3.5.4. FACULTY OF SCIENCE AND TECHNOLOGY

Preliminaries

- Rwanda vision puts stress on the TIC for a durable national development. The programme aims at producing computer scientists endowed with technical capacities, which were a not highlighted in the past in most of the institutions local programmes. This programme will specially aim at covering that aspect. It is oriented towards that development of the capacities required in public, private sectors as well as in that of partnership in the field of TIC in order to find out solutions to their problems thanks to the means provided by the technology of information and communication.
- ULK central mission is to be totally involved in the development of capacities in sciences and Technology in order to bring solutions to the needs of Rwandan Community That programme fits the Vision of Rwanda Government and ULK Mission.
- That programme which has a vocational vision will provide the students with practical knowledge which will get them to be efficient. It will help them to become competent and competitive on the labour market at local and regional levels.
- The programme notably aims at becoming a practical course oriented towards awarding diplomas. At the level of licence, the program contains a great deal of theories and advanced courses of mathematical feature so that the laureates can easily have access to higher diplomas; which was not the case in past when candidates wanted to have access to post-University diplomas; The was no exit to go ahead . The admission requirements for sciences options will consist of having a minimum of 2 marks diploma.

3.6. COMPUTER SCIENCE CENTRE

Our teaching system is oriented towards finalization and professionalization. In this connection, ULK opened a Computer Science Centre where students are trained to new technologies of information and communication processing.

ULK/ Kigali Computer Science Centre has got 300 computers at the disposal of students and lecturers for different tasks

The Computer Science theoretical course is reinforced by practical exercises.

Access to the Centre is free, which offers more learning opportunities to our students. The computer hall is opened even on week-ends.

Note also that this centre comprises a Cyber net-café with 42 computers connected to the internet.

Internet connection allows the University community to carry out researches, documentation and exchange with the rest of the world. Offices are also connected to internet.
