The category ascribed to a client is determined by the accumulated maximum capacity TEU registered by the client over a maximum period of 12 consecutive months starting with the effective date of this program. The applicability of this tariff would be two months after the twelfth month, or if the required TEU for any given category are reached in less than 12 months, the application of the loyalty preferential tariff would be two months after the month in which the required loyalty category volumens are reached.
