## Introduction

On April 1, 2010, the U.S. Census Bureau conducted the 23rd national census. The decennial census is the only national count providing consistent, uniform measures and data for every geographic area in the nation. The results capture a picture in time of the population of Utah: who we are, how we've changed, and the direction we are heading.

*Cities and Counties of Utah* is the first in a series of Census 2010 Briefs to provide detailed analysis of the Census 2010 data for Utah. This report contains tables, figures, and maps showing current and historical population data for Utah's counties, cities, and census designated places (CDPs). The report begins with a 2000-2010 summary population table for the U.S., Utah, and Utah's counties and cities. This section is followed by more detailed demographic analysis of the state, including data on population density, land area, and growth and size rankings. The last section of the report provides users with a historical look at Utah and the growth that has occurred over the last hundred years.

## State of Utah

Utah's April 1, 2010 population reached 2,763,885. This represents a population increase of 530,716 persons, or 23.8% from 2000, ranking Utah third among states in the rate of population growth. Utah's growth rate of 23.8% was more than twice as fast as the U.S. (9.7%) during this ten year period. Utah, as well as three of its neighboring states, and Texas ranked as the five fastest growing states in the country during the last decade. They include: Nevada (35.1%), Arizona (24.6%), Utah (23.8%), Idaho (21.1%), and Texas (20.6%).

## Utah's Counties

**Largest.** Salt Lake County continues to be the state's largest county with a population of 1,029,655 in 2010, followed by Utah County (516,564), Davis (306,479), Weber (231,236), Washington (138,115), and Cache (112,656) counties. Daggett County remains the smallest county in the state with a 2010 population of 1,059.

Three out of every four people in the state live in the northern metropolitan area, including Weber, Davis, Salt Lake, and Utah Counties, where 2,083,934 people reside.

**Fastest Growing.** Wasatch County was the fastest growing county over the decade with an increase of 54.7%, from 15,215 in 2000 to 23,530 in 2010. This is the second decade in a row that Wasatch County has had a percent change of more than 50%. Washington was the second fastest growing county for the second decade in a row. Washington County, with a 52.9% increase over the decade, grew at more than double the state rate. Tooele had the third fastest growth rate with 42.9%, followed by Utah (40.2%) and Iron (36.7%) counties.

Six of the 10 fastest growing counties in the state are a part of or in close proximity to the northern metropolitan area. These counties include Wasatch (54.7%), Tooele (42.9%), Utah (40.2%), Morgan (32.8%), Davis (28.2%), and Juab (24.4%).

Millard County, with a growth rate of just 0.8% over the decade, was the slowest growing county in the state. Millard, along with Emery (1.1%), San Juan (2.3%), and Carbon (4.8%) all grew less than 1/3 of the state rate.

**Most Dense.** Salt Lake County remains the most densely populated county in the state with 1,397.1 persons per square mile. Other densely populated counties include Davis (1,008.2); Weber (401.5); Utah (258.5); Cache (96.7); and Washington (56.9). Garfield County is the least dense county in the state with only one person per square mile.

## Utah's Cities

**Largest.** Salt Lake City continues to be the largest city in the state with a 2010 population of 186,440, followed by West Valley City (129,480); Provo (112,480); West Jordan (103,712); Orem (88,328); Sandy (87,461); Ogden (82,825); St. George (72,897); Layton (67,311); and Taylorsville (58,652).

**Fastest Growing.** Saratoga Springs lead the way among the state's fastest growing cities (greater than 9,000) by increasing more than 17 times from 2000-2010, increasing by 16,778 people, or 1672.8%. Several other of the state's largest cities more than doubled in size over the decade, including Herriman (1330.4%); Eagle Mountain (892.8%); Cedar Hills (216.6%); Syracuse (158.9%); West Haven (158.4%); Lehi (149.1%); and Washington (129.2%).

**Most Dense.** Taylorsville is the most densely populated city in the state with 5,409.1 persons per square mile. Other densely populated Utah cities include Orem (4,851.5); Midvale (4,772.3); Roy (4,705.2); Washington Terrace (4,546.9); South Ogden (4,464.4); Clearfield (3,934.9); Sandy (3,808.7); Murray (3,794.4); and Cottonwood Heights (3,710.5). Fairfield in Utah County is the least dense city with only 4.6 persons per square mile.

