

M112 DEMOLITION CHARGE

DESCRIPTION

The M112 Demolition Charge with taggant is comprised of a pressed Composition C-4 block wrapped and sealed in Mylar plastic. The M112 includes a pressure sensitive adhesive tape for application to a variety of surfaces. AES produces the M112 for US DoD and approved foreign military, police and commercial customers.

PERFORMANCE

Owing to its packaged design, the M112 is easily transported, water resistant and can be used to produce a scalable effect. Depending on the required NEW, the block can be used as a whole, broken into smaller charges or combined with other charges.

The Composition C-4 is also moldable for irregular shaped targets. The M112 is commonly used for metal cutting, breaching and explosive ordnance disposal (EOD) applications.

AVAILABLE CONFIGURATIONS

The M112 Demolition Charge is available in Mil-Spec packaging (30 per Wirebound box) or Commercial packaging (40 per fiberboard box). In addition to the standard M112, AES also fabricates other specialty C-4 demolition blocks.

M112 DEMO CHARGE
