

Oilseeds: World Markets and Trade

New Crop U.S. Soybean Sales Fall on Surging South American Exports

As of the beginning of August, U.S. outstanding sales for the next marketing year are running at only half the volume observed over the past two years. This is the slowest pace of new crop sales since 2008 and has occurred despite ample supplies and growing China demand.

Several factors have contributed to the slow sales seen thus far. September 1 U.S. stocks are forecast to be over twice as large as observed in the previous year. These abundant stocks reduce the risk that buyers face in securing supplies, making it less critical to book sales in advance. Additionally, the United States is facing strong competition from record South American supplies. The weakening Brazilian real has continued to spur sales while Argentina's exports are up significantly from last year. With record monthly South American exports expected through September, early season U.S. sales are expected to remain sluggish.

OVERVIEW

2015/16

Global soybean production is raised this month as a higher U.S. yield resulted in a larger production forecast. Global rapeseed production is adjusted lower due to reduced forecasts for Canada, Australia, the EU, Belarus, and Ukraine. Soybean trade is forecast to reach new highs despite the lower U.S. forecast, as record South American supplies and lower prices spur additional sales. Significant increases in sales to China, the EU, and Iran are anticipated. Global soybean stocks are reduced, reflecting strong growth in protein meal and vegetable oil consumption. The U.S. season-average farm price is reduced to \$9.15/bu.

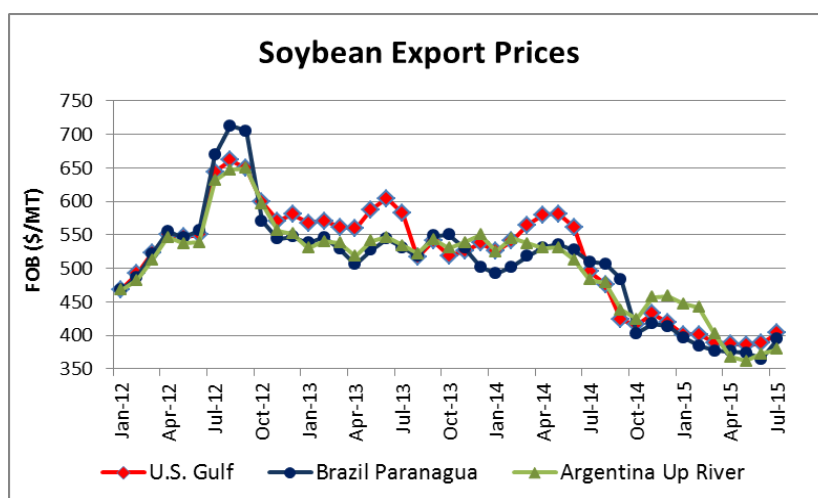

2014/15

Global soybean production is up as record yields pushed Argentina's production estimate higher. Global exports are raised in response to Brazil's record export pace and rebound in Argentina trade. Larger purchases by China, the EU, and Iran led the way. Global soybean ending stocks are reduced in response to growing consumption and trade. The U.S. season-average farm price is unchanged.

SOYBEAN PRICES

U.S. export bids, FOB Gulf, in June averaged \$404/ton, up \$15 from last month.

As of the week ending July 30, U.S. 2014/15 soybean commitments (outstanding sales plus accumulated exports) to China totaled 29.8 million tons compared to 28.1 million a year ago. Total commitments to the world are 50.6 million tons, compared to 46.1 million for the same period last year.
