
LANE OF ELECTRIC LIGHTS.

Police Plan Measure for Vehicles in the Columbus Circle.

In order to stop the practice that drivers of automobiles and other vehicles seem to have adopted, that of shooting out of Central Park into the Columbus Circle at all angles and at all rates of speed, scaring and endangering pedestrians, Police Commissioner McAdoo is going to try to have a beaten path permanently established there.

The lane that Mr. McAdoo wants to establish will consist of a row of electric lights on poles so close together that a wagon cannot go between any two of them.
