Round vibrating screen

旋振筛 ◀

产品特点:

1. 体积小、重量轻、移动方便;
2. 出料口方向可任意调整;
3. 筛网不阻塞、粉末不飞扬;
4. 换网方便、操作简单、清洗方便;
5. 保养简易、可单层或多层使用。

Product features:

1. Small size, light weight and convenient movement;
2. The direction of discharge port can be adjusted arbitrarily;
3. The screen is not blocked and the powder is not flying;
4. It is easy to change the network, operate and clean;
5. No mechanical action, easy maintenance, single or multi-layer use.

Ultrasonic vibrating screen

超声波振动筛

Built in ultrasound

内置超声波

内置超声波系统
Built-in ultrasound system

内置网架
Built-in grid

产品特点:

- 1.独特的筛网清理装置有效的解决物料起静电、聚团现象;
- 2.有效解决小于75 μ m的物料颗粒难筛问题;
- 3.针对超微粒的物料有很好的筛分效果;

Product features:

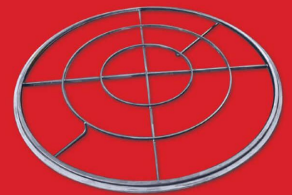

1. The unique screen cleaning device effectively solves the phenomenon of static electricity and agglomeration of materials;
2. Effectively solve the problem of difficult screening of material particles smaller than 75 μ m;
3. It has a good screening effect for ultrafine materials;

External ultrasonic

外置超声波

外置超声波系统
External ultrasound system

外置网架
External grid

Sieve shaker

试验筛

产品特点:

1. 广泛用于实验室中, 做检测、样品粒度分析。
2. 有数显时间继电器, 可定时定量使不同批次物料分析更加精确
3. 可配超声波清网装置, 筛分范围可达到0.025---3mm。
4. 设备可以多层使用, 最多可以同时筛分出9种粒径。

Product features:

1. It is widely used in laboratories for testing and sample particle size analysis.
2. There is a digital display time relay, which can be timed and quantified to make the analysis of different batches of materials more accurate
3. It can be equipped with an ultrasonic cleaning device, the screening range can reach 0.025---3mm.
4. The equipment can be used in multiple layers, and up to 9 particle sizes can be screened simultaneously.

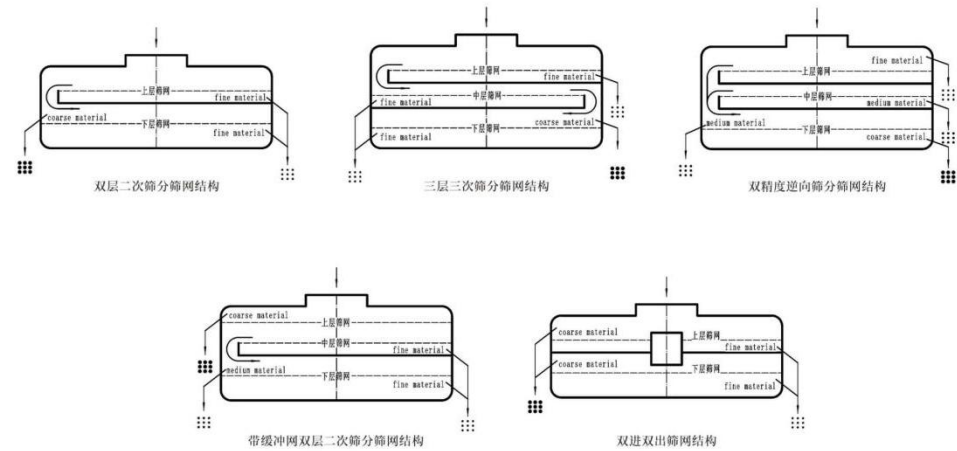

Round tumbler screener

圆形摇摆筛

Schematic diagram of double inlet and double outlet screen structure

双进双出筛网结构示意图

产品特点:

1. 模仿人工筛分动作和过程,物料在网面上运行轨迹长,筛分精度高达90%-95%;
2. 可配备弹跳球式或超声波系统等清网装置,有效避免网孔堵塞;
3. 可定制手动或液压升降装置,换网方便、筛网使用寿命长。
4. 适用于产量大,精筛分物料。

Product features:

1. Imitating the manual screening action and process, the material has a long track on the mesh surface, and the screening accuracy is as high as 90%-95%;
2. It can be equipped with a net cleaning device such as a bouncing ball or ultrasonic system, which effectively avoids the blockage of the mesh;
3. Manual or hydraulic lifting device can be customized, easy to change the screen and long service life of the screen.
4. Suitable for large output and fine screening of materials.

