Foreword

The Department of Census and Statistics (DCS), carried out a special enumeration in Eastern province and in Jaffna district in Northern province. The objective of this enumeration is to provide the necessary basic information needed to formulate development programmes and relief activities for the people.

This preliminary publication for Batticaloa district has been compiled from the reports obtained from the District based on summaries prepared by enumerators and supervisors. A final detailed information will be disseminated after the computer processing of questionnaires.

This preliminary release gives some basic information for Batticaloa district, such as population by divisional secretary's division, urban/rural population, sex, age (under 18 years and 18 years and over) and ethnicity. Data on displaced persons due to conflict or tsunami are also included. Some important information which is useful for regional level planning purposes are given by Grama Niladhari Divisions. This enumeration is based on the usual residents of households in the district. These figures should be regarded as provisional.

I wish to express my sincere thanks to the staff of the department and all other government officials and others who worked with dedication and diligence for the successful completion of the enumeration. I am also grateful to the general public for extending their fullest co-operation in this important undertaking. This publication has been prepared by Population Census Division of this Department.

Special Enumeration-2007
POPULATION INFORMATION ON BATTICALOA DISTRICT

BASIC SUMMARY RESULTS

1. Introduction

The Census of Population and Housing –2001 was unable to carryout completely in Northern and Eastern provinces. In order to overcome the lack of data required for ongoing development programmes in Northern and Eastern provinces, Department of Census and Statistics has carried out a special enumeration in Jaffna district in Northern province and in Batticaloa, Trincomalee and Ampara districts in Eastern province. This is a complete enumeration covering all the persons who are usual residents of households in the district. Usual residence is defined as the housing unit or collective living quarter at which the person usually lives, i.e. sleeps, keeps his clothes and other belongings etc. It is the residence from which a person generally goes to work or if a student, attends school. This 'de jure' method of enumeration differs from the 'de facto' approach used during the last Censuses in which people were enumerated during a specified period (usually 6 hours) at the place where they are found irrespective of the usual residence. Basic demographic information such as date of birth, sex, marital status, religion, ethnicity, relationship to head of household, number of displaced persons, reason for displacement etc. were collected through a carefully designed schedule. An enumerator for each Grama Niladhari (GN) division and a supervisor for 10 GN divisions were appointed with the help of District administration. The enumerator listed all the building units and collected the information visiting each and every building unit within the area allocated to him/her. Close supervision has been maintained throughout the enumeration by supervisors. The necessary administrative arrangements in the district were carried out by the District Secretary and Divisional Secretaries and all the technical guidance was provided by the staff of the Department of Census and Statistics. Enumeration was carried out during the first three weeks of August 2007.

2. Population Size and Growth

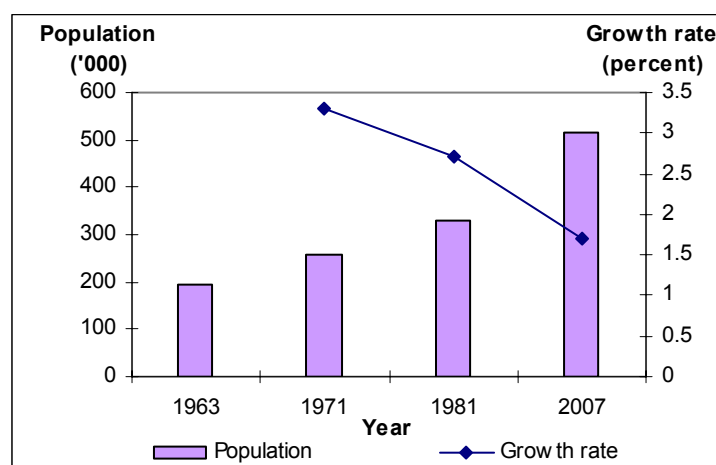

The total population enumerated in the Batticaloa district is 515,857. This represents 56.2 percent increase since the last Census in 1981. The average annual growth rate during the period of 1981-2007 shows a decline from 2.7 percent to 1.7 percent. The enumerated population, intercensal increase, and average annual growth rates are shown in Table A and Figure A for the district.

