

# High-performance SiGe BiCMOS solutions

## Highlights

- Leverage a feature-rich combination of active and passive devices to optimize your design
- Achieve hardware results you can count on by utilizing some of the industry's most accurate device models
- Take performance to new levels with SiGe 9HP, the highest  $f_{max}$  SiGe BiCMOS process in volume production today
- Access ongoing innovation from the SiGe pioneer for differentiation that matters

## Differentiated, performance-optimized offerings for next-generation applications

The high-performance silicon germanium (SiGe) BiCMOS portfolio from GLOBALFOUNDRIES (GF) is designed to deliver the speed, performance and bandwidth that chips for next-generation hardware require. The silicon-proven solutions enable you to maximize performance, integrate extensive digital and RF functionality and exploit an economical silicon platform.

### SiGe HP target applications

SiGe Solution	Highest Performance			Performance/Value	
	9HP	8XP	8HP	8WL	7WL
<b>Applications</b>					
Automotive RADAR	●	●	●		
Automotive LiDAR			●		
Wireless infrastructure	●	●	●		
Gesture sensing		●			
Optical communications: Data center	●	●			
Optical communications: PON/GPON			●	●	●
High-speed serial interfaces: USB/PCIe		●	●	●	
Test/measurement systems	●	●			
Aerospace and defense	●	●	●		

# SiGe HP solutions

## Differentiating features

GF's SiGe HP solutions feature low noise figures; high linearity, gain and breakdown and operating voltages; simplified impedance matching; and excellent thermal stability. Advanced SiGe heterojunction bipolar transistors (HBTs) provide superior low-current and high-frequency performance while enabling the solutions to operate at high junction temperatures. Choose the ideal combination of performance and value for your application from a range of platforms (90 nm to 180 nm) and NPN ft performance levels (310 GHz to 60 GHz).

An advanced copper (Cu) metallization feature, available in SiGe 9HP, 8XP and 8HP, enables you to take advantage of five times the current density at 100°C, or up to 25°C higher operating temperature at the same current density.

### SiGe HP solutions at a glance

Feature*	9HP	8XP	8HP	8WL	7WL
Platform	90 nm	130 nm			180 nm
CMOS supply (V)	1.2, 1.8, 2.5, 3.3	1.2, 2.5		1.2, 1.5, 2.5, 3.3	1.8, 2.5, 3.3, 5.0
<b>Metallization (levels of metal)</b>					
Base	7	5	5	5	4
Option	Up to 10	Up to 8	Up to 8	Up to 8	Up to 7
TSV		●	●		
<b>HBTs</b>					
High performance $f_t/f_{max}$ (GHz)	310/370	250/340	200/265	100/200	60/120
High breakdown $BV_{ceo}$ (V)		3.3	3.5	4.7	6.0
High breakdown $f_t$ (GHz)	140	70	60	54	29
Medium breakdown $BV_{ceo}$ (V)	2.4	N/A	N/A	3.4	4.1
Medium breakdown $f_t$ (GHz)	150	N/A	N/A	70	45
<b>FETs</b>					
High $V_t$	●			●	●
Reg $V_t$	●	●	●	●	●
Zero $V_t$					●
Triple well	●	●	●	●	●
Thick gate oxide (V)	2.5, 3.3				
High voltage devices ( $\geq 5$ V)					●
Other bipolars			VPNP		VPNP/LPNP
<b>Resistors</b>					
p+ poly	●	●	●	●	●
Precision p+ poly	●			●	
High resistance poly	●	●	●		
Metal	●	●	●	●	
n+ diffusion	●	●	●	●	●
Silicided poly ballast resistor	●			●	●
Low-resistance sub collector	●	●	●

## SiGe HP solutions

SiGe HP process design kits (PDKs) leverage our experts' decades of experience with SiGe solutions—some of the original scientists and engineers who invented SiGe. The kits provide RF-specific tool support along with leading model-to-hardware correlation accuracy to help you achieve first-time-right results in hardware. Frequent multi-project wafer (MPW) runs enable fast prototyping and a full range of turnkey services is available.

GLOBALFOUNDRIES SiGe 9HP, 8XP, 8XP, 8WL and 7WL solutions on our 200 mm manufacturing process are fully qualified, with PDKs available now.

# SiGe HP solutions

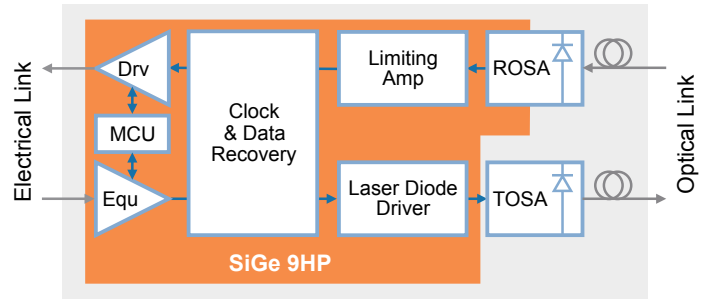

## Premier performance

SiGe 9HP is our most advanced SiGe solutions. With an  $f_T/f_{MAX}$  of 310/370 GHz, the solution delivers premier RF performance and enables up to 50% more integration density than its 130 nm SiGe 8HP/8XP predecessors.

### SiGe 8XP vs. SiGe 9HP $f_T$ and $f_{MAX}$ Comparison

Example Active Optical Cable / Optical Fiber Module Block Diagram

## Comprehensive enablement

SiGe HP solutions are complemented by end-to-end design enablement to help you meet design goals, easily inject differentiation and accelerate time to market.
