PART III : HOUSEHOLDERS SCHEDULE : 50

PREFACE

This Report contains statistics tabulated from information collected in the Census of Population and Housing conducted in Norfolk Island on 8 August 2006, under Authority of the

It is intended that this Census provide up to date statistics for the island concerning the characteristics of the population and housing. This information is required to meet the needs of Government and private organisations for policy planning and research purposes.

As Statistician for the Census, I take this opportunity to express my thanks to my Field Supervisor for his efforts in coordination of the physical and logistical aspects of form distribution and collection.

My thanks also to the field collectors for their diligence in achieving as complete coverage of their districts as possible. The delivery and collection of forms was carried out in absolutely atrocious weather conditions with more rain falling during field work for this Census than any other I have been involved with over twenty years.

Thanks also to the Data Entry Supervisor and the data processing crew for their accuracy and speed. Thanks also to the Report Supervisor for final presentation of this report.

Thanks also to the Administration staff who provided additional statistical information and to all those who contributed to the effort which results in the production of this Report.

Lastly, special thanks go to my wife for her patience and understanding during the Census exercise.

Steve Mathews
Statistician for the Census
October 2006

PART I : EXPLANATORY NOTES

CENSUS DESIGN AND OPERATION

It was expedient to base design and operation of the Census on the principles and practices adopted in previous Census. Since 1981 Census of Housing and Population have been conducted in Norfolk Island every five years. There have been some modifications or enhancements based on experience including minor changes to the householders schedule to elicit more specific response and report format to highlight trends.

This Census was fully processed locally on Norfolk Island. The island was divided into six Census Collectors' Districts for the purpose of the Census, these districts were identical to the 2001 Census. Six Collectors were assigned the duties of distributing and collecting Census schedules for private dwellings. A description, map and statistics of the districts can be found on pages 5 and 6. The Field Supervisor dealt directly with the distribution and collection of schedules for Registered Tourist Accommodation and their staff, while a registered nurse assisted patients at the Public Hospital.

Confidentiality of Census information was maintained by arranging for householders to seal Census schedules within envelopes before collection. Procedures ensured that this confidentiality was continued during processing of schedules. At the completion of processing, all forms were destroyed by burning.

Schedules were manually coded and these codes were input into the database for summary and tabulation for presentation in this report.

Norfolk Island population has distinct groups, namely Residents and Visitors. As has been done in previous Census reports, particular emphasis has been given to the Resident Population in this report. The Tourist and Visitor population section provides a cross section of visitors in the island on Census night. The Norfolk Island Government Tourist Bureau publishes tourist statistics providing similar information for the full financial year. A summary of Tourist Arrival Figures over recent years has been included at the end of this report.

DEFINITIONS

Population : The population recorded in the Census comprises all persons who spent the night of 8 August 2006 in Norfolk Island (including neighbouring Nepean and Phillip Islands) whether they normally reside in the island or were visiting on Census night. On this basis, persons who normally reside in Norfolk Island but were absent (on leave etc. or in transit to or from Norfolk island) on Census night were, of course excluded from the Census counts. By definition, persons (whether residents or visitors) arriving in Norfolk Island before midnight of 8 August 2006 were included in the Census totals, but were excluded if they arrived on or after 9 August 2006. Where 2001 Census figures are included, persons were excluded if they departed from the Island prior to midnight of 7 August 2001 but were included if they departed on or after 8 August 2001.

Some real world examples of this principle include the barge that was anchored off the island on the 8 August and left Norfolk Island after Census night, the crew on board are included in the Census count. In addition there were a number of people on the island on

Census night involved with a committal trial including the accused who was in police custody at the police station. People involved included court staff, legal teams, media, families and witnesses; the majority of which had no residential status and were therefore classified as visitors. I am also aware of people who normally reside on the Island who, with members of their family, were absent for medical treatment on Census night, these people are not included in the count. Alternatively there were people who hold Resident status on the island who normally reside elsewhere, but because they were in Norfolk Island on Census night they are counted with the Resident Population.