**Utah's Census Designated Places (CDPs).** CDPs are delineated for each decennial census as the statistical counterparts of incorporated places. A CDP is a statistical entity comprising a dense concentration of population that is not within an incorporated place but is locally identified by a name. CDPs are delineated cooperatively with state and local and tribal government officials based on Census Bureau guidelines, and the boundaries usually coincide with visible features or the boundary of an adjacent incorporated place. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as an earlier census does not necessarily have the same boundary.

CDPs do not have to meet a population threshold to qualify for tabulation of census data. The three largest census designated places in Utah in 2010 are all located in Salt Lake County. Millcreek CDP is the largest with a population of 62,139, followed by Kearns CDP (35,731); and Magna CDP (26,505).

#### **Historical Population**

The final section of this report contains historical population tables for the United States, Utah, and Utah's counties and cities. The historical data dates back to 1790 for the nation, 1850 for the state and its counties, and 1890 for cities.

#### **Additional Information**

**American FactFinder.** American FactFinder is a dynamic search feature on the U.S. Census Bureau's web site that allows users to access Census Bureau data. The system is inter-

active and gives Census Bureau customers more flexibility to request the data they need for their geography of interest. American FactFinder offers data from the 2010 Census and the 2000 Census, as well as the 1990 Decennial Census, the Economic Census, and the American Community Survey. To access American FactFinder go to [factfinder.census.gov](http://factfinder.census.gov) or go to the Census Bureau's web site [www.census.gov](http://www.census.gov) and click on A or American FactFinder.

**State Data Center.** Electronic versions of tables and figures in this report are available by contacting the Utah State Data Center staff at [dea@utah.gov](mailto:dea@utah.gov). Census 2010 data for the state of Utah is available on the Demographic and Economic Analysis web site: [www.governor.utah.gov/dea](http://www.governor.utah.gov/dea). Census Briefs will be posted (in PDF format) to this site as they are available.

Census designated places (CDPs) are delineated for each decennial census as the statistical counterparts of incorporated places. CDPs are delineated to provide data for settled concentrations of population that are identifiable by name but are not legally incorporated under the laws of the state in which they are located. The boundaries usually are defined in cooperation with local or tribal officials. These boundaries, which usually coincide with visible features or the boundary of an adjacent incorporated place or other legal entity boundary, have no legal status, nor do these places have officials elected to serve traditional municipal functions. CDP boundaries may change from one decennial census to the next with changes in the settlement pattern; a CDP with the same name as in an earlier census does not necessarily have the same boundary.

### Notes:

- 1) Before Carbon County was formed from Emery County in 1894, population was included with that of Emery County.
- 2) Daggett County was formed from Uintah County in 1918; before that time population was included with Uintah County.
- 3) Duchesne was created from Wasatch County in 1915; before that time, population was included with Wasatch County.
- 4) Emery was organized in 1880 from parts of Sanpete, Sevier, and Wasatch counties; later, part of Emery County was taken to form Grand County in 1890 and Carbon County in 1894; therefore, population figures for 1880 and 1890 include residents living in what became Grand and Carbon counties.
- 5) Part of Kane County was annexed to Garfield County between 1890 and 1894; therefore, residents in 1880 are included in the count for Emery County.
- 6) Grand County was formed from Emery County in 1890; therefore, residents in 1880 are included in the count for Emery County.
- 7) Part of Kane County was annexed to Garfield County between 1890 and 1900; thus Kane County totals for 1870, 1880, and 1890 include people living in what became Garfield County.
- 8) Part of Piute County was taken to form Wayne County in 1892, and part was annexed to Sevier County in 1902; therefore, totals for Piute County in 1870, 1880, 1890, and 1900 include those people residing in what became parts of Wayne and Sevier counties.
- 9) Part of Uintah County was annexed to Duchesne County in 1917, and Daggett County was created from Uintah County in 1918; population figures for 1880, 1890, 1900, and 1910 include people living in those areas that became part of Duchesne County and Daggett County.
- 10) Uintah County was organized in 1880 from part of Wasatch County, 1870 census for Wasatch County therefore includes people living in what became Uintah County. Duchesne County was organized from part of Wasatch County in 1915; Wasatch County census before 1920 therefore includes those living in what became Duchesne County.
- 11) Wayne County was formed from Piute County in 1892; therefore, totals for Piute County in 1870, 1880, and 1890 include those living in what became Wayne County.
