March 22, 2022

To: Our Valued Customers,

Effective with new orders, Crucible Industries will be raising base prices on all products 4-10%. This includes Stainless, CPM®, High Speed, Tool Steel, and Valve Steel. All raw material and energy surcharges will remain in effect.

Crucible will continue to offer industry leading communication, lead times, and on time delivery performance in the specialty bar industry. This price adjustment is necessary to reinvest in new capital projects and to help reduce the effects of the inflationary environment within the primary metal industry.

Sincerely,

A handwritten signature in black ink, appearing to read 'Andrew Smith', written in a cursive style.

Andrew Smith
