Foreword

Population Census is indeed the only recognized and reliable source of quality database in Bangladesh for complete data related to population size, spatial distribution and all basic characteristics of population from national level down to village. Bangladesh Bureau of Statistics (BBS) had conducted the fifth Population and Housing Census during the period from March 15-19, 2011 starting at the zero hour of 15 March, 2011. The initiative of publishing **Union Statistics Report** has been undertaken considering the importance of union level data and information apart from national level in the process of determining policy-strategy and decision-making. The **Union Statistics Report** is an effort of the national Series Publication.

I believe that the wide array of census findings presented in this **Union Statistics Report** will be useful to planners and policy makers in formulating, implementing and evaluating responsive development plans and programmes for human resource development and overall development. I also believe that this report will be helpful for all users both at home and abroad.

The dedicated efforts of personnel employed in the census have tremendously helped for the success of the census. Moreover, the participation of people at large also plays a vital role in this operation. I deeply acknowledge the active participation and commendable cooperation of all the government and non-government organizations, district and field administration, different local government bodies, print and electronic media of the country for making the census possible. I also express my gratitude to the European Union (EU), United Nations Population Fund (UNFPA), US Census Bureau and U.S. Agency for International Development (USAID) for their financial and technical support for completing this huge task. I express my heartfelt gratitude to Honorable Minister, Ministry of Planning for his effective guidance and significant cooperation throughout the census operation. We are also grateful to the Cabinet Secretary and the Senior Secretary, Ministry of Public Administration for their active cooperation.

The Population and Housing Census had made best use of the modern IT technology. In order to minimize time and manpower required, modern technology like ICR (Intelligent Character Recognition) machines and iCADE (Integrated Computer Assisted Data Entry) system were used in capturing the census data. CSPro software was used in analyzing and processing of data. In earlier censuses, it took a long time to publish the final report following the enumeration. We had a plan to reduce the gap by publishing all reports including Community and Zila Reports for Population and Housing Census 2011, within the shortest possible time. The census preliminary report has been published within 4 months of data collection and census data for the whole country up to mauza/village level has been disseminated through BBS website within 15 months after the enumeration. I express my thanks to Director General and Deputy Director General, BBS, Project Director, Population and Housing Census 2011, members of the Editorial Committee, Editors' Forum and all other officers and staffs involved in the efforts and finally bringing out this report in time.

Preface

Bangladesh has a long tradition of conducting the population census on decennial basis since 1872. The fifth population census of Bangladesh and fifteenth in the region, following the decennial periodicity, was conducted during March 15-19, 2011. The main objective of the census was to collect information on the basic characteristics related to housing, households and population for developing a comprehensive database for all development planning and human resource development programmes as well as economic management.

Population and Housing Census 2011 was conducted in three phases. In the First Phase, basic data about all households and individual members of the households were collected through ICR formatted questionnaire during March 15-19, 2011. In the Second Phase, quality and coverage of the main count were verified through a Post Enumeration Check (PEC) survey during April 10-14, 2011. For the first time in the census history of Bangladesh, PEC was conducted by an independent organization, namely Bangladesh Institute of Development Studies (BIDS). In the Third Phase, detailed socio-economic information was collected by administering a long machine readable questionnaire in a sample survey held during October 15-25, 2011.

The preparatory works of the census was started by Bangladesh Bureau of Statistics from mid 2009 with updating maps and area Geo-codes. The preliminary checking on the census questionnaire was done in several times through field operation. The census questionnaire was pre-tested in selected areas with the participation of some experts of the "Technical Committee". The views of the users' and experts' were taken into consideration for finalizing the questionnaire. The census field operation and quality of census inputs were tested under two zonal operations. Accordingly the questionnaire was designed in machine readable format with the technical assistance of US Census Bureau and was printed with the financial assistance of European Union (EU) through the United Nations Population Fund (UNFPA).

The entire country was divided into 2,96,718 Enumeration Areas (EAs) with the help of enumeration area maps in order to ensure full coverage, effective management and close supervision. There was a supervisor for every 6 or 7 enumerators to supervise their works. The Geo-coding system developed in the previous Census was checked, edited and computerized.

Modified Defacto Method was adopted in enumerating the population. Zero hour at the night of 15 March, 2011 was considered as the census moment. On the other hand, the hours between census moment and the following morning (6.00 a.m.) was considered as the census night. Basically the floating people were counted at that night for avoiding omission and duplication.

Census committees were formed at Zila, Upazila, Paurasava, Union/Ward levels to ensure participation of local administration and local bodies. Moreover, supervisors and enumerators were appointed from amongst the local unemployed youths and teachers.

At national level, a standing technical committee comprising of well-known census experts and users of census data was formed to provide technical support to BBS in planning, designing and executing the census. A seminar-cum-expert consultation was held at BBS with the census data users, experts, researches and educationist to get their views for finalizing the census questionnaire and other policy related issues.

A nationwide publicity campaign was carried out before census through posters, banners, leaflets, brochures, features, films, miking, radio, television and newspapers for the purpose of creating public awareness and motivation.

I express my heartfelt gratitude to the Honorable Minister for Planning for his effective guidance and significant cooperation in making the census a success. I express my deepest gratitude to Secretary, Statistics and Informatics Division (SID) for his whole-hearted support and cooperation to the census. Moreover, members of 'Steering Committee', 'Technical Committee', Consultants and also to participants of the Seminar-cum-Expert Consultation for their valuable contributions for finalizing the questionnaire and the census programme. I am thankful to all members of the sub-committees on publicity, sampling and report writing for their valuable contribution. I am also thankful to our mass media, local bodies and the people at all level for their whole-hearted supports to the census.

Finally, I like to thank Deputy Director General, BBS, Project Director, Population and Housing Census 2011 Project, members of the 'Editors' Forum', 'Project Directors' Forum', other officers and staff members of BBS who vigorously helped in implementing the census activities and processing the census data with their relentless efforts to make the census a success and bringing out this report within a very shortest possible time.

