A to Z of Rider Averages 1929 to 2009*

* This release covers the period 1929 to 1980 (less 1976) and 1993 to 1998.

Notes and what this file covers

General.

This file covers only full LEAGUE Teams. It does not cover Juniors, Reserves, Non-League, International or non-British teams. However, it does include Teams who withdrew from League action during the season and it covers all 'Official', non-Junior, Leagues.

Not all of the 1979 has yet been added to this list. Those so far not added include roughly half of that years National League.

Matches where the result did not stand or which were expunged or otherwise removed from Official records are not included (except in those cases were a Team withdrew, in which case details are shown for information/interest)..

This file is presented using a sort order of rider name, year and team. Riders who rode for more than one Team in a season have separate entries for each Team (i.e. riders score are not aggregated into season totals).

This file is not complete nor is it 100% accurate (I'm not aware of anyone that knows the complete Speedway results for the period covered here !). It is, however, as accurate as I can get it. As such the information contained here is on a 'best endeavours' basis. If you can add to it or correct anything then please contact me via the Speedway Researcher website.

Primary sources of information include, but are not limited to; the Speedway Researcher website, Speedway magazines and local and national newspapers.

This file may only be viewed for personal use. No part of it may be reproduced, in full or part, for any other purpose, including, but not limited to ; business use, posting on the internet or print.

Specifics.

Year and Team

Basically what it says on the tin ! The year (season) for which the following results apply to. Likewise the Team that the rider rode for during that season.

Rider

Riders are listed in strict alphabetical order by their name as written rather than via Surname, Christian name. Thus if you want to look up 'Jack Parker' then you need to go to the J's for 'Jack' rather than the P's for 'Parker'. Unfortunately this has been forced on me by the way I set up the source files to this file and it just would not be practical to alter things.

Riders who rode, where known, under an assumed name (e.g. Kid Bodie for Howard Cole) or who changed name during their career (e.g. Mikael Karlsson becoming Mikael Max) are shown under their real or final name. A footnote explaining this is added to the relevant season file.

Some riders are commonly referred to by their nickname (e.g. Bluey Wilkinson, Split Waterman, Kid Curtis). Where I am aware of the riders proper name I have used it. I have, however, shown the nickname in brackets. So 'Bluey Wilkinson' is listed as Arthur (Bluey) Wilkinson and 'Kid Curtis' as Fred (Kid) Curtis. Where

I am not aware of the riders proper name I have just shown it as nickname then surname. For instance, Split Waterman or Nobby Stock.

For a few riders I do not know the Christian name. These riders are listed as ? Surname (and are listed first on Page 2).

Names are as accurate as I can get them. However, it is reasonably common for sources to list the same rider using different spellings (or even format). For instance, I have come across sources listing 'Alan Belham' as : 'Allan', 'Allen', 'Alan', 'Belham' or 'Belham' (or any combination thereof). This means that it is

possible that some of the spellings used here are incorrect for which I apologise (though see above regarding 'best endeavours').

Matches Rode

This figure includes all Team matches in which the rider rode (see limitations as to what constitutes a 'Team Match' below). It does not include matches where the rider DNA, DNR or for whom r/r and res/r were used. Note that a rider doesn't necessarily have to have completed a ride in order to have ridden in a match - for instance a rider injured in his first ride and thus unable to participate further is listed as having ridden in the match. Non-riding number 8's are not deemed to have ridden in the match.

The 'Matches Rode' value is that for Team matches in which the rider rode. So Individual meetings (including World Championship meetings) are not included. Neither are Pairs, Fours or Five Team meetings (even if for 'Official' competitions such as the National League 4 Team) included. Some Three Team meetings are included - those that had at least 6 riders per Team and where riders rode as pairs.

Matches where the result does not stand (i.e. meetings abandoned part way through or where the opposition subsequently resigned from the League) are not included. Tests are not included but a tour meeting from a visiting Nation would be e.g. Boston v West Germany would be included.

The number of meetings given for Guest's is the number of meeting for which a Guest was used and not the number of Guests used by the Team during the season (which would normally be a higher figure).

Averages

All Averages are calculated incorporating 'Bonus Points' - even if they were not used, or even existed, at the time. This allows direct comparison from season to season.

Averages are calculated on the standard 4 ride per meeting basis. This means averages can be between 0 and 12.

In both 1929 and 1933 heat points were awarded on a 4-2-1-0 basis instead of 3-2-1-0 for all other seasons. This means that the calculated averages for these two years use a multiplier of 3 rather than 4. It also means that bonus points have a less effect than in other years (for instance, a Paid maximum would be 3-10-1 or 3-8-2 as opposed to 3-12 for a Full maximum).

The doubling of tactical substitute points is ignored when calculating these averages.

All Av.

Is the average based on all eligible matches. It will include League, Cup, Challenge etc match results from meetings that stood.

Official Av

This is NOT the 'Greensheet' or other 'Officially' published average. It is the average based on all matches that are part of an Official competition. This includes (but is not limited to) all League, KO Cup, National Trophy, League Cup etc meetings which 'stand' in the 'Official' records. The Gold Cup of 1989 & 1990 is (or will be) included but results from the Gold Cup of the 1970's will not as that competition was a Regional competition and not Officially endorsed. This average does not include meetings from Official competitions not covered in this file such as the National League Fours or Premier League Pairs.

League Averages

Is the average for League matches only. It is for matches that were not expunged or otherwise did not stand.

Cup Averages

In those seasons where the National Trophy and a KO Cup were both run this average is for the National Trophy. For this file, the figures for the corresponding KO Cup are included under 'Official and 'All' averages. It just isn't practical to have shown the averages for each of the official and unofficial competitions that have been held in this period - there are just too many of them especially as most were short lived as well.

Challenge Averages

Is the average for all Challenge Matches that were allowed to Stand. It does not normally include Regional Competition averages as these are usually shown in the Season files separately (see above comment regarding non-practically of showing averages from all competitions here).

Maximums.

You might like to think of these as being 'Unbeaten' performances. They give the total number of meetings for the season in which the rider was unbeaten by an opponent. The minimum number of rides is 2 (allowing comparisons in performance across all seasons). If you don't like it

Division

Is the League that the Team participated in. Unfortunately some truncation of names has had to be made but hopefully they are clear enough.

The final 9 columns list for each rider the number of riders taken, points and bonus points scored used to calculate the Official, League and Cup (or National Trophy) averages listed here.
