Пуск

akella.a@gmail.com

The image shows the Windows 8 Start screen with a grid of live tiles. The tiles include:

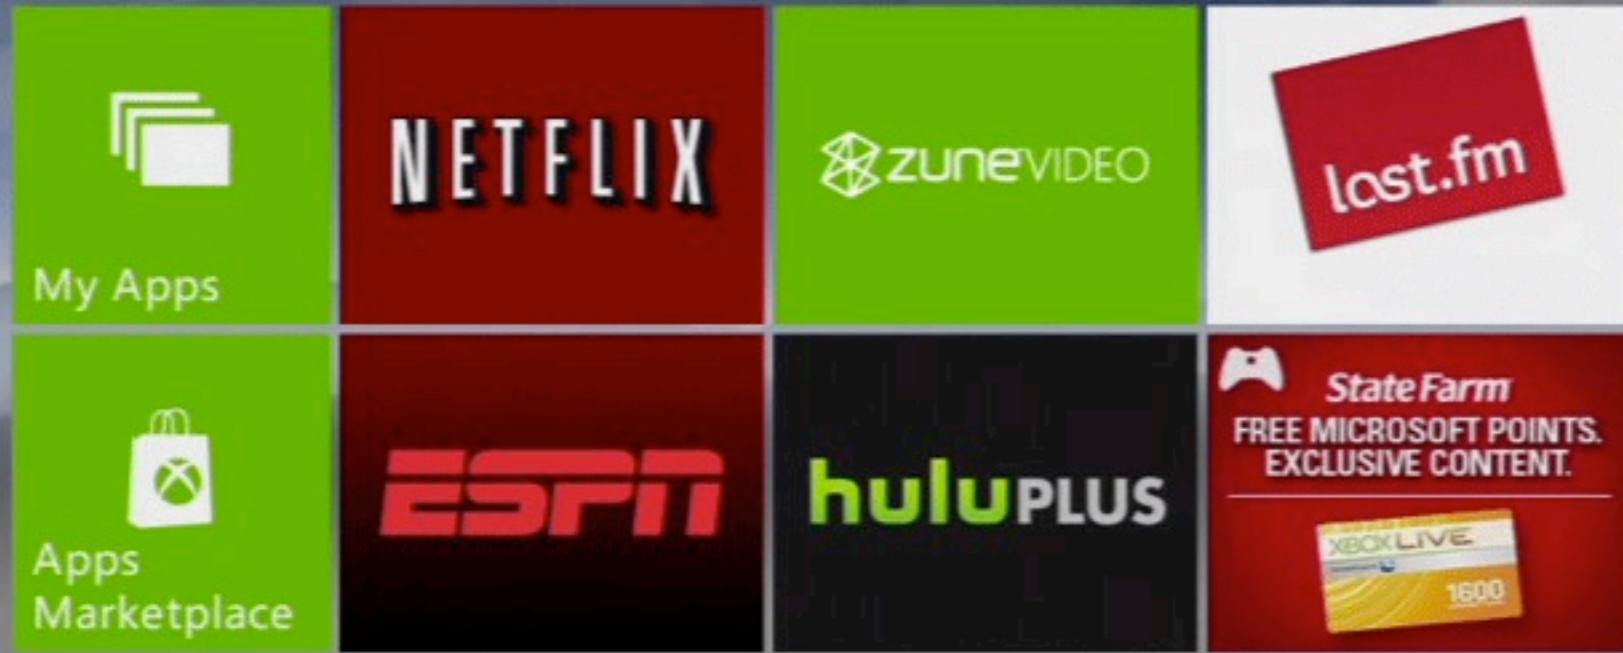

- Mail (blue tile)
- Calendar (purple tile): Shows 13 Saturday
- Internet Explorer (blue tile)
- Store (green tile): Shows 11 items
- People (orange tile)
- Photos (cyan tile)
- Maps (magenta tile)
- SkyDrive (blue tile)
- Messaging (pink tile)
- Finance (green tile)
- Games (light green tile)
- Weather (blue tile): Shows 41° New York City, Clear, 56°/41°
- Music (orange tile)

A red banner at the bottom right displays the headline: "New York Post - Yankees catch" and "Endeavour inches along L.A. streets".

The screenshot shows the Visual Studio IDE interface with the project 'HelloWorld_Part1' open. On the left, the Solution Explorer displays the project structure:

- css
- default.css
- default.html
- HelloWorld_Part1.jsproj
- images
- logo.png
- smalllogo.png
- splashscreen.png
- storelogo.png
- js
- default.js
- package.appxmanifest