Map of Bangladesh

CHAPTER – 1

Introductory Notes on Census

1.1 Introduction: The population and housing census is the unique source of reliable and comprehensive data about the size of population and also on major socio-economic & socio-demographic characteristics of the country.

The population and housing census provides information on geographic and administrative distribution of population and household in addition to the demographic and socio-economic characteristics of all the people in the country. The data from the census are classified, tabulated and disseminated so that researchers, administrators, policy makers and development partners can use census data in formulating and implementing various multi-sectorial development programs at the national and community levels

The purpose of Union Statistics Report is to disseminate census data by ward in urban areas and union in rural areas. Data on all key variables namely area, household, population by sex and selected age group, literacy and married woman have been presented in this report. The users will find this report as a valuable reference document for formulating plans and programmes for welfare and well-being of the common people.

1.2 Census and its Periodicity: Bangladesh Bureau of Statistics is the national statistical organization for conducting national census. In 1872, the practice of census was started in Bangladesh territory. There after, another census was conducted in 1881 and since then the decennial periodicity of census was maintained with the exception of 1971 which was held up and delayed till the year 1974 because of the Liberation War. The 1974 census was the first census in Bangladesh after her emergence as an independent state in 1971. Bangladesh went back to the decennial periodicity and conducted the second, third, and fourth censuses in 1981, 1991 and 2001 respectively. The Population and housing census of 2011 is the 5th in this census series.

1.3 Objectives: The population census was carried out to achieve the following objectives:

- ▶ to count the population and the number of households of the country;
- ▶ to obtain data on demographic characteristics by gender and residence;
- ▶ to obtain data on disability;
- ▶ to collect information on housing, household structure and other selected facilities;
- ▶ to generate data on gender specific occupation and participation in economic activities;
- ▶ to gather basic information on ethnic people and
- ▶ to prepare socio-economic database for policy makers, planners and researchers etc.

1.4 Census Phases: The census data collection was completed in three phases.

Phase I - Main Count: Collection of basic information for all households and individuals using an ICR formatted questionnaire.

Phase II- Post Enumeration Check (PEC): A PEC survey was carried out to measure quality and coverage of the main census count. The survey was conducted immediately after receiving filled-in census questionnaires at Dhaka head office. For the first time in census history of Bangladesh, the PEC was conducted by an independent organization, namely Bangladesh Institute of Development Studies (BIDS).

Phase III- Sample Census: A sample census (large scale sample survey) was carried out at the last phase. For this undertaking, ICR formatted long questionnaire was adopted to supplement the data of the main census. Being a programme of much wider information coverage, the sample census was carried out with the detailed data relating to population and household characteristics including fertility, mortality, morbidity, migration etc.

1.5 Census Planning: The census preparatory work programme was mounted in the mid of 2009. A census work-plan was prepared defining in details the activities to be performed and completed by specific dates in each calendar year. Field instruction manual and training manual were prepared for census workers of different stages. These manuals provided precise guidelines regarding: (i) duties and responsibilities to be performed at all levels, (ii) lessons to be given when imparting trainings to field supervisors and enumerators, (iii) mapping and geo-coding operation to be done, (iv) how questionnaire to be filled-up, (v) enumeration and supervision disciplines to be adhered, (vi) census workers to be put in place, (vii) census materials be distributed, (viii) Committees at different levels to be formed, and (ix) publicity plan to be implemented.

1.6 Mapping: The updated and well defined map is one of the basic instruments to succeed any population and housing census. The primary objectives of the mapping operation are (i) to update the produced GIS maps and delineate enumeration areas (EA) in the country to facilitate the smooth counting of inhabitants during enumeration and (ii) fundamentally to ascertain that all areas are covered and that everyone in the country is counted with minimal possibility of under or over counting. Household counting for EA demarcation and concurrent EA mapping activities were carried out in two phases beginning from May, 2009. The first phase, confined exclusively to rural areas, necessitated updating and preparing of union, mauza, and control maps. The second phase was initiated only for urban coverage in view of the complex task associated with household and EA boundary identifications due to quite dense habitations in urban localities. All urban ward, mahalla, and control maps were updated and/or newly prepared showing current boundaries. BBS used GIS Maps for field operation for the first time in census history of Bangladesh. GIS Maps Project of BBS produced the maps from aerial photography. The updated maps were used for zonal operations. All maps were finally checked and updated during zonal operations. The updated EA maps were used for main census, PEC and sample censuses.

1.7 Designing and Pre-testing of Questionnaire: The contents of census questionnaire were determined based on data needs assessed on government current priorities and also recommendations of technical committee and data users. Several preliminary checks of the questionnaire were made locally. Lastly, the questionnaire was pre-tested in selected areas with participation of some experts of the technical committee. Satisfactory pre-test results were resolved in finalising a two module questionnaire for adoption in the census. Accordingly the questionnaire was designed in machine readable format with the technical assistance from US Census Bureau and was printed with the financial assistance from European Union (EU) through United Nations Population Fund (UNFPA).

1.8 Questionnaire: A two module questionnaires was used for the main census. As many as 25 questions were included in it. A total of 11 questions relating to housing and household characteristics were included in household module. The remaining 14 questions focusing on individuals were incorporated in individual module. The items of the questionnaire were identification, address of household, number and structure of house including tenancy, toilet facility, electricity connection, ethnicity, individual age, sex, religion, marital status, literacy, disability, education and working status. All data on the items were collected through door to door visit and interviewing head of the household or responsible member in absence of head of the household.

1.9 Zonal Operation: Two zonal operations were executed in both urban and rural areas. These operations helped in setting up a system germane to: (i) involve local people in the census, (ii) interact with local bodies, and (iii) ensure efficient field work arrangements.

