to save lives if they do not have the supplies and equipment to do so? It angers me that ambulances—the most important vehicles in this government, were left in disrepair while residents waited in their time of need. It baffles me that medics would be made to take the blame for a problem that deserved attention from the very top. Luckily, Guam Community College, in a display of interagency support, offered to fix the fleet of ambulances. I want to thank Dr. Mary Okada and her team, and my partner, Lt. Governor Ray Tenorio, who provided the leadership to see this through. Senator Palacios, thank you for your partnership to protect the people.

My fellow Guamanians, your lieutenant governor was a proud police officer, who roamed our streets protecting us. It is why I appointed him to oversee the public safety agencies. And he's doing a fantastic job. We'll need his energy, his drive, and his love for public safety in the years ahead. Crime seems to be getting worse, and the buildup in population hasn't even happened yet. We're already short on officers in the police, fire, corrections, customs and youth affairs departments. You have my word the safety of the public always will be a funding priority. From drug trafficking to family violence, from criminal rehabilitation to emergency response, and control of our ports, we will protect neighborhoods. We will protect families. We will protect children.

Vice Speaker Cruz, I know you are off-island, but if you are listening, know that children are safer today because of your leadership. When I signed measures strengthening our laws against the sexual abuse of children, you said my actions were a profile in courage. Your actions, my friend, truly were heroic. You stood up firm, and you fought for what you believed was right. You fought for children in the face of adversity. Our island is proud of you.

Senators, the people care little for our political affiliations. Democrat or Republican, if you send me fiscally-responsible legislation that will protect children, fight poverty and provide for the less fortunate, I will sign it into law. This administration's entire focus is about the future. We will leave in the past the poverty that has burdened so many families. We will retire the problems that have afflicted our community. Together, with unwavering faith in the Guamanian Dream, we can leave our problems behind us so we can concentrate on what matters most: our children, and their future.

On February 21, 1989, Governor Joseph Ada stood where I am standing right now. In his State of the Territory address, he spoke about the sacrifices our ancestors made so that future generations could have more than they ever had. He said:

*“For their sake, let their good works, their compassion and concern, live through us and through our children...into the fullness of years...beyond a million Guam sunrises. Through hard times...it has been our concern for the welfare of our young that has sustained and nurtured us, and kept us alive. We are but one more link in an unbroken chain of generations, united by one generation's love for the next. Let us forge the next link in the chain, together.”*

Fate will have it that 22 years later, a woman answered Governor Ada's call. All her life, she dedicated herself to the preservation of our great culture, so that future generations could know about who we are and what we can become. While she was criticized and maligned for her passion of our past, we saw that it was her love for the future that drove her to fight for Guam. Indeed, she did. And with strength and courage, she took action to allow us a brighter future without sacrificing our past.

My fellow Guamanians, this morning I dedicate the State of the Island Address to the silent courage and kind-hearted heroism of State Historic Preservation Officer Lynda Aguon. I told Lynda I would be honoring her this morning. But, humble as she is, she said the work she is able to do is an honor itself.

Lynda, your actions were a profile in courage. For as long as I am in office, you will have all the support you need to preserve and promote our culture. Guam needs you. You make our people proud. And from those latte stones in Pãgat and Hila'an, from Yigo to Malessó and from Hagåtña to Pago Bay, our ancestors are smiling upon you. And if you listen very carefully to their whispers of gratitude, you will hear them say, “Si Yu'os Ma'ase, Lynda.” Indeed, Lynda, you have God's Mercy. You will go down in history as the officer of this government who stood unwilling to sacrifice her principles, who stood firm until a solution could be found that preserves our heritage while bridging our past to our future.

Under my watch, no government employee ever will be vilified or persecuted for having the courage to stand up for what is good and what is right. Government employees, I will protect you. Ray will protect you. And if we all work together to do what is right, no matter how controversial or unpopular, we can do right by the people of Guam. Democrat or Republican, political supporter or not, you are a member of one GovGuam family. You are a member of my family.

What Lynda did speaks to the greatest values of the Chamorro people. With the weight of history upon her shoulders, she thought and she prayed: “What is the right thing to do for the people of Guam?” And, as she signed the Programmatic Agreement, she bridged the past to our future.

