XXI EUROPEAN CONGRESS OF LEPIDOPTEROLOGY, CAMPOBASSO, ITALY

The XXI European Congress of Lepidopterology, sponsored in part by Societas Europaea Lepidopterologia (SEL), will be held at the University of Molise, Campobasso, Italy, 3–7 June 2019. The deadline for early registration is 15 March 2019. Abstracts for oral presentations and posters should be submitted before 15 April 2019. Details regarding accommodations, meals, field trips, etc. can be found on the conference website: sel2019 conference.com. For further information, please contact Dr. Pasquale Trematerra at trematerra@unimol.it.

The weather should be delightful, the venue spacious and modern, and the participants friendly and collegial, as usual.

The preliminary schedule is as follows:

Monday, 3 June, 1500–1900 hrs. Welcome reception and opening of the Congress.

Tuesday, 4 June, 0830–1830 hrs. Oral presentations and poster session.

2030 hr. Congress Dinner.

Wednesday, 5 June, 0830–1300 hrs. Oral presentations and poster session.

1400 hr. Half-day excursion to Campitello Matese.

Thursday, 6 June, 0830–1600 hrs. Oral presentations and poster session.

1600–1830 hrs. General meeting.

1830–1930 hrs. Closing remarks.

Friday, 7 June, 0700–1630 hrs. Post-congress excursion to the UNESCO World Heritage site of Pompeii.

ANNUAL MEETING OF THE LEPIDOPTERISTS' SOCIETY, DAVIS, CALIFORNIA

The Annual Meeting of the Lepidopterists' Society will be held 10–12 July 2019 at the Odd Fellows Hall in Davis, California. The venue is just down the street from the University of California, Davis and the Bohart Museum of Entomology. The Executive Council meeting will be held the day before the meeting on Tuesday, 9 July. For details go to <https://www.lepsoc.org/>

In addition to the Bohart Museum, there are at least two major Lepidoptera collections within an hour drive of Davis - the California Academy of Sciences in San Francisco (contact Chris Grinter, cgrinter@gmail.com) and the Essig Museum of Entomology at the University of California, Berkeley (contact Peter Oboyski, poboyski@berkeley.edu).

PROGRESS TOWARDS UNDERSTANDING THE SYSTEMATICS OF COCHYLINI

Several studies on Cochylini currently are in progress by colleagues in Europe and North America. John Brown and Eric Metzler are continuing work on a fascicle in the series the Moths of North America (MONA) focused on the Cochylini of the U.S.A. and Canada. Joaquin Baixeras and José Vicente Santa-Rita are investigating the morphology diversity and taxonomic distribution of the male hindwing “costal roll” within the tribe. And a group led by Marko Mutanen (i.e., Leif Aarvik, John Brown, Maria Heikkila) is working on a molecular phylogeny of the tribe.

Stay tuned – the results of some of these studies may be published this year!

TORTRICID TAXA DESCRIBED IN 2017

The following is a list of tortricid taxa described in 2017 (in **bold**); it is followed by a list of new synonyms, new combinations, and revised combinations, followed by the literature that supports the proposed additions and changes. I would appreciate it if authors of new taxa would take a moment to review their citations and spellings and provide me (and/or Todd Gilligan) with any necessary corrections. Thanks much.

TRACKING OUR TAXONOMIC PROGRESS, 2005–2017

Below is a brief assessment of the number of new species and genera described in Tortricidae since 2005. The number of new species in 2017 is the lowest in over 20 years, less than 100, fewer than last year, which was a record low. In regards to geographic trends, 37% of the new species are from the Neotropical region, 22% from Asia, 18% from the Nearctic, 15% from the Afrotropical Region, and 8% from Europe.

The total number of valid species of Tortricidae now exceeds 11,000.

2005	123 species	4 genera
2006	165 species	32 genera
2007	159 species	9 genera
2008	239 species	14 genera

2009	256 species	11 genera
2010	262 species	8 genera
2011	165 species	7 genera
2012	234 species	18 genera
2013	148 species	7 genera
2014	160 species	9 genera
2015	108 species	7 genera
2016	96 species	6 genera
2017	94 species	11 genera
