MATERIAL SAFETY DATA SHEET

Product Name: EYE FLUSH
Date prepared: July 1994

SECTION I – PRODUCT IDENTIFICATION

Product Name: Eye Flush
Product Number: 50010, 50011, 50015, and 50016
DOT Hazard Classification: Mutual eye flush fluid is a mixture.
A DOT classification label or number is not required

SECTION II – COMPONENTS

A sterile isotonic buffered solution for irrigation of the eyes or skin. Contains sodium chloride, sodium phosphate monobasic, sodium phosphate dibasic, preserved with edetate disodium and benzalkonium chloride in purified water, USP. Packaged in sealed single use plastic bottles.

SECTION III – INDICATIONS, INSTRUCTIONS, WARNINGS

Indications

Eyes: For irrigating the eye to relieve irritation, discomfort, burning, stinging, or other symptoms caused by foreign matter in the eye.

Skin: For use on the skin where buffering agents may be useful in neutralizing acid or alkali burns.

Application

Irrigate the eye thoroughly with solution, rotating eyeball to insure thorough bathing. Use the complete bottle.

Warnings

To avoid contamination, avoid touching the tip of the bottle to the eye. Do not re-use once the bottle is opened, as the sterility of the solution can no longer be guaranteed. Do not use if the solution has changed color or become cloudy, or if the expiration date has passed.

Eyes: If you experience eye pain, changes in vision, continued irritation or redness of the eye, or if conditions worsen or persist, consult a physician. Obtain immediate medical assistance for all open wounds in or near the eye. In the event of chemical splashes, the solution is intended as an immediate continuous flow irrigation facility. Always seek immediate medical attention in the event of a chemical splash or other serious injury to the eye.

Skin: If the condition persists or worsens, consult a physician.

SECTION IV – PERSONAL PROTECTION AND DISPOSAL PRECAUTIONS

No special provisions are necessary for use in administering first aid.
No special disposal procedures are necessary for used bottles.