The latte stones at Hila’an are remnants of what used to be. Imagine those pillars of strength hundreds of years ago. Bring to life the illustration of those latte. They stood together on our western shores, with homes filled with Chamorros, prosperous and innovative. Off the coast flew the fastest sea vessels in the world, proudly built by the hands of the people of Guam. Those latte stones are more than signatures of our past. They are reminders of who we are and what we can become. They are silent markers of strength and ingenuity, withstanding centuries of change, calamity and, yes, colonialism. And they stand there, not for us to simply watch as life goes by. Our ancestors did no such thing. They were men and women of action. They did what I call on all of us to do today: embrace the future. Embrace tomorrow.

Today, the military buildup is upon us. \$1 billion in projects will soon start, enhancing our economy. Beyond this is a decade of expansion, which will result in a large increase to our population. The Marines from the same unit that came to liberate our grandparents will return to Guam.

The federal government made significant concessions to us recently. Much of this was the result of commanding negotiations by my Chief Policy Advisor, Arthur Clark. Through the Programmatic Agreement, we preserved Pagat village and caves, and we brought unprecedented resources to historic preservation efforts. Senator Guthertz, please stand and be recognized by the people of Guam for your leadership through this historic time, and undying commitment to the preservation of our history.

Soon my administration will be engaging the military on the return of federal land to Guam. We will explore and seek funding for environmental and renewable energy initiatives, as alluded to in their pillar for a “Green Guam.” Senator Barnes, I look forward to working with you on ensuring this buildup maintains the beauty of the island. And of utmost urgency is holding the military to its promise of a “One Guam” approach to the buildup.

This promise of a One Guam approach, where community improvements are made inside and outside the fence, requires a serious federal financial commitment to this island. We need to fix our roads and bridges. We need to overhaul the water and wastewater systems. We need operational funding to hire more teachers, law enforcement officers, medical professionals, social workers, planners, engineers, and more. I have great faith the military will see its promise through.

For our part to build capacity, we soon will be seeking the funding to outsource a program management office under my direction. All existing management offices will take its direction from this new office. The government of Guam needs the capacity to manage the buildup and the myriad of projects each agency will have to undertake. More importantly, we can't focus on the buildup at the expense of daily services and future planning. A program management office of experts in project and community development can transfer new knowledge to help government officers, ensuring sustainability in planning and program management beyond the buildup.

Simultaneous to our management of the buildup will be our pursuit of longstanding federal issues, which the Defense Department has agreed to help us champion. This includes war reparations, compact impact reimbursements, greater control of our exclusive economic zone, veterans claims and benefits processing services on Guam, visa waiver programs and binding political status commitments. I am so grateful to you, Assistant Secretary Babauta, Congresswoman Bordallo, and Senator Blas. You have been outspoken, consistent, tenacious and unwavering in fighting for the resolution of these unresolved issues.

Admiral Bushong, General Doucette, Colonel Loynd, and Captain Sparks, I want you to know it's been a great pleasure working with you. You've shown Guamanians great respect and deference. You and the sailors, airmen, coastguardsmen, and Marines under your commands have lived up to the ideals for which this country stands: blind justice, freedom and democracy. When we talk about the Marines coming, we must all consider the Marines who are already here, those Guamanians who served this country and our island so well—Guamanians, like John Gerber, who bridged our proud history with the United States Marine Corps. When the Marines come, I want to be the first person on the tarmac to welcome them and say, "Hafa Adai my fellow Guamanians."

Unfortunately, as history shows, it is the larger federal establishment, whose colonial mentality has degraded the people of Guam time and again in our history as a territory of the United States. I highly doubt the 1,744 Marines and soldiers who gave their lives in the Battle of Guam died so that the people they liberated could be colonized for eternity. They, and every United States freedom fighter, fought and died for freedom.

It has been 67 years since the Liberation of Guam. In those 67 years, we had to march for our citizenship, which isn't even full citizenship. We had to fight to elect our own senators, later, our own governor, and our non-voting delegate to the House of Representatives. We had to settle for an Organic Act, enacted by a Congress without a single vote from the people it would govern. Our preliminary exercise of self-government through the Commonwealth Act was rejected. War claims were denied. Even the rich waters around our island, where Chamorros have sailed and fished for thousands of years, are restricted from us as other nations rob us of our resources and make billions in profit.