The first zonal operation was held during May-July 2010 in 3 (three) phases. In first phase it covered 39 Zilas, second phase 17 Zilas and third phase 8 Zilas. During first zonal operation the following tasks were completed:

- a) Updated of geo-code list;

- b) Updated of Mauza and Mahalla maps with demarcation of EA boundaries;
- c) Prepared the supervisors' sketch maps;
- d) Prepared the primary list of local enumerators and supervisors with names and addresses and
- e) Identified the depopulated Mauzas and Mahallas.

Besides, Zonal Officers introduced themselves to the public representatives of different local bodies and local administration and sought their support and cooperation in completing census activities successfully. They extended all sorts of cooperation and gave their best effort for the completion of field activities of census in Bangladesh.

The second zonal operation was mounted just three months prior to census, i.e. November-December 2010, to conduct the main census in March, 2011. This schedule ensured the smooth flow of census activities including field management system.

The main tasks completed in second zonal operation:

- a) Formed census committees in zilas, upazilas/thanas, wards/unions, paurashavas and city corporations,
- b) Interacted with local bodies,
- c) Verified supervisor maps and getting those finalised,
- d) Finalized the lists of supervisors and enumerators and
- e) Checked and endorsing locations and available facilities of training centres selected to train enumerators and supervisors. All these activities were performed by 2,612 Zonal Officers under the supervision of 130 Zila Census Coordinators who were engaged from BBS and other ministries.

The terrains and habitation patterns of the localities were taken into consideration in forming EAs. Mauza/Ward maps were used for exact identifications of EAs within mauzas and wards. During census enumeration final base maps and supervisor maps were used by the Zonal Officers, Enumerators and Supervisors for field control and overcoming coverage errors.

1.10 Organization: The lowest unit of census was Enumeration Area (EA). As many as 2,96,718 EAs were delineated all over the country. Above them there were 48,531 Supervisors' Areas (SAs) throughout the country Areas with every SA having 6-7 EAs. For each EA one enumerator and for each SA one supervisor were appointed temporarily from amongst local educated youths. Females were given priority in selecting enumerators and supervisors. Enumerators and supervisors were controlled by 2,612 Zonal Officers. To supervise the activities of zonal officers, 130 Census Zila Coordinators deployed from Class-I officers of BBS, SID and Ministry of Public Administration. Each census zila was supervised by one Census Zila Coordinator. Each zone was consisted of taking about 100 enumeration areas. The large mauzas/villages were divided into two or more enumeration areas and small mauzas/villages were merged to form an enumeration area consisting of about 120 households, keeping in view the terrain and habitation pattern of the locality. The Project Director of Population and Housing Census Project was the coordinator of field activities and maintained liaison with higher authority and different organizations. The Director General of Bangladesh Bureau of Statistics acted as the Census Commissioner and the National Census Coordinator. The Secretary of Statistics and Informatics Division was the Chief Census Coordinator who guided the whole system of census programme and implementation.

The local administration and public representatives participated in the census through census committees formed for City Corporations, Paurashavas, Zilas, Upazilas, Wards, and Union Parishads. The Mayors of City Corporations and Paurashavas, Deputy Commissioners, Upazila Chairman, Ward Councillor and Chairman of Union Parishads headed the respective census committees with BBS officials being the Member-Secretaries.

Central census control room was established at Dhaka headquarters of BBS (Parishankhyan Bhaban) under active supervision of the Project Director. Similarly, control rooms were established in each

administrative levels namely Zila, Upazila and Union. These control rooms functioned round the clock during entire field enumeration period. A number of officials were engaged to provide logistics during census field activities, monitored constantly the census performance, informed the National Coordinator and Chief Census Co-ordinator about performance status and obtained their instructions for successful completion of the census.

1.11 Enumeration: The population across the country was counted at a stretch in five days during 15-19 March 2011 using machine readable questionnaires. The counting began at zero hour of 15 March 2011. Floating people were counted from zero-hour till 6.00 am (the night is called census night) at the places where they were found passing the night. In case of households, on the other hand, all members were enumerated in their residences. The modified de-facto method was followed in counting, i.e. every person was counted at the place where he/she stayed in the census night except the people on board and on duty, counted at their residence.

1.12 Data Capturing/Processing: The adoption of Intelligence Character Recognition (ICR) strategy was planned for census data capturing. As such, ICR machines were procured. BBS had gathered experience in OMR and OCR techniques of data capturing from earlier censuses of 1981, 1991 and 2001. The ICR technology was introduced at this census in BBS. US Census Bureau supported BBS in using Capture Pro and iCADE (Integrated Computer Assisted Data Entry) system for data capturing. For analyzing and tabulating census data CSPro software was used.

iCADE: Integrated Computer Assisted Data Entry provides digital images of respondent questionnaires. Data are processed through OMR, OCR, KFI, quality assurance, and automated detailed tracking of each step in the process.

Steps:

1. **Batching and Batch Identification:** Filled-in census questionnaires are batched for processing. An identifying batch cover sheet is created. Batch status numbers are kept in the database along with other relevant metadata.
2. **Scanning:** Each page from the batched census questionnaires is scanned into a TIFF Image. In each step status info is kept in the database.
3. **Auto-registration:** Auto-registration relates images to the Master Template, registers Form barcodes, and reads checkboxes. There may be preliminary "mini" OCR processing here. Auto-registration then creates a script with data captured so far.
4. **Manual Registration:** Images where auto registration detected positional tolerance errors are sent to a clerk, who resolves skewing and bar code issues and repairs checkbox ambiguities. The OMR clerk examines all checkboxes.
5. **Batch Completeness/Exception Review:** Batch completeness identifies batches with problems, forms with missing, loose, or duplicate pages, batched not scanned, scanned not batched. In Exception Review, the clerk researches each issue (checking paper forms if needed) and takes appropriate action.
6. **OCR Review:** Converts designated handwritten and printed text fields to electronic data, with greater than 99% accuracy for numbers. A clerk then reviews OCR results, verifying all 1s, 2s, etc. Any rejected field must be reprocessed using KFI.
7. **Key From Image (KFI):** The OMR portion of the programme will capture check box data prior to KFI. KFI technology guides a keying clerk to the write-in fields on the form where the system detects presence. Furthermore, a keyer will not be taken to any fields already read by the OCR machine. Keyers may also re-register skewed pages or correct checkbox answers.
8. **Quality Assurance (QA):** Two samples are drawn, one from the OCR read "universe" and one from the KFI keyed-in "universe". They are sent to an independent keyer to be rekeyed. OCR and