Liquid vibrating sieve

液体筛

产品特点:

1. 单网双箍网架结构, 效率高, 筛网使用寿命长, 易换网;
2. 配置专业振动电机, 噪音低, 体积小, 重量轻, 耗电小, 运行平稳;
3. 可根据物料和生产线情况定制产品。

Product features:

1. Single mesh screen double hoop net frame structure, high efficiency, long screen life, easy to change the mesh screen;
2. Equipped with professional vibration motor, low noise, small size, light weight, low power consumption and stable operation;
3. Products can be customized according to materials and production line conditions.e customized according to material conditions.

450 filter screen

450过滤筛

用于生产量不多或杂质少的物料的单层筛分和过滤; 豆浆、果汁、油墨等
used for single-layer screening and filtration of materials with little production or less impurities; soy milk, fruit juice, ink, etc.

High frequency screen

高频筛

适用于高浓度液体过滤, 釉料油漆等。
suitable for high-concentration liquid filtration, glaze paint, etc.

Intermediate frequency screen

中频筛

适用于低浓度物料, 陶瓷泥浆等
suitable for low-concentration materials, ceramic mud, etc.

Low-profile sifter

直排筛

产品特点:

- 1.扁平设计,整机高度低,便于现场生产线中的布置;
- 2.下出料口位于筛面正下方,排料速度快,处理量高;
- 3.拆装方便,内外部易清理,单独网架结构,方便更换筛网;
- 4.密封式设计,减少粉尘飞扬;

Product features:

- 1.Flat design, low height of the whole machine, convenient for layout in the field production line;
- 2.The lower discharge outlet is directly below the screen surface, with fast discharge speed and high processing capacity;
- 3.Easy to disassemble and assemble, easy to clean inside and outside, separate grid structure, easy to take out and replace screen;
- 4.Sealed design, reduce dust flying.

Linear vibrating screen

直线振动筛 ◀

产品特点:

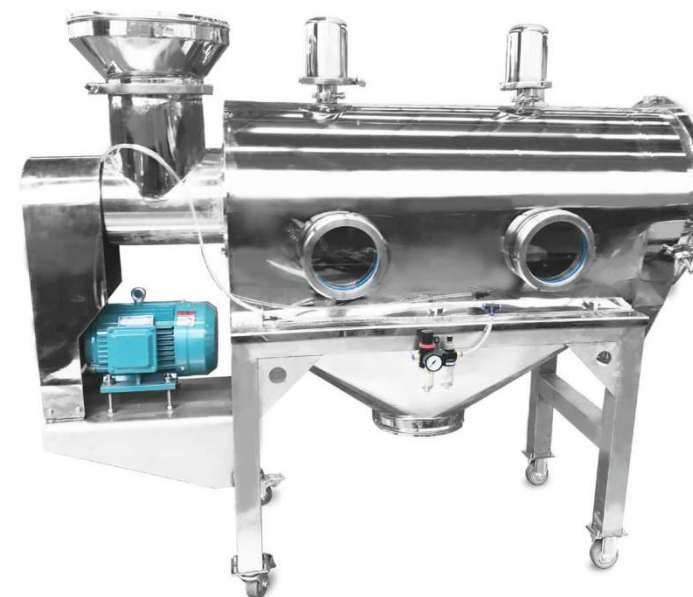

1. 物料在网面呈直线跳跃式运动,处理量大;
2. 在分选的同时,对物料长距离输送;
3. 可根据生产现场定制契合的进出料连接方式。

Product features:

1. The material moves in a straight line and jumps on the mesh surface, and the processing capacity is large;
2. At the same time of sorting, long-distance transportation of materials;
3. It can be customized according to the production site to fit the connection method of the incoming and outgoing materials.