Population Classifications : The population has been defined as persons classified themselves in one of the categories in Question 10 of the Householders Schedule as follows :-

Permanent Population

1. A RESIDENT within the meaning of the *Immigration Act 1980*.
2. The holder of a GENERAL ENTRY PERMIT (G.E.P.) under the *Immigration Act 1980* (or Enter and Remain Permit under the repealed *Immigration Ordinance 1968*).

Itinerant Population

3. The holder of a TEMPORARY ENTRY PERMIT (T.E.P.) under the *Immigration Act 1980*.
5. Other. This group is made up of those awaiting permits or those not requiring permits.

Tourist and Visitor Population

4. A TOURIST or VISITOR to Norfolk Island.

The Ordinarily Resident Population has been further classified into Permanent and Itinerant Populations. These groups have been tabulated separately (Sections B, C, D, E, F and G), to highlight different features and characteristics within these groups. For a number of tables these two groups have been tabulated together as the Ordinarily Resident Population (Sections H, I and J).

Dwellings : For the purpose of this Census, dwellings (whether houses, flats or other dwelling units) were classified as either "private" or "non-private" dwellings. Private dwellings exclude all Registered Tourist Accommodation and the Hospital. These are the same classifications as used in previous Census of Population and Housing. It is intended that "Private" dwellings are those occupied by (or intended to be occupied by) the Ordinarily Resident Population. However experience has shown there are a number of visitors who stop privately with friends or house minding.

All statistical tables relate to occupied private dwellings with the exception of Table M1 which also includes Unoccupied Private Dwellings. All figures in the Dwelling tables are for the 2006 Norfolk Island Census unless specifically stated otherwise.

GENERAL COMMENTS ON CENSUS RESULTS

By comparing Census figures of people on the island on Census night and those of the Immigration section of the Administration of Norfolk Island, it has been established that the Census achieved an excellent coverage of Ordinarily Resident population with a good coverage of the visitor population in Norfolk Island. There were a few Visitors forms returned totally blank and where possible information from immigration was used to include them in the head count although most of the responses would fall in the Not Stated category. District collectors were appointed areas of the island with which they were reasonably familiar, and as a result a full coverage of "private dwellings" (under the above definitions) has also been achieved.

Answers to individual questions were not obtained in all cases. Where possible gaps were filled during editing from local knowledge and information available from official sources. Particular care has been taken to avoid assumptions being made and where no answer was obtainable numbers are shown as "Not Stated" in the accompanying tables.

Because of the central importance of Residency Status in tabulation of this Census, where question 10 was not answered or incomplete information was given, all were classified according to information from official sources. Persons answering "5. Other" were persons either awaiting permits or persons not requiring permits. As a result, they have been classified as Itinerant Population under the Ordinarily Resident Population.

For personal questions other than age or residency status, the level of non-response (Not Stated) was lower for the Ordinarily Resident Population than for the Tourist and Visitor Population. There was a noticeable increase in "Not Stated" categories for this Census which may be a result of the number of questionnaires conducted on the island leading up to and at the time of the Census.

In all tables that have the column "Percent Of Total" included, where a discrepancy between totals and sum of components occurs, that discrepancy is due to rounding.

INDIVIDUAL TOPICS

Residency Status (Table A1) : This table indicates a static Permanent Population over the last 5 years. It also shows a marked decrease in Itinerant Population of 38% over the last five years, this is a direct result of the downturn in the economy particularly over the last 12 months. (Table A2) In comparing the Permanent population age groups for the last two Census (Table B1), there is a 14% reduction in 15 to 35 age group, and a 10% increase in numbers over 50 years of age. An 8% increase in the 70 and over age group continues the trend from the last two Census.

Examination of individual tables within the Itinerant Population section (Tables E1, E4 and F1) highlights some changes in the nature of this group. The under 30 years of age has decreased by 50% which is slightly higher than the overall rate of decrease. Of note in this group is the increase in married persons as a percentage of the Itinerant Population. There was also a marked rise in number and percentage of persons within the Itinerant Population born in countries other than Australia, New Zealand or the United Kingdom. Comparisons with the 2001 Census should keep in mind the results of Table H5, which indicate that nearly the whole itinerant population arrived after that census. This result being a direct result of the immigration laws for the itinerant population.

