Table 12

Q.3 I'm now going to ask you about a number of public services in Britain. For each one I'd like you to think about using that service as a member of the public. Using this card, please tell me whether you would expect to be treated better than people of other religions, worse than people of other religions or about the same. It doesn't matter if you haven't had any direct contact with an organisation, it's just your opinion I'm after.

Summary Table**Base: All respondents**

Q.3 I'm now going to ask you about a number of public services in Britain. For each one I'd like you to think about using that service as a member of the public. Using this card, please tell me whether you would expect to be treated better than people of other religions, worse than people of other religions or about the same. It doesn't matter if you haven't had any direct contact with an organisation, it's just your opinion I'm after.

Q.3 I'm now going to ask you about a number of public services in Britain. For each one I'd like you to think about using that service as a member of the public. Using this card, please tell me whether you would expect to be treated better than people of other religions, worse than people of other religions or about the same. It doesn't matter if you haven't had any direct contact with an organisation, it's just your opinion I'm after.

Table 50

Q.17 I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Q.17 I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Q.17 I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Q.17 I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Q.17 I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Table 54

Q.17 I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

25 April - 31 May 2015

Absolutes/col percents

Table 56

Q.17 I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Absolutes/col percents

Table 56

Q.17 I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Q.17 I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Q.24 As you may remember, in January 2015, two brothers who identified themselves as belonging to the Islamic Terrorist group Al-Qaeda's branch in Yemen, broke in to the office of a French satirical magazine, Charlie Hebdo, and killed 11 people. It was claimed that they did this because the magazine had published cartoons of the Prophet. When you heard about this shooting, how surprised, if at all, were you that it had happened?

Q.28 As you may know, Islamic State, also known as ISIS or ISIL is an extremist rebel group which controls territory in Iraq and Syria and has operations in other areas of the Middle East, North Africa and South Asia. Its stated objective is to establish a 'Caliphate', or an Islamic state, led by a group of religious authorities under a supreme leader. Regardless of how it is going about achieving this, to what extent do you support or oppose the objective to create an Islamic state?

Table 22

QS1. I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Survey of Muslims - Control Group
CATI Fieldwork : 5th - 7th June 2015

Absolutes/col percents

Table 24

QS1. I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

- Catholic people

Survey of Muslims - Control Group

CATI Fieldwork : 5th - 7th June 2015

Absolutes/col percents

Table 26

QS1. I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

- People who are not religious

Base: All respondents

Survey of Muslims - Control Group

CATI Fieldwork : 5th - 7th June 2015

Absolutes/col percents

Table 28

QS1. I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Survey of Muslims - Control Group
CATI Fieldwork : 5th - 7th June 2015

Absolutes/col percents

Table 30

QS1. I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

- Jewish people

Survey of Muslims - Control Group

CATI Fieldwork : 5th - 7th June 2015

Absolutes/col percents

Table 33

QS1. I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

Table 113

Q15. As you may remember, in January 2015, two brothers who identified themselves as belonging to the Islamic Terrorist group Al-Qaeda's branch in Yemen, broke in to the office of a French satirical magazine, Charlie Hebdo, and killed 11 people. It was claimed that they did this because the magazine had published cartoons of the Islamic Prophet Muhammad.

In your opinion, should any publication have the right to publish pictures of the Islamic Prophet Muhammad?

Table 114

Q15. As you may remember, in January 2015, two brothers who identified themselves as belonging to the Islamic Terrorist group Al-Qaeda's branch in Yemen, broke in to the office of a French satirical magazine, Charlie Hebdo, and killed 11 people. It was claimed that they did this because the magazine had published cartoons of the Islamic Prophet Muhammad.

In your opinion, should any publication have the right to publish pictures of the Islamic Prophet Muhammad?

Base: All respondents

Q18. As you may know, Islamic State, also known as ISIS or ISIL is an extremist rebel group which controls territory in Iraq and Syria and has operations in other areas of the Middle East, North Africa and South Asia. Its stated objective is to establish a "Caliphate", or an Islamic state, led by a group of religious authorities under a supreme leader. Regardless of how it is going about achieving this, to what extent do you support or oppose the objective to create an Islamic state?
Base: All respondents

Survey of Muslims Topline results

Method and sample

Muslims survey

- Results are based on interviews with 1,081 Muslims aged 18+.
- Interviews were carried out face-to-face, and fieldwork took place between 25 April and 31 May 2015.
- The data has been weighted by age, gender, region and work status.

Control group survey

- Results are based on interviews with 1,008 respondents aged 18+ across Britain.
- Interviews were carried out by telephone, and fieldwork took place between 5 June and 7 June 2015.
- The data has been weighted by age, gender, region and work status.

Understanding the data

- Where results do not sum to 100%, this may be due to multiple responses, computer rounding or the exclusion of don't knows/not stated.
- Results are based on all respondents unless otherwise stated.
- An asterisk (*) represents a value of less than one half or one per cent, but not zero.

Prejudice

- Q. I'd now like to get your feelings towards a number of different religious groups. I'll read the name of a group and I'd like you to rate your feelings to that group between 0 and 100 using something we call the feeling thermometer.

Ratings between 50 degrees and 100 degrees mean that you feel favourable and warm toward the group. Ratings between 0 degrees and 50 degrees mean that you don't feel favourable and don't care too much for that group. You would rate the group at the 50 degree mark if you don't feel particularly warm or cold toward the group. Feel free to use the entire extent of the scale.

As you may remember, in January 2015, two brothers who identified themselves as belonging to the Islamic Terrorist group Al-Qaeda's branch in Yemen, broke in to the office of a French satirical magazine, *Charlie Hebdo*, and killed 11 people. It was claimed that they did this because the magazine had published cartoons of the Prophet.