KFI may have different sampling rates and different accept/reject quality rates. These results are then verified against the earlier captured data, and discrepancies are presented and corrected by analysts.

9. **Sample Verification, Classification and Adjudication:** A sample of the fields is keyed in by an independent verifier. A classifier reviews images and data from OCR/KFI and compares with verifier's data. An adjudicator determines final truth and decides if the batch is acceptable, and determines the cause of discrepancies, which may be charged against the original keyer.
10. **Remainder Verifier, Classifier and Adjudicator:** If batch quality for either universe is unacceptable, all remaining fields are rekeyed by a verifier, and results are compared and corrected by a classifier, and adjudicated by a final adjudicator.

All records were subject to an efficient computer edit and imputation programme. The errors and inconsistencies, if detected, were imputed by applying both **hot-deck** and **cold-deck** methods.

1.13 Data Tabulation: For all Zilas, separate files were maintained. The census tabulation plan was finalised through technical committees' recommendations admitted of options for comparing most of the individual cells with 2001 census results. The tabulation programme was developed in CSPro and thoroughly tested before adopting for census tabulation. All tables were transferred to MS Excel/MS Word format for ensuring correct headings and footnotes.

1.14 Publication: The census reports will provide population information at the national, Zila and community levels. Besides the Community Reports, Zila Reports, National: Analytical Reports, Socio-economic & Demographic Report, Union Statistics Report and Administrative Report will be published during the coming months.

1.15 Post Enumeration Check (PEC): To assess coverage of the census an effectively designed Post Enumeration Check (PEC) survey was conducted just a month after completing the census. Bangladesh Institute of Development Studies (BIDS) conducted the PEC survey. The PEC survey data were collected during 10-14 April 2011. The net under coverage rates were estimated separately for national level aggregate and also for rural, urban, other urban (Upazila Headquarters) and City Corporation areas which are given below:

Locality	Net error rate (%)
National	3.97
Rural	3.80
Urban	5.26
Other Urban (UHQ)	4.07
City Corporation	3.86

The PEC Survey Report can be obtained from Bangladesh Institute of Development Studies (BIDS) and also from the online addresses of Bangladesh Bureau of Statistics and BIDS respectively: www.bbs.gov.bd and www.bids.org.bd

CHAPTER -2

Concepts and Definitions

The concepts and definitions adopted in the census and those presented in this report are as follows:

2.1 Census Moment: It is the precise time hour fixed for starting up census enumeration nationwide. In the census the zero hour of 15 March 2011 was treated as the census moment.

2.2 Census Night: The time span from census moment zero hour to 6:00 a.m of 15 March 2011 was the census night.

2.3 Census Period: It denotes the days ascertained to complete the census enumeration activities. In this census 15-19 March 2011 was considered as the census period.

2.4 Reference Period: It is reference time cut off to which particular sets of census date items relate. In this census two reference periods were used. These are:

- i) Field of Economic Activity: One week preceding census moment (8 to 14 March 2011)
- ii) For other variables: Census night.

2.5 Modified De-facto Method: It means the system of enumerating people at places of their stay in the census night. Adhering to this method the counting of floating population across the country was completed during census night by interviewing them just at places of their night stay except the people on duty or on board. The remaining vast number of people found in usual residences were counted (including people on duty or on board) during 5 (five) days census period by fixing places of their stay during census night. As this is the slight deviation of de-facto method, so it is termed as modified de-facto.

2.6 Floating Population: People detected passing the census night at railway stations, launch ghats, bus terminals, boats, temples, pagodas, mosques, hotels (boarders), footpaths, under building-stairs, overpass/underpass and some other unusual places. Also the people who were fishing at deep sea and living in the forest especially in the Sundarbans were treated as floating population.

2.7 Household: Persons, either related or unrelated, living together and taking food from the same cooking pot constitute a household. A single person living and eating alone forms one-person household. Households are classified into three groups as defined below:

- i) **General (dwelling) Household:** Includes all households having usual dwelling places. In 2001 census it was used as dwelling household.
- ii) **Institutional Household:** Hospitals, clinics, jails, barracks, orphanages, hostels/halls of educational institutions etc. were treated as Institutional Households.
- iii) **Other Household:** Includes those households other than general and institutional found in census night such as messes, shops, offices etc.

2.8 Ownership and Tenancy of Dwelling Unit: Tenancy status of dwelling units distinguishes the following three classes:

- i) **Owned:** Dwelling unit found occupied and used by household owning it.
- ii) **Rented:** Dwelling unit found occupied and used under arrangement of contractually rented.
- iii) **Rent free:** Dwelling unit found occupied and used without rent.

2.9 Literacy: It denotes ability to write a letter in any language. Literacy status assessment is made for population 7 years and over, 15 years and over and also for population of all ages.