Country of Citizenship (Tables B3, E3 and H4) : A number of persons omitted to state their country of citizenship. In these cases it was assumed that the country of citizenship was Australia if born in Australia or Norfolk Island, and New Zealand if born in that country. There were also a few dual and triple citizenship answers that were classified under the first stated citizenship.

Religion (Table H6) : This question was optional and therefore the level of non-response was high. There were again a few responses of Jedi to this question in our Census; these were classified as not stated. Persons who responded with "none" or similar were classified as No Religion, however those left blank are shown as Not Stated.

Look for Work (Table I3) : On examination of the answers to this question it was again evident that not all those persons who had responded "Yes - looked for work" were unemployed. This table therefore highlights whether the person who looked for work was in a job or business last week as per question 17 of the Householder's Schedule.

Gross Weekly Income from All Sources (Tables C3, F3, and L1) : Comparisons of Income tables with the previous Census have again been included. Although the difficulties of comparing dollar values over a period of time should be taken into consideration. Persons who responded "nil", "none" or similar were classified as No Income, however those left blank are shown as Not Stated. The additional responses to this question, while suggestive, were unable to be tabulated.

Mortgage – Dwellings by Range of Monthly Payments (Table N6) : Monthly payment levels for mortgages have moved significantly in the last five years particularly toward the very high mortgage bracket of above \$1600 per month.

Fuel or power used for Household Purposes (Table N9) : the large number shown as "Not Stated" in secondary use for all purposes in this table is because most people indicated only one fuel or power for each household purpose.

Additional Tables – Information not sourced from Census Papers (Section O), in this Census additional information from official sources has been included. While this information was not compiled from the Census Questionnaires, it is hoped they may provide some background to changes in Population and Housing over the past 5 years. The Tourist Arrival figures over a period of time are considered more useful for some purposes than a pure snapshot of those on island on Census night. The Customs Import Statistics, RPI and Financial tables hopefully provide some insight into aspects of the Norfolk Island economy.

ABBREVIATIONS AND SYMBOLS USED IN TABLES

- \$ - Australian Dollars.
- n.e.i. - Not elsewhere included (classified)
- - Nil or less than half the digit shown.

NORFOLK ISLAND
CENSUS OF POPULATION AND HOUSING 2006
COLLECTOR'S DISTRICTS

Under section 8 of the *Census and Statistics Act 1961*, I divide Norfolk Island into the following Collectors Districts for the taking and collection of the Census in the year 2006 –