Table A : Total population, percentage increase and average annual rate of growth, 1963 - 2007

3. Population Density

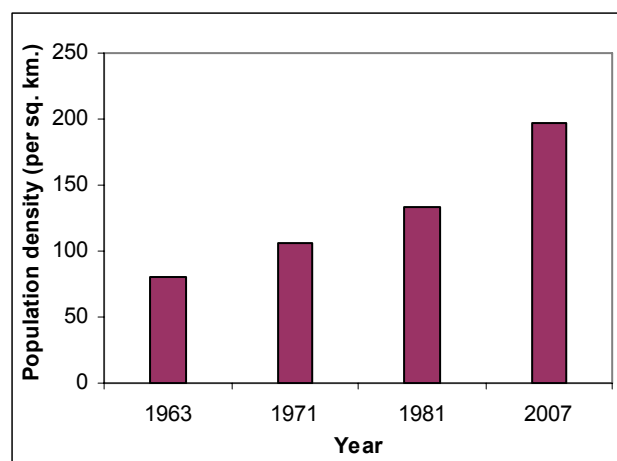

Population density measured as the number of persons per unit area of land is shown in Table B and Figure B. Population density stands at 198 persons per square kilometer in the district. Population density is shown a significant increase from 1971 to 2007.

Table B : Population density, 1963 - 2007

Year	Population	Population density (persons per sq. km.)
1963	196,189	81

4. Population Distribution

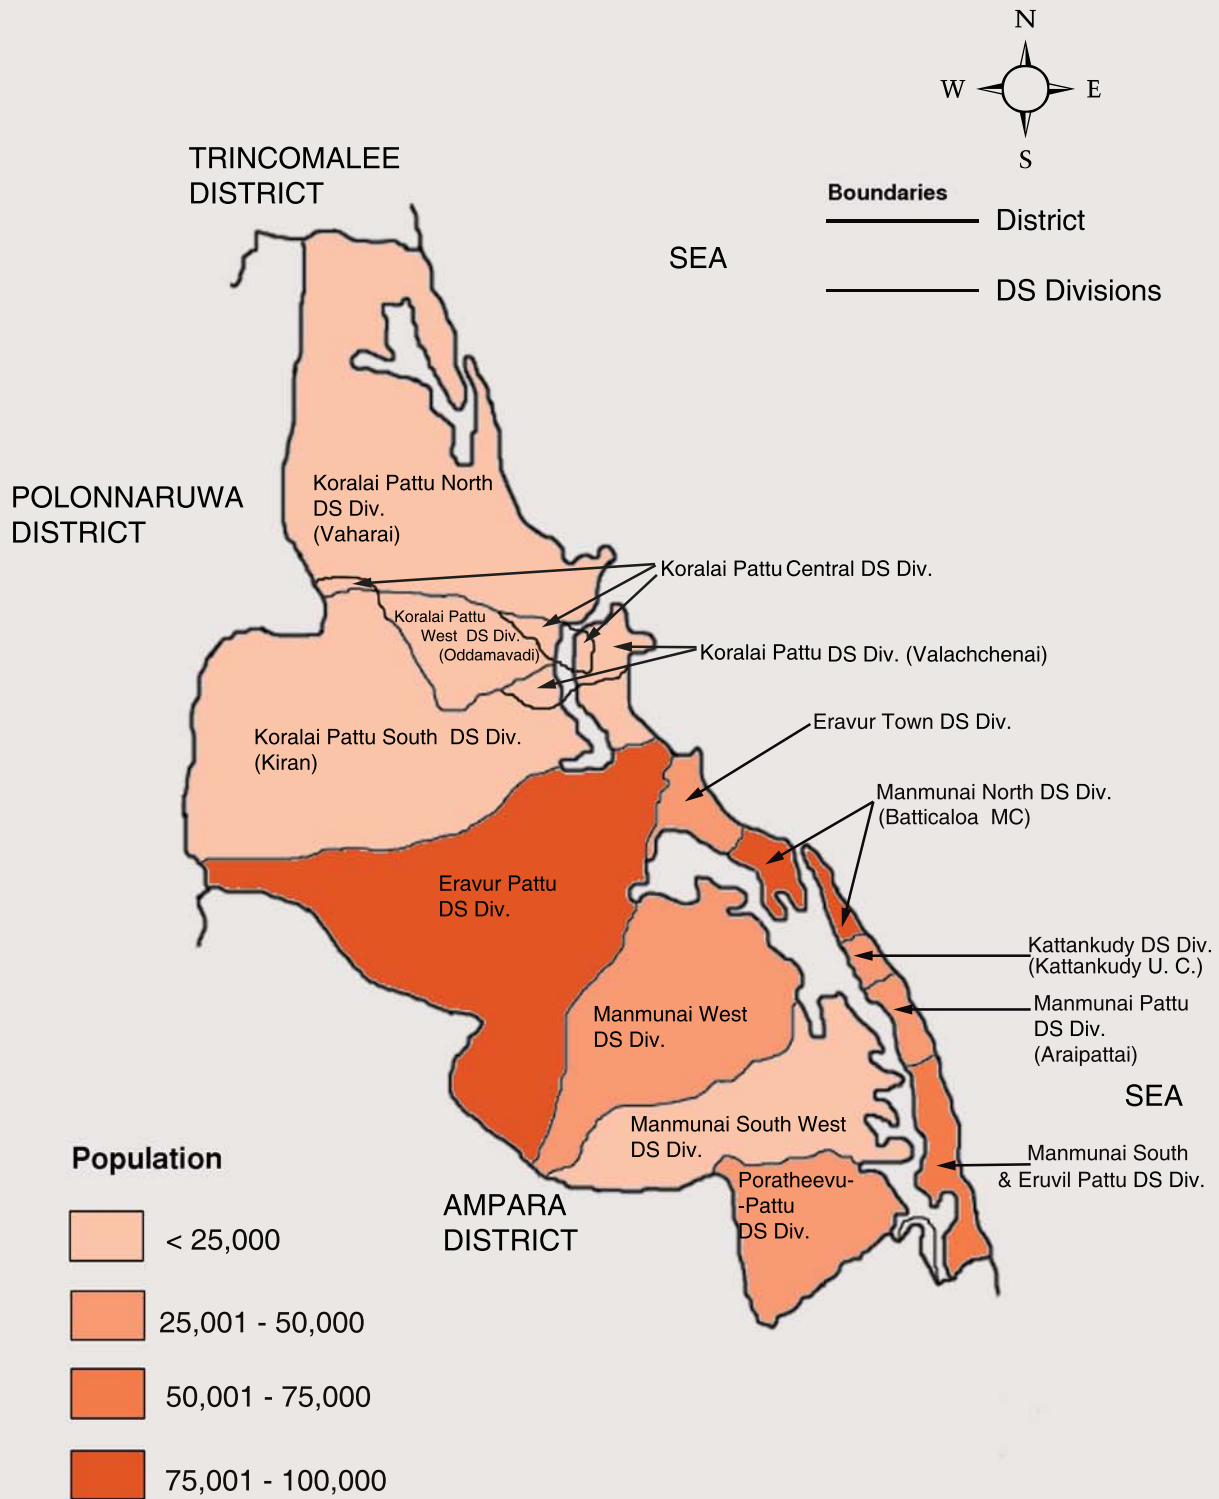

Number and percentage of population by Divisional Secretariat (DS) division is shown in Table C. Manmunai North DS division reports the highest population while Koralai Pattu South (Kiran) DS division reports the lowest population in the district. The pattern of the population distribution is shown in Figure C.

According to the current definition, urban sector comprised of all Municipal and Urban Council areas. The definition of urban sector is not comparable between 1981 Census which is the last completed census for Batticaloa district and this enumeration. This happened as a consequence of abolishing town councils which were treated as urban in the 1981 Census and absorbing the administration of such areas into Pradesheeya Sabhas which are considered as rural since 1987. Therefore the Urban population figures and percentages should be interpreted cautiously.

Rural	387,875	75.2

Table D shows the population distribution by sectors. Urban and Rural percentages are 24.8 and 75.2 respectively.

5. Age-Sex composition

At this preliminary stage, age distribution is available only as dichotomy, i.e. population under 18 years and 18 years and over.