But it is the waters in Guam that raised my ire just days ago. Congress, in the dead of night and without even the courtesy of informing our Congresswoman, decided it should make a profit out of Guam by selling to us what is rightfully ours. I have news for Congress. The water at Fena does not belong to you.

I will fight to ensure Congress does not sell us the water, poured down by God Himself from the Heavens. Not one penny will be spent to pay for what is rightfully ours. And if we have to, I will take Senator Tom Ada and the other senators on a march to Fena, and go as far as the United States Supreme Court to protect the water that belongs to the Guamanian people.

Congresswoman Bordallo, please take a message from me back to my Republican colleagues in the House of Representatives. Remind them that our party stands against imperialism and the over-reaching arm of the federal government.

This, my dear people, is yet again a clear reason why we must exercise our right to self-determination now. I will be working with Senators Respicio and Pangelinan on funding our long-awaited plebiscite. My administration will be working with Congresswoman Bordallo on securing a commitment to bind the federal government to honor our rights, in addition to the promise to fund necessary education campaigns.

Admiral Bushong, General Doucette, Colonel Loynd, and Captain Sparks, please know that the men and women of the United States Armed Forces always will be welcome to our shores. You are Guamanians, too. It is colonialism we detest, and self-determination we desire most. The buildup will move forward and progress will continue, because unlike elements of the federal establishment, we are Americans loyal to the very tenets of this country.

The military buildup cannot, by any measure, be seen as the height of prosperity in Guam. It cannot dictate the course we take to build our future. We cannot forsake our responsibility to the next generation to build a sustainable tomorrow. We cannot limit our children and grandchildren to someone else's plan. As I've said many times before, the military buildup cannot be seen as the 'be all, end all,' of Guam's prosperity.

There is something even greater than the buildup, a responsibility much more pressing than the \$15 billion in investments over the next decade. It is the education of our children. This is the key to our prosperity. This is the gateway to the Guamanian Century.

Children in today's classrooms will graduate into a decade of wealth that will end with the military buildup. In 2020, it will be beyond their comprehension if our generation allowed the prosperous times to cease when the last Marine arrives. Our children will wonder what we did to prepare them for their future. They will ask why we squandered an opportunity to leave them an island full of promise and reward. Let us answer those questions today, not as politicians or grand stewards, but as parents, role models and educators. Speaker Won Pat, your lifelong service to education is second-tonone. I want to thank you for the collaboration you have shown thus far, and your commitment to working with everyone in the name of our students.

The greatest challenge of our time is to prevent the cruel cycle of poverty from spreading to the next generation. While we tend to the services for those most in need now, our focus must be on providing for children in today's classrooms. This is our greatest challenge, because of the perennial funding shortages for the Department of Education, University of Guam and Guam Community College. Without a doubt, these three institutions are the most important agencies of this government to the future prosperity of the island.

Yet, there aren't enough resources to hire the educators they need. There has been inadequate support for their academic programs. Master plans were created over the past two decades to bridge children from classrooms to careers, and support languished from the very top. Unlike any other community in the world, the economic prospects of our island are certain. There is \$15 billion coming to this island, yet there is no plan to build an economy to sustain us after that investment. There is no projection of the industries of the future. There is no projection of the workforce needed to build those industries. Outside the education community, there is no effort to educate your children into this workforce. My dear people, this is our big opportunity! We can finally hand to the next generation an island better than we found it.

In the coming days I will be issuing an executive order launching the Classrooms-to-Careers initiative. It will develop, through an unprecedented collaboration of the community, an economic master plan linking industry development to workforce creation through educational excellence. None of these three pillars should ever be viewed apart from the other. They are integral and married to the next. A strong economy is the product of a strong and educated workforce. That workforce is the outcome of an education second-to-none. Senator Yamashita, I have always admired your perspective on leadership. It reminds me of the late Speaker Tony Unpingco's reason for service. It's about family; it's about children. I can see the concern for our children's future in your eyes. You were instrumental in crafting this policy, and you will be instrumental in ensuring its success.

By the end of this initiative, we will have a projection of the economy of the future, and the industries that will drive it. We will project the human resource requirements to build these industries, identifying the types and numbers of career paths and jobs needed. We will give this information not just to our government, but also to the private sector so all of Guam can build the new economy. Senator Mabini, Senator Duenas and Senator Tony Ada, we need your commitment to workforce and economic development to see this process through. We will hand that information over to a consortium of educators and analysts to build the governance and curriculum that will educate children into this future.