The right pane shows the content of the 'default.html' file:

```
1 <!DOCTYPE html>
2 <html>
3 <head>
4     <meta charset="utf-8" />
5     <title>HelloWorld</title>
6
7     <!-- WinJS references -->
8     <link href="//Microsoft.WinJS.1.0/css/ui-light.css" rel="stylesheet" />
9     <script src="//Microsoft.WinJS.1.0/js/base.js"></script>
10    <script src="//Microsoft.WinJS.1.0/js/ui.js"></script>
11
12    <!-- HelloWorld references -->
13    <link href="/css/default.css" rel="stylesheet" />
14    <script src="/js/default.js"></script>
15 </head>
16 <body>
17     <h1 class="headerClass">Hello, world!</h1>
18     <div class="mainContent">
19         <p>What's your name?</p>
20         <input id="nameInput" type="text" />
21         <button id="helloButton">Say "Hello"</button>
22         <div id="greetingOutput"></div>
23     </div>
24 </body>
25 </html>
26
```

Управление состоянием

```
app.onactivated = function (args) {
    if (args.detail.kind === activation.ActivationKind.launch) {
        if (args.detail.previousExecutionState !== activation.ApplicationExecutionState.terminated) {
            // TODO: This application has been newly launched. Initialize
            // your application here.
        } else {
            // TODO: This application has been reactivated from suspension.
            // Restore application state here.
        }
    }
    args.setPromise(WinJS.UI.processAll());
```

Возможности

```
var ui = new Windows.Media.Capture.CameraCaptureUI();

ui.photoSettings.croppedAspectRatio = {
    width: 4, height: 3 };

ui.captureFileAsync(Windows.Media.Capture.CameraCapture
UIMode.photo).done(function (file) {
    if (file) {
        var imageBlobUrl = URL.createObjectURL(file);
        id("photo").src = imageBlobUrl;
    }
});
```

Дизайн гайды

View states

People can snap your app so that they can use another app, or snap another app so they can use your app. You can design your app so that the content flows dynamically to optimize the user experience in each view state: full screen, snapped, or fill.

Full screen view

App fills entire screen.