2.10 Sex Ratio: It is the number of males per 100 females.

2.11 Community: It refers to the following geographic, administrative or revenue units:

- i) **Zila:** Zila (Bengali word of District) is a mid-level administrative unit comprising of several upazilas/thanas and having Zila Parishad institution.
- ii) **Upazila:** Upazila (Bengali word of Sub-district) is a rural administrative unit comprising of several unions and having Upazila Parishad institution.
- iii) **Union:** Smallest administrative rural geographic unit comprising of mauzas and villages and having Union Parishad institution.
- iv) **Mauza:** Lowest administrative unit having a separate jurisdiction list number (J.L No) in revenue records. Every mauza has its well-demarcated cadastral map. Mauza should be distinguished from local village since a mauza may consist of one or more villages.
- v) **Village:** Lowest rural geographic unit either equivalent to a mauza or part of a mauza.
- vi) **Ward:** Smallest administrative urban geographic unit comprising of mahallas and having ward council institution.
- vii) **Mahalla:** Lowest urban geographic unit.

2.12 Urban Area: It corresponds with area developed around a central place having 5000 population with such amenities as metaled roads, improved communication, electricity, gas, water supply, sewerage, sanitation and also having comparatively higher density of population with majority population in non-agriculture occupations. City, Town, Paurasava and Cantonment are the examples of urban area.

- i) **City Corporation:** It includes city corporations incorporated and administered by the Local Government Division under City Corporation Act, 2009.
- ii) **City:** It is an urban area having population 1,00,000-49,99,999 .
- iii) **Town:** It is an urban area having population less than 1,00,000 .
- iv) **Paurashava (PSA):** It includes paurashavas incorporated and administered by local government under Paurashava Act, 2009.
- v) **Other Urban Area:** It includes those Upazila headquarters which are not paurashavas. The only exception is the 17 unions adjacent to Dhaka City Corporation under Dhaka Metropolitan Area. These unions are treated as other urban areas on the basis of their urban characteristics.

2.13 Growth Rate: The annual population growth rate has been computed using the annual compounding formula:

$$P_n = P_0(1+r)^t$$

Where,

P_n = The population of 2011 census

P_0 = The population of 2001 census

r = Annual population growth rate

t = Time period between 2011 census to 2001 census

2.14 Singulate Mean Age at Marriage: The singulate mean age at marriage is calculated from the proportions single by age. The calculation steps are as follows:

Step 1: Calculation of the person's year lived in a single state, denoted by A:

$$A = 15 + \sum_{a=15-19}^{45-49} s_a * 5$$

Where, S_a is the proportion single in age group a.

Step 2: Estimation of the proportion remaining single at age 50, denoted by B:

$$B = (S_{45-49} + S_{50-54})/2$$

If the proportion single in age group 50-54, S_{50-54} , is not available, $B = S_{45-49}$

Step 3: Estimation of the proportion ever marrying by age 50, denoted by C:

$$C = 1 - B$$

Step 4: Calculation of the number of person's year lived by the proportion not marrying, denoted by D:

$$D = 50 * B$$

Step 5: Calculation of singulate mean age at marriage (SMAM):

$$SMAM = (A - D)/C$$

2.15 Dependency Ratio: A measure of the portion of a population which is composed of dependents (people who are too young or too old to work). The dependency ratio is equal to the number of individuals aged below 15 or above 64 divided by the number of individuals aged 15 to 64 expressed as a percentage. A rising dependency ratio is a concern in many countries that are facing an aging population, since it becomes difficult for pension and social security systems to provide for a significantly older, non-working population

2.16 Child Woman Ratio: The ratio of the number of children below five years to the number of women of child-bearing years expressed in thousand which may be expressed as:

$$P(0-4)/Pf(15-49) \times 1000$$

Where, P refers to a population, the numbers refer to their ages, and f denotes women.

In the absence of universal registration of births, the child-woman ratio is a relatively good indicator of fertility.

2.17 Economic Activity Rate: The economic activity rate measures the proportion of the working age population 15+ or (16-64) who are active or potentially active members of the labour market. A high economic activity rate means that a high proportion of people are working or available for work or training.

2.18 Economically Active Population: The economically active population comprises all persons of either sex and above 10 years age who furnish the supply of labour for the productive activities (falling in the production boundary of the system) during a specified time-reference period. It includes all persons who fulfill the requirements for inclusion among the employed (employees or self employed) or the unemployed.

2.19 Employed: Person was either working one or more hours for pay or profit or working without pay in a family farm or enterprise or organization during the reference period or found not working but had a job or business from which she / she was temporarily absent during the reference period.

2.20 Looking For Job: Person who is able to work and not engaged in any economic activity but actively looking for a job during the reference period.

2.21 Household Work: Persons engaged in house - wifery activities or various types of household works or domestic type of work at home other than economic activities , such as cooking, washing, take care of household members, children , etc, are considered as household work. Either male or female may engage in household work.

2.23 Do not Work: Person who does not work or is not engaged in any economic activity during the reference period.

2.24 Median Age: The age that divides a population into two numerically equal groups; that is, half the people are younger than this age and half are older. It is a single index that summarizes the age distribution of a population.

2.25 Whipple's Index: The Whipple Index is a simple, robust and easy to interpret method to measure age heaping. Per definition the Whipple Index is the ratio of the observed frequency of ages ending in 0 or 5 to the frequency predicted by assuming a uniform distribution of terminal digits:

$$W = \text{number of ages ending on 0 or 5} / 1/5 * \text{all ages} * 100$$

A Whipple value of 100 would suggest that no age heaping exists and that all ages are equally represented. A value of 500 indicates perfect age heaping and means that all ages are multiples of five. An increase of 20 in the Whipple's Index corresponds to an increase of 5% in the share heaped on multiples of five. The examined age group must be defined so that each terminal digit occurs an equal number of times for example 20-29 or 22-41.