Key to this initiative will be the University of Guam Center for Island Sustainability and the Governor's Council of Economic Advisors, which I will empanel soon. My office and my council will drive Classrooms-to-Careers with UOG. Economic growth cannot exist without a university empowered to partner with the community. That community involves industries, chambers of commerce, the Guam Trades Academy, consumers, the local and federal government, and regional and international affiliates. No other institution in an economy has the advantages and access to resources of a university. UOG, under the leadership of Dr. Robert Underwood, is the breeding ground for those who will build the new economy. It possesses every resource this community needs to realize the great future we all

envision. In our administration, it will be an indispensable partner in the economic policy of the island and the region.

We must get our financial house in order, because upon the completion of this plan and by fiscal year 2013, I want the resources of this government marshaled around the children of Guam. It will be a sizable investment, but who among us can place a value on our desire to give our children more than we ever had?

We want them to be anything they can be. Doctors, teachers, engineers, medics, nurses, police officers, business owners, manufacturers, exporters, flight technicians. We want them to compete against the best in the world and win. We want them to reach the ends of the earth, and to plant our flag on the frontiers of space.

And perhaps if one day another Guamanian follows in the footsteps of Commander William McCool, and she looks for her homeland from the galaxy above, here's where she'll find it: from the heavens, look to the Pacific and find the brightest star in the sea.

Everything starts with a dream. We are not so defined by our problems today, that we cannot reawaken the pride of our ancestors within us.

Yes, we have problems. People are struggling and suffering. We are not a big nation like China, or a rich country like Singapore. But we are Guamanians, each one of us rich in spirit and deeply rooted in a culture second-to-none in the world.

I began my speech today telling you about the problems many people face. But, there is a greater power at play: a driving force greater than the poverty people suffer—and it is the love and charity of all Guamanians.

I see it all around us. We do what we can to help others, even though we don't have much ourselves. I've seen the cousins and friends of Guamanians suffering from disease, raising money to get off island care. I've seen you selling raffle tickets and collecting donations at the door for medical fundraisers to help someone. I've seen you volunteer to bring hot meals to senior citizens who are all alone, and have no one else to talk to. I've seen you tutor and coach children who never thought much of themselves. I've seen you caroling at St. Dominics and giving presents at GMH to bring joy into the lives of the suffering. The gentleman in the Camry, I saw you park at the intersection of Route 3 and Marine Corps Drive to feed the Corner Dog. I've seen children, whose future is challenged by the poverty of today, picking up trash, planting trees and protecting our oceans.

These are all stories about the common decency of Guamanians who give charitably to others in their time of need. For those most vulnerable, it is the all-too-often unspoken story of their struggle that gives rise to the true spirit of Guam. Let us be their voice.

It is in our hearts where we find a deep love for all of Guam. Relative or stranger, friend or foe, the strength of this island is in the character of each one of you—difference makers and living gestures of goodwill.

No matter what we face or how hard times may be, we must have faith that God has anointed us to a special place in humanity. We were meant to make this our Guamanian Century of prosperity. Make no mistake about who we are or where we come from. We are Guamanians.

There is something to be said about the greatness of Guamanians.

Sometimes it feels as though we've been taught to believe that we need federal support or someone else's hand. That our way is primitive and the federal way is perfect. Quite to the contrary, the world, through all its upheavals, could take a lesson from Guamanians—from our resolve and our faith, from our ability to see past the troubles and care for one another without hesitation.

The late Governor Ricardo J. Bordallo, on April 11, 1983, said “We can remain as some might prefer that we remain—simple island people with simple needs who can be placated with simple gratuities....Or we can fulfill the destiny of the Ancient Chamorros and build a community that will set an example for the rest of the world.”

If all the world were a nation of Guamanians, there would be no war, there would be no drought of charity, and there certainly would be good food everywhere.

When Christine and I are home with our children, we count our blessings. You, who dwell in the shadow of prosperity and hope, need not believe your burden is too great to bear. As young as our administration and this legislature are, we will do right by you. Your burden is our burden. Your prosperity is our aspiration. Your children are our hope. Your tomorrow is our every waking moment.

Here is to the brightest star in the Pacific, and the eternity of sunrises above the endless horizon of every Guamanian.

Saina Ma'ase. Si Yu'os en fan'binendisi. Biba Guam!
