

This listing of DCR properties is meant to supplement the Landscape Designations map with additional information. It shows how many acres from each property are assigned to each landscape designation, but cannot detail which parts of each property are assigned to each designation – please see the maps for that information. The properties below are listed as named in DCR's GIS databases; GIS names may not match all names posted at facilities or known locally. The column labeled "ELU" identifies in which Ecological Land Unit the property belongs. Properties in the same ELU share similar landscape characteristics and are not necessarily linked geographically.