Number and percentage distribution of population by age, under 18 years and 18 years and over by divisional secretariat divisions are shown in Table E. It is seen that 39.9 percent of the population are under 18 years and 60.1 percent are 18 years and over.

Sex composition of a certain population refers to the distribution of people according to sex. A useful measure of sex composition is the sex ratio, which is defined as the number of males per 100 females in the population. Population by sex and sex ratio by DS divisions are shown in Table F.

Male population of Batticaloa district is less than the female population. This is the pattern for all the DS divisions, as the sex ratios are below 100. Among 14 DS divisions, of the district, the highest sex ratio of 99.2 was recorded for Koralai Pattu Central divisional secretariat. Eravur Town DS division also recorded a sex ratio of 99.

Number and percentage distribution of population by ethnicity from 1963 to 2007 is shown in Table G. It is seen that 74.0 percent of the population in Batticaloa district are Sri

Lanka Tamils in 2007. Sinhalese and Sri Lanka Moor comprises of 0.5 percent, 25.0 percent respectively. (See Figure D).

Figure D : Percentage distribution of population by ethnicity, 2007

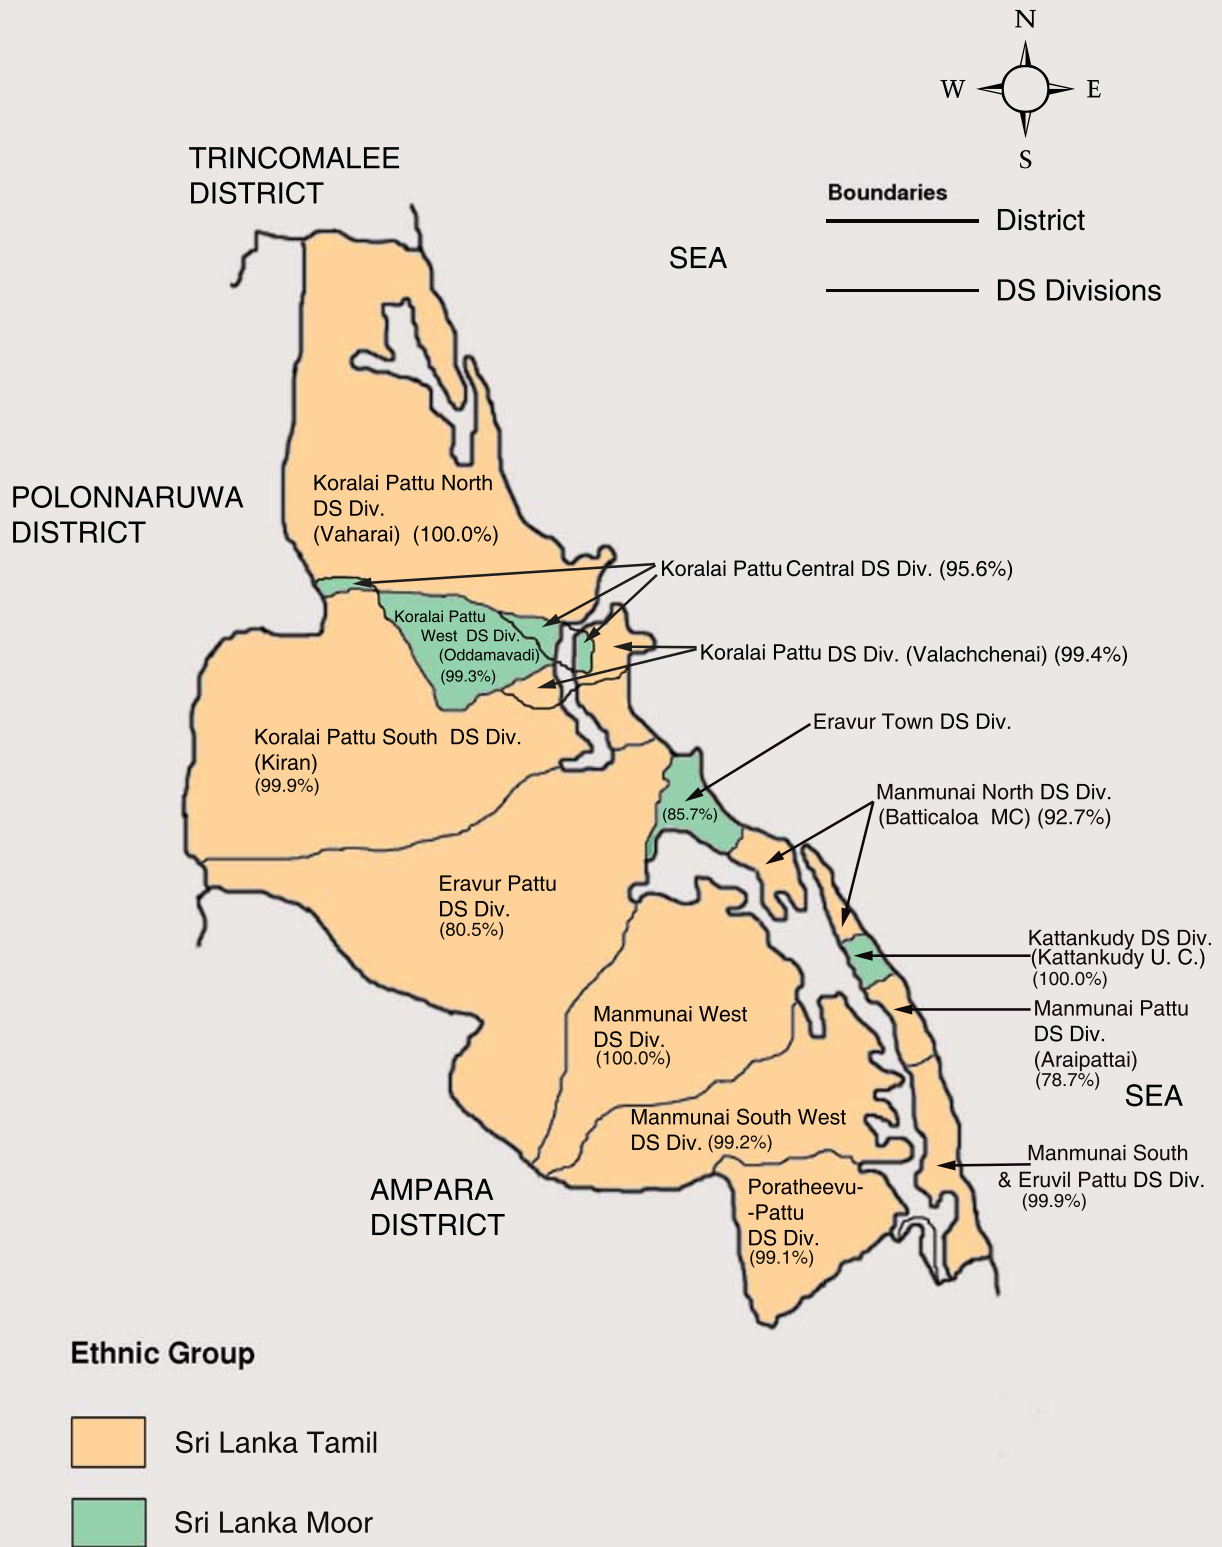

* Including Indian Tamil

Number and percentage distribution of ethnicity by DS divisions is shown in Table H. Out of 14 DS divisions in the district, Sri Lanka Tamil is the major ethnic group in 10 DS divisions. In the rest of 4 DS divisions viz Kattankudy, Koralai Pattu West, Koaralai Pattu Central and Eravur Town, Sri Lanka Moor is the major ethnic group. Percentage of major ethnic groups of the population by DS divisions are shown in Figure E.

One who change his/her place of residence due to conflict or tsunami is identified as a displaced person. People are completely displaced in 23 Grama Niladhari divisions which belong to 3 DS divisions in Batticaloa district mainly due to conflict. Out of total 47,558 displaced persons in the district, 40,833 are displaced due to conflict. Rest are displaced due to tsunami disaster. These displaced persons are living in 48 welfare centres situated in 7 DS divisions in the district at the time of enumeration . Highest number of displaced persons (40.0 percent) are recorded from Eravur Pattu DS division. This is schematically shown in Figure F.