Snapped view

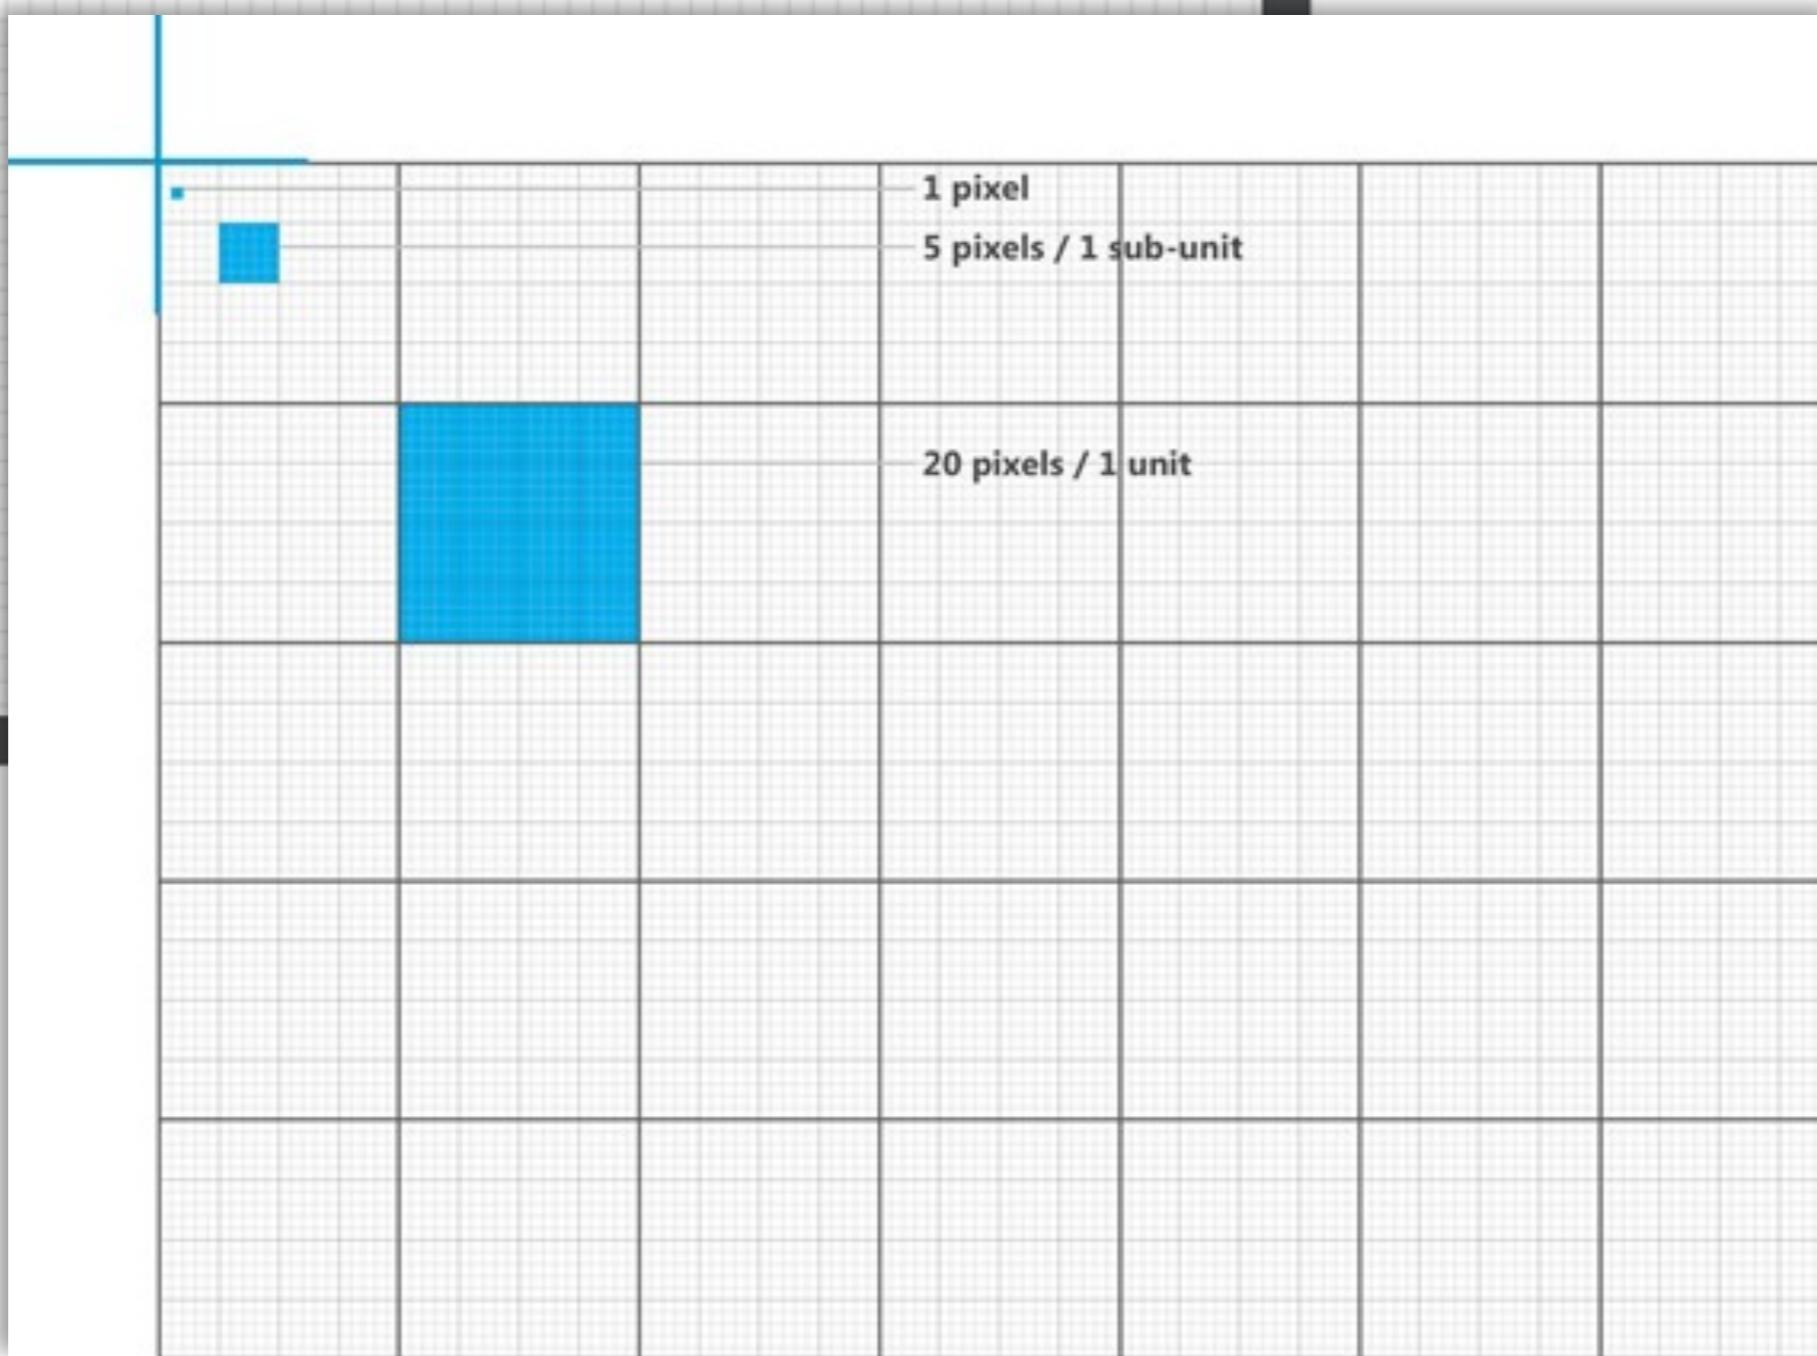

App is snapped to a narrow region of the entire screen.

Fill view

App fills remaining screen area not occupied by the app in the snapped state.

Application header, SegoeUI SS20, light

```
untitled

1 @media screen and (-ms-view-state: fullscreen-landscape) {
2 }
3
4 @media screen and (-ms-view-state: filled) {
5 }
6
7 @media screen and (-ms-view-state: snapped) {
8 }
9
10 @media screen and (-ms-view-state: fullscreen-portrait) {
11 }
```
