Sounds like a **Solidor®**

MADE IN GREAT BRITAIN

Solidor®

High security, energy efficient composite doors

Hang me on a **Solidor®**

Help me look this good for a long, long time

Solidor®

Congratulations on having your new Solidor® installed by one of our recommended installers.

Your **Solidor®** has a natural core, made up of cross laminated solid timber, this is great because unlike most others it is ultra strong, super secure and also environmentally friendly.

Your Solidor® comes with a 10 year guarantee which your installer passes on to you

During the first 6 weeks because it is a natural product, your door MAY move around to a very small degree at the top and at the bottom. This is completely normal. The timber is protected by our edge banding and our beautiful door skins and normally, only occurs during winter installations.

Please help your door to acclimatise to its new environment by following these two simple instructions;

1. When the door is closed it is essential to ALWAYS fully engage the hook locks, for example by lifting the handle or turning the key on our other versions.*

   *With our Heritage and AV2 locks this is done automatically.

2. Keep the temperature as low and stable as you comfortably can in the space immediately next to the door for the first 6 weeks, after the initial period raise the temperature gradually to normal levels.

To keep your door looking great for 10 years and beyond please follow these simple steps.

ON A MONTHLY BASIS:

Wipe down the door with a soft, damp, lint-free cloth using, mild warm, soapy water.

Keep your door furniture looking fantastic by polishing the handle, letter plate and knocker with regular furniture polish or similar.

ON AN ANNUAL BASIS:

Open the door, place a dust sheet or similar underneath the door and lubricate all of the moving parts with either oil or preferably grease, lift the handle (where appropriate) up and down 6 times to ensure that the lube works through to all parts of the mechanism.

Please follow these simple steps to help ensure that your Solidor® will look great for a long, long time.
