Right-Click a Folder	Browse with FastPictureViewer
File Associations	Opens With… FastPictureViewer
Explorer Thumbnails	Will show all your RAWs, fast!

TIPS

Read the online tutorials at www.fastpictureviewer.com/help
Right-click the program's taskbar for menu. Check the 50+ preference options! FPV can sort by file time, EXIF & GPS date. The File Utilities plug-in is *very* powerful: batch copy, move, and delete, import, backup, rename, FTP etc! IPTC Editor writes headlines, keywords (w/dictionary) etc. Web publishing: mark with P, publish with Ctrl+P. Batch delete: mark with X, delete with Ctrl+X. Filter images (e.g. by rating) using the F key. Try F10, F11, F12. You can tell FPV about your monitor's ICC profile. Right-click the "Images Folder" menu button for recent folders. Windows 7/8: Pin FPV to your taskbar! Add the FPV Codec Pack for PSD and more formats!