To gain more comprehensive results we slightly transform the formula and receive the variable for numeracy in percent:

The index score is obtained by summing the number of persons in the age range 23 and 62 inclusive, who report ages ending in 0 and 5, dividing that sum by the total population between ages 23 and 62 years inclusive, and multiplying the result by 5. Restated as a percentage, index scores range between 100 (no preference for ages ending in 0 and 5) and 500 (all people reporting ages ending in 0 and 5).The UN recommends a standard for measuring the age heaping using Whipple's Index as follows.

Whipple's Index	Quality of Data	Deviation from Perfect
Less than 105	Very Accurate	Less than 5%
105–110	Relatively Accurate	5–9.99%
110–125	OK	10–24.99%
125–175	Bad	25–74.99%
Greater than 175	Very Bad	Greater than or equal to 75%

2.26 Myer's Blended Index: Myer's Blended Index is calculated for the age above 10 years and shows the excess or deficit of people in ages ending in any of the 10 digits expressed as percentages. It is based on the assumption that the population is equally distributed among the different ages. The steps in the calculation of Myer's Blended Index are as follows:

Step 1: Sum of population ending in each digit over the whole range starting with the lower limit of the range (e.g., 10, 20, 30, 40,....; 11, 21, 31,....)

Step 2: Ascertain sum excluding the first population combined in step 1 (e.g., 20, 30, 40,.....; 21, 31, 41,.....)

Step 3: Weight the sums in steps 1 and 2 and add the results to obtain a blended population (e.g., weights 1 and 9 for 0 digit, weights 2 and 8 for 1, etc.)

Step 4: Convert distribution in step 3 into percentages.

Step 5: Take the deviation of each percentage in step 4 from 10.0, which is the expected value for each percentage.

Step 6: A summary index of preference for all terminal digits is derived as one half of the sum of the deviations from 10.0% each without regard to signs.

2.27 UN Age-Sex Accuracy Index: In this index the mean of the differences from age e.g. reported sex ratios, without regard to sign, is taken as measure of accuracy of observed sex ratios, on the assumption that these age-to-age changes should approximate zero.

UN Age-Sex Accuracy Index = Mean Deviation of age ratios for males from 100+ Mean Deviation of age ratios for females from 100+ (mean of age-to-age differences in reported sex ratios). Census age-sex data are described by the United Nations as “accurate”, “inaccurate” or “highly inaccurate” depending on the UN index is under 20, 20 to 40 or over 40.

CHAPTER – 3
Summary Findings

3.1 Administrative Units: According to Population and Housing census 2011, there are 7 administrative divisions, 6 city corporations, 64 zilas, 545 upazilas (including thanas within the city corporations), 310 paurashavas, 3161 city or paura wards, 4543 unions, 66926 mauzas or mahallas and 87223 villages in the country.

A summary table of administrative units for the 7 divisions is presented in Table 3.1.1:

Table 3.1.1: Administrative Units by Division, 2011

Division	Number of Administrative Unit							
	Zila	City Corpn.	PSA	Upazila/ Thana	Union	City/Paura Ward	Mauza/ Mahalla	Village
Barisal	6	1	24	40	349	246	3667	4098
Chittagong	11	1	59	112	945	608	9653	15241
Dhaka	17	1	85	163	1247	887	19467	25215
Khulna	10	1	36	64	571	358	7757	9289
Rajshahi	8	1	59	70	562	594	12558	14079
Rangpur	8	-	28	58	537	270	7625	9050
Sylhet	4	1	19	38	332	198	6199	10251
Bangladesh	64	6	310	545	4543	3161	66926	87223

In the Table 3.1.1 it is observed that Dhaka is the largest division in respect of administrative unit having 17 zilas, 1 city corporation, 163 upazilas/thanas, 85 paurashavas, 1247 unions, 887 city/paura wards, 19467 mauzas/mahallahs and 25215 villages while sylhet is the smallest division with 4 zilas, 1 city corporation, 38 upazilas/thanas, 19 paurashavas, 332 unions, 198 city/paura wards, 6199 mauza/mahallahs and 10251 villages.

3.2 Household: The total households enumerated in the Housing and Population Census 2011, are 32173630 of which 7502040 in urban area and 24671590 in rural area. The average household size for the country is 4.4. The size is same i.e. 4.4 for urban area and for rural area the size is slightly higher i.e. 4.5. Household size by residence from 1981 to 2011 is furnished in Table 3.2.1. It is seen that the average size of household is decreasing since 1981 in all areas.

Table 3.2.1: Household size by Residence, 1981-2011

Household Size(General)	2011	2001	1991	1981
Bangladesh	4.4	4.9	5.5	5.7
Urban	4.4	4.9	5.5	5.9
Rural	4.5	4.9	5.5	5.7

Distribution of households by division and residence is presented in table 3.2.2.

Table 3.2.2: Household and Household Size by Division, 2011

Division	Total Household	Rural Household	Urban Household	Average Size
Barisal	1862841	1561303	301538	4.5
Chittagong	5626310	4211325	1414985	5.0
Dhaka	10849315	7268628	3580687	4.4
Khulna	3739779	3072496	667283	4.2
Rajshahi	4486829	3712882	773947	4.1
Rangpur	3817664	3333437	464227	4.1
Sylhet	1790892	1511519	279373	5.5
Bangladesh	32173630	24671590	7502040	4.4

It is found in the above table that the household size is the biggest i.e. 5.5 in Sylhet Division and the smallest i.e. 4.1 in Rajshahi Division and Rangpur Division as compared to other divisions in the country.