Rotary Centrifugal sifter

▶ 气流筛

产品特点:

1. 新式外球面轴承,延长使用寿命;
2. 整机体积小、重量轻,密封性好;
3. 安装方便,运行平稳无振动、无噪音;
4. 对结块物料有在破碎功能。

Product features:

1. New-style outer spherical bearings, extending service life;
2. The whole machine is small in size, light in weight and good in airtightness;
3. Convenient installation, stable operation without vibration and noise;
4. For the raw materials easy to be lumped can be crushed

Square tumbler screener

方形摇摆筛 ◀

产品特点:

- 1、筛网利用率高, 换网方便, 使用寿命长;
- 2、可做双组结构, 两组同时筛分, 一台当多台使用, 增加产量;
- 3、工作时筛箱做周期式摇动, 物料与筛面接触面积和时间更长, 透筛率更高, 筛分效果更好。

Product features:

1. High utilization rate of the screen, convenient screen change and long service life;
2. It can be used as a double-group structure, and the two groups can be screened at the same time, and one can be used as multiple units to increase the output;
3. When working, the screen box is shaken periodically, the contact area and time of the material and the screen surface is longer, the penetration rate is higher, and the screening effect is better.

Gyratory screener

平面回旋筛 ◀

产品特点:

1. 布料均匀, 运行轨迹长, 产量大;
2. 移除接近大小的颗粒物料, 筛分精度高;
3. 没有垂直部件, 可确保物料与筛网表面保持恒定接触;

Product features:

1. Uniform distribution after feeding, long running track and large output;
2. Remove granular materials close to the size, with high screening accuracy;
3. There are no vertical parts to ensure constant contact between the material and the screen surface.

Screw conveyor

螺旋输送机 ◀

产品特点:

1. 结构简单, 操作简单;
2. 管式输送, 有效避免粉状飞扬;
3. 电机可正反转, 不易存料, 清理方便;
4. 均匀给料到振动筛、混料机或者其他设备。

Product features:

1. Simple structure and simple operation;
2. Tube conveying, effectively avoiding powder flying;
3. The motor can rotate forward and backward, it is not easy to store materials, and it is convenient to clean;
4. Evenly feed the material to the vibrating screen, mixer or other equipment.

Dust free feeding station

无尘投料站 ◀

产品特点:

- 1、整体密闭性好,工作环境干净、卫生;
- 2、投料台人性化设计,操作方便;
- 3、过滤器易拆卸、易清洗;
- 4、与振动筛、真空上料机配套使用,确保车间无尘。

Product features:

- 1. The overall airtightness is good, and the working environment is clean and hygienic;
- 2. Humanized design of the feeding table, easy to operate;
- 3. The filter is easy to disassemble and clean;
- 4. It is used in conjunction with vibrating screen and vacuum feeder to ensure that the workshop is dust-free.

Vacuum conveyor

▶ 真空上料机

产品特点:

- 1、密闭输送,无粉尘泄漏,无交叉污染;
- 2、体积小,重量轻,安装方便;
- 3、用PLC控制系统,自定义吸放料时间;
- 4、可配备小推车装置,移动方便,可用于多台设备。

Product features:

- 1. Airtight transportation, no dust leakage, no cross contamination;
- 2. Small size, light weight, easy installation;
- 3. Use PLC control system to customize the suction and discharge time;
- 4. It can be equipped with a trolley device, which is convenient to move and can be used for multiple equipment.

Z type Bucket elevator

Z型提升机 ◀

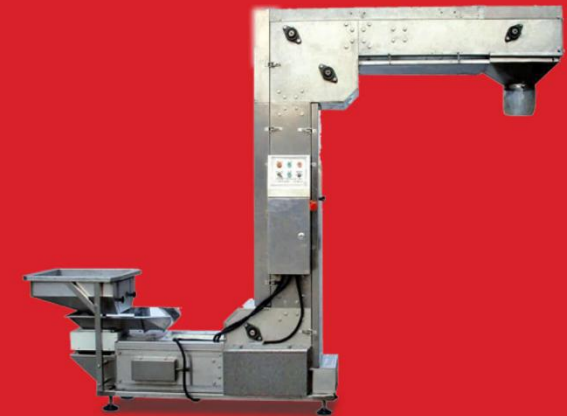

产品特点:

- 1、组成形式多样,可水平—垂直—水平组成Z字型,C字型等;
- 2、使用寿命长,设备维修率低;
- 3、物料无回料,破损率低,密封性能高;
- 4、可多点上料,多点卸料,应用于自动化系统中,与包装机组成定量自动包装系统。

Product features:

1. Various forms of composition, which can form Z-shaped, C-shaped, etc. horizontally-vertically-horizontally;
2. Long service life and low equipment maintenance rate;
3. No material return, low damage rate and high sealing performance;
4. Multi-point feeding and multi-point unloading can be used for automatic system, forming a quantitative automatic packaging system with packaging machine.