Collectors

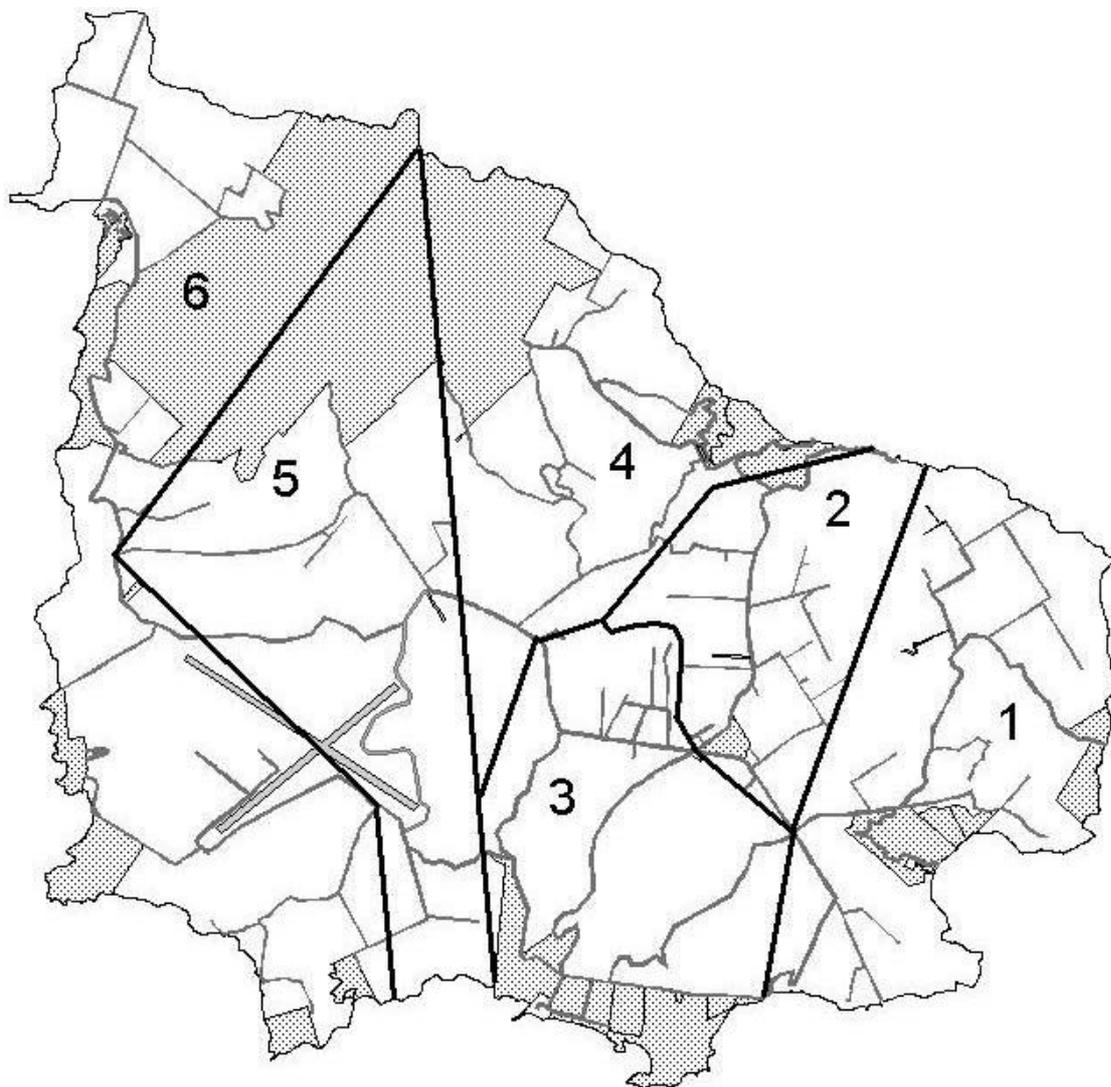

<u>District No</u>	<u>Description of Collector's District</u>
1)	Commencing from Music Valley and including Drivers Christian Road, Collins Head Road from Rooty Hill Road and Stockyard Road intersection, Stockyard Road, Martins Road, Two Chimneys Road and all of Steeles Point.
2)	Cascade Road from Fredic's Edge to Middlegate, New Cascade Road from Cascade Creek to Cascade Road, Collins Head Road from Middlegate to Rooty Hill and Stockyard Road intersection and Cutters Corn.
3)	Queen Elizabeth Ave, Fletcher Christian Road, Edward Young Road, John Adams Road, Shortridge, Taylors Road from and including Norfolk Village, Flagstaff, Middlegate Road to Kingston, Rooty Hill Road and Quality Row.
4)	Taylors Road from Norfolk Village to Hospital corner (including M. Ryding's), New Cascade Road to Cascade Creek, Harpers Road, Prince Phillip Drive, Selwyn Pine Road, J,E, Road, Poverty Row and Cascade Jetty to Harpers Road.
5)	Peters Highway, D.C.A. Circle, Ferny Lane, Douglas Drive to the bottom of the Gully, Grassy Road, Mt Pitt Road, Mission Road to Anson Bay Road intersection, Country Road, New Farm Road from the Rocky Point Road intersection and Longridge.
6)	Anson Bay Road, Bullocks Hut Road. Captain Cook Memorial Drive, Headstone Road, Douglas Drive from the bottom of the Gully, Captain Quintal Drive, Rocky Point Road, Bumboras New Farm Road to Rocky Point intersection.

Dated this 18th day of July 2006

Stephen Paul Mathews
Statistician for the Census