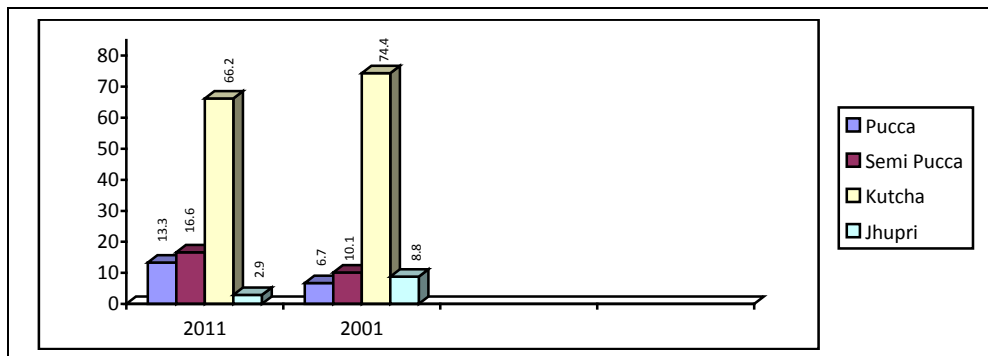

3.3 Housing: Housing structure of the main house of the household for two consecutive censuses is presented in table 3.3.2 and figure-3.01 respectively.

Table 3.3.2: Housing Structure by Type 2001 and 2011

Type of Structure	% of Households in 2011	% of Households in 2001
Pucca	13.32	6.68
Semi – Pucca	19.61	10.12
Kutcha	66.19	74.40
Jhupri	2.88	8.80

It is observed in the above table that housing condition of the country has remarkably improved over the decade as 13.32% and 19.61% housing structure were found pucca and semi pucca respectively in 2011 as against 6.68% and 10.12% in 2001 with an increase of 6.64 and 9.49 percent point. On the other hand, 66.19% and 2.88% households were found with kutcha and jhupri houses in 2011 as against 74.40% and 8.80% in 2001 respectively with a decrease of 8.21 and 5.92 percent point.

Figure 3.01: Housing Structure by Type, 2001 & 2011

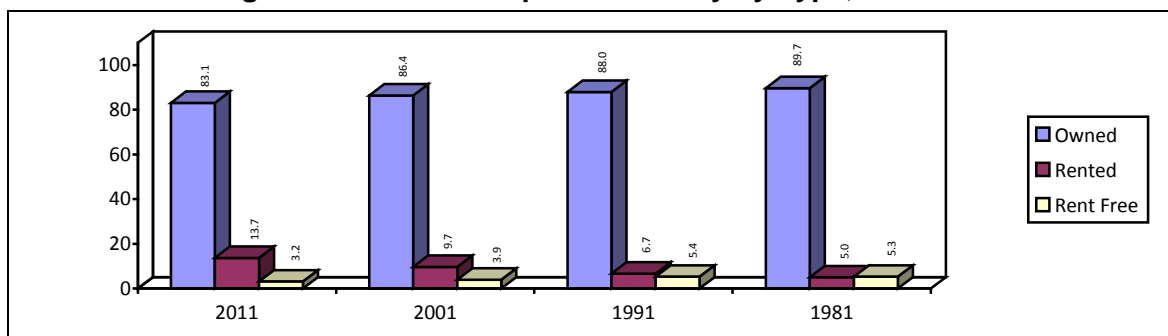

3.4 Ownership and Tenancy: It is seen in the table 3.4.1 that in respect of the ownership of dwelling house, owned house has been decreasing and shifting since 1981 whereas rented dwelling house showed an increasing trend. In respect of rent free house there found also a decreasing trend.

It is also observed that 89.67% households owned their dwelling houses in 1981 which has declined to 83.06% in 2011 with a net decrease of 6.61 percent point over the last three decades. On the other hand 5.02% households found living in rented houses in 1981 which has increased to 13.74% in 2011 with a net increase of 8.72 percent point over the same decade of 1981-2011. The scenario is presented in the following table 3.4.1 as well as in the figure- 3.02 respectably.

Table 3.4.1: Ownership and Tenancy by Type, 1981-2011

Ownership (%)	2011	2001	1991	1981
Owned	83.06	86.36	87.98	89.67
Rented	13.74	9.70	6.67	5.02
Rent Free	3.20	3.94	5.36	5.31

Figure 3.02: Ownership and Tenancy by Type, 1981-2011

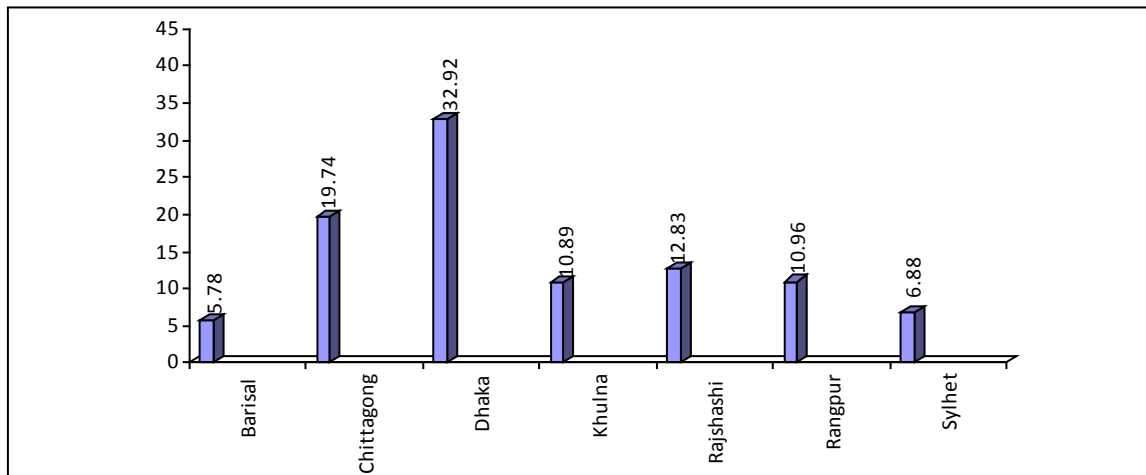

3.5 Population: The total population of Bangladesh as enumerated in 2011 census were 144043697 of which 72109796 (50.06%) were male and 71913901 (49.94%) were female. Dhaka is the largest division with 32.92% population and Barisal is the smallest division with 5.78% population.

