

# File format description of MT940 statements

Ver. 2017-02-02

## 1 General information about MT940

Document describes file format of MT940 statements used to import balances and transactions to ERP systems. MT940 statements are delivered as text files with STA extension. Format bases on MT940 SWIFT specification. Structured information within MT940 along with booking codes make it possible to automatically post transactions in ERP systems.

## 2 General rules regarding MT940

- MT940 statements are delivered as text files with STA extension
- Lines in file are separated by <CR><LF> (Hex 0D 0A)
- Code page of STA file is CP852
- Each MT940 statement consist of header containing statement number and opening balance, transaction blocks and footer containing closing balance and available balance
- Subfields in field :86: begin with < mark
- In case of empty subfields in field :86:, whole subfield with < mark may be skipped (not present in file)