Division wise population is furnished in table 3.5.1 and in figure-3.03 respectively.

Table 3.5.1: Household and Population by Division, 2011

Division	Household	Total Population	Male Population	Female Population	% of Total Population
Barisal	1862841	8325666	4089508	4236158	5.78
Chittagong	5626310	28423019	13933314	14489705	19.74
Dhaka	10849315	47424418	24172317	23252101	32.92
Khulna	3739779	15687759	7842533	7845226	10.89
Rajshahi	4486829	18484858	9256910	9227948	12.83
Rongpur	3617664	15787758	7881824	7905934	10.96
Sylhet	1790892	9910219	4933390	4976829	6.88
Bangladesh	32173630	144043697	72109796	71913901	100.00

Figure- 3.03: Percentage of Population by Division, 2011

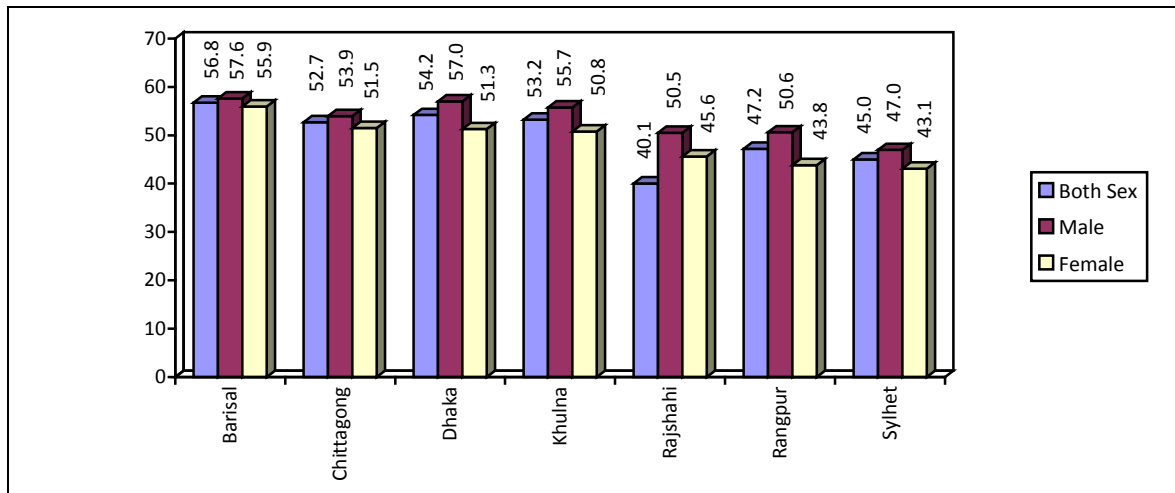

3.6 Literacy: The literacy rate for population 7 years and above of the country is 51.77% for both sex, 54.11% for male and 49.44% for female. Literacy rate by division is furnished in Table 3.6.1

Table 3.6.1: Literacy Rate by Sex and Division-2011

Division	Literacy Rate (7 years and above)		
	Both Sex	Male	Female
Barisal	56.75	57.62	55.93
Chittagong	52.69	53.94	51.52
Dhaka	54.19	57.00	51.27
Khulna	53.23	55.72	50.75
Rajshahi	40.05	50.50	45.60
Rongpur	47.19	50.60	43.82
Sylhet	45.01	46.96	43.10
Bangladesh	51.77	54.11	49.44

The above table shows that 55.93% population aged 7 years and above of Barisal Division are literate which is the highest rate in the country while the lowest rate i.e. 43.10% is found in Sylhet division. The scenario is also presented the following figure 3.04.

Figure 3.04: Literacy Rate by Sex and Division - 2011

Four Zila Tables viz. Z01, Z02, Z03 and Z04 have been annexed in this report.

In Table Z01 number of administrative units, households, population by sex, population aged 18 years and above (eligible for casting vote), literacy rate for population 7 years and above and floating population have been presented by zila.

Table Z02 in this report presents largest and smallest upazila and union by division and zila in the country. It is observed in the table that Shyamnagar upazila of Satkhira zila is the largest upazila and Bandar upazila of Narayanganj zila is the smallest upazila in the country in respect of area. In Barisal division, Galachipa upazila of Patuakhali zila is the largest upazila while Kawkhali upazila is the smallest upazila in respect of area. In Chittagong division, Bagaichhari upazila of Rangamati zila is the largest upazila and Ashuganj upazila of Brahmanbaria zila is the smallest upazila in respect of area. In Dhaka division, Phulpur upazila of Mymensingh zila and Bandar upazila of Narayanganj zila are the largest and the smallest upazila respectively in respect of area. In Khulna, Rajshahi and Sylhet division, Shyamnagar upazila of Satkhira zila, Singra upazila of Natore zila and Kulaura upazila of Maulavibazar Zila respectively have been identified as the largest and Phultala upazila of Khulna zila, Kamarkhanda upazila of Sirajganj zila and Fenchuganj upazila of Sylhet zila respectively have been identified as the smallest upazila in respect of area.

Table Z03 in this report presents largest and smallest upazila and union in respect of population by division and zila. It is observed in the table that Gazipur Sadar upazila of Gazipur zila is the largest upazila and Thanchi upazila of Khagrachhari zila is the smallest upazila in the country in respect of population. The table also shows that Dhamsana union of Savar upazila in Dhaka zila is the largest union and Satalari union of Harirampur upazila in Manikganj zila is the smallest union in respect of population in the country.

Table Z04 in this report presents number of households, population by sex and selected age groups, literacy rate for population 7 years and above by sex and married women aged 15-49 years i.e. in reproductive age by zila and residence .

Moreover one Union Table U01 showing household, population by age groups and sex, literacy and married women aged 15-49 years have also been annexed.
